EXTENSIONS OF REMARKS

MILTON FRIEDMAN ON THE MARKET AND HUMAN FREEDOM

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. McDONALD. Mr. Speaker, I do not always agree with Milton Friedman and his Chicago school of economics, but he and I do agree on the subject of socialized medicine. We agree that socialized medicine increases the cost of medicine and lowers the quality of the care delivered to the patient. Professor Friedman's recent article on this subject appeared in Private Practice magazine for July 1981. Mr. Friedman's article traces the failure of socialized medicine in Great Britain and points out how our limited socialized medicinemedicare and medicaid-have duced bad results in the United States. I commend it to the attention of any of my colleagues who may still feel that Government medicine has any merit. The article follows:

THE MARKET AND HUMAN FREEDOM (By Milton Friedman)

I am delighted to be here with you because you are part of a small band of people around the world who are trying to preserve the basic elements of a truly free and open society-a task which has for many years seemed almost hopeless but which I believe has recently taken on a new hue of hope. It looks as if there may be a change in the tide, as if that trend-that I am sure all of us bemoan-toward a greater and greater role for government in controlling men's lives may be stopping and reversing.
With respect to the field of medicine, one

of the most extraordinary feats of imagination that I know of is a passage in a book by Aleksandr Solzhenitsyn, the novel "Cancer Ward," in which * * * the protagonist of the novel visits an elderly man, a physician, who dates back before the revolution and who is able to talk about the nature of private

practice in medicine.

Here was a man (Solzhenitsyn) who had lived in the country, in a communist country, all his life at the time he wrote this. This was long before he was expelled from the Soviet Union and, yet, out of his imagination he was able to construct a true picture of the merits of private practice as op-posed to state practice. And this in a country which has gone farther than almost any other in converting the practice of medicine from a noble and honorable profession into an ignoble and dishonorable one-where physicians are required, essentially, to use their art to incarcerate people in prison, to declare them sick when all they are is free spirits, where in the only country in the western world-if you can call Russia the western world-I believe the average age at

death is going down rather than up.

And yet, despite the virtues of the private practice of medicine, the trend throughout

the world has been in the opposite direc-tion. It has been in the direction of the elimination of private practice; it has been in the direction of giving government more and more control over the practice of medi-

What has been happening in medicine has been part of a general trend for the past 80 to 90 years around the world-toward a greater and greater control of individuals by governmental officials, toward a turning over of more and more power to the government-the growth of government spending, the growth of government regulation, the growth of government intervention in every area

The growth of government financing of medical care is no different than the nationalization of steel industries in the United States. It's no different than the extension of control over prices or over wages. What you have has been a broad movement ever since the end of the 19th century away from a society in which government serves primarily as an umpire, as a policeman, and toward a society in which government serves as the all-powerful-supposedly and hopefully-all-benevolent father. The trend away from free medicine is part of a general trend not only in the sense that the same kind of greater involvement in government has occurred in area after area, but also in a very different sense, in the sense that it reflects to a considerable extent a kind of schizophrenia among businessmen and among physician professions. Every nessman knows that he's in favor of free trade and free markets except when it comes to himself and he's a special case. He needs a tariff or he needs a special tax arrangement. Physicians have been no different. The medical profession, the healing professions in general, are in favor of private practice but only up to certain limits.

A few years ago I spent a week or so on the island of Kos, a Greek island in the Aegean. I was on the island because it was the home of Hippocrates, the father of modern medicine. I wanted to bring Hippocrates in as an introduction to the episode of "Free to Choose," a PBS 10-part series hosted by the author or the part, of our program which dealt with the problems of labor unions and labor relations.

I wanted to use Hippocrates and the Hippocratic oath as an introduction to why you had a development of trade unions and the consequences which they have. Hippocrates himself gave his name to the Hippocratic oath, but he had nothing to do with it. What happened is, as most of you probably know, when he died, the island was full of physicians and of patients who had been attracted by Hippocrates' fame. But when he died, the fame was not there any more and the attraction was not so great, so you had an oversupply of physicians. Of course, physicians didn't like that so they organized themselves into a group and they drafted the Hippocratic oath.

The Hippocratic oath, which all of you probably took when you entered practice but didn't read very carefully, contains many fine and noble sentiments and statements. But if you examine it more carefully, you will see it is essentially a trade union agreement. There is a phrase in it in which the physician says he will take as students only his own children and the children of other physicians. There is another portion that is an attempt to restrict entry into medicine in an attempt to keep down the numbers.

There is another phrase in there which has to do with jurisdiction. It's a phrase, if you will remember, in which the surgeon says he will not interfere with the medical physician. The medical physician will not interfere with the surgeon. They shall each leave the other to pursue his specialty.

And that is, of course, what has happened to medicine over the course of the centuries that followed. Almost everywhere medical practitioners have formed themselves into organizations that have generally, with the assistance of the state, restricted entry into medicine-all, of course, for good purposes. Nobody ever does undesirable things for bad reasons; all for the good purpose of raising

standards of medical practice.

I have examined the story in this area in the United States, in particular with the American Medical Association during the course of the 1920's and 1930's. It's an extreme example of a very powerful trade union which succeeded in keeping down the number of physicians and in the process raising costs, which succeeded in retarding the development of efficient group medical practice and in the process reduced the quality. I mention this not to attack the American Medical Association or the members of it. They are noble, able people who wanted good things, but were misled. But only to suggest again a sense in which the developments in medicine are not special to medicine.

INPUT UP, OUTPUT DOWN

Now, from the point of view of the providers of medical care, the initial effect of government involvement often seems beneficial. After all, here's a new source of funds, here's a new set of finances which will make possible things that were not possible before. And that is indeed true for a time. It is true that in the initial stages when government enters into the financing of medicine, physicians and other providers of medical care do benefit. In the United States the emergence of medicare and medicaid has roughly doubled the fraction of the national income spent on medicine and it has greatly benefited many physicians. Indeed, its effect on the incomes of physicians has been far more noticeable than its effect on the quality of care received by patients. A major effect has simply been that the gov-ernment pays for some things that before the medical professional provided without payment. In that stage there is no doubt that government involvement is beneficial.

However, that is only the entry wedge in the beginning of it. As government control spreads and gets wider and wider, the advantages decline and the disadvantages emerge. And eventually there is a reversal and even from the purely financial point of view, from the amount of resources devoted to medicine, government control tends to

reduce it.

The most dramatic example of that is in the United Kingdom, which introduced so-cialized medicine in 1948 right after the war,

so you have a long period. What happens is in the beginning the government spends more because that is part of the process of getting approval for its socialization of medicine. But then, when the thing is donewhen the whole thing has been taken overthen there are always fiscal pressures. People will voluntarily pay their own money to go see a particular physician, but nobody likes to pay taxes for someone else to see a physician. Consequently, the complaints emerge that this is a very expensive process and that you have the cost running away and you have to hold down expenditures.

British physician Max Gammon developed a rather interesting theory—which he called a theory of bureaucratic displacement—in which he said in all bureaucratic enterprises where bureaucracies take over, input goes up and output goes down. A particular application of Parkinson's law, which is the growth of bureaucracy tends to take the place of useful output or useless output tends to take the place of useful. And he gave some evidence on that. In the eight years from 1965 to 1973 in Britain, the number of people on hospital staffs went up 28 percent and, I might note, that the people on clerical and administrative staffs went up 41 percent. On the other hand, the average number of beds occupied per day went down 11 percent and that wasn't because there weren't people there to occupy them. There was a waiting list of some 600,000 people at all times during that period.

The end result of this is twofold. On the one hand, as all of you know, there has been a virtual flight of physicians from Britain. The number of physicians emigrating from Britain has been something like a third to a half of the number graduating from medical school. But the other side of it is that there emerges a pressure from private medicine. And so one of the most rapidly growing developments in Britain has been the institution of voluntary health insurance with, as I was mentioning before, private hospitals being built.

The setting in which medicine has been practiced during the thousands of years has been one in which the patient has been the client and the employer of the physician. Today the state, in one manifestation or the other, claims to be the employer and thus the one to prescribe the conditions under which the physician has to carry out his work. These conditions may not, and eventually will not, be restricted to working hours, salaries and certified drugs. They may invade the whole territory of the patient/physician relationship. If the battle of today is not fought and not won, there will

be no battle to fight tomorrow.

What is the appropriate role of government in medicine? Given the extent to which government has been taking over, what is appropriate? What should government be doing? In my opinion, if we put to one side the field of public health, which is we are really talking about, we're really talking about physician/patient relationships. The fields of communicable diseases, public health and sanitation-there is an important role for government in that area. But in the area of private medicine, I do not believe there is any special role whatsoever for government other than its role in every other area of our lives.

What is that role in other areas of our lives? Well, an important role of govern-ment is to enforce laws against fraud and deception. If a person professing to be a physician hangs out a shingle saying, "I

have been graduated from the University of and it turns out he never went to such a university or there is no such university, then he ought to be prosecuted for fraud and deception. But that's the same in every field and ought to be done for the butcher, the baker, and the shoemaker and the candlestick maker. A second function that governments have assumed and is appropriate for governments to assume is to help people who are in dire distress. We do have a situation in which individual citizens get into a situation, often through no fault of their own, in which they are in dire difficulty and one of those possible situations may be subject to very high medical ex-penses, but there is nothing special about that. Another reason for dire distress may be a flood that destroys a town or it may be an earthquake or it may be anything else. And in that sense there can be a role for government in assisting people and the terms ought to be the same, in my opinion, regardless of what is the cause.

I do not believe there is any case whatso-

ever for government's financing ordinary medical care of a private patient. The cost financing ordinary medical care is well within the means of ordinary families in most of our countries. Certainly so far as the more expensive, unusual forms of medical care the appropriate method of financing those is insurance just as that is the appropriate mechanism for financing other

large risks

In the United States the development of private health insurance has gone very far indeed. So that today something like 80 percent of all hospital bills are covered by insurance, most of which is private voluntary health insurance, some of which is medicare government insurance for the elderly and some of which is other government programs, but most of which is private.

NO GOVERNMENT AID

You hear all the time the argument that medical care is so expensive that you cannot expect the ordinary person to finance it. Well, there are two things wrong with that. First of all, who finances it if government finances it? It's the ordinary people. Government doesn't have any money with which to finance anything. All government has is a monopoly on force. And, therefore, the power to take money out of some people's pockets and use it for purposes that are determined by government. So, * * * if ordinary people, if the average people of the country cannot afford to pay for their own medical care, neither can the government afford to pay for it.

But the second thing that is wrong with it is that it misrepresents the magnitude of the expenditures on medical care. The total expenditures in the United States on medical care-and I may say those expenditures have been going up very rapidly thanks to government involvement * * have gone from something like 4 or 5 percent of the national income to 9 or 10 percent. But yet those total expenditures on medical care are less than two-thirds of amount people spend on their houses. It's less than three-fourths of the amount they

spend on their automobiles.

In my opinion, government involvement in medicine has been the problem and not the solution. And the right ultimate course * " and this is a position that will go much beyond what most of you in this room would go to I believe, * * * should be no government involvement, no government regulation, no government subsidization and to add the point where I will lose all of you

* * * no government licensure of physicians. (Applause.) You are a most unusual audience. I have argued against the licensure of physicians before the board of directors of the American Medical Association and had one of the most vituperative, the most argumentative evenings I have ever had. But, your endorsement of that is fascinating because I think physicians everywhere and people everywhere are coming to realize the truth of that old saving that if you're going to sup with the devil you better have a very long spoon. And licensure is not a long enough spoon. It has been a major source of the problem.

Well, let me go on and ask the question, what are the prospects of turning things around? And here I think it is possible to be far more optimistic than it was some 5 or 10 years ago. Not because of any element special to medicine, not at all, but for a very different reason and that is that just as the socialization of medicine has been part of the broader movement toward socialism, so the enhancement of private medicine willcan-only occur as part of a broader movement toward an enhancement of human freedom in all areas, toward a reduction of the role of government in our society, toward a cutting of government back to scale. And the reason it is possible to be more optimistic than it was a few years ago is because it seems to me we are experiencing worldwide a movement of opinion and a movement of practice away from the trends of the past 70 or 80 years and in a very different and new direction.

These trends are worldwide and they can be observed not only in the countries most of us come from-the western countriesthey can be observed in the countries behind the Iron Curtain. The success of the Russian revolution in 1917, of the communist revolution in China after World War II, were part of this worldwide movement toward greater centralization and collectivism. Just as much as the emergence of the welfare state in Great Britain, of the New Deal in the United States, and similar tendencies here in Australia. And, similarly, what is happening in Poland, the attempts in countries like Hungary to introduce greater elements of market arrangements, the attempt by Mr. Deng and others in China to introduce a greater role for the market in those countries. They may not succeed, I am not saying they will, far from it. But, they are indicative of the same kind of a worldwide move away from collectivism and centralized direction and toward a greater role of market and of human free-

You know, the believers in collectivism, the believers in socialism are on the defensive everywhere. Very seldom do people who have taken a very strong and firm position change their position. People pretty well are set in their ways after the age of 25, but you have new generations arising and you have a whole mess of the population that has come to the conclusion that it has been sold a bill of goods and that it has come to realize that these miracles promised by governmental control are not going to emerge.

FREEDOM PERSISTS

And as a result you have a political movement sparked very much by a resistance to high taxes-and that's probably the most important driving force-which is showing its face all over. It's by no means certain, very far from it indeed, that that movement will be successful. It is far more difficult to unwind the consequences of government control than it is to get involved in those controls in the first instance. Every time government gets involved in any area it sets up vested interests that have a strong reason to oppose the reversal of that policy. That's why it is so difficult to turn things around.

So, I am by no means confident that we shall succeed throughout the world in turning things around, in particular in the area of medicine, of providing a greater role for freedom, but I am certain of one thing: elements of freedom will persist.

Just as the private practice of medicine lit a light that Solzhenitsyn recognized inside of closed in Russia, so private practice will persist. The real question is whether it will be able to assume as large a place and as large a role as would be in the interest of patients, or physicians, of the community at large.

ANTHONY "SHOEY" LATTANZIO

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

• Mr. YATRON. Mr. Speaker, I would like to take this opportunity to bring to the attention of my colleagues in the House the accomplishments of Mr. Anthony "Shoey" Lattanzio.

For 40 years, Mr. Lattanzio was actively involved in the Reading, Pa., Orioles. He served in numerous capacities and, together with his board of directors, made the Reading organization the largest Lodge and Home Association of the Orioles in the United States.

Mr. Lattanzio was indeed an indefatigable and most dedicated member of the Orioles, as he devoted almost all of his spare time to the club. He held all the offices of the local Lodge and the Home Association. In addition, he was elected to the prestigious supreme board, and served as supreme treasurer and two terms as supreme president. The importance of the position of supreme president cannot be overemphasized, as his jurisdiction included all U.S. Oriole organizations. Moreover, Mr. Lattanzio served on any committee to which he was asked, including the Orioles' Meadow Building Committee.

Mr. Lattanzio was instrumental in developing solutions to the problems which occurred at the Orioles. Under his leadership the mortgage was paid and the club improved dramatically. His managerial skill was manifest in every capacity he served and was a most important feature in the club's success.

It is certainly an honor for me to pay tribute to Mr. Lattanzio. His leadership, loyalty, wisdom, and experience were tremendous assets to the Orioles not only in Reading, but all over the country. His many achievements and contributions will always be remembered. Mr. Lattanzio is truly an outstanding American citizen.

CHANGES IN THE FEDERAL GOVERNMENT

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for Wednesday, August 12, 1981, into the Congressional Record:

CHANGES IN THE FEDERAL GOVERNMENT

In my newsletter last week, I commented on the abrupt and far-reaching changes in the Federal Government that have occurred this year. The central point of the newsletter was that a reduction in the size and cost of the Federal Government, an objective strongly promoted by President Reagan, has been the primary development. Because he views the Government as the problem and not the solution, the President seeks to minimize its intervention in all aspects of the Nation's life. Any measure that holds the Government in check is all to the good.

There should be no doubt about the importance of the changes, but still it is possible to overstate them. As I examine the budget cuts of recent weeks, I am impressed that very few of the programs approved during the New Deal and the Great Society have been eliminated, though many of them have been reduced in size and cost. Public service jobs have been terminated and some programs have been folded into block grants serving the same general purposes, but social security, medicare, medicaid, student loans, aid to education, nutrition centers, and grants for community development remain on the books.

Even so, the changes in the Federal Government are dramatic. They are also very understandable. For some years now, both the public mood of exasperation with the ways things have been going and the inability of the Government to deal effectively with our many problems have been apparent. The frustration came to the foreground in the 1980 election, an election which revealed a deep tide of discontent. There was broad support in the country for decisive action to address the Nation's problems. The changes came about, however, not simply because of the mood of the country. The President deserves credit, too. His success in conceiving his plan and steering it through Congress demonstrated a rare political prowess. Using the process of reconciliation, a part of the Budget Act designed for more modest ends, he short circuited lengthy legislative deliberations on numerous bills, made it very difficult for special interest groups to modify his plan, and took full advantage of public sentiment before it dissipated. He kept public concern focused on two bills, the tax and budget cuts, both of which contained sweeping and complex changes in scores of laws. As a legislative maneuver, the President's was spectacular.

Mr. Reagan also had help from his party. During the past few months the Republicans in Congress have maintained a remarkable discipline. Only one Republican voted against the President's tax bill, for example, For the Democrats, it was quite a different They simply could not stay united and their discipline broke frequently. The Democrats merely reacted to Republican initiatives and did not organize a coherent

and constructive opposition.
Some observers believe that the changes in the Federal Government are permanent,

but I am not so sure. These observers point out that the indexation of the tax brackets will lead to a permanent loss of Federal revenue and a permanent curtailment of Federal power. They argue that there will be re-lentless pressure for further cuts in spending, and they contend that the Government will find new programs much harder to finance. The other view-one which may have been overlooked-calls attention to patterns in our history. Periods of internal stress are often followed by periods in which there is less emphasis on social responsibility and the role of the Government. The years after the Civil War and World War I are examples. Because of the conflict in Vietnam, the Watergate scandal, and the economic problems of recent years, the Nation may be entering a similar time. Moreover, important social phenomena, such as poor mass transportation, inadequate health care, the decay of the cities, unemployment, and trouble in the schools may reassert themselves if they are not handled effectively. If they do, new demands will arise for Government action.

It is easy to see the direction the Federal Government will take in the years ahead. In general, I am inclined to think that we will be less ideological and more pragmatic as we try to solve our problems. Perhaps we should take our cue from an observation of President Lincoln's on his own conduct in office: That a man with a policy would have been fatal to the country, and that he just tried to do what was best each day. Because most of us agree that the Government has run too many deficits, incurred too many costs, and been too clumsy and intrusive in its actions, we will surely be more willing to consider nongovernmental options as

search for solutions.

Nevertheless, I doubt that-in the long run, at least-we will come to accept the idea that the Federal Government is evil and worthless. Most of us turn to the Government at some point in our lives: Some for personal advantage, others out of a gen-uine concern for their fellow citizens, still others in desperation. Most of us believe that the Federal Government has a job to do even if we worry that it is sometimes excessive. It seems to me that Americans have repudiated an inefficient, ineffective Government, not the Government itself. Americans have a very reasonable desire: To be able to solve problems with less bureaucracy, less cost, and less interference.

HONORING THE CITY OF LAKE-CALIF.'S SKYNIGHT WOOD, PROGRAM

HON. DAN LUNGREN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. LUNGREN. Mr. Speaker, I rise with pride to bring to the attention of my colleagues the 15th anniversary of the city of Lakewood, Calif.'s skynight program. Skynight was the first community program to use helicopters for routine police work. Following the effective use of helicopter patrols during the Watts riots in 1965, Los Angeles County Sheriff Peter Pitchess proposed to a receptive Lakewood City Council the basic concept of the sky night-helicopter patrol program. Insti-

tuted as a trial program in the summer of 1966, skynight began to yield immediate results and crime in the Lakewood area dropped 11 percent

Originally, the skynight program had one helicopter with a civilian pilot and a sheriff's deputy observer. Presently the city of Lakewood and the surrounding communities of Para-mount, Bellflower, Artesia, Hawaiian Gardens, and Cerritos are served by three skynight helicopters on a fulltime basis. The skynight program and its innovative approach to crime prevention has proven so effective that over 100 communities in America now use helicopter patrols on a regular basis to assist police.

The tremendous success of the skynight program over the past 15 years is a tribute to the civic leaders of Lakewood and to the entire community. It is through the actions of such concerned and active citizens that effective ways may be found to curtail the crime which has plagued our Nation's communities. It is now the responsibility of the U.S. Congress to follow the lead of the people of Lakewood and develop a comprehensive plan to combat crime that will provide full protection for the people of America.

PERU: A THIRD WORLD CINDERELLA

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mrs. SCHROEDER. Mr. Speaker, amidst the dismal spectacle of international financial woes, notably in Third World countries, there are a few bright exceptions. Peru is one.

Sound financial management, oil production, market incentives, and government efficiencies have done wonders for the Peruvian economy.

'A Third World Cinderella," in the August 30, 1981, New York Times, has the details:

[From the New York Times, Aug. 30, 1981]

A THIRD WORLD CINDERELLA (By Clyde H. Farnsworth)

Washington.-The figures are staggering. Those third-world nations without the blessing of oil revenues have run up debt approaching \$400 billion. Countries in arrears on current payments have risen from three in 1974 to 22 at the end of 1980, and the amount in arrears has jumped from \$500 million to \$5.5 billion.

'Debt rescheduling crises, like the migration of locusts, are recurring events," says Chandra Hardy, a specialist on the financial problems of third-world countries at the World Bank. "We know they are coming but

not when."

The crises-the specter of an entire nation going bankrupt-get all the attention. But since the 1973-74 explosion in oil prices, no borrowing countries have defaulted out-right. And despite the heavy economic weather of the last half-dozen years, some of these hard-pressed nations have managed to improve their position through self-help.

Peru is a shining example. Years of cheap money, large Government subsidies, heavy public works spending, a costly arms program and nationalizations left the country with runaway inflation and unmanageable short-term foreign debt. Now, less than a year in office, its new civilian Government returned to the international credit markets that shunned it only three years

The Reagan Administration, now in the midst of drafting a new American approach to third-world development, is watching Peru's efforts closely. Reagan officials have already signaled some reluctance to approve an expansion of Government aid to the third world. They want developing countries to de-emphasize centralized planning and orient policies more toward the market system to create a better environment for private capital investment. While cautious about commenting on individual countries, Reagan officials do not conceal their desire to see more Perus.

A. W. Clausen, president of the World Bank, cited Peru, South Korea, Taiwan, Singapore, Hong Kong, Chile and Argentina among those that have already tapped private enterprise with some success. Mr. Clausen, now preparing for next month's annual meeting of the World Bank and its sister lending institution, the International Monetary Fund, put the issue in these terms: "We have to ask what the World Bank can do to help a given country make itself more sexy,

more interesting, safer."
In Peru, increased oil production has aided the country's improvement. It has moved from a \$200 million-a-year oil import-

er in 1978 to a small net exporter. While petroleum and minerals are important in the country's improving export position, Peru has also made substantial progress in expanding foreign markets as well for light

manufactured goods, which now account for

about a quarter of overall exports.
"Peru has turned the corner," said Jack
D. Guenther, senior vice president of Citibank and its senior adviser for international operations. "After the oil-price increases, there were all sorts of dire forecasts that countries would not be able to adjust. What we're seeing in Peru is the way adjustment works. The key is good management.'

Peru's economic storm struck in 1978, when it was unable to pay interest and amortization and was forced to seek a rescheduling of its obligations. The Government of President Fernando Belaunde Terry, which took over last July after 12 years of military rule, has just prepaid a \$354 million loan to a consortium of banks. The money was not due until 1986. That, combined with a decision of two newly organized syndicates, one led by Manufacturers Hanover and the other by Wells Fargo, to lend Peru \$200 million of fresh credits on more favorable terms, is evidence that conditions are chang-

William H. Bolin, executive vice president in charge of the world banking division at the Bank of America, said: "Peru has adopted quite workable and sound economic policies with budget control, greater latitude for private investment and the free market and more efficient management of public enterprises. This is not to say that it will be able to avoid further strains as it seeks to maintain social peace and reduce the rate of inflation, but the country is now operating within its means.

The Government, in addition to repaying some of the country's debts, has already managed to reduce inflation, increase central bank reserves, attract foreign capitaland at the same time increase the minimum wage and win a no-strike agreement from the powerful trade unions.

By 1978 the gross external debt neared \$7 billion. With dwindling earnings from exports there was not enough in the till to pay off the interest and amortization and the Government had to request a rescheduling

of the obligations.

Some 250 international commercial banks. which held \$800 million of debt that had fallen due, insisted that the Government first come to terms with the International Monetary Fund, the intergovernmental lending agency that provides balance-ofpayments credits to countries that cannot make ends meet-but only on condition that they alter policies.

Stormy negotiations with Peru culminated in an agreement in August 1978, under which the Monetary Fund granted additional credits following a commitment from the Government to reduce bank credit, let interest rates rise to reflect the inflation rate, speed up the rate of devaluation of the sol against the dollar to reflect market rates, and reduce public works expenditures and subsidies. Four months later the rescheduling accord was signed with the commercial banks.

With the refinancing package came dramatic changes in the overall economic management that have been continued by President Belaunde and by Manuel Ulloa Elfas. an internationally known financier who was named Prime Minister and Minister of the Economy.

Key economic positions in the new Government were also taken by such men as Richard Webb and Pedro Pablo Kuczynski, who had both earlier held high posts in the World Bank. Mr. Webb, an internationally known economist, had also taught at Prince-

Reserves of the Central Bank are now more than \$1 billion, much of the funds held in United States Treasury securities. Despite a shift to import liberalization aimed at checking inflation, the country enjoyed a surplus of exports over imports last year of nearly \$1 billion. Inflation has come down from the 80 percent level in 1978 to around 50 percent, and would be lower, bankers said, were it not for the lifting of controls on food and fuel prices and interest

Other evidence of recovery: a 3.1 percent real growth rate last year, down slightly from 1979 mainly because poor weather checked farm output and lower world mineral prices curbed mining output. Other sectors were more buoyant. Manufacturing output rose by 7 percent and construction activity was 18 percent higher.

Petróleos del Peru, the nationalized Exxon subsidiary, found commercially productive wells in the northern jungle area bordering Ecuador and offered international companies up to half of whatever oil they might find in their own exploration. Occidental, Superior Oil and Belco are among those that have undertaken the joint ven-

tures with Petroperu.

Fernando Schwalb López Aladana, Ambassador to the United States, says his country's golden rule on foreign investment consists of "creating favorable conditions for it: In other words, by offering guarantees and reasonable tax incentives to prospective investors and restoring confidence in Government through the adoption of rules of the game so stable that they will guarantee fair treatment."

THE PASSING OF A GREAT AMERICAN

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

. Mr. HAWKINS. Mr. Speaker, the passing of Roy Wilkins was a blow to all members of our society who remember him as a tireless soldier in his life-long struggle for equal rights for blacks. He counseled Presidents, Congressmen, and Senators on civil rights matters and fought the legislative battle at a time when blacks were less represented in the area than they are now. Although he is gone, his legacy will never die. Mr. Speaker, I submit an editorial from the Washington Post highlighting the efforts of this great American:

Roy WILKINS

Today's young Americans of all races may read with a certain understandable detachment about life in this country 50 years ago, when Roy Wilkins began his distinguished career with the National Association for the Advancement of Colored People, Lynch law and Jim Crow were teamed in a cruel reign through southern and border states that slammed doors and gates in the faces of blacks. Restaurants, hotels, theaters, drinking fountains, beaches, pools and entire neighborhoods were blatantly segregatedand heaven help any Negro objector because the law certainly wouldn't. Mr. Wilkins who died yesterday at the age of 80, had more than a routine role in all that has changed since then.

Through those dangerous days down South and on into the years of more subtle but persistent discrimination in all regions of the country, Mr. Wilkins kept up the battles for equal justice under the law. In the courts, in the legislatures, in the city halls and in the schools, this ardent and idealistic man approached each of these challenges with intelligence, unshakeable faith, grace,

rage and plenty of research.

Because Roy Wilkins chose not to rail but to persuade, not to tear down but to construct, not to shoot from the hip but to marshal reason and resources, there were some in the civil rights movements of the '60s and 70s who became impatient with his style and pace. But for the most part, they still respected Mr. Wilkins for his incalculable contributions during so many of the most important moments in U.S. civil rights history-and for the fact that he guided the country's oldest civil rights organization through its greatest growth and period of prestige.

It was the successes of this pioneer, in fact, that made the issues confronting the NAACP and other newer organizations that much more complex and the views of black Americans that much more diverse. The days are past when the NAACP could set directions almost by itself. And if Mr. Wilkins could not comprehend or countenance some of the methods and directions of certain of those groups in his later years, he nevertheless spoke out for freedom and understanding: "All dedicated hands are needed and welcome in this fight," he once said, "but the NAACP would be less than human if it did not take a special pride for not only in what it has done but in what it is doing

There is no question that this is a better country for those deeds-and for the guiding hand of Roy Wilkins.

SUNSET AND OVERSIGHT: FIND-THE RIGHT FORMULA FOR A VIGOROUS CONGRESS

HON. GILLIS W. LONG

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

. Mr. LONG of Louisiana. Mr. Speaker, beginning September 18, the Subcommittee on the Legislative Process of the House Rules Committee will hold a series of hearings on congressional oversight.

As chairman of the subcommittee, it is my pleasure to extend an invitation to all interested Members to participate in these hearings. The Honorable TRENT LOTT, ranking minority member of the subcommittee, joins me in this invitation. TRENT and I mailed out 'dear colleague" letters announcing the hearings in early August. We wanted to allow all those interested in presenting their views ample notice in order to obtain a wide range of comment.

The proposals we will emphasize are the oversight portions of the Lott resolution, House Resolution 100, the Committee Improvement Amendments Act of 1981, and two bills pertaining to sunset legislation, H.R. 2, the Sunset Act of 1981, and H.R. 58, the Sunset Review Act of 1981.

The legislative changes effected through reconciliation and the budget process represent a new approach to program change. We feel it is appropriate and timely to review the way we authorize programs, and reassess proposals that would alter this process through sunset, sunset review, and other oversight measures.

Sunset strictly interpreted requires the automatic termination of Government programs after a specified period unless they are deliberately renewed by legislative action. In its pure form it is a concept that is itself sinking below the horizon, partly because many of the 30-odd States that enacted sunset legislation since 1976 have had disappointing experiences with it.

We are left with valuable nuggets after panning the streams of sunset proposals, however. These are the methods to institutionalize and streamline the program review and oversight embodied in all sunset plans.

The Budget and Impoundment Control Act of 1974 mandates comprehensive congressional oversight as an aid to choosing budget priorities. When Federal resources are limited, priority selection becomes more urgent and the oversight function more critical.

At its best, oversight can be dynamic, not deadly. It can be detective work, spotlighting waste and abuse of public funds. It can separate deserving programs from the dispensable. It can serve as a mechanism for creative change, and for improving Government services.

Oversight is a fundamental part of the legislative process. It is pervasive, and takes many forms. The casework we do, the contacts we make with Federal agencies, are oversight, though we may not consciously regard them as such. Any review, assessment, or inquiry that can result in a program change is oversight, whether or not it bears that label.

What is needed most of all is simply enough time to perform the expanding obligatory aspects of oversight. This is particularly important for the authorizing committees, for making time for formal program reviews is a growing problem.

The bills we plan to examine in our fall hearings are all designed to assist the oversight process. We do not plan to limit ourselves to discussing only these proposals. Many members have had valuable firsthand experience with oversight. We hope to encourage informal, bipartisan sharing of ideas in such areas as selecting oversight priorities, setting up agendas, motivations for oversight, making room for oversight in already strained schedules, and creating public awareness of oversight activity.

The three proposals before the subcommittee contain an assortment of appealing features. H.R. 58, which the Honorable Butler Derrick and I have introduced in the 97th Congress with the cosponsorship of over 150 Members, creates a tie between program review by committees and legislative action in the same Congress. This would be coordinated with the Budget Act. H.R. 58 requires each Congress to prepare and vote on an oversight schedule and to report legislation to continue, modify, or terminate the programs selected for review. All programs would be subject to review, because no program could be automatically terminated. Automatic termination is a feature of traditional sunset legislation that serves to exempt sensitive but costly programs from sunset for fear of placing them in jeopardy. The danger of ending programs inadvertently is avoided by requiring that Congress vote to end them. This makes it possible to include the review of entitlements, loan guarantees, and tax expenditures.

H.R. 58 has also been enriched by the sunrise provisions of BUTLER DER-RICK'S H.R. 65 in the 96th Congress. It

requires listing a bill's objectives in its accompanying report, a feature which should ease the job of oversight by clarifying program goals. This would

help the agencies as well.

H.R. 58 has benefited from committee contributions, thanks to detailed responses to questionnaires and other information furnished to us by the House committees. Additionally, it reflects what we have learned from extensive hearings held in the previous Congress on sunset legislation and studies made of the States experiences with sunset.

An essential feature of program review is a comprehensive inventory of Federal programs, arranged by committee jurisdiction. H.R. 58 and H.R. 2 contain inventory provisions. H.R. 58 also requires that reviews include an analysis of the regulatory impact of the programs being reviewed.

H.R. 2, introduced by the Honorable JAMES J. BLANCHARD, requires that all Government programs, except those specifically exempted, be reviewed and reauthorized at least once every 10 years. It limits authorizations to not

more than 10 years.

Committee Improvement Amendments Act was explored earlier this summer in productive and stimulating bipartisan hearings held jointly with the Subcommittee on Rules. The oversight provisions, section I, have been referred to the Subcommittee on the Legislative Process. This section provides that the Government Operations Committee hold hearings on accomplishoversight committees ments and their proposed oversight Government Operations agendas. would then consolidate all committee agendas into a single oversight agenda resolution for House consideration.

It is the hope of all subcommittee members that our series of hearings on these and other proposals will contribute in a major way to helping Congress deal with the growing workload of a rigorous budget process. The need to oversee and evaluate existing programs has grown correspondingly.

We will welcome testimony or participation in panel discussions from any Members interested in sharing their views on how to improve oversight. We hope to enlist the advice of former Members as well. Our aim is to provide a forum for lively discussion and bipartisan exploration of how to make oversight a workable tool, responsive to the needs of the times.

TRIBUTE TO OTTO A. TENNANT

HON. COOPER EVANS

OF IOWA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. EVANS of Iowa. Mr. Speaker, I want to offer my congratulations to

Otto A. Tennant, P.E., of Des Moines, Iowa, a fellow professional engineer, who has recently been elected president of the National Society of Professional Engineers (NSPE), NSPE, a naorganization representing tionwide 80,000 individual members working in virtually every aspect of the engineering profession, will honor Otto tonight at a reception, and I am proud to be among his many friends who will be in attendance.

Otto served as vice chairman of NSPE's north central region and professional engineers in industry and chairman of the legislative and government affairs committee.

He holds a B.S. degree in general engineering from Iowa State University and an M.A. in economics from Drake

Currently he is manager of industrial marketing and technical services of

Iowa Power & Light Co.

It is indeed an honor for the State of Iowa to claim Otto Tennant. As a fellow member of NSPE and his friend I would like to extend my best wishes to him for what I am sure will be a productive year.

THE NATIONAL DEBT MUST BE REDUCED

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

. Mr. IRELAND, Mr. Speaker, I am today introducing legislation designed to serve as a guidepost for the future. for the day we finally achieve a balanced budget, and, most wonderful of all, a budget surplus.

My bill would put the Congress on record that a major goal of our fiscal policy must be not merely balancing the budget, as important as this is, but also reducing the national debt by applying a budget surplus when one is

achieved.

The headlines of late have made it clear that despite the massive tax and budget cuts enacted so far by the Congress, we must cut even further. This bad news is compounded, in my view. by reports this week from the Treas-Department that consideration may be given to new tax increases to help control the projected fiscal year 1982 budget deficit of some \$60 billion, and the staggering fiscal year 1984 projected deficit of \$100 billion.

You do not have to be a disciple of Milton Friedman to agree with his point that Government spending and taxes combine to crowd out private spending, absorbing resources that otherwise might be used for private comsumption or productive capital in-

vestment

You also do not have to have shared my experience in the banking business

to know how harmful to the people of our Nation are the high interest rates now being charged on loans. Homes are not being built or purchased; the same for automobiles; education is being priced out of reach.

As a banker, I used to pride myself in getting my banks involved in these sorts of community-building activities. As Members of Congress, we all know how badly our communities are being hurt by the failure to finance these activities-or, rather, by the inability of the average person or business to pay the price.

I make these obvious points about the effects of inflation on the economy because I think it is essential to remind ourselves of just what we are talking about when we resist the idea of reducing the national debt on the grounds that deficit financing is a useful governmental tool.

It is my basic premise that tax cuts plus Government spending cuts will equal, eventually, if we are tough enough, a real balanced budget. I say "real," because, obviously, we could "balance" the budget tomorrow by hiking taxes enough, or cutting programs enough. But, again, obviously, we must continue to act in the responsible fashion we have so far this year.

We cannot, in short, make up for 25 years of financial mismanagement overnight, or by passing a few cuts or tax law revisions. We have to keep it up. My bill is designed to be a part of that process, by helping us to focus on what our ultimate goals really are.

We do not want a balanced budget just for itself, although, as a banker, I recognize that concept has legitimate appeal. I think we want a balanced budget for the simple reason that our budget-and our Federal Federal debt-have clearly gotten out of hand, regardless of which, or who's, economic theory you subscribe to.

Interest on our national debt, social security, and defense together constitute 60 percent of the Federal budget. We are now looking at some well-merited, in my view, defense cuts. Social security is an area I need not mention-we all heard enough about proposed cuts on our recent district work period.

This leaves the national debt as, to me, both the most attractive, and potentially most productive area of cuts which we must begin to explore in the future.

If I may add a few statistics to the debate: presently, the ratio of Federal debt is running in excess of 25 percent of our GNP, and interest on this massive debt is some 10 percent of the Federal budget, itself some 3 percent of GNP.

While low, this interest percentage is growing, as it was less than 2 percent in 1979. Interest payments in fiscal year 1982 are estimated to be \$100 billion, or enough to fund even the most extreme MX proposal, for example.

Another fact perhaps not fully comprehended is that a growing percentage of our national debt is now held by foreign investors—presently some 22 percent, up from a mere 8.6 percent in 1970. That this is primarily the result of our oil import dependency I do not find reassuring.

We are so used to the Federal debt, and the carrying costs, that we fail to focus on the "digging the hole deeper" aspect of mounting carrying costs. Interest on the public debt has risen some 156 percent since 1974. This is not mere "inflation money"; military spending, for example, has risen only 71 percent.

In short, interest-bearing Federal debt has more than doubled in the past 8 years, a rate far in excess of our GNP. If the present deficit projections are true, and if interest rates on 3½-year U.S. Government securities remain at their current levels, simply paying the interest on the debt will take some 20 percent—one-fifth—of all our projected tax revenues for this year.

As a banker, I can assure you that I never approved a loan which would take one-fifth of someone's income to simply make the interest payments, home mortgages excepted.

My point is that the problem of balancing the budget becomes increasingly difficult—if not impossible—simply due to "locked in" interest payments, payments which will hit a higher level each year.

The multiplier effect of increasing debt and high interest rates on the debt are areas of fiscal planning, and fiscal action, to which the Congress must begin to apply itself.

An apparently inevitable chain of events is at work here, even though we are now engaged in a very courageous budget and tax cutting process—unless we actually reduce the debt, the interest costs alone will make it increasingly difficult to balance the budget, or, having achieved a balanced budget, to keep it balanced.

A final fact—every percentage point by which interest rates exceed budget assumptions increases Federal debt carrying costs some \$2.4 billion annually. It doesn't take a calculator to see how many worthwhile programs and needed community-building activities are being killed just to service this debt, and what we face for the future if we don't reduce the debt.

With that, and with the hope that my bill will help focus the debate in a positive and timely way, I now present for the RECORD a copy of my legislation: H.J. RES. 320

Joint resolution expressing the sense of the Congress that following the achievement of a balanced budget, any existing budget surplus should be applied to reducing the national debt.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

Whereas the continuing growth of the national debt of the United States is not in the best interest of the economic health of the Nation:

Whereas borrowing money to pay interest on the national debt adds to inflation, and deprives the private sector of needed development capital, while adding to the cost of that capital which is available;

Whereas a balanced budget is a major goal

of United States fiscal policy;

Whereas reducing the national debt should be a major goal of United States fiscal policy, because it would encourage economic growth by stimulating the private sector, and cutting inflation: Now, therefore, be it

Resolved, that-

(1) Following the achievement of a balanced budget, any existing budget surplus should be applied on an annual basis to reduce the national debt of the United States;

(2) Reducing the national debt should be a major goal of United States fiscal policy in order to stimulate economic growth and cut inflation. ■

UNITED STATES-LIBYAN CONFRONTATION

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. BROOMFIELD. Mr. Speaker, because of the congressional recess, this is my first opportunity to express my thoughts on the U.S. defensive action taken August 19 against Libyan attack aircraft. I wholeheartedly endorse the action taken by our pilots in response to an unprovoked attack in international waters.

This confrontation has again clearly demonstrated Libya's total disregard for international law and human life. The Libyans were aware that U.S. naval forces were holding peaceful training exercises in well-established international waters, but, nevertheless, tried to back up their dubious claim of sovereignty over the area by attacking our aircraft. I have only praise for the manner in which our fighters responded, and for the level of preparedness of the naval task force in general.

Some editorial writers have questioned whether the U.S. naval exercise was not itself a provocative action which encouraged the Libyan attack. I find such commentary shallow and devoid of an elementary understanding of Libyan strategy and tactics. We are not dealing with a nation that adheres to recognized rules of civilized behavior. Libya financially supports

international terrorism from its oil revenues. It maintains terrorist training bases and grants asylum to terrorists. It has forcefully overthrown the Government of Chad, and has attempted to undermine the Governments of Sudan and Egypt. Moreover, it was only a short time ago that Libyan troops were kicked out of Uganda for supporting Idi Amin, the butcher of Africa.

To suggest that the naval exercise, operating in international waters, was provocative, is itself outrageous. Are we never to cease reading or hearing such lines from apologists for every breach of international law by radical regimes? Whether we are dealing with Libya, Iran, the PLO, or the Soviet Union, we are told by some that the establishment of a strong position which defends our national interest will never bring opponents around to our way of thinking. Such sentiments were expressed at Munich in 1938, and in the Carter White House in recent years. They were not credible then, and the evidence doesn't support them now. Appeasement doesn't work.

I commend the Reagan administration for its willingness to defend the basic principles of international navigation in this particular instance, and of freedom in general throughout the world, Such forceful defense of American interests has not only bolstered the morale of our Armed Forces after 4 years of deterioration, but it has given confidence to our allies abroad. The attainment of world peace is never more effectively pursued than when the United States is militarily and economically strong, and is prepared to let our adversaries know that we will meet our responsibilities in the international arena.

A TRIBUTE TO AMERICA'S WORKING PEOPLE

HON. JOHN G. FARY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. FARY. Mr. Speaker, it is early September again, and according to a 99-year-old tradition, I am sure we all enjoyed the last holiday and 3-day weekend of the summer. For many of our youth, these were the last 3 days of summer vacation. For families and working people, these were the last days to take a short vacation before the cooling air of autumn is upon us. For others, it was a time to just stay at home and perhaps see neighbors and friends.

However we spent this Labor Day weekend though, let us not forget what this day symbolizes and who this day commemorates. In ceremonies throughout the country we paid tribute to American workers who, through their hands, muscle, sweat, and minds have built this country and keep it running. We paid tribute to those who build our houses, pave our roads, and raise our skyscrapers and office buildings. We paid tribute to those who assemble our cars, machinery, and appliances; produce and package our food, run the offices of business and government smoothly, and perform countless other jobs and tasks.

In short, we paid tribute to the American worker of the past and present. It is easy to take their labor and the fruits of their labor for granted. Yet when we look at the rest of the world, we realize just how bountiful the fruits of their labor have been. They have produced a standard of living that has freed us from a subsistent level of existence. They have enriched our lives both on the job and when the day's work is done. A majority of the world's population do not enjoy these blessings.

And lest we forget, our parents and grandparents, in many cases, were not able to free themselves from a subsistent standard of living and from hard, back-breaking, life-shortening work. All money and energy went for basic necessities. Working 12 hours a day, 6 and 7 days a week, there was no time for leisure or to enjoy the benefits which they reaped. Many of these workers were subject to dangerous workplace conditions and little job security.

Fortunately, we have progressed beyond that point, but this progress did not come easily. It took persistence, dedication, and courage to organize workers and press for a decent wage and better working conditions. They were hard-fought victories, and we also pay tribute today to the men and women behind those victories.

While paying tribute, however, we must not grow complacent. There are still too many in this country who do not have safe and healthful workplaces, decent homes, access to good schools, and good medical care. We must work to insure that all Americans enjoy these basic necessities.

So, while we relaxed and enjoyed this weekend, let us remember the American workers and all they have done and are doing for us. They have built our cities, our homes, and our way of life. They certainly deserve this day of appreciation.

INFORMING THE AMERICANS

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

 Mr. LAGOMARSINO. Mr. Speaker, during the August recess, members of the Committee on Foreign Affairs conducted a study mission to the Far East, including a stop in Taiwan. During our stay in that country, an editorial appeared in the China News summarizing the main issues affecting the relations between our two countries. I believe it is worthwhile to keep these issues in mind as we consider policies that affect our Far Eastern allies.

The editorial follows:

INFORMING THE AMERICANS

Before the U.S. broke off diplomatic relations, the Republic of China was frequently visited by congressional delegations and individual senators and representatives.

Today such visits are few and far between. This is why we especially welcome the two-day sojourn of congressmen headed by Clement J. Zablocki, chairman of the House of Representatives Committee on Foreign Affairs.

If members of the U.S. Congress don't come here to talk to our leaders and see our situation for themselves, they are legislating in the dark on measures pertaining to Taiwan and the Republic of China.

Nothing in U.S. law prohibits individual congressmen or groups from stopping over in the Republic of China

in the Republic of China.

But in President Carter's time, the administration discouraged Taiwan visitation as a part of the process of appeasing the Chinese Communists. Under President Reagan, that phase of U.S. China policy apparently has been ended.

It is to be presumed that our government leaders have been candid in talking to the 21-member congressional delegation. We know that the reception has been friendly.

Information provided for the visitors has no doubt been concerned with defense and

The condition of our national security is especially important.

As yet, the United States has not responded to the Republic of China's request for fighter aircraft with greater capability than the F5E.

Some American sources have maintained that the Taiwan Straits are quieter than ever before and that the Chinese Communists constitute no threat whatsoever.

This isn't true. If the American congressmen learn this and nothing else, they will support the sale of higher performance aircraft to the Republic of China in the nearest future.

The Chinese Communists make no bones about saying they are going to cross the Straits and attack Taiwan. They have many reasons for doing so.

reasons for doing so.

The Republic of China is too successful at a time when the mainland's failure to modernize is becoming increasingly apparent.

Mainland people are restively demanding to learn from Taiwan. The Communists may be compelled to strike out in defense of their own tryanny.

Even if the F5E is a match for the MIG19 or even the 21, it is obvious that the Chinese Communists will try to improve their air striking power in the next few years.

To replace the F5E will take at least two or three years. If the present workhorse of the Chinese Air Force is not retired in that time, it will almost certainly be overtaken by a new or improved Chinese Communist fighter.

Our political and military leaders are in a position to tell the congressmen exactly where we stand in terms of defending ourselves against the Red Chinese military machine.

It is not true, for example, that the Chinese Communists have reduced their forces along the mainland coast opposite Taiwan. Despite the defense needs in the north and south, the Communists have maintained these forces at peak level.

Why? The Republic of China may be intent upon national recovery, but that is to be principally a political action. We are aware that the United States would be strongly opposed to any east-west venture across the Taiwan Straits. There is no intention of mounting one.

If the Communist Straits forces are not required for defense, their intention is obviously offensive.

To help the Republic of China modernize its air force, navy and army will contribute to the peace of Asia, not to warmaking. We still consider ourselves to be bound by the American partnership and alliance.

Economically, the Republic of China depends heavily on the American trade and investment relationship. About a third of our goods go to the United States. We are earnestly endeavoring to buy more goods from America, the only country in the world to do so

But the lack of diplomatic relations and direct contacts between our two governments has been responsible for economic damage.

For example, President Reagan removed the U.S. quotas on our shoes. But lack of information then led our government to believe that the United States wanted stringent controls on our part. It doesn't. It wants plenty of cheap shoes for American buyers.

Congressional action is needed to break down barriers which were erected by the Carter administration almost as an evasion of the Taiwan Relations Act. It is already apparent that the ROC-U.S. economic relationship is going to be more important than that between Red China and the United States for a long time to come.

But the Chinese Communists have official standing and contacts, while we are relegated to the status of economic orphan. Congress has the power to improve the situation and thereby help the United States as well as Republic of China.

Perhaps above all, the United States has pressing need for greater understanding of the Chinese mainland reality. Washington runs grave risks in trying to play the Red China card against the Soviet Union.

The leaders of this country know both the minds and the intention of the Chinese Communists. Red China is not an American friend. It remains an enemy. Failure to treat it as such could be a mistake to rank with those made before Pearl Harbor and in the war's end Pacific participation of the USSR.

This country has nothing to hide from its old American friends. The congressional visit should be only the first of many to clear away some of the misunderstandings that have arisen since Jimmy Carter took it upon himself to recognize the Chinese Communists and derecognize the Republic of China.

H.R. 450 SAYS VIOLENCE IS NO WAY TO SETTLE DISPUTES

HON. ROBIN L. BEARD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. BEARD. Mr. Speaker, the incidence of strike-related violence is a problem which calls for immediate attention by this Congress.

The current legislative drive to amend the Hobbs Anti-Extortion Act is not the first congressional attempt to expressly outlaw the use of physical and psychological intimidation to enforce compliance with the wishes of either labor or management.

In 1946, Congress enacted the original Hobbs Act at the behest of an American public which was becoming alarmed over an escalation of violence occurring in conjunction with labor disputes.

That law provided for full Federal sanctions against all individuals or groups of individuals employing violent tactics to achieve their objectives in interestate commerce, whether the guilty party was employer or employ-

But some parties immediately set out to undermine the legislative intent of the Hobbs Act with intricate legalistic infighting.

Their efforts culminated in complete success in 1973, when the Supreme Court ruled that union officials and their agents could not be held responsible for acts of violence under Federal law when those acts were committed in pursuit of legitimate union objectives.

In the Enmons decision, the Court acquitted three individuals who dynamited transformer substations to force a utility company and its employees to accept their demands.

The acquittal was based not upon the men's innocence, but upon their participation in a legitimate union objective—a strike—which released them from accountability in the eyes of the Federal law.

The extreme acts of terrorism condoned by this warped ruling grants those on both the labor and management side who want to use violence a wide range of violent options to intimidate both employers and employees.

And this violence has occurred in such places as my home State of Tennessee.

The citizens of Tennessee are still concerned at the outrageous acts of violence displayed by 1,500 angry picketers to disrupt the groundbreaking ceremonies for the construction of the \$300 million Nissan automobile plant in Smyrna.

That project, which will employ 2,000 skilled laborers at the height of construction and produce 2,200 high technology jobs paying an average of

\$20,000 yearly, was the target of violence because the subcontracts will be available to all on a competitive basis.

It is inconceivable to me how anyone who professes to speak out on behalf of the workingman could attempt to drive away with violence so many high-paying, promising jobs from the workingmen and workingwomen of Tennessee.

The right to join a union is a basic right of American workers. The right to strike is a basic right of workers in the private sector. I support both those rights.

But violence is no way to settle labor disputes. Violence is wrong, whether it is perpetrated by union or management officials. The American worker should be allowed to choose, not be intimidated by fear of bodily harm.

TRIBUTE TO THE EMPLOYEES OF THE USPHS CLINIC IN SAN PEDRO

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. ANDERSON. Mr. Speaker, at the end of this month, many of the hospitals and clinics which comprise the U.S. Public Health Service system will close their doors forever. Such is the case with the San Pedro Clinic, in my own 32d District of California.

The many hours all of the doctors, nurses, therapists, pharmacists, and others have worked in the care and service of the many people in their charge demonstrates a devotion to duty and commitment to quality health care which I believe deserves recognition.

Many successful pilot projects coordinated by the clinic's employees have become standards. They have been adopted for use by other health care institutions in this country. And I am pleased to insert for the Record, Mr. Speaker, a statement submitted by the Director of the USPHS hospital in San Francisco, Dr. Truman McCasland, to the Health Services Administration. It is a recommendation for a commendation award, to which I would like to add my own strong endorsement.

The statement follows:

JUSTIFICATION STATEMENT PUBLIC HEALTH SERVICE UNIT COMMENDATION

The United States Public Health Service Outpatient Clinic, San Pedro, California, is nominated for the PHS Unit Commendation (UC) in recognition of their superior service and outstanding performance in the achievement of the goals and objectives of the Office of Ambulatory Care, Bureau of Medical Services, the Health Services Administration and the Public Health Service from August 1, 1980 to August 31, 1981.

The enumeration of accomplishments by

The enumeration of accomplishments by this organization demonstrates a level of professionalism and performance above that normally expected of other similar organizations. Undoubtedly, their efforts and teamwork have increased the quality and accessibility of ambulatory care services provided to PHS beneficiaries in San Pedro.

Utilizing only existing funds and personnel resources, their efforts during this period included reorganizing the medical staff by reducing the number of physicians by one and hiring a nurse practitioner. The latter concept is a time honored and cost effective means of treating patients in an ambulatory care setting and enabled the clinic to increase its services. Affiliation agreements were consummated with other Federal agencies (i.e. Veterans Administration Medical Center, Long Beach, and Naval Regional Medical Center, San Diego) which once again increased accessibility to care, introduced advanced technology into the clinic's environment while maximizing scarce resources by containing costs and avoiding duplication of services. The facility's cooperative spirit is also evidenced by the staff's willingness to provide medical and administrative assistance to the Center for Disease Control Quarantine station at Los Angeles International Airport, the Veterans Administration Medical Center's (Wadsworth) team who conducted a longitudinal study on atomic bomb survivors and by providing radiology services to U.S. Air Force dispensary (El Segundo) patients. Procedures were streamlined which enabled active duty personnel to receive prompt attention when reporting for sick call or having to comply with annual physical examination requirements. Moreover, the clinic's dental staff has been providing sick call coverage for the approximatley 800 inmates incarcerated at the Terminal Island Federal prison who have been without the services of full time providers since July 1, 1981. These forms of assistance, which in many instances lasted over a period of weeks, are in addition to the staff's already voluminous workload.

The clinic's enthusiasm for outreach services is manifest in numerous ways. For example, physicians and nurses, prior and subsequent to the Bureau of Medical Services' Seafarers Health Improvement Program. are dispatched to provide outreach care to seamen while their vessels are at dockside. This action has earned the respect and appreciation of a multitude of seamen and shipping company representatives. Tangentially, the clinic works in concert with local shipping company physicians in improving existing regulations governing U.S. Coast Guard physical requirements for merchant seamen. Moreover, the clinic mobilized and made available primary health care personnel and other resources to Indochinese and Cuban/Haitian refugees who entered the Ports of Los Angeles and Miami respectively, as well as those refugees located at Fort Chaffee, Arkansas and Camp McCoy, Wisconsin.

In addition to the aforementioned activities, the staff developed and expanded a model patient health education program which has been emulated by other PHS facilities. Topics include smoking cessation, arthritis, diabetes, hypertension, obesity, stress reduction and breast self-examinations. Through the use of volunteers and working in concert with the Seamen's Church of San Pedro, an alcoholism counseling program was initiated. Additionally, a Health Awareness Program, which, in part, publishes health tips and conducts seminars, was established for the Eleventh Coast Guard District. The results have been so

promising that this program is being adopted by the Twelfth Coast Guard District.

Not being satisfied with the status quo. and in its desire for self-improvement, the clinic actively participates in a number of research projects. Illustratively, the clinic was selected to participate in a Health Services Research project regarding the utility of patient hand carried medical records. The project, which is under the direction of two professors from the University of Massachusetts, is intended to increase patient involvement in the medical care process, determine patient receptivity and determine the cost effectiveness of such an endeavor. Other research pursuits include working with Dr. Eleanor Smith (of the National Center for Health Services Research) on ways of containing contract hospital care costs and participation in the American Hospital Association's health education project.

In a related matter, the clinic, eager to provide educational opportunities for health care students, has entered into affiliation agreements with a number of universities. As such, the clinic's staff has served as preceptors for students enrolled at the University of California at Los Angeles, California State University (Long Beach) and the Uniformed Services School of Medicine (Bethesda, Maryland). The Staff's commitment to the community is also revealed in their providing cardiopulmonary resuscitation training for patients and their dependents as well as participating in civic meetings such as the Los Angeles County Health Department's Volunteers for Immunization, Coastal Health Services Regional Community Health Service Council, San Pedro's Coordinating Council, San Pedro's Home Environmentalist Program, Harbor Nursing Advisory Committee, Los Angeles Interagency Forum on Resettlement of Indochinese Refugees and the Los Angeles Federal Executive Board.

The professionalism, innovative approaches, teamwork, flexibility, pride and devotion to duty demonstrated by all the personnel assigned to San Pedro's USPHS Outpatient Clinic during this period is truly outstanding and reflects positively on themselves and the U.S. Public Health Service.

So, Mr. Speaker, although these many fine individuals, under the capable direction of Bruce Immerman, will now be scattered to the four winds, I want them all to know that while they may be gone, they will not be forgotten. All of us in the South Bay area who have known them, worked with them, or have been cared for by them, will long remember their selfless contributions to our quality of life.

IRS ABUSES—WASTE IS JUST ONE PART OF THE PROBLEM

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. LEBOUTILLIER. Mr. Speaker, with the passing of each day, comes further reinforcement of the realization that the general reach of the Federal Government is on the wane. Indeed, the recently adopted budget and tax reductions bear witness to the

desire of the American people to LONG BEACH lessen, if not eliminate, Government involvement in our lives.

LAUNCH CAM HANCE MEMBI

Unfortunately, there is a notable exception to this trend. I speak specifically of the Internal Revenue Service, whose practices have been labeled by some as illegal, overhanded, and unrestrained.

While many are familiar with the horror stories of IRS agents swooping down on "criminal" tax derelicts to collect a few thousand or even hundred dollars, the IRS recently demonstrated the ultimate in callousness in its efforts to collect an underpayment of 10 cents.

To some, the following account may seem humorous. To others, this incredible incident is representative of the seemingly limitless powers of the IRS. If you are tempted to chuckle while reading this article, remind yourself that for many, when dealing with the IRS, you are guilty until proven innocent.

The article which appeared in the New York Daily News on August 7, 1981, follows:

Pounds of Flesh: IRS Fattens Thin Dime Owed

(By Bella English)

A dime won't even buy penny candy any more, but to Uncle Sam it can be worth a lot more than 10 cents.

The government is demanding that a Chinatown woman pay a \$28.15 penalty because she underpaid her 1980 taxes—by a dime.

In an Aug. 3 letter to Chan Wing, 59, the Internal Revenue Service said: "Unpaid tax on return is 10 cents. Penalty charge is \$28.15. Balance due to IRS is \$28.25. Make check payable to IRS."

Wing, who speaks no English, showed the form to her stepdaughter, Rose Wine, assistant manager at a Chemical Bank branch in Jackson Heights, Queens.

"It cost them more to print up this form and send this out than my stepmother owes," Rose said, "Do you believe this? I think this is the most ridiculous thing I've ever heard of. I just had to laugh."

Her laughter turned to anger yesterday when she went to the IRS office in Jackson Heights and was told that her stepmother must indeed pay the 10 cents and the \$28.15

"I can't believe it," Rose said. "They're wasting your money and my money over a lousy dime. But I don't know which way to turn. If I have to pay it, I have to pay it."

Rose said, though that she is considering writing a letter of appeal to President Reagan.

IRS officials said that disclosure laws prevent their discussing the case.

LONG BEACH BOY SCOUTS LAUNCH CAMPAIGN TO EN-HANCE MEMBERSHIP

HON. DAN LUNGREN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. LUNGREN. Mr. Speaker, the Boy Scouts of America have been a dynamic component of the leadership training for young men in this country since the inception of Scouting in the United States in 1913. Through scouting, literally millions of young men have been forged into self-sufficient leaders via the rigors of the Scouting program.

A keen appreciation of our Nation's natural resources, an understanding of the scope—and limits—of man's physical abilities, and a knowledge of the great things that can be attained through manly cooperation—these are the vital attributes of the Scouting program.

Since 1922, the Long Beach Area Council of the Boy Scouts of America has been instilling these very characteristics into the young men of the district I represent. On September 15, the Long Beach Council will launch an ambitious program to enhance its membership. On that date, the council will launch its fall roundup kickoff. Working with the unit leaders of Boy Scout and Cub Scout troops throughout the area and with school administrators and officials, the council will seek to increase its overall membership by no less than 1,500 by the vear's end.

Mr. Speaker, I hope that the other Members of this body will join me in wishing this effort the very best of success in this effort to extend the benefits of Scouting to hundreds more young men in the southern California area.

THE FIRST 6 MONTHS HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, August 5, 1981, into the Congressional Record:

THE FIRST 6 MONTHS

As the August recess approaches, it is appropriate for a Congressman to think about the significance of the major events that have taken place in this session of Congress.

The most noteworthy development is the radical cutting back of federal involvement in the American economy. Congress will cut social expenditures by \$37 billion in 1982 and by \$140 billion over the next three years. Congress has also approved a multi-year tax cut that will amount to \$150 billion by 1984. Together, these actions represent

both the largest budgetary realignment in the history of the federal government and a most dramatic shift in the role the federal government plays in our national economy.

Over the past few months, President Reagan's budgetary strategy has emerged and taken clear form. He intends to use tax cuts both to hold the budget in check and to reduce the size of the federal government in relation to the economy. With the new tax law, the only way to control the deficit will be through further cuts in spending. To all who follow the budget closely, it is apparent that the large reductions in spending made this year will not begin to be sufficient to balance the budget anytime soon. More budget cutting will be necessary later this year and in subsequent years. It is unlikely that social security and defense will be spared.

It is not in the budget and tax cuts alone, however, that the new direction of the federal government may be seen. Mr. Reagan has sparked a serious debate on the condition and course of federalism with his search for ways to "restore the constitutional symmetry between the federal govern-ment and the states." He proposes to fold more than 500 federally controlled categorical programs into a few large block grants for the states. These block grants will be an "interim step" toward the eventual return of the sources of revenue to the states. The President is also ready to direct a sweeping reversal in the way the federal government regulates the private sector. The role of the federal government as a protector of consumers, the environment, and minorities will decline. The laws put into effect after Watergate and the environmental and civil rights movements will be open to modification. Appointees to the regulatory agencies will be men and women who are supporters and former employees of the businesses they will oversee. Mr. Reagan's success in these areas, while not as spectacular as his success in cutting taxes and the budget, is noteworthy in any case, especially since it is

still early in his term of office. The major events of this congressional session invite comparison with other periods in recent American history. The President has become the fourth Chief Executive in this century to make an early, pronounced mark on domestic legislation (the others were Mr. Wilson, Mr. Roosevelt, and Mr. Johnson). Most students of the Presidency know that if a President does not secure approval of the basic elements of his program in his first session of Congress, he never does. It is apparent that Mr. Reagan has done what he needed to do. He deserves full credit for responding to the will of the voters, for holding to his priorities, and for pushing his program very hard.

Observers agree that the President has done remarkably well in getting his pro-gram through Congress. The Republicans control the Senate comfortably, so it may not be surprising that his program has moved easily through the body. His mastery, however, has also extended to the House of Representatives. It seems to me that on economic issues, and perhaps on other issues, too, Mr. Reagan now has effective control of the House. He has accomplished far more than most Washington politicians thought possible only a few months ago. The magnitude of the change is such that it will take years for Congre and the country to understand just what has been done. It is clear to me now that for many Congresses to come, the agenda will be to act upon the new course the President has set.

Because Mr. Reagan has done so well, he must bear responsibility for the performance of the economy. He has promised that his program will bring rapid growth, more jobs, less inflation, and lower interest rates. The question is whether he is right. From the start, experts have doubted some of his assumptions-in particular. economic whether rapid growth can occur as inflation falls. Another worry is that by cutting taxes so deeply, the President may run enormous deficits. If these deficits are combined with tight money, interest rates may remain very high. Mr. Reagan, however, sees a "new ren-aissance" in America and a "new era of prosperity." He believes that results will come quickly because of the expectations he thinks his program will generate. All Americans must hope that the President is right.

It is undoubtedly premature to judge

whether the President's program stands at the beginning of a new era in our history, the beginning of something solid and last ing, or whether it is just another political detour from the road that leads to economic growth and stability. I would only add that while Mr. Reagan has enjoyed success in the launching of his economic plan, it is less obvious that the Democratic opposition has been as vital, constructive, and coherent as it should be. Having been the majority in Congress since 1955, the Democrats may have forgotten how to exercise the skills of responsible opposition. Whatever the case, the Democrats must improve. The President himself would be a beneficiary of such an improvement.

LORETTA C. MANGGRUM

HON. WILLIS D. GRADISON. JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

. Mr. GRADISON. Mr. Speaker, I would like to take this opportunity to pay tribute to a citizen who has contributed much to the cultural and educational enrichment of the Cincinnati community. Loretta C. Manggrum, who turned 85 years old this past July, is currently working toward a Ph. D. in music composition and theory from the University of Cincinnati's College Conservatory of Music. Mrs. Manggrum was the first black woman to graduate from the old conservatory of music, earning her master's degree.

A noted Cincinnati composer, Mrs. Manggrum has written six cantata's, including "Watch," which was performed at the college conservatory of music's Patricia Corbett Auditorium in 1975, and "Behold," which is performed during the Christmas season each year. She has written many spirituals and anthems which are sung in various churches in the city as well as

in other parts of Ohio.

Her love for and commitment to young people is especially noteworthy. Following her husband's death in 1961, Mrs. Manggrum began teaching in the Cincinnati public school system and taught until her retirement at age 75. She still spends a great deal of time composing music which children sing, learn from, and enjoy. Most importantly, Mrs. Manggrum has been instrumental in helping young people with musical talent and interest pursue musical educations in college.

In addition to her concern for these young people, Mr. and Mrs. William Langston Manggrum had three children of their own; Lillian Jenkins, principal at Winton Terrace School, Robert Manggrum, science teacher at Gamble Junior High School, and the late Langston Manggrum, an architect who designed several buildings in the Cincinnati area.

Currently, Mrs. Manggrum serves as organist and pianist for the Gaines United Methodist Church, which will be the site of a special tribute to be held Sunday, September 20. I am happy to pay tribute to Loretta C. Manggrum and to present her with this special congressional recognition.

RESIDENTIAL RENTAL HOUSING TAX INCENTIVE ACT OF 1981

HON. STEWART B. McKINNEY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

 Mr. McKINNEY. Mr. Speaker, today I am introducing the Residen-McKINNEY. Mr. Speaker. tial Rental Housing Tax Incentive Act of 1981 to stimulate increased private sector production of rental housing in general and low-income rental housing in particular.

We are all too familiar from our districts with the increasingly severe shortage of rental housing. At the same time that we must cut back on the outrageously expensive production of subsidized rental housing, we must face the fact that the construction of new, unsubsidized units has dropped a precipitous 80 percent over the past 3

This astounding drop in production has led experts to estimate a gap between rental needs and production in the 1980's totaling from 1.2 to 4.6 million units. Such a shortfall places a tremendous burden on tenants, whose incomes average half that of homeowners nationwide, as low vacancy rates lead to aggravated inflation in rents. Rental vacancies have declined from the second quarter of 1980 to the second quarter of 1981 in every region of the country but the North Central. says the Census Bureau. While the national rental vacancy rate declined to an even 5 percent, the lowest that it has been in years, the largest decline in rental vacancies is in the South, where the 5.1 percent of this year represents a significant drop from 1980's 6.5 percent. In the West, the rental vacancy rate dropped to 5 percent from 5.5 percent last year, while the Northeast rate has fallen to 3.7 percent from

the already perilous 4.1 percent in 1980.

The inevitable outcome of the shortage of rental housing, as demonstrated in New York City and countless less well known places around the country, is more overcrowding, deterioration, and displacement. All of these factors pressure local governments to adopt rent controls and restraints on condominium conversions. These, of course, only further discourage production and promote deterioration and abandonment.

My bill addresses the extreme need for more private sector production of rental housing through a tax incentive approach. I believe that we must act now to restore rental housing to at least the bare margin of profitability, and that tax advantages are essential to that margin. We must also act immediately to contain the subsidy costs of the assisted housing programs, which can no longer be directly supported by the Federal Government. The savings associated with a tax incentive approach to producing new and rehabilitated rental units affordable by low-income people are obvious when you compare these indirect costs with the frightening costs of direct subsidy programs. Even if Congress never authorizes a single additional unit for subsidization, annual housing assistance outlays under existing commitments will be at least \$9.6 billion by 1986. Clearly, we must develop more efficient approaches.

Consequently, I propose shortening the period for straight line depreciation-the method most preferred for housing development-to 10 years for constructed or rehabilitated rental housing, and to 8 years for new buildings in which at least 20 percent of the units are leased to low-income families at affordable rents. The 20percent standard developed by the Mortgage Bond Subsidy Act and tandem financing of section 8 projects insured under section 221(d)(4) of the National Housing Act appears a more realistic and workable approach to providing low-income rental units. I would also broaden the definition of low-income rehabilitation which qualifies for 5-year writeoff under existing law to the 20-percent standard, and increase to \$40,000 per unit the maximum which may be depreciated without any of the complex restrictions in

the current law.

Finally, this bill includes financial incentives for owners of rental properties in which 20 percent of the tenants are low income both to maintain the property and continue to own it after most of the usual tax benefits have been taken. Specifically, I propose an investment tax credit to kick in after 5 years of occupancy. Landlords would receive a \$1 reduction in taxes for each \$1 spent on maintenance, up to 5 percent of the adjusted basis in the

building. The credit would kick in just at the point when the building typically requires new paint and the inevitable small but costly repairs. In addition to creating more low-income housing, this provision should help to extend the useful, rental life of many buildings

While I have long criticized the traditional direct subsidy approach to providing low-income housing which section 8 epitomizes, I recognize that new, more efficient solutions to the problems must be developed. In addition, we can no longer ignore the rental housing crisis without even more destructive consequences. I believe this bill will maintain our commitment to rental housing in general and low income in particular, while passing the necessary litmus text of budget restraint. I am hopeful, therefore, that tax incentives will become an effective and efficient part of rental housing policy over the next decade.

STANLEY "SCHULTZ" SADOWSKI

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. YATRON. Mr. Speaker, I rise today to pay tribute to one of Reading, Pa.'s finest citizens, Stanley "Schultz" Sadowski.

Throughout his life, Stanley Sadowski has consistently demonstrated his love and respect for his fellow man. As a bartender for 42 years he spent much of his time listening to people's problems, consoling, sympathizing, advising, and providing encouragement and reassurance to those who needed help. He adroitly settled disagreements and cooled tempers with the utmost tact, diplomacy, and commonsense.

Stanley Sadowski could get along well with others and his experiences as a baseball player and expert bowler reinforced his belief in the benefits of teamwork. Mr. Sadowski fostered the spirit of teamwork during his years at the Reading Orioles. This attitude, combined with his many qualities made him a most effective member of this organization.

Mr. Sadowski was a member of both the fraternal lodge and the home association of the Orioles. He proceeded through the 12 official chairs of the lodge and served in every officer's chair of the home association. In each of these capacities, Mr. Sadowski made valuable contributions which improved and strengthened the club.

Mr. Speaker, I am truly grateful for the opportunity to give recognition to the achievements of this fine American. May Mr. Sadowski's life serve as an inspiration to us all. THE VOTING RIGHTS DEBATE

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. WHITEHURST. Mr. Speaker, on August 5, 1981, the editor of the Norfolk Virginian-Pilot provided the readers of that paper with a thoughtful and comprehensive commentary on the Voting Rights Act. It seems to me that Mr. Eastland has put the matter in perspective, and the points that he has raised merit the full and careful consideration of all of my colleagues before a final vote is cast on the extension of this act.

Thank you, Mr. Speaker.
[From the Virginian-Pilot, Aug. 5, 1981]
THE VOTING RIGHTS DEBATE

First the Justice Department rejected the state Senate's redistricting plan on grounds that the two single-member districts into which Norfolk would be divided would "dilute" black voting strength. Then, last week, the Justice Department threw out the House of Delegates' plan because it said black voting strength would be "diluted" in six of the state's 100 proposed districts.

Supporters of extending the Voting Rights Act, under whose authority the Justice Department acted in both instances, have interpreted these decisions, the first two such voting rights actions taken by the Reagan administration, as reasons the act must be renewed. However that may be, the two decisions suggest another point: that the purpose of the Voting Rights Act is no longer to ensure access to the ballot but to guarantee, wherever possible, that the groups protected by the act—blacks mainly, but also Chicanos, Asian-Americans, and American Indians—are proportionally represented in elective bodies by members of their own groups.

Thus the focus is on statistics and numbers and percentages, and it is from this quantitative stew that a more truly equal society is supposed to emerge. Presumably we will have this better society when, as Justice Thurgood Marshall wrote last year, every minority group is electing "candidates in proportion to its numbers."

In the current debate over renewal and revision of the Voting Rights Act, now regarded especially by blacks as the instrument for effecting proportional representation, few people have dared to raise the question of whether this sort of representation is such a worthy goal. Certainly it is not on the minds of those who demonstrated the other day in behalf of extension in Richmond; emotional advocacy rarely permits sober reflection. And it is not a question the six candidates for statewide office in Virginia have taken up, mainly because all six are opposed to extension of the act.

Amazingly, this question did not even seem to burden the House Judiciary Committee, which last week approved legislation that would extend the act in a revised form for another ten years. The committee falled to address what "dilution" means, which is to say it falled to address the question of what minorities are entitled to.

But precisely this is the question that must be raised. If minorities are entitled to nondiscriminatory access to the ballot box. colitsame COLUMBIA ACT TO ELIMINATE join VARIOUS SEXUAL OFFENSES

HON. PHILIP M. CRANE

EXTENSIONS OF REMARKS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

Mr. PHILIP M. CRANE. Mr. Speaker, it is my unfortunate but necessary responsibility today to introduce a resolution of disapproval for the District of Columbia Sexual Assault Reform Act of 1981. It has been called a reform but in fact it is far from it. Although certain portions of the measure may have merit, the proposal in its entirety is unacceptable. The District Act for instance, would effectively repeal laws prohibiting homosexual conduct in the District of Columbia and laws prohibiting the seduction of children. It would legalize the sexual advance by a teacher against a 17year-old child so long as no force were used. The act would also reduce the penalty for forcible rape from life im-

prisonment to 20 years in jail.

The District of Columbia and the agencies of the Federal Government located within its boundaries are the concern of every American. To allow a code of ethics to be instituted for the seat of the Federal Government which other Americans traditionally have found unacceptable would be a denial of our responsibility as legislators of this great Nation. For this reason I have introduced a resolution of disapproval today. It is my hope that after its passage the District Council will take a closer look at what should or should not be included in such an act if they are disposed to moving another piece of legislation forward in this area.

THE LIBERALS PRAISE O'CONNOR—CONSERVATIVES CRITICIZE CHOICE

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

• Mr. McDONALD. Mr. Speaker, with hearings commencing this week on the nomination of Mrs. Sandra Day O'Connor to the Supreme Court, it seems pertinent to let the public know who is in favor of the nomination and who opposes. Conservative Digest, in its August 1981 issue, compiled statements from liberals and conservatives on the nomination, and I think they bear careful consideration by the Members of this body. Therefore, I am inserting them in the Congressional Record for the edification of those who are interested:

THE LIBERALS PRAISE O'CONNOR KENNEDY

"Every American can take pride in the President's commitment to select such a woman for this critical office."—Sen. Edward Kennedy (D-Mass.), quoted in Time magazine, July 20, 1981

SMEAL

"Judge Sandra Day O'Connor's appointment to the Supreme Court is a victory for the women's movement because of the unceasing pressure placed on the President for women's rights and particularly the Equal Rights Amendment."—Statement by Eleanor Smeal, president, National Organization for Women, July 7, 1981.

TIP O'NEILL

House Speaker Thomas P. O'Neill Jr. (D-Mass.), who has been in a toe-to-toe battle with Mr. Reagan on the budget and taxes, called a truce long enough to hail Judge O'Connor's nomination as "the best thing he's [Reagan] done since he was inaugurated."—Quoted in the New York Times, July 9, 1981.

METZENBATIM

"At this point, it looks like a good appointment."—Liberal Sen. Howard Metzenbaum (D-Ohio), ABC World News Tonight, July 7, 1981.

UDALL

"My Democratic friends ought to be grateful for this appointment. It's almost inconceivable to me that they could do any better."—Rep. Morris Udall (D-Ariz.), in the Washington Post, July 13, 1981.

ADA

Americans for Democratic Action spokesman Stina Santiestevan said she was "thrilled" at the choice [of O'Connor]...—Quoted in Human Events, July 18, 1981.

Now

"I'm surprised by President Reagan's pick, because O'Connor is not as rightwing as I would have anticipated. Yes, in my judgment, O'Connor is a feminist. In 1972, she was an active and vocal supporter of ERA. Newspapers here report that she was one of the strongest backers of ERA. And I assume she still supports it."—Kate McGee of Phoenix, Ariz., national board member of the National Organization for Women, representing the Southwest region, in CD interview, July 7, 1981. McGee says she knows "lots" about Judge O'Connor and has researched her record for the national NOW group.

MOYNIHAN

"Judge O'Connor is a superb choice."— Sen. Daniel Moynihan, the pro-abortion liberal Democrat from New York, Congressional Record, July 16, 1981.

ACLU

"From the standpoint of her not being a doctrinaire conservative, the President made a good selection."—Louis Rhodes, director of the American Civil Liberties Union, quoted in the Philadelphia Inquirer, July 8, 1981.

KAMISAR

"Give the devil his due; it was a pretty good appointment."—Michigan law professor Yale Kamisar, "a judicial liberal," quoted in Time magazine, July 20, 1981.

ROWAN

"... My male intuition says that President Reagan has made a choice that is good for the nation."—Veteran anti-Reaganite

then they can be part of an integrated political process, able to cast ballots in the same unrestrained way as whites and able to join in alliances based on class that cross racial lines. Such is the historical meaning of the right to vote, and it guarantees no results along racial lines—no proportional representation by race. It generates the sort of politics cities like Norfolk have seen, as blacks frequently have banded through the use of the Goldenrod ballot to help elect candidates (black or white) of their choice.

But, on the other hand, if minorities are entitled not simply to equal access to the ballot box but to proportional representation by race, then the historical meaning of the right to vote changes. Political alliances based on class and issues mean less; racial politics becomes more important. The political process becomes segregated, with blacks understanding they are to vote for blacks, and whites perhaps cynically deciding that they should vote only for whites.

Unfortunately, this is the clear direction in which the Voting Rights Act is taking us, and it is a direction raising more questions than people have been willing to recognize. It is not at all clear, for example, that carving out a majority black district, wherever possible, is necessarily a good thing for blacks; a minority vote can by "diluted" be excessive concentration. Nor is it clear that an equitable proportion of seats will result in a comparable proportion of legislative benefits. No one has proposed that the Voting Rights Act should ensure this result, but it is the assumption on which appellate courts and the Justice Department have often seemed to proceed. Nevertheless, legislation that a majority of blacks might want enacted could stand a better chance of being passed if the political process emphasizes non-racial coalitions, and thus non-racial elections.

It will be October, probably, before the question of extension comes to a vote on Capitol Hill. Between now and then, especially in this political season in Virginia, and especially because of the two decisions by the Justice Department, one can expect more such demonstrations as were held this past Saturday-demonstrations that paint the issue as one of simple morality. But it should be clear to anyone who studies the Voting Rights Act that the central question its current enforcement raises is not the simply moral one of whether the right to vote is being denied. It is rather the political one of what kind of society we should be, one that encourages, as Madison would have had it, factions based on common interests that cut across racial lines, or one that encourages race to be the deciding characteristic in the electoral process.

The irony of the Voting Rights Act is that it intended to produce the first kind of society but has been used to effect the second. The Reagan administration, which is still trying to decide where it should stand, will honor the original purpose of the act by ensuring that, if renewed, it will be enforced in such a way as to encourage an integrated political process.

and superliberal columnist Carl Rowan, in the Washington Star, July 10, 1981.

"YELLOW DOG" DEMOCRAT

"She won't be a rightwing ideologue like Rehnquist."—Self-described "yellow dog Democrat" and Arizona lawyer John Frank, quoted in the Washington Post, July 8, 1981

CONSERVATIVES CRITICIZE CHOICE

DR. WILLKE

"I am shocked beyond belief at President Reagan's surprise nomination of pro-abortionist Sandra Day O'Connor to the United States Supreme Court. I'm sure you are too. Her ascension to the high court would be the most devastating blow to the pro-life movement since the Supreme Court legalized abortion on demand in 1973 . . . Mrs. O'Connor also claims to be 'personally opposed to abortion.' But you and I have heard those same words from politicians like Birch Bayh and Teddy Kennedy. Did their 'personal opposition' ever cause them to cast a pro-life vote? No."—Jack Willke, MD, president of the National Right to Life Committee, in a July 15, 1981, Action-Gram to Friends of the Unborn.

SENATOR HELMS

"The information that he [the President] has about the lady and the information that I have about the lady are not consistent, one to the other. He told me that she had not, to his knowledge, participated in the ERA issue, that she was strongly opposed, personally, to abortion."—Sen. Jesse Helms (R-N.C.), on the CBS Evening News, after a meeting with President Reagan, July 7, 1981.

REVEREND FALWELL

"President Reagan's nomination of Judge Sandra O'Connor of Arizona to the Supreme Court is a mistake. Judge O'Connor's record indicates she is not an opponent of abortion on demand and is opposed to attempts to curb this biological holocaust that has taken the lives of more than 10 million innocent babies since the 1973 Roe vs. Wade decision by the Supreme Court that legalized abortion."—The Rev. Jerry Falwell, head of the Moral Majority, quoted in the New York Daily News, July 8, 1981.

SCHLAFLY

"Some of the people who are praising President Reagan's appointment of this judge are people who would never vote for him, who would never back his economic program and who are not his friends. And I hope he won't end up the way Jimmy Carter did—which is to find that he tried to curry favor with his enemies, but he lost out all the way around."—Phyllis Schlafly, interviewed on the CBS Evening News, July 8. 1981.

DR. GERSTER

"It was common knowledge she was philosophically against us in the legislature. It is unforgivable that the White House could ignore this."—Dr. Carolyn Gerster, MD, of Phoenix, Ariz., former head of the National Right To Life Committee, quoted in the Washington Post, July 8, 1981.

NELLIE GRAY

"Please understand clearly that your proposed nomination of Judge Sandra D. O'Connor to fill the vacant seat on the Supreme Court brings deep disappointment and anguish to all pro-life Americans. . . . Please do not nominate a candidate for the Supreme Court whose public voting record indicates that the new justice would cast a vote on the high bench to continue the

slaughter of innocent preborn human beings. P.S.: Pro-lifers find it offensive that we must picket the White House to bring your attention to this matter. We worked in the 1980 primary and general elections so that the innocent preborn children would be protected by your administration."— Nellie Gray, president of March for Life, in a letter to President Reagan, July 14, 1981.

HUMAN EVENTS

"President Reagan, for all his and his aides' assurances, asking conservatives to rally behind a highly uncertain trumpet... What is so difficult to comprehend, however, is why the administration, in making this weightiest of all appointments, selected a nominee of such murky ideological moorings. Under a Reagan presidency, we expected to see a major transformation in the high court, a sea-change shift to the right. But that kind of alteration is not likely to come about with O'Connor-type appointments. Conservatives—no, the country—have a right to expect better."—Human Events, July 18, 1981.

DR. JEFFERSON

"This appointment is appalling."—Dr. Mildred Jefferson, president, Right To Life Crusade

KAREN MILLS

"We're going to fight the appointment all the way."—Karen Mills, past president of Arizonans for Life, quoted in the National Catholic Register, July 19, 1981.

ROBISON

"Any report concerning the appointment of Sandra O'Connor which appears to imply that I have endorsed her is a gross misrepresentation... All evidence indicates that she stood for pro-abortion and that she was pro-ERA. This gave our organization and all pro-family interests cause for grave concern... I have total confidence in the profamily interest groups. If they are convinced that Sandra O'Connor would not be the best choice, then I would certainly stand with those people who have a consistent record of concern for the family."—Excerpt from a clarification statement by James Robison, James Robison Evangelistic Association.

RABBI GINSBERG

"Because of Judge O'Connor's pro-abortion record, it would be a tragedy for the cause of human rights for unborn children to have this appointment confirmed."—Rabbi Hersh M. Ginsberg, director, Union of Orthodox Rabbis of the U.S. and Canada.

MORAL MAJORITY

"The President has made a truly major mistake and we intend to point this out with all the means at our disposal. We consider it Ithe O'Connor appointment! the single most disappointing act since this administration came into office."—Dr. Ron Godwin, vice president and chief operating officer of the Moral Majority, quoted in the Baltimore Sun, July 8, 1981.

PHILLIPS

"The nomination of a pro-abortion feminist to the court is a major blow to the political alliance of social and economic conservatives which began to emerge in 1977 and which contributed significantly to Ronald Reagan's 1980 primary victories as well as legislative turnovers in 1978 and 1980. Right-to-life supporters are not partisan Republicans. For them, protecting innocent unborn children is the overriding issue."—Howard Phillips, national director, The Conservative Caucus, July 9, 1981.

FRAN WATSON

"When Ronald Reagan understands that he will lose the support [in 1984], then maybe the next judges he appoints will respect the right to life of the unborn child. But to accomplish this, the leaders of the Right-to-Life movement must seriously consider establishing an independent political base of support. As long as a pragmatic politician like Ronald Reagan believes we have nowhere else to go, he will continue to give right-to-life rhetoric and pro-abortionists actions."—Fran Watson, state committeewoman, New York Right-to-Life Party.

PAUL BROWN

"Shock and outrage would be a timid expression of our reaction to the O'Connor nomination. We consider this a total and complete sellout of the Republican platform."—Paul Brown, director, Life Amendment Political Action Committee, quoted in the Baltimore Sun, July 9, 1981.

FATHER FIORE

"Apparently, Reagan has forgotten that it was the disaffected Democrats and independent ethnic, blue-collar Catholic and evangelical-fundamentalist Protestants who helped build what appeared to be the beginning of a new majority in the 1980 elections. . . . It is this very constituency that is now outraged at the O'Connor nomination."—Father Charles Fiore, president, National Pro-Life Political Action Committee, quoted in the Wanderer newspaper, July 16, 1981.

JUDIE BROWN

"We are appalled at the obvious fact that President Reagan was extremely ill-advised by members of his own staff in the final selection of Sandra Day O'Connor as his choice for next justice of the Supreme Court. . . . We are prepared to do all within our power to see to it that this nomination is stopped, because we firmly believe that her record as a state senator will ultimately be reflected in her opinions on the issue of abortion once she is seated on the court."—Mrs. Judie Brown, president, American Life Lobby, July 9, 1981.

FRAN CHILES

"As a member of the social issues subcommittee of the 1980 Republican platform committee, I strongly oppose the appointment of Sandra O'Connor to the U.S. Supreme Court. Her record on issues such as ERA, abortion on demand and others does not live up to the platform. I am deeply concerned about this matter."—Fran Chiles, Republican national committeewoman from Texas.

RANDY ENGEL

"The U.S. Supreme Court doesn't need another antilife millstone around its neck in the form of Sandra O'Connor, especially with two of abortion's handmaidens—infanticide and euthanasia—knocking at America's judicial door."—Randy Engel, national director, U.S. Coalition for Life.

WEYRICH

"Perhaps most disturbing to those of us who have been in the conservative trenches for many years has been the attitude of some of the President's closest advisers. On the evening news the day of the O'Connor nomination, a 'high White House official' was reported as saying the nomination would give the President a chance to separate himself from the 'rightwing nuts.' The organizations now being undermined by some of Reagan's aides were working their

hearts out for Reagan in 1976 and 1980 when some of the President's current aides were working against him. Many of the grass-roots conservatives so blithely dismissed by White House aides supported Ronald Reagan when he was being called a 'rightwing nut.'

"The handling of the O'Connor nomination has harmed the conservative coalition which elected Ronald Reagan and a Republican Senate in 1980. And that political reality has implications for the 1982 congressional elections."—Paul Weyrich, director, Committee for the Survival of a Free Congress, writing in The Review of the News, July 29, 1981.

BILLINGS

"Based on information we have received to date, we will oppose the nomination of Judge O'Connor. We believe that President Reagan has been misled concerning her activism on social issues such as abortion and the proposed Equal Rights Amendment."—William Billings, acting president, National Christian Action Coalition, July 9, 1981.

PRO-LIFE PAC

Peter B. Gemma Jr., executive director of the National Pro-Life Political Action Committee, said today that the nomination of Sandra O'Connor to the Supreme Court is a "slap in the face to all pro-lifers." He says: "Every senator should be aware of the fact that our future support will be tempered by this confirmation vote. We want to send a message to the Senate and to the White House that Right-to-Life support cannot be taken for granted."—Press release, July 8, 1981.

EVANGELICALS

Robert Dugan, director of public affairs for the National Association of Evangelicals, applauded Reagan's appointment of a woman to the court. . . . But he expressed "deep misgivings about Judge O'Connor's views on abortion."—The Washington Post, July 17, 1981.

TRUEMAN

"I regret that because of Judge O'Connor's apparent position on the issue of abortion, which seems similar to Justice Potter Stewart's whom she replaces, we cannot expect a positive change from the high court on life-related matters. However, I hope and believe that the political furor raised by Right-to-Life as a result of this unfortunate appointment will influence the President to be more sensitive to the abortion issue so that he will, in the future, appoint judges who respect innocent human life to the Supreme Court and throughout the federal system." Patrick Trueman, general counsel/executive director, Americans United for Life.

SENATOR JEPSEN

"The President has consistently stated his strong support for the rights of the unborn, both in his active involvement in drafting the Republican platform and his most recent support for the Hyde language in the continuing appropriations resolution. Therefore, I am puzzled by the nomination of a person who apparently does not reflect that commitment."—Sen. Roger Jepsen (R-Iowa), quoted in Human Events, July 18, 1981.

CHRISTIAN VOICE

"We are extremely concerned over the nomination of Judge O'Connor. Her past positions on the abortion issue indicate that she does not meet the requirements of the Republican Party platform or the campaign primises of President Reagan to appoint a pro-life justice. . . . We are sick and tired of hearing from people who say they are personally opposed to abortion but continue to act to the contrary. Judge O'Connor must make it crystal clear that as a Supreme Court justice, she would make every possible effort to protect the life of the unborn."—Rev. Robert Grant, chairman, Christian Voice, July 15, 1981.

CONNIE MARSHNER

"I hope Sandra O'Connor is not what she appears to be right now. If this nomination is what it appears to be, then by nominating her, the administration has said to the profamily movement: 'Goodbye. We don't need you. We don't care about you.' In the campaign last fall, millions of lifelong Democrats voted for Reagan because he offered a clear alternative on the abortion issue. If Sandra O'Connor supports the Roe vs. Wade decision, Reagan will have turned his back on his most enthusiastic supporters."—Connie Marshner, chairman, National Profamily Coalition, legislative director, CSFC, Inc., and editor, Family Protection Report.

PROFESSOR WITHERSPOON

"All persons who are genuinely committed to restoring legal protection for the lives of unborn children under our Constitution should vigorously oppose the nomination of Judge Sandra Day O'Connor."—University of Texas law professor Joseph Witherspoon, writing in the National Right To Life News.

"I don't think there's any problem."—Presidential counselor Edwin Meese III, quoted in the Washington Post, July 9, 1981.

METRIC CONVERSION BOARD MERITS SUPPORT

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. McCLORY. Mr. Speaker, the Daily Courier News, published in Elgin, Ill., in my congressional district, has produced an illuminating and persuasive editorial in support of our Nation's conversion to the metric system of weights and measures.

Mr. Speaker, this issue should cease to be controversial as we view the wisdom of a general conversion to the metric system which could benefit our society as a whole and particularly the business community. Mr. Speaker, I have visited a large number of industries in my congressional district during this and earlier district work periods, and during each visit I have inquired as to the feasibility of converting to metric standards. It is my observation that the conversion can take place relatively easy and inexpensively in most cases. Foreign markets require the production of goods according to metric measurements. It follows that we can increase our foreign trade, bring out Nation into conformity with every other industrialized nation of the world, and bring uniformity to our system of measurements from which every segment of our society can benefit.

Mr. Speaker, I am pleased to attach the Courier News editorial entitled "Time to Get Started on Metric Conversion," as follows:

Time to Get Started on Metric Conversion

A decade ago, the National Bureau of Standards recommended that America convert from the English system of weights and measures, to become "predominantly metric" by 1981.

Despite the Metric Act of 1975, which promotes voluntary metric conversion, most Americans continue to use yards, pounds, quarts and Fahrenheit degrees, while the rest of the world uses meters, grams, liters and Celsius degrees.

We believe that American measurements should become dominantly metric.

Voluntary efforts have largely failed. Although General Motors plans to be fully metric by next year, and California gasoline is now sold in liters, evidence of the nonmetric system abounds, from supermarket shelves to shipping boxes.

The U.S. Metric Board, established by the 1975 Metric Act, is powerless to push the metric system forward, because it cannot do more than "educate, inform and assist parties who make a voluntary decision to convert," according to its first president, Louis E. Polk. Partial conversion creates the crippling problem of some industries using metric and some English measurements.

The Reagan "new beginning" offers an opportunity for this country to convert, once and for all, to the metric system.

The arguments for conversion are compelling. Scientific developments and technological advances are measured metrically. International trade is based on the metric system. American products which are not metric cannot be easily sold abroad, and foreign metric machinery is not easy to employ here. Once learned, the decimal-based metric system is simpler to use in transactions than the more cumbersome, non-decimal English system.

Most important, we are isolating ourselves from the rest of the world by sticking to the English system which even the English are abandoning.

Conversion is expensive. It involves retooling of machines, rewriting regulations, reducation, and a host of difficulties. Some unions and industries oppose it, because it would take away de facto protectionist barriers based on equipment size. Folklorists argue that doing away with the pound and foot will rob our culture of character.

But the economic, technological and social benefits of metric conversion far outweigh the problems. A fully metric America would enjoy increased world trade, greater access to discoveries, and more efficient transactions.

We urge the president to seize the initiative from his tax and budget victories, to present Congress with a program of guidelines—and deadlines—for conversion to the metric system.

Economic incentives, rather than mandatory rules, would be the Reagan approach. But the aim must be to phase in the metric system, on all levels, along a definite timetable. The examples of conversion in Britain and Canada should be used to indemnify businesses hurt by conversion.

Progress toward the goal of a "predominantly metric" America should be measured in meters, not inches.

THE CONFLICT IN LEBANON

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES
Wednesday. September 9, 1981

 Mr. HAMILTON. Mr. Speaker, I am inserting my foreign affairs newsletter for September 1981, into the Congres-SIONAL RECORD:

THE CONFLICT IN LEBANON

During the past six years, Lebanon has resembled a battlefield more than a nation.

Communal and political tensions among Christians. Muslims, and Druze have plagued Lebanon since the 1800's. present crisis combines these tensions with the involvement of three non-Lebanese actors, each of which pursues its own interests, upsets a fragile sectarian balance, and weakens the central government. Syria has had some 22,000 troops in Lebanon since 1976. It seeks to ensure that Lebanon will remain responsive to its concern for security and its political interests. Israel, which also has a concern for security, wants to protect its northern border. It has ties with Colonel Haddad, a former Lebanese army officer who commands a Christian enclave along the Israeli border, and it has ties as well with the Lebanese Front, a largely Maronite Catholic group which controls areas north and east of the capital city of Beirut. Some 400,000 Palestinians, mainly refugees, are also present in Lebanon. Among them are thousands of armed guerrillas who regularly provoke Israel's intervention.

Peace can come to Lebanon with the resolution of three key problems. First, the central government must regain authority in the nation. Today, its authority hardly extends outside parts of Beirut. Second, the Lebanese political system must be modified because it no longer reflects demographic and sectarian realities. The National Pact of 1943 enables the Christians, who represent about 35 percent of the Lebanese population, to have disproportionate influence in the country even though Muslims and Druze constitute an absolute majority. Third, Lebanon's future depends on a solution to the Arab-Israeli conflict, one which addresses the problem of the Palestinians and thereby eliminates the need for Israeli and Syrian intervention. Unfortunately. none of these problems will be solved soon.

As the conflict in Lebanon now stands, there are three potentially explosive fronts. Beirut has been racked by factional strife since 1976. East Beirut is controlled by the Lebanese Front, but in West Beirut the Palestine Liberation Organization (PLO) has a major military presence. The few fixed points of access into the city are patrolled by the Lebanese and Syrian militaries. The continued division of Beirut symbolizes the threat of partition that hangs over the entire country. The battle in southern Lebanon between Israelis and Palestinians has dragged on since 1978. Thousands of Lebanese have been left dead, injured, or homeless, and Israeli casualties have also been significant. The continuing presence of a Nations peacekeeping (UNIFIL) has diminished but not eradicated the violence, and Colonel Haddad's enclave has not proved to be an effective buffer between Israel and Lebanon. A third front has opened up around Zahlah, a town on the main road between Lebanon and Syria. Skirmishes between Lebanese Front and Syrian forces broke out there in 1980, but the fighting soon flared into a dangerous Syrian-Israeli confrontation.

Most Lebanese today despair of the conflict in their country and lament that their destiny is in non-Lebanese hands. They want to regain control of their country and bring about the disengagement of Syrian and Israeli forces. They seek reconciliation in their nation through a stronger central government and army. Unless these goals are achieved to a certain extent, the presidential election scheduled in 1982 may be impossible. If it were, the political crisis could grow worse and make the chance of reuniting the country even more remote.

The United States has always argued for the territorial integrity, independence, national sovereignty, and unity of Lebanon. It has opposed partition. More than \$200 million in military and economic assistance has helped strengthen the central government and army. Beyond rhetorical and financial support, however, concerted diplomatic efforts are needed to meet Lebanon's many problems. These efforts should build on Lebanon's strong currency, its resilient economy, and its entrepreneurial class. Ambassador Philip Habib's recent mission to Lebanon sought relief of the siege of Zahlah, installation of the Lebanese army and gendarmerie there, and removal of Syrian missiles from the area. This mission could serve as the catalyst for an effort of greater scope to help achieve the goals the Lebanese people desire.

American diplomacy should: support the Lebanese central government with additional political, military, and economic assistance; explore the creation of a wider buffer zone between opposing forces and the expansion of UNIFIL's operations; attempt to reduce the flow of weapons into the country; help the central government bring the Palestinian militia under control; and aim to foster conditions that will allow the non-Lebanese actors to withdraw. Furthermore, American diplomacy must recognize that Colonel Qaddafi of Libya and some factions of the PLO will try to disrupt such initia-

One hopeful sign for Lebanon is the Baytal-Din initiative of Saudi Arabia, Syria, Kuwait, and Lebanon. So far, it has achieved modest success by reducing hostilities.

As Lebanese political groups of all persuasions meet today, their mood favors national reconciliation. The task of the United States is to set in motion the process that will permit Lebanese Christians, Muslims, and Druze alike to reclaim their own land.

TRIBUTE TO SIX BOY SCOUTS

HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. NELLIGAN. Mr. Speaker, I join my colleagues today in honoring six Boy Scouts from Luzerne County in the 11th District of Pennsylvania, which I am privileged to represent. These six Scouts from Troop 352 of West Pittston, Pa., have recently received the highest Scouting award, the coveted Eagle Scout Award.

Morgan C. Williams, 18, the son of John and Beverly Williams, is a recent graduate of Scranton Preparatory School, where, in addition to his Scouting activities, he has been active in sports.

Ronald J. Pollard, 18, the son of Mr. and Mrs. Warren E. Pollard, will be a senior at Wyoming Area High School this year, and is a member of the Key Club in the West Pittston area.

John D. Marko, 18, the son of Mr. and Mrs. John Marko, has been active in band and chorus activities while a student at Wyoming Area High School, from which he was recently graduated.

Jeffrey B. Sheridan, 18, also a recent graduate of Wyoming Area, is the son of Eugene C. and the late Margaret Baird Sheridan. Besides his activities in music programs, he was recently commended by the borough council for his efforts on behalf of the community

Joseph C. Valenti, 19, the son of Mr. and Mrs. Michael Valenti, was graduated from Wyoming Area in 1980 and is currently attending Luzerne County Community College, where he is majoring in criminal justice.

Richard Mariette, 18, the son of Mr. and Mrs. Jean C. Mariette, is a recent graduate of Wyoming Area High School and is presently working toward the Bronze Scouting Award.

I commend the troop's Scout leaders, Bill Goldsworthy and Dom Aritz, for spurring these young men on to such outstanding achievements, and I join parents, friends, and members of the community of West Pittston in wishing these young men equal success in their future endeavors.

SMALL ISSUE INDUSTRIAL REVENUE BONDS

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. RANGEL. Mr. Speaker, the Ways and Means Oversight Subcommittee recently conducted a review of the numerous and complex issues surrounding small issue industrial revenue bonds (IRB's). As a result, the subcommittee adopted recommendations for legislative change and submitted these recommendations to the Ways and Means Committee for consideration. At the request of the subcommittee, I am introducing legislation which reflects the substance of the subcommittee's recommendations.

In April of this year, the Ways and Means Oversight Subcommittee held hearings on small issue IRB's. The testimony presented to the subcommittee during 3 days of public hearings, as well as the extensive research undertaken by the Congressional Budget Office at the request of the subcommittee, indicates that there has been a

EXTENSIONS OF REMARKS

significant increase both in the volume and diversity of small issue IRB's. While the subcommittee believes that in many cases IRB's are used with discretion under narrowly drawn State public purpose requirements, there, nonetheless, is a need to clarify the Federal guidelines with respect to both the volume and intended purpose of IRB financing. Clearly some abuse have occurred. In some cases, IRB's have been issued indiscriminately, and even excessively. To the extent this has occurred, there have been unwarranted Federal revenue losses.

Mr. Speaker, today I am introducing this legislation in an attempt to responsibly address the expended use and volume of IRB financing. I believe this legislation strikes a reasonable balance between the Federal Government's responsibility to assure that the IRB program is used to advance public purposes at minimal cost to the Treasury, and the States need to have a flexible financing mechanism that will assist them in their effort to stimulate economic development.

In all likelihood the full Ways and Means Committee will address the subject of small issue IRB financing and review the subcommittee's proposal. Accordingly, I invite each Member to support this legislation and welcome comments and suggestions with regard to the proper use of this taxexempt bond financing tool in the future.

The full text of this legislation follows:

A bill to amend section 103 of the Internal Revenue Code of 1954 with respect to the small issue exemption

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 103 of the Internal Revenue Code of 1954 (relating to interest on certain governmental obligations) is amended by redesignating subsection (i) as subsection (j) and by inserting after subsection (h) the following new subsection:

"(i) SPECIAL RULES RELATING TO SMALL ISSUE EXEMPTION OF SUBSECTION (b)(6).-(1) STATE REPORTING REQUIREMENTS

"(A) In GENERAL.-Not later than February 15 of calendar year 1983 and calendar year 1984, each State shall submit to the Secrea report containing such information as the Secretary may by regulations require with respect to small issue industrial development bonds of such State (or any political subdivision thereof) which were issued during the preceding calendar year.

"(B) GOVERNOR REQUIRED REPORT.-Any report required to be submit-

ted under subparagraph (A)—
"(i) shall be submitted by the Governor of the State (or any department or agency of the State designated by the Governor for purposes of this paragraph), and

"(ii) shall be in such form as the Secretary

shall by regulations prescribe.

"(C) SMALL ISSUE INDUSTRIAL DEVELOPMENT BONDS.—For purposes of this paragraph, the term 'small issue industrial development bond' means any industrial development bond (as defined in subsection (b)(2)) to which paragraph (1) of subsection (b) does not apply solely by reason of paragraph (6) thereof.

"(2) Public Hearing Requirements.-Paragraph (6) of subsection (b) shall not apply

to any issue of obligations unless—
"(A) the issuing entity has conducted a public hearing regarding such issue before approving such issue;

(B) the issuing entity has made (and published a statement of) the following find-

"(i) the issue will not create an unjustified competitive disadvantage to existing businesses in the area,

"(ii) the issue will stimulate the local economy

"(iii) the issue will result in the creation (or retention) of a significant number of jobs, and

"(iv) the project being financed with the issue would not have been undertaken with-

out tax-exempt financing; and "(C) the issuing entity has submitted to the Governor of the State (or any department or agency of the State designated by the Governor for purposes of this paragraph) a certification that the requirements of this paragraph have been met with re-

spect to the issue.

"(3) Targeting commercial-type projects TO ECONOMICALLY DISTRESSED AREAS

"(A) TARGETING.-Paragraph (6) of subsection (b) shall not apply to any issue if a significant portion of the proceeds of such issue is to be used (directly or indirectly) to provide commercial-type property unless such property is used predominantly in an economically distressed area.

"(B) PROJECT MAY BE LOCATED IN ADJACENT AREA UNDER CERTAIN CIRCUMSTANCES.-The requirement of subparagraph (A) that the property be used predominantly in an economically distressed area shall not apply if the Secretary and the Secretary of Housing and Urban Development determine-

(i) that there is no suitable site for the property within the economically distressed

area

"(ii) that the property will be located directly adjacent to such area, and

"(iii) that the property will substantially contribute to the economic development of such area.

"(4) DEFINITION OF COMMERCIAL-TYPE PROP-ERTY

"(A) In GENERAL.-For purposes of this subsection, the term 'commercial-type property' means any property used in an activity classified in one of the following Standard Industrial Classification codes:

"(i) division F—wholesale trade, "(ii) division G—retail trade,

"(iii) division H-financial, insurance, real

"(iv) division I-services (except group no. 805 (nursing and personal care facilities) and group no. 806 (hospitals)), and

'(v) activities at central administrative offices (within the meaning of appendix A).

"(B) RULES FOR APPLYING CLASSIFICATION codes.-For purposes of subparagraph (A), classifications shall be made in the same manner as they are made under the most recent edition of the Standard Industrial Classification Manual published by the Federal Government before the date 90 days before the date of the issue.

"(5) ECONOMICALLY DISTRESSED AREA DE-

FINED.

"(A) In general.—For purposes of this subsection, the term 'economically distressed area' means an area composed of one or more contiguous census tracts, enumeration districts, or block groups-

"(i) which are located in the same city or county.

"(ii) which have a population of at least 2,500.

"(iii) in which at least 70 percent of the families have incomes below 80 percent of the median income for the State in which such area is located, and

"(iv) in which at least 30 percent of the families have incomes below the national

poverty level.

"(B) INFORMATION USED.—Determinations under subparagraph (A) shall be made on the basis of the most recent decennial census for which data are available before the date 90 days before the date of the issue

"(6) PROCEEDS NOT TO BE USED TO RELOCATE ACTIVITIES FROM ONE STATE TO ANOTHER. Paragraph (6) of subsection (b) shall not apply to obligations where any part of the proceeds is intended to facilitate the relocation of a business activity from one State to another

"(7) PROCEEDS MAY NOT BE USED TO FINANCE PURCHASE OF FARMLAND .- Paragraph (6) of subsection (b) shall not apply to any issue if a significant portion of the proceeds of such issue is to be used (directly or indirectly) to finance

"(A) the acquisition of land which is to be used primarily for farming purposes, or

"(B) the acquisition of other real property to be used primarily for farming purposes if such acquisition is in connection with an acquisition described in subparagraph (A).

For purposes of this paragraph, the term farming purposes' has the meaning given to such term by section 6420(c)(3)."

(b) Paragraph (6) of section 103(b) of such Code (relating to exemption for small issues) is amended by adding at the end thereof the following new subparagraph:

"(K) TERMINATION.—This paragraph shall not apply to any obligation issued after December 31, 1983."

(c) The amendments made by this section shall apply to obligations issued after December 31, 1981.

SEC. 2. (a) The Secretary of the Treasury shall conduct a study on the use of small issue industrial development bonds.

(b) Not later than July 1, 1983, the Secretary of the Treasury shall submit to the Committee on Ways and Means of the House of Representatives a report on the study conducted under subsection (a) (together with such legislative recommendations as he may deem apropriate).

(c) For purposes of this section, the term "small issue industrial development bond" means any industrial development bond (within the meaning of section 103(b)(2) of Internal Revenue Code of 1954) to which paragraph (1) of section 103(b) of such Code does not apply solely by reason of paragraph (6) of such section.

EXPLANATION OF ABSENCE

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

• Mr. GREEN. Mr. Speaker, I rise to explain why I was paired against the motion to suspend the rules and pass H.R. 4242, the so-called tax package, on Tuesday, August 4, 1981.

First, why did I pair instead of being present to vote? Longstanding family plans had taken me to Maine on the preceding weekend and to northern New Hampshire on Monday, August 3, 1981. I had nonetheless made plans to return to Washington by getting up before dawn on Tuesday, driving to Montpelier, Vt., catching a 7:15 a.m. Precision Airlines flight from Montpelier to Boston, and then catching a 9:10 a.m. Delta Airlines flight to Washington. However, with the onset of the air traffic controllers' strike, Precision Airlines canceled all its flights, and my staff, on checking Delta and the other airlines, advised me that, even if I could get to Boston some other way, there was no assurance that a flight would be available that could get me to Washington in time. Accordingly, I arranged for a pair.

Second, why did I oppose the motion? I had supported the tax package when it passed the House on Friday, July 30. However, I do so only after unsuccessfully opposing the rule under which the tax package was considered by the House, because it denied us a separate vote on tax breaks for the oil industry.

The effect of the motion to suspend the rules was identical. Under normal House procedures for considering conference reports it would have been possible to have a separate vote on the oil provisions, and to have instructed the House conferees to agree to the Senate position on those provisions, which provided for substantially less in the way of tax breaks for the oil industry than did either the House bill or the conference report. The motion to suspend the rules made that effort impossible.

In summary, I supported the basic tax package, but opposed the oil industry tax breaks that were added to it in Congress. However, the motion to suspend the rules and pass H.R. 4242 carried, and thus the tax package passed with the oil tax breaks.

INTERVIEWS WITH MEESE, OTHERS MAKE CLEAR PRESI-DENT UNINFORMED ON O'CON-NOR RECORD

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. McDONALD. Mr. Speaker, one of the saddest aspects on the nomination of Mrs. O'Connor to the Supreme Court has been the apparent misinformation and incomplete information given to President Reagan. If the President had chosen her after being made aware of her complete record, then so be it, but the evidence is mounting that he acted without full

knowledge of her record, particularly in the State legislature. In this connection, I am inserting an article that appeared in Conservative Digest for August 1981, for the edification of my colleagues.

CONSERVATIVE DIGEST ARTICLE STATES PRESI-DENT UNINFORMED ON O'CONNOR RECORD

In a speech in Chicago the day he announced his intention to nominate Sandra Day O'Connor to the Supreme Court, President Reagan said that he had done this after "examining her whole record in public life." But, there is compelling evidence that there is important information about Mrs. O'Connor which the President did not know. The following data was revealed in CD interviews with: presidential counselor Edwin Meese; a senior presidential aide who requested anonymity; counselor to the Attorney General Kenneth Starr; and Tom DeCair, director of public information for the Justice Department.

Meese says the text of the 1970 abortionon-demand bill voted for by Mrs. O'Connor was "not seen" by the President. This bill appears to have been, he says, "a therapeutic abortion act and a lot of legislators, even Ronald Reagan as governor, did that at the time without it being apparent what problem it was."

This is not correct. The bill Mrs. O'Connor supported was a radical departure from the restrictive abortion laws in effect in most states in 1970.

Messe says the 1973 family planning bill supported by Mrs. O'Connor "had nothing to do with abortion." He says "no," he never saw this bill and it wasn't read "because we didn't have it."

Meese says "yeah," Mrs. O'Connor was asked her views on the Supreme Court's 1973 Roe vs. Wade decision legalizing abortion on demand. Did she say it was good or bad law? Meese: "Uh, I don't think she was asked in those terms." White House press spokesman David Gergen says Mrs. O'Connor was not asked about Roe vs. Wade.

Prior to her being chosen, or after, was Mrs. O'Connor asked if she favored any kind of legal protection for the unborn? Meese: "I think there was a hesitation to ask how she would rule on a particular case. I'm not sure she was asked in the form you put this question."

Later in this interview, Meese says, when asked if he feels it is improper or injudicious to ask Mrs. O'Connor about her own past rulings or past rulings of the Supreme Court, "not particularly, no. I don't."

Meese says Mrs. O'Connor's views on abortion, the family and other social issues were "generally known" but they didn't affect the President's decision "because of her basic personal attitudes."

An anonymous senior aide says that it is "entirely possible" that the only negative information received about Mrs. O'Connor's record supporting legalized abortion was "sent in by the people concerned about these votes."

Like Meese, this senior aide was unsure about what the 1973 family planning bill allowed, saying that some people thought it authorized only the distribution of sex education information. Did you see the text of this bill? Senior aide: "Oh no, we didn't. We didn't go back and dig up the actual piece of legislation. The President didn't choose to do this. He could have but didn't."

Regarding Mrs. O'Connor's acknowledgement that in 1974 she voted against urging Congress to constitutionally protect the

lives of the unborn, the question is asked: And this didn't bother the President? Senior aide: "Well, I suppose not, because they discussed it."

Has Mrs. O'Connor said anything indicating she favors any kind of legal protection for the unborn? Senior aide: "Not that I'm aware of."

Was Mrs. O'Connor asked if she shares the President's view that there should be a Human Life Amendment to the Constitution? Senior aide: "No, she wasn't asked about specific issues at all on a whole range of subjects."(1)

Counselor to the Attorney General Kenneth Starr says he made no effort to check out Mrs. O'Connor's statement that she never had any disputes or controversies with national pro-life leader Dr. Carolyn Gerster, who lives in Arizona. Why did he make no such effort? He refuses to say. In fact, Dr. Gerster and Mrs. O'Connor had several disagreements about abortion.

Starr says the record is "not all that clear" and "a bit murkier than some are suggesting" as regards Mrs. O'Connor's 1970 vote for an abortion-on-demand law. False. The April 30, 1970, Arizona Republic reports that Mrs. O'Connor voted for this bill.

Would you say Mrs. O'Connor is antiabortion and pro-life in the way the President and the 1980 GOP platform are? Long pause. Starr: "I don't know if I can deal with that question on those terms." Starr declines to use "shorthand" to describe her views saying that he thinks such phraseology "impedes and doesn't advance the inquiry."

Doesn't it feel strange to have people like NOW's Eleanor Smeal and Sen. Howard Metzenbaum gushing over your Supreme Court nominee? Starr: "I think it's to be expected that the head of NOW would gush over a woman." You think she would have gushed if the nominee had been Phyllis Schlafly? Starr: "I don't know. Maybe not as effusively."

Justice Department public information director Tom DeCair says "no," all of the information in the July 7 Starr memo was not "entirely" known about prior to the President's choice of Mrs. O'Connor.

DeCair says, regarding Mrs. O'Connor's positions on family-related issues, that "no," information on "all of these things" hadn't been developed because there are "no records" on how she voted in subcommittees and caucuses. Talks with her colleagues and her political opponents and the reading of newspapers would, of course, have developed this information.

At the daily White House news briefing on July 7, 1981, presidential press spokesman Larry Speakes told reporters:

"What we're saying is that we would encourage you to look very, very thoroughly into her votes in the state legislature. . . . I would encourage you to look very closely at the record of the votes in the Arizona legislature."

Good advice. Too bad the President's men didn't follow it when they checked out Mrs. O'Connor.

CONSERVATION—LET THE BUYER BEWARE

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

• Mr. LaFALCE. Mr. Speaker, on July 24, the General Accounting Office released a report entitled "Consumer Products Advertised To Save Energy-Let the Buyer Beware." The report noted that the American consumer still faces serious obstacles to making cost-efficient purchases on the conservation marketplace. As the conservation movement has grown in response to rising energy prices and our desire to remove the OPEC stranglehold from our Nation's energy supplies and our economy, conservation applications have flooded the marketplace. However, the level of information needed to make rational choices among competing products is available to only the most information hungry consumer.

The GAO report concludes that the obligation to inform consumers about the best mix of conservation applications is one that must be shared among the Federal Government, State, and local governments, the industry, and consumers themselves. Indeed, government has not only an obligation but an interest in insuring the most efficient use of our conservation dollars. Grants and tax credits for conservation investments in the home and commercial and industrial buildings give us all a stake in seeing that these dollars are spent wisely and efficiently.

Mr. Speaker, the GAO report is a timely reminder of the need for continued cooperation among the public and private sectors. As the Congress considers budget cuts and regulatory reforms aimed at streamlining the Federal Government, we must not lose sight of the positive role that Government must play in conjunction with industry and the public. For the benefit of our colleagues, I insert in the Record the summary of the GAO study:

CONSUMER PRODUCTS ADVERTISED TO SAVE ENERGY—LET THE BUYER BEWARE

DIGEST

In efforts to reduce energy costs—and in response to government encouragement, including tax credits—consumers spend bilions of dollars each year on energy-saving products. However, consumers face problems with advertisements designed to induce them to purchase such products. Accordingly, GAO conducted a review to look at the types of products and claims in the marketplace, evaluate the potential of energy-saving claims to mislead consumers, and assess the effectiveness of Federal and State efforts to protect consumers from inaccurate or misleading claims.

GAO noted hundreds of advertisements having questionable energy-saving claims.

The ads (1) appeared to exaggerate a product's capabilities, (2) did not disclose material facts affecting the product's performance, or (3) made performance claims which consumers could not compare with competing brands because of the lack of standard, generally accepted measures of energy savings. Consumers cannot easily determine the

Consumers cannot easily determine the accuracy of energy-saving claims because sellers generally are not responsive to consumer's requests for information to support the claims; the data that sellers provide consumers to support claims are often inaccurate, not relevant, or highly technical and therefore difficult for most consumers to understand or evaluate; and consumers often cannot learn through experience and switch to more effective products because (1) the energy savings are not always measurable even after purchase and (2) the purchases are often costly and are made infrequently.

FEDERAL CONSUMER PROTECTION EFFORTS

The Congress mandated that the Federal Trade Commission (FTC), the primary Federal consumer protection agency, take specific actions to prevent unfair and deceptive acts and practices relating to energy conservation. During fiscal years 1978 through 1980, FTC spent about \$1 million annually on a program designed to determine whether energy-saving claims were accurate, sufficiently informative, and based on standard, generally accepted measures of energy savings so that product brands can be compared.

Among FTC's accomplishments are two regulations aimed to make sure that sellers of home insulation and appliances provide consumers with comparable and accurate information on their products' energy efficiency or annual operating cost. In addition, FTC has, to varying degrees, acted to stop questionable claims being made by obtaining consent orders, requiring sellers to substantiate questionable claims, and conducting investigations. FTC also attempted to minimize some consumer problems by publishing guides and distributing factsheets to consumers and consumer groups alerting them about energy-saving claims for some products

While FTC has made progress in accomplishing its objectives, it was not able to rapidly reduce consumers' problems with energy-saving claims because staff assigned to energy cases also worked on higher priority, nonenergy cases; staff was unable to give attention to all the many small, widely dispersed companies making inaccurate or misleading claims; and FTC had to rely on existing test reports and no-cost or low-cost technical support which was not always readily available.

Furthermore, FTC experienced difficulties assuring that claims were comparable and meaningful to consumers, because testing or advertising standards that would provide a common base for the claims had not been developed. FTC was working with several industry groups to develop voluntary standards.

Through enforcement of its mail fraud statutes, in fiscal year 1980 the Postal Inspection Service established a priority program to take action against sellers misrepresenting energy-saving products through the mails; however, it has limited its efforts primarily to stopping inaccurate claims for automotive retrofit devices.

STATE AND LOCAL CONSUMER PROTECTION AGENCIES' EFFORTS

Numerous State and local agencies also try to protect consumers from unfair or deceptive trade practices. The primary law enforcement agency for preventing inaccurate or misleading claims is the State attorney general's office. The district attorney's office is also involved, but to a more limited extent.

Both the State attorney general's and district attorney's offices have eliminated some inaccurate or misleading energy claims, but those efforts have generally been limited.

Lack of resources, limited coordination, and the need for testing and expert testimony are the main factors limiting State and local consumer protection agencies' efforts regarding inaccurate or misleading energy-saving claims. As a result, State and local consumer protection agencies have not been able to significantly or rapidly reduce such claims.

FTC and the Department of Energy (DOE) have promoted various activities to foster information sharing among Federal, State, and local consumer protection agencies. The most substantial is a DOE-funded, 2-year, \$200,000 clearinghouse to promote the exchange of needed technical and product information.

CONCLUSIONS AND RECOMMENDATIONS

Consumers can contribute to the Nation's interest to conserve energy by investing in products that reduce energy use. GAO believes that continued government efforts are needed to protect consumers from being misled by advertisements making energy-saving claims. Therefore, FTC should continue to work with industry groups to develop guidelines for performance testing and advertising. In the meantime, GAO recommends that FTC alert consumers by publishing additional factsheets about some of the difficulties with claims and ads.

GAO also recommends that the Secretary, DOE, work with the information clearing-house to improve the sharing of technical and product information. Until these agencies take the recommended actions and energy-saving claims become more accurate, meaningful, and comparable, GAO believes that the best advice for consumers is "let the buyer beware."

FTC'S COMMENTS

FTC said that GAO overstates the problems consumers are having in evaluating energy-saving claims for products because GAO failed to distinguish between "fraudulent" and "legitimate" products. GAO believes that any products' claims having questionable accuracy, being potentially misleading, or lacking comparability may cause consumer problems. FTC did not specifically comment on GAO's recommendation.

DOE'S COMMENTS

DOE acknowledged that its grantee is extending its outreach efforts and will be working with FTC staff to overcome their concerns about public disclosure of information they provide to the information clearinghouse. DOE also commented that industry and supporting government efforts, designed to improve the availability and accuracy of information on energy-related products, are important supplements to Federal consumer protection efforts.

HIGH INTEREST RATES

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

HAMILTON. Mr. Speaker, I would like to insert my Washington report for Wednesday, September 2, 1981, into the Congressional Record:

HIGH INTEREST RATES

Interest rates are at their highest level since the Panic of 1873, and almost everyone is feeling the pain. The prime rate (the rate charged by commercial banks for shortterm loans extended to their very best customers) stands at 20.5% today, three times the annual average of 6.84% five years ago. A farmer or small businessman pays the prime rate plus two to four percentage points to borrow money for his operations. Would-be homeowners are staggered by 17% rates for mortgages. Banks pay 16% to 18% or higher to attract deposits. There is no indication that high interest rates will fall anytime soon.

There can be no question that high interest rates wreak havoc in the economy. They stymie construction, stop families from purchasing homes, cause savings and loan institutions to run into the red, depress the automobile industry, and make economic life miserable for farmers, businessmen, and nearly everyone else. Hoosiers mention high interest rates at each and every stop I make in southern Indiana. Their deep concern and the obvious impact of high interest rates suggest to me that the nation's economy will not tolerate the strain much longer

without plunging into recession.

Interest rates are really the price of money. They are set not by the President or the Congress, as many people believe, but by the interaction between the demand for money and credit and the supply of money and credit. Since the supply of money is controlled by the Federal Reserve System, the nation's central bank, the actions of that agency have a major effect on interest rates. However, anything that affects either the demand for or the supply of money will cause interest rates to fluctuate.

Several factors are pushing up the level of interest rates today. Inflation and the expectation that it will continue prompt lenders to ask for higher interest rates on the loans they make. Such rates are necessary in an inflationary economy to insulate the

lenders from loss

The budget deficit of the federal government and the pessimism that people feel about it form another important set of factors. Despite President Reagan's promise of a balanced budget by 1984, the deficit is going to stay very high. The President sees a deficit of \$42.5 billion next year and \$22.9 billion in 1983, but most observers think that the figures will be substantially higher. Yet the more money the government borrows to finance the deficits, the less money there is for the private sector and the higher the cost of borrowing.

Still another factor behind the high interest rates is the policy of tight money (the policy of slowing the growth of the supply of money, which keeps interest rates higher than they would otherwise be). The Secretary of the Treasury has said that tight money is an integral part of the fight against inflation, and virtually everyone agrees that consistently slow growth in the

supply of money will trim inflation in the long run. Tight money is probably the most common weapon against inflation in use among western governments today. In the short run, however, the high interest rates that follow tight money actually add to inflation by raising the cost of items bought on credit. Another basic problem with such a policy is that while the cure it works is only gradual, the economic pain it brings is immediate and sharp. As long as tight money alone is being used to combat inflation, there will be upward pressure on interest rates. In Mr. Reagan's economic program, there is a clear and strong tension between tight money and the demand for money in an economy which the President wants to grow rapidly. The large budget deficits combine with tight money to hamper economic growth.

I am frequently asked what the Congress can do about high interest rates. Although it does not control interest rates directly, the Congress can help get them to come down by balancing the federal budget. A balanced budget would contribute to lower interest rates in two ways. First, it would get the government out of private capital mar-If the government were out of those markets, there would be less competition for funds and interest rates would fall. Second. balanced budget would signal both the Federal Reserve System and private capital markets that the government was using the budget to fight inflation, not to worsen it. Slow growth in the supply of money would no longer result in record-breaking interest rates. Furthermore, the Federal Reserve could even allow the supply of money to grow somewhat more rapidly without risking a new round of increases in wages and prices. The markets would be less inclined to expect that inflation would continue. Some downward pressure would be brought to bear on interest rates

The present economic program depends on a fiscal policy which is loose (the deficit is large) and a money policy which is tight (the supply of money is growing slowly and interest rates are high). The difficulty with such a program is that it throws onto money policy the entire burden of the fight against inflation. In my opinion, the approach of the President is exactly the reverse of the approach we should be using. What is needed is a fundamental shift in the mix of fiscal and money policies. Our goal should be to tighten fiscal policy (balance the budget) so that money policy can be relaxed (the supply of money can, if necessary be expanded somewhat more rapidly). One important result of such a shift would be a decline in the interest rates which are proving to be so harmful to the

economy.

JAMES EUGENE "JIM" PRATER

HON. JOHN J. DUNCAN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. DUNCAN. Mr. Speaker, of all the joys that are known to man there is a special pride in the knowledge that one lives a full life. A life of adventure and opportunities which are grasped with vigor, and treasured throughout the years. After a century of hard work and joyous adventures James Eugene "Jim" Prater has many treasures and continues to live a full

Jim Prater's life ranges from the mountains of east Tennessee to the cattle lands of Oklahoma. His has been a journey boys used to dream of, from the wilds of the Indian territory to the modern industrialization of the South. Along the way Prater has not only collected memories, but also left them. This is what endears him to the people of Blount County.

How else could one explain the fervor with which the citizens have prepared to celebrate his centenary. Jim Prater will be honored by these east Tennessee residents, Friday at the George Washington Masonic Lodge in Louisville, for his life and contributions to the community.

He grew up along the banks of the Tennessee with "a hand in the river. There his family farmed and operated a ferry which carried many across the water. As a boy he would sometimes take a passenger across in his own small boat for a 10 cent fare. Lowe's Ferry was across the river and 2 miles from the birthplace of Civil War hero Adm. David Farragut. Prater recalls the dedication of the birthsite by another war hero, Adm. George Dewey, who was Farragut's protege.

At 20 he began his travels to the West. He began in St. Louis, Mo., as a pipefitter with another Blount countian. He worked for \$45 a week with the pay in a combination of \$2.50 gold pieces and \$1 bills. He moved on working as a wholesale grocer in Paris, Tex., and spending time in Dodge and Bonham, Tex., and Hugo, Okla.

At the time Oklahoma was still the Indian territory. It was there Prater began his affiliation with the Masons, membership he has kept active to this day. He settled down to managing 40,000 acre cattle ranch near the Red River. Despite the further opportunities which awaited him, he returned to Tennessee because of his wife's ill health.

Prater went to work for Alcoa in Tennessee, a plant which stands for the beginnings of southern industrialization. During his 18-year tenure there he hired John Harper of Louisville, Tenn., a man destined to become the president of the Aluminum Co. of America. He also managed the plant's four cafeterias for a time overseeing the dietary needs of the workers.

His own prescription for good health and longevity includes a large breakfast featuring steak or roast beef, a hearty lunch, and a light supper. He avoids alcohol, but succumbs to the temptation of sweets. Visitors to his home are sometimes able to partake of his delicious cream candies, which they often receive as gifts.

Citizenship is another of Jim Prater's assets. He has participated in every election since records have been

kept. Though he calls himself a Democrat, his first vote was cast for a Republican candidate for sheriff in Blount County. Given the politics of east Tennessee he has found himself in the same position many other times, because the Democrats in Blount County do not get enough candidates running.

Prater also enjoys music, particularly of his own making. He has played the piano, bass violin, guitar, and drums. He studied voice at Murfreesboro and sung professionally. An orchestra Prater directed was featured at one of the popular spas near Blount County at the turn of the century.

He still entertains guests with his violin, playing renditions of "Moonlight and Roses," "Cruising Down the River on a Sunday Afternoon," and "Let Me Call You Sweetheart," a tribute to his late wife. He still calls Effie Mae Wood Prater, sweetheart. She shared 56 years of adventurous life with him. They often hunted and fished together after returning to Tennessee. Though she died 20 years ago, Prater makes certain there are always flowers on her grave.

It is impossible to capsulize 100 years of a full life. There are so many incidents and memories surrounding the past and always the inescapable possibilities of the future only one man can explain it. As Jim Prater sums it up he leaves a model for his lessers. "I live for God," he says, "and thank God, I'm a gentleman."

NUCLEAR NONPROLIFERATION A SERIOUS CONCERN

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. LAGOMARSINO. Mr. Speaker, nuclear nonproliferation remains a serious concern for this administration and this Congress. The President has described the basis for his policy, and I welcome his approach. Two newspapers in my district published identical editorials recently on nuclear nonproliferation which I want to share with my colleagues. This editorial appeared in the July 29 Oxnard Press-Courier and the July 30 Santa Maria Times.

[From the Oxnard Press-Courier, July 29 1981]

Non-Proliferation Track

The United States must assume a more positive role in international efforts to control the spread of nuclear weapons.

But how?

President Carter was as dedicated to nuclear non-proliferation as any president could be, but his policy initiatives in that area got nowhere.

Now, President Reagan has issued a policy statement on non-proliferation and it appears to correct the major mistake in the Carter approach. Carter attacked the problem by limiting the export of U.S. nuclear technology and materials and urging other nuclear-exporting countries to do the same. The failure of this initiative was evident even before the June 7 Israeli raid on an Iraqi reactor brought the non-proliferation issue to the fore

Reagan's statement restores an earlier perspective to American policy—one that acknowledges that the United States can best contribute to safeguards and controls by being a "reliable supplier" of technology and fuel for nuclear power programs.

By going back on promises to share its nuclear technology with other countries, the United States only encourages them to try to develop that technology on their ownand with it the capability of making bombs.

While reaffirming U.S. support of the nuclear non-proliferation treaty and other international safeguard programs, Reagan puts new emphasis on creating conditions that would reduce the motivation for countries to go their own way with nuclear development. This is a broad and ambitious goal, but it recognizes that insecurity about future energy supplies is what motivates countries to try to develop independent nuclear power programs, and that military insecurity motivates some of them to arm themselves with nuclear weapons.

The Reagan policy puts the United States back on a more promising track. It is said to have been greeted with approval at the Ottawa summit. It remains, however, a statement of guidelines and objectives rather than a summary of how the United States will proceed on specific issues on the

nonproliferation agenda.

The statement promises to bring pressure on countries whose nuclear programs make them a "proliferation risk," but administration officials have declined to identify any countries now held to be in that category. It calls for strengthening the inspection and safeguard program of the International Atomic Energy Agency, but does not point to the weaknesses in that program that need to be addressed.

The world is flirting with catastrophe if the proliferation of nuclear weapons continues unchecked. There are now six nations known to possess atomic bombs. Nine others are believed to have the capability of producing them. Another 16 may join that category by 1990.

President Reagan says he has told the State Department to give "priority attention" to the proliferation problem, and well it should

should.

[From the Santa Maria Times, July 30, 1981]

THE PRESIDENT'S APPROACH

The United States must assume a more positive role in international efforts to control the spread of nuclear weapons.

But how?

President Carter was as dedicated to nuclear non-proliferation as any president could be, but his policy initiatives in that

area got nowhere.

Now, President Reagan has issued a policy statement on non-proliferation and it appears to correct the major mistake in the approach of Mr. Carter. The latter attacked the problem by limiting the export of U.S. nuclear technology and materials and urging other nuclear-exporting countries to do the same. The failure of this initative was evident even before the June 7 Israel raid on an Iraqi reactor brought the non-proliferation issue to the fore.

Mr. Reagan's statement restores an earlier perspective to American policy—one that acknowledges that the United States can best contribute to safeguards and controls by being a "reliable supplier" of technology and fuel for nuclear power programs. By going back on promises to share our nuclear technology with other countries, we only encourage them to try to develop that technology on their own—and with it the capability of making bombs.

While reaffirming U.S. support of the Nuclear Non-Proliferation Treaty and other international safeguard programs, Mr. Reagan puts new emphasis on creating conditions that would reduce the motivation for countries to go their own way with nuclear development. This is a broad and ambitious goal, but it recognizes that insecurity about future energy supplies is what motivates countries to try to develop independent nuclear power programs, and that military insecurity motivates some of them to arm themselves with nuclear weapons.

The Reagan policy puts the United States back on a more promising track. It is said to have been greeted with approval at the Ottawa summit. It remains, however, a statement of guidelines and objectives rather than a summary of how the United States will proceed on specific issues on the

non-proliferation agenda.

The statement promises to bring pressure on countries whose nuclear programs make them a "proliferation risk," but administration officials have declined to identify any countries now held to be in that category. It calls for strengthening the inspection and safeguard program of the International Atomic Energy Agency, but does not point to the weaknesses in that program that need to be addressed.

The world is flirting with catastrophe if the proliferation of nuclear weapons continues unchecked. There are now six nations known to possess atomic bombs. Nine others are believed to have the capability of producing them. Another 16 may join that category by 1990. Mr. Reagan says he has told the State Department to give "priority attention" to the proliferation problem, and well it should.

MORE REASONS WHY THE UNITED STATES SHOULD LEAVE THE UNITED NATIONS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

• Mr. McDONALD. Mr. Speaker, several recent events have raised questions in the minds of many Americans concerning our continued participation in the United Nations. The first was the recent revelation that the United Nations Department of Public Information paid 15 top foreign newspapers to run items favorable to the United Nations. The second has been the drive by UNESCO to prevent the press from operating freely in many parts of the world. These two items should convince any fair-minded American that it is not in America's best interest to remain in this organi-

zation. Alice Widener wrote up this sad state of affairs in her publication U.S.A. for May 31, 1981. Her article should be carefully read by any taxpayer that believes the United Nations is our best hope for peace. The article

AT LONG LAST-PROPAGANDA SCANDAL REVEALS TRUTH ABOUT UNITED NATIONS (By Alice Widener)

As a rule, when the New York Times breaks a front page story about a scandal involving a major national or international institution, the broadcasting networks and prominent liberals, American and foreign, hit the fan about it. In the case of the biggest scandal ever reported about the United Nations, however—a scandal revealed by the New York Times, May 28, 1981-dead silence has reigned over the airwaves. The Washington Post, usually so keen on denouncing venality in the press or ment, carried only a short U.N. official defense tucked away next day on page 28.

The revolting fact is that the United Na-tions Department of Public Information paid 15 top foreign newspapers, including Le Monde, the international Leftists' Parisian darling, to publish propaganda articles advocating economic, social and political pro-posals spawned at the U.N. that would pauperize advanced nations in favor of the thereby hurting every backward ones. American's pocketbook and injuring national sovereignty and security. The U.N.subsidized articles were run by client newspapers as straight news and research material, not as advertisements. Each article was prepared from a special point of view by a United Nations staff member.

A \$1,250,000 slush fund for the propaganda operation was given to the U.N. Department of Public Information by Ryoichi Sasakawa, a Japanese multi-millionaire whom the New York Times describes as "an influential conservative businessman who has supported the United Nations before. His help was solicited by Genischi Akatani, a former U.N. Under Secretary General for Public Information." The Times' description of Mr. Sasakawa is inadequate, to say the least. On June 4, 1979, Barron's National Business & Financial Weekly reported on Mr. Sasakawa's present connection with Hardwicke Companies, Inc. in our country and provided information on his "unusual" background. Before 1941, he helped the running tide of militarism in Japan and formed a political party favoring Japanese military expansion into Southeast Asia. "Di World War II," reported Barron's, "During sakawa's political party participated in the looting of countries occupied by Japan." The United States occupation authorities arrested Sasakawa as a suspected war criminal and he spent three years in a Japanese

Evidently Mr. Sasakawa is only doing what comes naturally in subsidizing the proposal advanced by some U.N. member states "a new international economic social order" which would loot the wealthy countries for the alleged benefit of the poor ones. The New York Times says the new order would effect "an enormous transfer of goods and services from rich to poor through the erection of commodity cartels, the printing of money by the International Monetary Fund, big increases in aid and similar devices." In one form or another among U.N. members, the proposal for a new order has been discussed since 1945, always under Socialist/Communist sponsor-

ship. In 1956, Leslie Gould, highly regarded financial editor of the New York Journal-American, pointed out that at the IMF the Communist countries have "full access to confidential financial information on western countries.

The New York Times reports that Bhaskar P. Menon of the U.N. Department for Economic Information, and author of a subsidized propaganda article in foreign newspapers, describes the proposed new order as "decolonization of the world economy." Exactly 20 years ago, U.S. Senator George D. Aiken described the Socialist/ Communist proposal as "colonialism-in-reto exploit American taxpayers, and he warned "too many members of the United Nations ignore the fact that every dollar we contribute to raising the standards of developing nations has to be earned or borrowed by us. The fact that we have gone so heavily in debt to help them does not seem to make much of an impression on some of them." Sen. Aiken knew what he was talking about; he was U.S. Delegate to the U.N.

As early as 1951, Dr. Hans W. Singer, special adviser to the U.N. Secretary General on economic development, advised the Pakistan Government not to exert their own efforts for development but to borrow money for it from abroad. "Supposing you borrow a hundred million dollars from the United States now to undertake a certain project and you repay the money over the next 30 years-well, it is possible that a dollar in 30 years time in the United States will only buy half of what it buys now. But that is not your worry; that is the risk of the people who have lent you the money. That is their risk.'

It is now exactly 30 years since Dr. Singer sang his siren song in Lahore, Pakistan. The U.S. dollar buys not half but less than a third of what it bought in 1951, and our country has accumulated more than a trillion dollar national debt on which we American taxpayers pay annual interest of more than \$60 billion.

A dedicated Marxist, Dr. Singer was quite a prophet. In 1956, he told a women's group at the U.N., "We must do all possible to get extension in Congress of U.S. foreign aid. We should try to get ten years plus, and then nobody will ever be able to follow anything because so many people will be involved. If a long range plan is established, the United States couldn't stop."

As predicted, the United States wouldn't and then couldn't stop its inflationary forboth bilateral and through the United Nations. Most Americans have been blindly idealistic supporters of the United Nations as "the last best hope for peace," having been made to feel guilty because we didn't join the League of Nations after World War I and because we developed the atom bomb to end World War II. Thinking about peace, democracy and human rights, the very last thing Americans thought about was money. The few farsighted realists who tried to warn us about the economic perils of U.S. membership in the U.N. were either ignored or branded by liberals as warmongers, racists and isolationists.
On April 14, 1981, the Journal of Com-

merce in New York reported that the socalled "developing" nations' debt to the advanced western nations will soar to \$500 billion, most of which could not be repaid. publication interviewed Secretary General Gamani Corea of the U.N. Conference on Trade and Development. A staunch advocate of the proposed new international

economic and social order, Mr. Corea who hails from Sri Lanka (formerly Ceylon) urges creation of international commodity cartels and price fixing, both contrary to American principles and practices of free trade and free enterprise.
As early as May 1954, Preston Hotchkis,

U.S. delegate to the U.N. Economic and Social Council, warned publicly, "Watch out for the United Nations because what it does

can affect your pocketbook!"

U.N. membership has grown from the original 51 member states in 1945 to the present 154, several of the latter being merely small islands with scant population, but each with a vote equal to ours in the U.N. General Assembly. In 1949, the regular administrative annual budget, which members are assessed, was \$43 million. Today that budget is approximately \$1.1 billion, of which the United States is assessed 25% or approximately \$250 million annually. These sums do not include funds for any of the huge amounts spent by the U.N. specialized agencies and other operations. The total U.N. annual expenditure is \$2.5 billion. For the regular administrative budget, the Soviet Union is assessed less than half of what we pay, that is, only 11.3%. China [People's Republic of] is nearing the 2-year expiration date for payment of arrears in assessments and risks being ousted from the General Assembly according to financial provisions in the U.N. Char-

More and more at the United Nations its main financial supporter, the United States, is becoming a minority of one. Besides being used by the U.N. to undermine U.S. sovereignty, our 25% financial support of the U.N. is being used to undermine our way of life and national security, and also to enable the United Nations to violate the very principles upon which the international organization was founded.

How cynically this violation is taking place is exemplified in the current U.N. propaganda scandal. Article 100 in Chapter XV of the U.N. Charter deals with the U.N. Secretariat, the international civil servants staffing and administering the organization who are paid out of its own budget. Article 100 states that the U.N. Secretary General and the staff "shall not seek or receive instructions" from any government or authority external to the Organization, and that each member of the U.N. undertakes "to respect the exclusively international character" of the Secretary General's and staff's responsibilities and "not seek to influence them in the discharge of their responsibil-

The acceptance of a \$1.25 million "gift" from a single individual by the U.N. Department of Public Information to further a special proposal advanced by only a single group of U.N. member states is a clear violation of the letter and spirit of the U.N. Charter. However generous or well-intentioned or something else is Mr. Sasakawa, he is undeniably external to the United Nations Organization. It is an act of unspeakable corruption, in my judgment, for the U.N. Department of Public Information to solicit funds to suborn the press in an action designed to influence authorities external to the U.N. in behalf of political, social and economic schemes hatched by some members of the U.N. to further their own interests as against other member states' inter-

The American Newspaper Publishers Association and other professional groups dedicated to a free press have been bitterly

critical of proposals recently put forth in Paris by UNESCO (United Nations Educational, Scientific and Cultural Organization) to set up restrictive international controls over the press and licensing of its journalists, controls proposed by Socialist, Communist and many Third World nations. Obviously, the U.N. Department of Public Information itself has become a vehicle for venal influence in the press. The 15 important newspapers which carried the Sasakawa-subsidized "new order" propaganda are: Le Paris-\$48,000; Asahi Shimbun, Tokyo-\$48,000; La Stampa, Turin-\$40,000; Pais, Madrid-\$24,000; Politika, Belgrade-\$32,000; Zycie Warszawy, Warsaw \$40,000; Magyar Nemzet, Budapest-\$24,000; El Moudjahid, Algiers—\$24,000; Le Soleil, Dakar—\$16,000; Excelsior, Mexico—\$24,000; Indian Express, New Delhi-\$40,000; Kahan Newspapers, Teheran-\$16,000; Dawn, Kara-\$16,000; Franfurter Rundschau, Frankfurt-\$24,000; Die Presse, Vienna-\$16,000.

In connection with all the foregoing, it must be borne in mind that the proposed "New International Economic and Social Order" has not been enacted by the United Nations and is therefore not an official U.N. covenant or treaty or officially adopted resolution of the General Assembly.

To the great credit of Walter Fontura, editor, Jornal do Brasil, he refused the U.N. propaganda subsidy and tried but failed to persuade other editors not to accept it.

It appears that Le Monde (which many Frenchmen in a play on words call "L'Immonde" meaning unclean and foul) is the newspaper most deeply involved, directly and indirectly, in the U.N. propaganda scandal, though it is a favorite source of West European quotation by our major wire services, liberal press and magazines such as Newsweek and Time. Project coordinator of the Sasakawa-subsidized U.N. operation at an annual salary of \$69,600 is former Le Monde diplomatic correspondent Jean Schwoebel. Le Monde's present boss, Jacques Fauvet, told the New York Times "no reason" to refuse the subsidy he saw money. The initial \$1.25 million has been spent but Mr. Schwoebel is asking the U.N. Department of Information to seek \$200,000 from the U.N. General Assembly as seed money to attract additional contributions for the propaganda operations, saying that Algeria, Venezuela and Kuwait are prospective donors. The United States and Britain are strongly opposed to such action. The New York Times says all this "raises fresh questions of influence."

The whole U.N. propaganda scandal raises not only questions of influence at the United Nations but also the question of whether U.S. participation in the U.N. can now be a useful tool of American diplomacy and foreign policy. Things now are far diferent from what they were in 1945 when it was agreed under the Charter that the five permanent members of the U.N. Security Council, its principal peace-keeping body, should be China, Britain, France, the United States and Soviet Union. Among the five at that time there was only one socialist member—the Soviet Union. Today there are three—China, France and the Soviet Union.

Today U.N. Secretary General Kurt Waldheim himself is involved in the U.N. propaganda scandal and declares that the Sasakawa-financed distribution of U.N. articles helps "to foster a better understanding of the vital objectives of the new international economic order." What he deems "vital" is deadly to American free enterprise and American principles of freedom. Already the

Reagan Administration has been forced to reconsider U.S. participation in the U.N.proposed Law of the Sea Treaty and to cast a lone "no" vote at the World Health Organization.

For many years, some Americans have urged, "Get the U.S. out of the U.N. and the U.N. out of the U.S.A." Perhaps the time has come to do so.

DEATH OF SHELDON POLLACK

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. GREEN. Mr. Speaker, I was shocked and saddened by the July 28 death of Sheldon Pollack. Most recently, Sheldon served as executive director of New York Citizens for Balanced Transportation, a group with which I have worked closely in supporting the construction of a new highway in New York which promises to revitalize the west side of Manhattan.

Indeed, throughout his career, Sheldon Pollack demonstrated an intense and active commitment to the betterment of life in New York City and in urban areas across the country. As director of information for the Regional Planning Association, a private research group which makes recommendations on transportation, housing and recreation for New York, New Jersey, and Connecticut, he was instrumental in creating Gateway National Recreation Area, the first urban national park in the United States. Sheldon and a handful of others conceived of this urban dimension to what has traditionally been a benefit available to those who live in less populated areas, and convinced others-including the Congress-of its significance. The urban seashore park which he envisioned now occupies 26,000 acres within New York's metropolitan area. It includes beaches, wildlife reserves, wetlands, and grasslands, and is visited by about 10 million people per year. Similar urban parks have opened in Chicago, San Francisco, Atlanta, and Cleveland in recent years.

I knew Sheldon Pollack personally for a number of years, and will miss not only his friendship, but also his enthusiastic commitment to civic affairs.

WE REMEMBER EMMA WEBB

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

• Mr. PICKLE. Mr. Speaker, last month, we in central Texas unfortunately lost a dear friend and a unique lady. Mrs. Emma Webb of Elgin, Tex.,

died in her sleep last month, having lived a full, successful life.

As the first woman lawyer in Bastrop County, Tex., licensed in 1923, Mrs. Webb blazed the trail of women's rights and the sense of civic responsibility decades ahead of almost everyone else. She was one of the first and most ardent supporters of Lyndon B. Johnson. As her Congressman, I have enjoyed a very special understanding, love, and respect for this most unusual lady. She was as dedicated to her country as she was kind to her friends. So I submit into the Record an obituary of Mrs. Emma Webb from the Bastrop County Times of August 13, 1981.

EMMA WEBB REMEMBERED

(By Katherine Reynolds)

Emma Webb is gone. Elgin's well-known lawyer, historian and civic leader died in her sleep in the early hours of Aug. 3 at the home of her son Jackson Webb, and his wife, Zoe.

She was not yet 90 years old, but she had tallied up enough experiences and good works to fill several long lifetimes.

Born in Bible Grove, Ill., Emma and her family came to Texas when her father, John L. Stullken accepted a teaching post at Blinn College in Brenham. She received some early schooling there and later lied about her age so she could begin teaching public school in Dime Box, Knobbs and Lincoln in Lee County. Emma was still in her teens when she started teaching, and many of her students were older than she. She attended summer sessions at the University of Texas, then taught for one year in the Elgin Public School.

While teaching in Elgin, Emma Stullken met Charles W. Webb, an established lawyer and civic leader and also a member of the Elgin School Board. He and Emma carried on a very proper, but "secret" romance. In a diary, Emma mentioned that "Mr. Webb pursued" her with great ardor through letters delivered by her younge brother. Their relationship was kept secret because at that time a romance between a school board member and a young teacher was considered scandalous. Emma Stullken married Webb in 1917.

Webb encouraged Emma to study law, a subject in which she was already interested. She attended the University of Texas Law School, and was a Class of 1923 member. She never graduated, lacking just one half a semester toward her degree. Her son, Jackson, was ill and she left school to care for him. However, she passed the state bar examination on March 5, 1923 and became her husband's law partner in Elgin in April, 1923. Emma Webb was Bastrop County's first woman lawyer.

"She wasn't one to ask for any privileges as a woman lawyer," recalls her son, Jackson S. Webb. "She just quietly went about her business, doing her work. If she saw something that had to be done, she just did it."

A member of the Bastrop County Bar Association, the Texas State Bar and the National American Jurisprudence Society, she also served as president of the county association for six years.

She had been identified with Elgin's civic, cultural and religious activities ever since her arrival in the community.

Emma taught Sunday school for many years and sang in her church choir. She was

an elected member of the Elgin School Trustees and served as the board secretary and school tax collector.

She helped organize and was the first president of the Elgin School Band Boosters Club

Emma Webb was a lifetime member of the New Century Club; was a founder of the Elgin Memorial Park Association; helped organize the Bastrop County Federation of Women's Clubs; served one term as president of the Elgin American Legion Auxiliary; was an active member of the Order of the Eastern Star, receiving an Honorary Membership in that organization several years ago, commemorating her continuous 50 years of active membership in the Order.

Mrs. Webb had long been interested in people and events of historical significance. She wrote many articles for the Elgin Courier, as well as numerous booklets, especially pertaining to the history of the Elgin Methodist Church.

In 1959, the Elgin Chamber of Commerce named her the town's "Outstanding Citizen" and presented her with a bronze plaque at its annual banquet.

She was a charter member of the Bastrop County State Historical Committee and with others under the leadership of Mrs. W. E. Maynard, the committee's efforts to publish a History of Bastrop County were realized in 1972.

She was a primary contributor to the first published history of Elgin 1872-1972, compiled for the town's centennial year by the Elgin Historical Committee.

Mrs. Webb was also a longtime member of the Bastrop County Historical Society. She counted it "her loss" when she failed to attend any of the meetings.

Her full-time law practice and civic activities caused her to declare that she "never had a dull moment."

Her son, Jack Webb, said she had a "mind for detail, and was very thorough." But, "I don't know how she kept things straight, because she wasn't very organized," he said. Webb added that Emma had an "unusually close" mother-daughter-in-law relationship with his wife, Zoe. They were "real buddies," he said, and in recent years Emma depended on Zoe to "keep tract" of things for her.

Zoe called Emma a "remarkable lady; a real doer, not just a joiner" in her many or-

Mrs. Webb and her husband worked in close partnership until his death in 1961. Growing up, Jack Webb recalled his parents were at the office every day except Sunday. "But in her off hours she was always available for whatever my needs were." Sunday was the day for church, family and visitors. During World War II, their house was always open to soldiers and their families.

Inspired by patriotism during the war, Emma very nearly joined the WACS, but was persuaded to "stay home and do what she could here" after receiving a letter from son Jack, who was in the service. "She didn't want anyone doing the battling for her," he said.

She was an ardent supporter of Lyndon Baines Johnson. She spent the last 10 months of her life working on a study of LBJ's "grassroots campaigns" in Bastrop County, which was the outgrowth of interviews with her by historians from the LBJ Library in Austin.

Her family described her last day as "very pleasant." After a traditional Sunday dinner at Jack and Zoe's home, along with Jack's older brother, Charles Wallace Webb, and his family, they all visited friends in Bastrop. Emma was alert when Zoe checked on her about 4 a.m. Monday to administer medication. When the family rose for the day however Emma had passed on

day, however, Emma had passed on.
Funeral services were held Wednesday,
August 5 at the First United Methodist
Church in Elgin, with Reverend Jesse Long
officiating. Burial was in Elgin Cemetery
following the service.

"It was a victorious service," said Jack Webb. "It wasn't somber at all," in keeping with her long and productive life. Two hymns were sung, "A Mighty Fortress Is Our God" and "Oh For a Thousand Tongues To Sing Thy Great Redeeming Praise," grand and majestic music for a great woman.

Survivors include two sons, Jackson S. and Charles Wallace Webb; two sisters, Florence Stullken of Round Rock and Helen Bratton of Austin; eight grandchildren, five greatgrandchildren, and five great-grandchildren

MERGERS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, August 26, 1981, into the Congressional Record:

MERGERS

The policy of the Reagan Administration toward the recent spate of corporate mergers has become clear. When asked whether he was concerned about the takeovers, the Chairman of the Council of Economic Advisors, Murray Weidenbaum, replied, "No, private enterprise is private enterprise." Attorney General William French Smith has anounced that this administration does not believe bigness is bad. He has also said that such a view is misguided and mistaken. The assistant attorney general for antitrust has underway a project to loosen the restrictions on mergers. Several antitrust suits have been dropped. Without doubt, the direction of the President's antitrust policy is very hospitable to mergers.

There can be no question that mergers in the United States have become more common during the past few years. There were 41 acquisitions of \$100-million firms in 1977, 80 in 1978, 83 in 1979, and 94 in 1980. There were six acquisitions of \$500-million firms in 1978 and 16 in 1979. This year, we have seen deals worth billions of dollars. Even the biggest companies can no longer avoid the frenzy of mergers. The transaction between Du Pont and Conoco so widely reported in the media merged the four-teenth and fifteenth largest industrial firms in the country.

in the country.

The extent of corporate concentration in American industry is noteworthy. Recent congressional hearings and federal studies indicate that 90% of all net profits are controlled by a mere 2% of all corporations. In 142 industries, the four largest firms have more than half the market. From 1947 to 1972, the 200 largest manufacturers in the nation increased their share of all sales from 36% to 52%. Part of the concern about mergers is due to the concentration that already exists in the economy.

The significance of these figures is certainly open to question. Economists differ

on the degree of concentration of economic power they reflect. Economists also differ on the seriousness of the problem they pose. Some economic thinkers see real dangers in these statistics, but others say that things are not quite so bad. Virtually all agree, however, that any marked movement toward monopoly in this country would be a threat to our free enterprise system. It has long been the view of non-socialist economists that monopoly can undermine and destroy such a system. It was Adam Smith himself who said that monopolistic prices are "the highest which can be got."

Questions arise as to the good that is brought about by mergers. Are more jobs created? Are better products developed? Are high prices reduced? Does productivity go up and efficiency increase because of mergers? Is a conglomerate more innovative than the smaller businesses it absorbs? Is the cash used to acquire huge companies diverted from the purchase of new equipment, the replacement of old equipment, or added investment in research and development? Does the large amount of time and effort expended by top managers in complicated mergers deflect their attention from other pressing needs of their companies? about the large amount of time and effort expended by legal staffs? How do mergers affect small businessmen? What kind of political power can be exercised by the economic giants created through mergers? Does increased corporate wealth inevitably vest political power in fewer hands? Even if these questions cannot be answered in a general way, it is important that they be asked.

My own view is that there is nothing inherently wrong with mergers. They are not necessarily unhealthy or sinister. There certainly are good reasons why businesses must be big to compete in a global economy. The trend toward larger and larger firms, however, causes me to worry. The reasons for it are not entirely apparent to me, especially when buyers must use borrowed funds to make acquisitions. I am inclined to think that the United States is not really solving its major economic problems through mergers. I agree with a recent editorial of The Wall Street Journal, which stated that "the concentration of increasing political power in the hands of remote corporate chieftains worrisome development in a democracy." Most Hoosiers with whom I speak are uneasy about the concentration of powerwhether economic or political, whether in the private or public sector. I share their misgivings.

I must acknowledge that I have a hard time determining whether the concentration of economic power is a threat to our society. On the one hand, I do not think it can be shown that the more a conglomerate expands, the less it cares for the common good. On the other hand, it seems to me that the social, political, and economic benefits and consequences of mergers are vague—even unknown. So when corporations choose to grow, but not from within by developing new products or improving plant and equipment, I conclude that their behavior is a matter of interest to the public. As such, it bears scrutiny and careful analysis.

Our antitrust policy should not lead us automatically to disapprove of mergers. It should prompt us instead to assess mergers with an eye on the greater national goals of prosperity, efficiency, and broad dispersal of economic power. A strict "hands-off" policy of government may cause us to lose sight of these goals. Worse still, it may result in a

dramatic loss of public confidence in our system of free enterprise.

A VILLAGE CALLED THE BRONX

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. BINGHAM. Mr. Speaker: As a Bronxite and a Representative of the Bronx in Congress, I have often ruminated over the special qualities which make the Bronx unique and worth fighting for. In the New York Times of August 15, 1981, Susan Thaler beautifully describes the Bronx as it once was and, in many ways, still is. I am pleased to commend Ms. Thaler's reminiscence to my colleagues and to other readers of the Congressional RECORD.

[From the New York Times, Aug. 15, 1981] A VILLAGE CALLED THE BRONX

(By Susan Thaler)

GLEN ROCK, N.J.—They say that home is where the heart is. But you won't find my heart anywhere among the sad wrecked buildings that line the street where I once lived. My heart is with the Bronx of memory, a Bronx that even then we knew was just a stepping stone to Bigger and Better.

Even before the early 1960's when the influx of minority groups to our neighborhood spurred what must surely have been one of the more rapid episodes of white flight in the history of urban breakdown, our folks were preoccupied with Getting

Mothers spent whole afternoons sitting outside on folding chairs (this was pre-lib. when it was possible to do such things without guilt) having conversations that went something like this:

"We drove out to Merrick last week to

"Oh, yeah? Did you find anything?"

"Well, we saw some possibilities. A very nice Cape with an expandable attic on a corner lot."

Yeah? So-when are you moving already?"

(Pause.) "So, we'll see."

Most of this amounted to wishful thinking. A fortunate few might actually make it to a garden apartment in Flushing or Bayside, but for those of us whose dreams could not stretch even as far as Queens, we could always hope for this: A sunny, roomy four with a sunken living room in one of those sedate buildings on the Grand Concourse.

While Davidson Avenue was never exactly the Concourse, at least it was part of what we referred to with (misguided) pride as the West Bronx, as distinguished from the East Bronx, where all our poorer relatives lived. Between McCombs Road and Tremont Avenue, we were situated just enough west of Jerome Avenue that we could turn a deaf ear to the rumblings of the elevated Woodlawn-Jerome Avenue line, the comings and goings of which laced our nights and days with numbing consistency.

What our parents failed to recognize in their eagerness to lead us on to greener pastures was that life in the Bronx had its advantages. Not just the superficial kind, such as the proximity of Yankee Stadium to our living rooms. What we had and what we took for granted was a sense of community that buoyed our lives like an invisible spirit. When you were born in the Bronx, you belonged not only to your parents but to the neighborhood as well.

Consider: There were 60 families in our buildings. Most had children. Therefore, on any given day, one could find upward of 50 children on the sidewalk in front of our building, ranging in age from infancy onward. Our building was one of many on the block, but because it had a commodious courtyard with spiked railings around it that was useful for games such as iron tag, kids from up and down the block congregated there.

The noise we made drove the older tenants to stuff their ears with cotton, especially in spring and summer, when the crash of steel wheels against pitted concrete echoed raucously in the air. (No prissy polyurethane wheels for us; the noise our skates made was half the fun.)

The selection of playmates being limitless, we were never beggars and were free to choose our friends from day to day. Our mothers, too, had a wide circle of confidantes. Since we were, by and large, of the same ethnic heritage (Jewish) and stratum (aspiring upwardly mobile), our needs, desires and frustrations were often common knowledge. Just as everyone knew the layout of everyone else's apartment, so they knew, to a sometimes unnerving degree, what went on inside that apartment. Pretensions fizzled under that kind of intimacy. If for no other reason than that they had no place else to go, our neighbors were always there. Money problems, the loss of a job, an unwanted pregnancy-nothing could be withheld for long.

Crises came and went. When the throat of a child in apartment B-60 almost closed during a diphtheria attack, every mother in the building wrung her hands in worry; they put themselves on call, lending thermometers, hot water bottles, consolation, until the doctor arrived. When the girl in B-41 fell out of her crib onto the makeshift vaporizor, a pot filled with boiling water, and scalded her arm, a cadre of women was on the scene to distract the other siblings, to soothe the hysterical mother and child, to and this is important-assuage feelings of guilt: "It wasn't your fault; how could you know she was going to fall out of the crib? You couldn't watch her every second!"

Now here we are, most of us, reaping the dreams sown by our parents. We have reached Bigger and Better. The suburbs we live in have well-defined property lines. Neighbors are people to whom one waves when one carries out the trash, people whose privacy must be preserved at all cost.

The cost to some of us is considerable. Where is that company of women in whose relaxed reciprocity we might exercise our Bronx-bred need for "yenting," not to mention the leisure time this would necessitate?

Our children, who cannot miss what they never had, cannot understand what was so great about living there, in a slum. What do they know, these kids whose heads are into electronic invaders from space and other substitutes for human interaction, what do they know of the exhilaration of games such as ring-a-lievio, captain, double-Dutch salt-and-pepper, skelly, potsy and a hundred other creations of our own imaginings?

While some of us already have begun to dribble back, there are not enough yet to turn the tide. Most often, we aim for Manhattan or Brooklyn when we flee the isolation of the suburban dream gone sour because, physically, we have no other option. One cannot live in an empty shell.

Perhaps someday those dead Bronx streets will resound again with the shouts of "Ready or not, here I come!" One day some smart developer will tap the vast areas waiting to be reclaimed. If I am still able to tote a folding chair to the sidewalk when that happens, save a place for me, if not on Davidson Avenue, then maybe in a sunny four with a sunken living room on the Grand Concourse.

U.S.S.R. FOOD PICTURE GROWS GRIMMER

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

 Mr. McDONALD. Mr. Speaker, indications are growing that the food situation in the Soviet Union is very serious this year. As mentioned earlier, there are reports of rationing in Irkutsk-see page E2923 of June 11, 1981, CONGRESSIONAL RECORD. There has also been discussion of the role of the private plots this year as well as urging more horse breeding, not only to save fuel, but for eating purposes. Pravda took note of the situation in an unusual way as reported by Soviet World Outlook for August 1981. A similar editorial appeared in Latvia on July 23 and was probably sent to all the outlying republics from Moscow. Talk of saving bread has not been heard since before the big wheat sale by President Nixon. I commend this item to the attention of my colleagues.

REGIME CALLS FOR SAVING BREAD

A July 16 Pravda editorial has called for nationwide conservation of bread, an unusual move underscoring the tightness of the current Soviet grain situation. The move also helps explain Soviet willingness to negotiate for grain purchase from the U.S. despite earlier boasts that the U.S. grain embargo had not seriously affected the USSR and had been made up by Soviet purchases from other suppliers. According to the operational passage of the editorial:

Ensuring the economical and rational use of bread and baked goods is a nationwide concern and the task is to see that it is closely watched and monitored by party. soviet, trade union, and Komsomol organization."

While citing bread's low price as the reason behind its wasteful use, the editorial takes great care to assure the population that no increase in price and availability is contemplated:

'Cheap bread, within everyone's means, is one of socialism's great gains. Implementing party's policy on maintaining stable retail prices for staple goods is in the interests of broad strata of the population; the state will in the future continue to maintain retail prices of bread and baked goods at a constant level, despite increasing production (It might be noted that in lieu of raising bread prices in times of stringency, the regime does not uncommonly adulterate the quality.)

Nevertheless the regime's realization of the sensitivity of its action is reflected in its repetition of the lines from Brezhnev's book, "The Virgin Lands":

"Bread has always been a most important product, the yardstick of all our values. Even in our age of great scientific and technical achievements, it is the people's staff of life."

The editorial seeks to suggest that this call for conservation merely involves using an abundant supply of bread with greater efficiency. Areas of inefficiency targeted in the editorial include baking industry enterprises who bake large loaves at the expense of smaller varieties. While this nominally improves the enterprise's labor productivity, it presumably leads to waste at the consumer end where unused portions go stale. Also noted is the use of bread as feed for livestock in cases where fodder concentrates meant for use on personal plots are instead channeled to the nation's kolkhozes and sovkhozes.

However, availability problems are alluded to in another Pravda editorial on July 22, which said:

"The targets for crops as a whole are far from fulfilled by all oblasts, krays and republics. Hence, the shortage in certain types of groats and flour products."

Publication of the Pravda editorial appears to support other indications that the USSR is facing its third poor harvest in a

The USSR Central Statistical Administration in its report on 6-month economic performance that was published in Pravda on July 25 shows a substantial reduction in the total area sown from 217.3 million hectares in 1979 and 1980 to 214.7 hectares in 1981. This includes a drop back to 1979 levels in the area sown with grain and pulse crops; from 126.6 million hectares in 1980 to 126.4 million hectares in 1981.

Weather conditions appear to be bad and in some areas becoming worse. A July 22 Pravda editorial states: "Because of the heat and, in some places, the rain and the cold, the crops have turned out stunted, sparse and lodged."

Taking into account these factors, the U.S. Department of Agriculture has now revised its estimate for the USSR's 1981 grain harvest down from the 200 million tons in July to a figure of 185 million tons in August. This would mean a harvest below the 189 million tons reached in 1980, a widely acknowledged poor harvest year.

It would also mean a bad beginning for Soviet agriculture in efforts to attain the 238-243 average annual grain production target set for the sector in the current 11th 5-Year Plan. It is in this context that the existing grains supply agreement between the U.S. and the USSR has been renewed for another year. Concluded in August, the agreement will permit the Soviet Union to import up to 6-8 million tons of U.S. beginning October 1, 1981.

There are some indications of difficulties being experienced in other food staples. Potatoes were especially hard hit by weather conditions in 1980. The USSR Central Statistical Administration reports that the area sown with potatoes dropped from 7 million hectares in 1979 to 6.9 million hectares in 1980: and the yield declined from 130 to 96 centners per hectare (one centner is equivalent to 50 kilograms). It remains to be seen how well they fare in 1981.

EXTEND VOTING RIGHTS ACT IN ALL AREAS WHERE DIS-CRIMINATION PERSISTS

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

 Mr. McCLORY. Mr. Speaker, a recent editorial in the Elgin, Ill., Daily Courier News argues for extension of the Voting Rights Act with amendments under active consideration by many members of the House Judiciary Committee.

The editorial argues that the new version of the act, allowing States to bail out of coverage if they have had a clean record on voting rights for 10 years, would satisfy those States which have been following Federal standards in their election practices without remaining under the thumb of the Justice Department in managing their electoral affairs.

Mr. Speaker, I share the sentiments expressed in the editorial and hope that the voting rights act extension will be approved as revised by these perceptive and fair-minded members of the House Judiciary Committee.

I commend to the attention of my colleagues the full text of the Daily Courier News editorial of August 18, 1981, as follows:

[From the Daily Courier News, Aug. 18, 1981]

VOTING RIGHTS ACT MOVES TOWARD RENEWAL

President Reagan has let it be known he supports an extension of the 1965 Voting Rights Act, which will expire next year unless renewed by the 97th Congress. This should put to rest any notion that Mr. Reagan plans to lead a retreat from the major civil rights achievements of the last two decades.

The Voting Rights Act has had a significant effect in opening up the political process in Southern states where state and local election laws had been keeping blacks from becoming voters and winning elective office. In spite of that progress, however, there appears to be no justification for abandoning the Act which makes the U.S. Justice Department a watchdog in areas with a history of discription projections.

of discrimination in election practices.

A consensus is building in Congress around proposals to extend the Act for another 10 years, but on terms recognizing that the problem of discriminatory election laws is not as widespread as it was in 1965. The House Judiciary Committee recently completed a rewrite of the controversial Section 5, which has required that nine states and portions of 13 other states get Justice Department approval for any changes in their election laws.

The new version would allow states to "bail out" of coverage by the Act if they have had a clean record on voting rights for 10 years. This would satisfy those states which have been following federal standards in their election practices, but, under the law as it is now written, remain under the thumb of the Justice Department in managing their electoral affairs.

A state which has abolished literacy tests and other subterfuges that keep minorities

out of the electoral system, and has shown for 10 years that it is fully recognizing the right of all citizens to vote, deserves to be cut loose from federal supervision. Those which have continued to arouse complaints of unfair voting practices do not.

The House Committee's proposed revisions of Section 5 would concentrate federal enforcement in areas where it is still needed, and remove it in cases where state and local officials can be left on their own. That's a fair basis for extending the Voting Rights Act, and we trust Congress will move along those lines.

GOD AND MAN AT YALE REVISITED

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. HYDE. Mr. Speaker, the president of Yale University recently lectured his freshman class on the evils of the Moral Majority.

Tha anomaly of liberal churchmen expressing distemper at conservative churchman seeking equal access to the political process is superbly discussed by columnist William F. Buckley Jr., and I commend his logic and insight to my colleagues:

[From the Washington Post, Sept. 8, 1981]

YALE AND THE MORAL MAJORITY (By William F. Buckley, Jr.)

Well now, that was a close one. The 1,267 members of the freshman class of Yale University have been warned against the Moral Majority by President A. Bartlett Giamatti. And what a speech it was: Dr. Jerry Falwell, head of the Moral Majority, is said to be quite a fulminator himself. He ought to go to Yale. To study under Bart Giamatti. Learn a thing or two about how one fulminates in the big league.

What's going on? To be lectured against the perils of the Moral Majority on entering Yale is on the order of being lectured on the danger of bedbugs on entering a brothel. What is it that exercised Giamatti, a man of great urbanity who has some lovely and incisive things to say about many issues, as witness his forthcoming book of essays?

Well, he says the Moral Majority are "peddlery of coercion" and that they have made "a radical assault" on pluralism, civil rights and religious and political freedoms in the United States. How so?

Because they are "angry at change, rigid in the application of chauvinistic slogans, absolutistic in morality." Thus, "they threaten through political pressure or public denunciation whoever dares to disagree with their authoritarian positions." Moreover, "they presume to know what God alone knows, which is when human life begins."

Enough.

On the latter point: how is it that the president of a distinguished and cosmopolitan university tells us that God alone knows when human life begins? If you penetrate this rhetorical formulation, you have a dimly obscured invitation to nescience.

"God alone knows" is the safest way to say, "That is unknowable." Because inasmuch as God is not invited to teach a regular course at Yale, Giamatti is saying in effect that the search for the answer ("When does life begin?") should be abandoned-because no one can tell. Why not? If you grant the metaphorical extravagancies (Life Begins at 40) you can indeed ask scientists to make sound judgments on when life begins. Or moralists. Or theologians. And in any case, the question is ultimately decided by civic action. But civic action is regularly informed by theological insights.

Thus we had for many years a group known as Clergy and Laity Concerned. They used to be Concerned About Vietnam, but lately they are just Concerned. That concern regularly focuses on the sins of everywho wants America to be strong militarily or wants to develop nuclear energy. These people are very big on denunication, and it is interesting that Giamatti hasn't gone after them. Is it really his position that people reading the Bible are not free to enjoin its messages? Its messages as they

Giamatti said he had no quarrel with the values of the Moral Majority, defined in the paraphrase of The New York Times as "love of country, a regard for the sanctity of life, the importance of the family and high standards of personal conduct." But "the point is," said the president of Yale, "the rest of us hold to ideas of family, country, belief in God, in different ways. The right to differ, and to see things differently, is our concern." Well, so is it the concern of the Moral Majority, isn't it? They are saying that certain values should govern Americans. Aren't we free to disagree? And why should they not say so, believing such values to be true? It is quaintly interesting that there isn't a single tenet of the Moral Majority (so far as I know) that hasn't officially been held by Yale University over a century or more of its life, and more or less unofficially since then. So what on earth is exciting Giamatti?

That the Moral Majority are "angry at change"? But anger was officially cultivated, by Yale among other institutions, quite recently in the matter of such things as civil rights and the Vietnam War. "And God said to Jonah, 'Doest thou well to be angry?' And he said, 'I do well to be angry, even unto death.' "Giamatti should lecture the kids against the dangers of gonorrhea and Gnosticism, and let the Moral Majority alone.

THE DRAFT

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, September 9, 1981, into the Congressional Record:

THE DRAFT

One of the most difficult questions for a public official to answer is: are we going to have a draft? The question comes up very frequently in any group and invariably in a young group. My quick answer to it is: Probably not in the short term, but the odds are higher in the long term. The answer calls for elaboration

Most politicians, including this one, would prefer not to have a draft. It is the ultimate example of government intrusion into the lives of citizens. On the other hand, most politicians, this one included again, are com-

mitted to the idea that the nation must be defended against all adversaries. There are circumstances in which the draft would be indispensable to the well-being of the nation.

The All-Volunteer Force came into being after the Vietnam War, for understandable reasons. During the war, draftees bore the brunt of the fighting. About 83 percent of all infantrymen were draftees, and nearly 25 percent of all draftees were killed or wound-ed. The All-Volunteer Force, however, certainly has not measured up to expectations. The educational levels of the volunteers have fallen, increasing numbers of recruits have displayed low mental aptitude on tests, and black Americans, who now make up about 33 percent of the Army, are carrying too large a share of the burden of military service. Today's Army, for example, is a cross section of black America plus the poorest and least educated whites.

Military planners cite other problems from which the All-Volunteer Force suffers. One is low morale. They point out that in order to attract recruits, discipline has been relaxed. They also claim that recruits have been discontented because their hopes for vocational education, travel, good pay, and personal growth have not been satisfied. Another substantial problem with the All-Volunteer Force is the decline in the size and readiness of the reserve units that back it up. Without strong reserves, the ranks of All-Volunteer Force would be quickly depleted in a major war. In addition, the expense of the All-Volunteer Force may mean that the country eventually may not be able to afford it. There is also real doubt that voluntary recruitment can provide all the manpower the armed services will need in the years ahead. The Army, the Navy, and the Air Force are all slated for expansion under President Reagan's defense budget, so some 250,000 extra recruits will be sought. Yet the pool of 18-year-olds in the general population is expected to drop almost 20 percent between 1977 and 1987.

The impact all these problems have on the fighting capability of the All-Volunteer Force is not entirely clear, but there is presently a heated dispute as to whether the problems, serious or not, can ever be solved

without recourse to the draft.

The draft would have problems as well. A large bureaucracy would have to be created to administer it. It probably would not save much money since training costs would rise with draftees serving only a two-year term. The pay of draftees probably would not be much less than that of current volunteers. I doubt that Congress would cut pay sharply because such an action would only add to the burden the draft would place on the young. The draft would not help us meet the most urgent manpower requirement— the retention of the highly skilled personnel who are now leaving the armed services at a rapid rate. In short, the draft is no panacea for the many ailments of the All-Volunteer Force.

The greatest disadvantage of the draftits inherent unfairness-is apparent to all who study it. How do we determine who will serve when not all serve? If, for example, the Pentagon were to continue to recruit volunteer at 90 percent of the present rate. less than one young man in 100 would have to be drafted. This inherent lack of fairness means that the major obstacle to the draft is really a political one. My judgement is the nation would demand fairness without qualification in any draft it would approve. The "fairness question"

have to be answered convincingly or the draft would lose all popular support and political feasibility. It is no accident that many of those who argue for the draft do so on the basis of the weakness of the All-Volunteer Force, not the strength of the draft.

I believe that it is premature to call the All-Volunteer Force a failure. We must stay with it until it has been given every opportunity to work well. This certainly means that we should provide sufficient economic incentives for recruits, and pay in particular must not be allowed to lag. In addition, educational and housing benefits must be enhanced, funds must be available to keep the All-Volunteer Force prepared for combat, recruiting must be more aggressive, and manpower must be used more efficiently. As things stand today, authorized levels of manpower are being sustained, and the All-Volunteer Force still has a chance to succeed. No one would suggest that it will be easy to meet the requirements of the All-Volunteer Force, but the drawbacks of the draft, with its cumbersome bureaucracy, its inherent unfairness, and its intrusion into the lives of citizens make it imperative that we do our best to keep the All-Volunteer Force going. I am not enthusiastic about the All-Volunteer Force, except when I think about the alternative.

We should recognize, of course, that the All-Volunteer Force is essentially a peacetime service. In the event of war, the draft vould be necessary.

THE FACTS BEHIND THE "WATT QUOTATION"

HON. DAN LUNGREN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

• Mr. LUNGREN. Mr. Speaker, Interior Secretary James Watt has again been the subject of recent front page media coverage. As with other controversies surrounding Secretary Watt. this most recent accusation is based on distorted and supurious information.

The controversy actually centers on an issue that should be constitutionally irrelevant: Secretary Watt's religious convictions. Outside this irrelevancy, however, the facts upon which the accusation that Secretary Watt opposes resource preservation due to the imminence of the Coming" were based on misinterpreted and distorted congressional testimony. This fact was clearly documented in a recent Evans and Novak op-ed piece which is worthy of my colleagues' careful attention.

As Evans and Novak stress in their insightful article, it is the inability to predict the religious future that requires the Interior Secretary to be a prudent manager of our natural resources. Thus far, Secretary Watt has attempted to carry through on this commitment by balancing the interests of economic well-being and energy production with environmental protecThe Evans and Novak article follows:

(From the Washington Post, Aug. 21, 1981)
(By Rowland Evans and Robert Novak)
That Watt "Quotation"

Portrayal of Interior Secretary James Watt as a religious fanatic intent on despoiling the land, based on congressional testimony taken out of context, has penetrated political folklore so deeply that "Doones-burn" now accents it as fact.

bury" now accepts it as fact.

In the Aug. 16 Sunday strip, "Doonesbury's" oil magnate, asked by his wife whether Watt's resource development policy isn't "very shortsighted," replies: "Hell, yes. But the man believes Jesus is due any minute! Who am I to say he's wrong?" Indeed, the slander that Watt favors pillaging America because of Christ's imminent second coming is Washington's conventional wisdom.

That's no accident. The well-financed environmentalist lobby has marked Jim Watt for destruction. Since his environmental views are identical to Ronald Reagan's, the way to separate them is ridicule. If Watt is transformed from an intense conservative into a madman, the environmentalist lobby has hopes that the president's advisers will toss him overboard for Reagan's sake.

Watt himself gave his enemies their opening in his first days as secretary at a Feb. 5 House Interior Committee meeting. Democratic Rep. James Weaver of Oregon asked Watt whether "you agree that we should save some of our * * * scenic resources for our children, not just gobble them up all at once?"

The alleged response to this question has become the main club for flogging Watt. What he actually answered was this: "Absolutely. That is the delicate balance the secretary of the interior must have to be steward for the natural resources for this generation as well as future generations."

eration as well as future generations."

Then, after a pause, Watt uttered words that have haunted him: "I do not know how many future generations we can count on before the Lord returns. Whatever it is, we have to manage with a skill to have the resources needed for future generations."

By any fair interpretation, Watt was not saying that Christ's imminent coming made resource preservation unnecessary, but, on the contrary, that the inability to predict its occurrence makes it all the more necessary for human managers to protect the Earth. In any event, there was no commotion at the hearings. Weaver merely told a long-winded biblical joke, "seeing [that] the secretary brought up the Lord."

But by spring, Watt's "I do not know how many future generations, etc." was being widely reported as his answer to Weaver's original question—without repeating what came before or after. The caricature was embroidered in article in the May issue of Audubon magazine contending that Watt agrees with this dubious biblical paraphrase: "The Earth was put here by the Lord for His people to subdue and to use for profitable purposes on their way to the hereafter." There is nothing in Watt's often cantankerous rhetoric that suggests this.

When Watt appeared before the House Interior Committee July 16, Jim Weaver was ready with more than biblical jokes. He misquoted Watt as telling the committee in February "the Lord could come at any time," then asked: "Are you approaching the environmental issue of surface mining * * * [with] 'Why worry, the Lord's return is imminent?"

Stunned, Watt replied he had taken an oath to enforce all laws, the Surface Mining Act included. Weaver insisted on determining whether "the imminent return of the Lord is having anything to do with this." Watt protested that "my religious freedom is guaranteed under the First Amendment." When Weaver persisted, Republicans raised a point of order. "This is not a hearing on religion," shouted Rep. Donald Young of Alaska.

Committee Chairman Morris Udall told us he thought Weaver's comments "in poor taste" and that "my instinct" was to uphold Young's point of order. But since Watt first raised the religion question, he let Weaver proceed. Udall later privately apologized to Watt. But on July 21, Watt informed Udall he would not have time for the massive Central Arizona water project pushed by Udall if he had to resist hostile questioning condoned by the Interior Committee chairman—an implied threat given national attention this week by The Washington Post.

Watt has himself to blame for proclaiming his belief in the Second Coming, shared by millions of American Christians, during his early weeks in office. Wisely, he no longer discusses religion. But that prevents any response to the lunatic stereotype now perpetuated by "Doonesbury."

"Sooner or later," one leading environmentalist told us, "Ed Meese will see this guy is hurting Reagan politically and get rid of him." In fact, presidential counselor Edwin Meese III and Ronald Reagan, westerners who have been fighting for the same cause as long as Watt, encourage him to be even tougher in attacking the environmentalist lobby. That's why Watt's enemies changed the topic from environmental policy to the Second Coming.

WHO PROMOTED WOMEN INTO COMBAT

SENDING MILITARY

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

Mr. McDONALD, Mr. Speaker, the trend continues of placing women in positions where they will be in combat continues, the United States Code notwithstanding. The 82d Airborne Division, the cutting edge of our Rapid Deployment Force is already short hundreds of paratroopers. However, unknown to the general public, the shortage is even greater as there are many women in the division, wearing paratrooper wings, who will never be dropped into a combat zone. Therefore, our combat strength is even weaker than it appears. There are even some women wearing the Green Beret of the Special Forces. The result is a weakening of combat readiness. Phyllis Schlafly recently issued a statement on who has been pushing to get our women into combat and interestingly enough turned up the fact that the present Supreme Court nominee Judge Sandra O'Connor is part of this effort. Mrs. Schlafly's statement on the Defense Advisory Committee

on Women in the Services (DACOWITS) follows:

WHO PROMOTED SENDING WOMEN INTO MILITARY COMPAT

One of the biggest mysteries in the politics of national defense in recent years has been the peculiar push to assign women to serve in military combat. It is very difficult to find anyone who favors it; no country in the world does it; nothing in history or reason or logic supports it.

Yet the existence of an orchestrated campaign to achieve this objective (the repeal of 10 U.S.C. 6015 and 8549) was obvious when the House Armed Services Committee, Military Personnel Subcommittee, held four days of hearings on that proposal on November 13-16, 1979. Based on the massive evidence against women in combat, the effort to repeal the male-only combat laws was quietly dropped.

Diligent research has just uncovered where the original idea came from: a little-known federal body called DACOWITS—the Defense Advisory Committee on Women in the Services. This is a group of 30 civilians, mostly women, each appointed by the Secretary of Defense for a three year term, "to assist and to advise the Secretary of Defense on policies and matters relating to women in the Services."

An examination of the minutes of the DACOWITS meetings shows that this group, throughout the decade of the 1970s, carried on a steady barrage of pressure against the Armed Services in behalf of full sex-integration even to the assignment of women to military combat. Here is the official record:

DACOWITS Recommendation of April 6-10, 1975: "#9. That the Department of Defense initiate an amendment of Title 10, U.S.C. Section 6015 to remove the total prohibition against assignment of women to vessels other than hospital or transport vessels thereby allowing assignment of persons (male or female) to vessels and aircraft in accordance with individual qualifications of the person to be assigned and the particular mission to be performed (Utilization)"

DACOWITS Recommendation of October 5-9, 1975: "#5. That the Department of Defense direct the Department of the Navy to initiate a legislative proposal to revise or repeal Sec. 6015. Title 10, U.S. Code, to provide women of the Navy and Marine Corps access and assignment to vessels and aircraft under the jurisdiction of the Department of the Navy. (Utilization) #6. That the Department of Defense direct the Air Force to initiate an amendment or repeal of Sec. 8549, Title 10 U.S. Code, so as to permit assignment of women to aircraft. (Utilization)"

DACOWITS Recommendation of April 21-25, 1976: "That the Office of the Secretary of Defense direct the Department of the Navy to initiate legislation to revise or repeal U.S.C. 6015, so as to provide women of the Navy and Marine Corps access and assignment to vessels and aircraft under the jurisdiction of the Department of the Navy; and that OSC direct the Department of the Air Force to initiate amendment or repeal of 10 U.S.C. 8549, so as to permit assignment of women to aircraft. (Utilization)"

DACOWITS Recommendation of November 14-18, 1976: "#8. That laws now preventing women from serving their country in combat and combat related or support positions be repealed. Rationale: Self-explanatory." This recommendation resulted in wire service news stories headlined: "Combat

Role for Women Urged; DACOWITS Seeks Law Change."

The Word "Utilization" after the above recommendations means that they came from the "Utilization Subcommittee." Here is how the proceedings of that Subcommittee, which met four times during the April 6-10, 1975 DACOWITS meeting, reveal the author of the recommendation to put women in combat:

"Judge O'Connor initiated discussion of Title 10, U.S.C., Sec. 6015 relating to the Navy's prohibition against assignment of women to vessels other than hospital or transport vessels. . . This resulted in the following motion by Judge O'Connor, seconded by Dean Heyse, and agreed upon by all present: That the Department of Defense initiate amendment of Title 10, U.S.C., Sec. 6015 so as to remove the total prohibition against assignment of persons (male and female) to vessels and aircraft in accordance with the qualifications of the person to be assigned and the particular mission to be performed."

Judge Sandra O'Connor was appointed to a three-year term on DACOWITS in 1974 and became the principal sponsor of the effort to repeal the laws that exempt women from military combat. Those are the same two laws (10 U.S.C. 6015 and 8549) which the majority of the Supreme Court ruled on June 25, 1981 justify the exemption of women from the military draft. The Court treated the exclusion of women from military combat as fundamental to our civilized society. Sandra O'Connor is simply out of step.

WORLD GATHERING OF JEWISH HOLOCAUST SURVIVORS

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. BINGHAM. Mr. Speaker, between June 14 and June 18, 1981, a historic conference was held in Israel known as the World Gathering of Jewish Holocaust Survivors.

This unique conference was held under the patronage of the Prime Minister of Israel and had the support of leaders throughout the world.

It brought together thousands of persons who survived the terror and human degradation of the Nazi concentration camps.

This conference was conceived, developed, and chaired by Ernest W. Michel, who serves as executive vice president and campaign director of the United Jewish Appeal/Federation of Jewish Philanthropies Campaign of New York.

I am privileged to insert in the RECORD Mr. Michel's eloquent remarks which opened and closed this historic event. It is important that my colleagues in this body and the public be given the opportunity to absorb and to understand the meaning of this important gathering and the message brought forth by the thousands in attendance. It is our responsibility to insure that the rest of the world never

forgets the tragedies perpetrated during the Holocaust by the Nazis.

Mr. Michel's remarks follow:

OPENING REMARKS AT YAD VASHEM

Mr. President, Guests, Distinguished Rabbis, World Leaders, Fellow Survivors from all over the world—My name is Ernest Michel, Auschwitz #104995, born in Germany, and now a citizen of the United States.

Like many of you, I had a dream. Mine was born in the darkness of Auschwitz, nourished by our liberation, and, finally, brought to life 4 years ago when a few of us met in Kibbutz Netzer Sereni.

The dream was, that one day—if we lived—we, the survivors of one of the greatest tragedies in all of human history, would come and stand together to remind a world that would rather forget, not to let another Holocaust happen—to Jews or non-Jews. Once is enough.

I remember vividly my arrival in Auschwitz on a grey winter evening in 1943, after endless days in a cattle car. The SS in their long leather coats, elegant, tall, clean shaven. I remember jumping out of the car—hungry—frightened—whips lashing down.

Then the line moving slowly forward until we came face to face with Dr. Mengele—the Angel of Death—and his thumb went up and down:

Up-You live. Down-You die.

I was a young boy then. I did not know what was happening. How can any human being imagine that he would be forced into a stark chamber, naked, and that he would breathe gas—in agony—until he was dead.

How could you imagine that?

What had I done?
And so, we dreamt. Would we live? Would the day of freedom ever come? That day did come and today we are here. That dream has become a reality, as we meet in the land of Israel, in the City of Jerusalem, the Land of our Forefathers—at this holy place of remembrance called Yad Vashem.

We are the largest number of survivors ever assembled in one place since our liberation 36 years ago. We have come with our children and grandchildren. We come from 23 countries: from four continents. We come from hundreds of cities. We speak different languages. We are citizens of different countries. We are Ashkenazim and Sephardim.

We note with regret the absence of survivors from the Eastern Bloc countries. We invited them here but they were not permitted to join us. Our thoughts are with them and we will not forget them.

All of us are united by an indivisible bond, a bond forged in the death camps of Nazi Germany, the ghettos of Poland, the forests where we fought, and the places where a few caring non-Jews kept us in hiding and saved our lives.

This is a reunion of a special group of people for which there is no parallel anywhere.

Here we are, 5,000 strong, standing together in the land created out of the ashes of our parents, families, friends—those known and those unknown—6,000,000 of them. Killed because they were Jews.

Since they have no graves where we can mourn, we have brought to Israel—in their memory—a piece of rock, a stone. Here is mine—It is a simple stone. On it are written the names of the immediate members of my family who perished. We brought these rocks from all over the world. Eventually they will be built here—at Yad Vashem—

into a monument so that our children and theirs, too, can have a place to mourn.

So here we are, all of us survivors, who came to Israel, sharing memories of a horrifying past, carrying the evidence on our bodies, but proudly standing together to tell a world: We have survived!

We want to stand together once more before time runs out, united in freedom as we were in slavery. We want to meet friends and, perhaps, even lost family.

We want to see in each other's eyes and in the eyes of our children the proof of our survival and the joy that comes from being alive and free.

If we succeed, simply by the great number of us here, to impress upon a world the horrors we have seen—and survived—If we succeed once again in stirring the conscience of mankind—If only that—Then our Gathering will have been worthwhile.

But there is more than that. We survivors want to tell those who try to re-write history and deny that the Holocaust ever happened:

Our eyes have seen; Our ears have heard.

Our nostrils were filled with the acrid fumes from the gas chambers drifting over our camp. Day after day. Week after week. Year after year.

These hands have carried more corpses than I care to remember. Friends, Families. So don't tell us it never happened. We

were there. To deny us that part of our lives negates our very existence. We are the living witnesses and we will continue to speak out until the last survivor is no more. After that, only faces on films and our recorded voices will be left to tell future generations.

This World Gathering could only take place here in Israel—nowhere else. This land was the prayer on the lips of our forefathers for generations—in exile, during pogroms, during the years of wandering. It is the focal point of our being. It is an indelible part of our existence. It is part of our lives. Israel's existence is the vindication of our suffering.

We may come from all corners of the globe but we all have family here. We speak different languages but we all pray in Hebrew.

It is therefore totally appropriate that this reunion, this gathering, begin here at Yad Vashem, this holy place of remembrance, the place of night and fog, where the names of those we loved are enshrined forever.

forever.

And it is equally appropriate that on Thursday we conclude our gathering at a place of majesty and glory—the holy Western Wall, dating back to the time of the Second Temple.

That night—standing before that symbol of Jewish faith and hope—we shall pass on the legacy of the Holocaust to the next generation.

My fellow survivors,

Touched by the madness of our nightmare, we have tried to live normal lives, scarred by the acid of barbarous hatred, we have tried to give love to our children. Forgotten by a silent world, we have tried to avoid cynicism and despair.

Despite all we have known, we affirm life—despite the most ferocious of efforts to steal it from us. While we shall never forget, we will not live with hate. We assert faith and can hug and embrace each other goodbye.

We came to this place in a great burst of love for one another and for the ideals in which we believe-our Jewishness, our Israel, our ancient heritage.

When the final shofar of that closing ceremony sounds, we shall return home and most of us will never meet again.

But we will leave with gratitude in our hearts for the miracle of our survival, for that of the Jewish people, and for the rebirth of the Jewish land. Go, my friendsgo-knowing that history will tell our story

CLOSING REMARKS AT KOTEL

Honored rabbis, leaders of the Government of Israel, fellow survivors from throughout the world. I would like to acknowledge, among the outstanding personalities present, the leaders of two of the largest Jewish communities in the world who have come to the gathering with the greatest number of participants.

First, the chief rabbi of France, Rene Samuel Sirat and the honorable Greville Janner, chairman of the Board of Deputees of British Jews.

We have received many letters and telegrams from all over the world which will become part of the archives. Among them, telegrams from Nissim Gaon, president of the World Sephardi Federation.

Today marks the final day of this historic world gathering-an event we bequeath to

our future generations.

For us, this gathering represents the realization of our most fervent dream. It was an outpouring of love, of joy-a celebration of

Most of you will probably agree that this gathering could not have taken place 10 or 20 years ago. It took time for wounds to heal enough for us to meet. This is why this event took almost 40 years to come into being, and that is why we shall never meet as one group again.

Purpose. We have an obligation to fulfill. During the years in the camps, I remember-as you do-that overpowering will-to

survive, to live—another day.

And so, in words, however inadequate, we must continue to tell the story. That obligation is ours today. Tomorrow it will fall to our children, then to theirs. That is Jewish tradition, that is Jewish responsibility.

We owe it to those who are no longer with

We owe it to ourselves.

We owe it to the Jewish people.

something constructive has Already emerged from this gathering. Represented here were almost 1,000 members of the second generation-our children and grandchildren. I am pleased to announce that they have formed here in Jerusalem a second generation international network whose major purpose will be to carry on the memory of the holocaust.

The first conference will be held within 14

months. We are proud of you.

Like you, I will never forget this week, the seeking, the finding, the first look of recognition: Aren't you? Weren't you? Block 14? Kommando 35? From the Ghetto? The embrace—the touch—God, how good

it felt to see each other, to be together-the tears, the smiles, the memories, the stories.

I met a man from Atlanta.

Will you forget the posters on the wall in the village?

Do you know this one? . . . Anyone from

Lodz?... Anyone from Kassel?

It will take a while to climb down from the emotional high of this unforgettable and unrepeatable week. As long as I live the faces of these four days will be indelibly

etched in my memory, when our tears turned to laughter and our sadness to joy. When we first met on Monday at Yad Vashem our senses were filled with the burning memories of the past.

Tonight our eyes are filled with joy. Our ears have heard the laughter

Thank God, thank God, for letting us have this day.

AGRICULTURAL EXPORTS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, August 19, 1981, into the Congressional Record:

AGRICULTURAL EXPORTS

The United States is the world's leading supplier of agricultural products. We have 46 percent of the world's trade in wheat, 73 percent of the market in feed grains, and 84 percent of the trade in soybeans. Despite the embargo on shipment of grain to the Soviet Union, agricultural exports reached \$40.5 billion last year—the eleventh consecutive record—up 27 percent from the previous year. This year we should reach \$46 billion. The growth, of course, has not been entirely due to inflation. While the dollars brought in by agricultural exports have in-creased more than sixfold during the past decade, the physical tonnage of exports has more than doubled. More than one of every four dollars earned by American farmers

comes from sales abroad.

Today, we use 138 million acres—about one acre of cropland in every three-just to produce for export. American farmers export two-thirds of their wheat, two-thirds of their rice, half of their soybeans, three-fifths of their cotton, and more than one-third of their corn. In 1980, 36 percent of our agricultural exports went to Japan, Canada, and the countries of Western Europe, 21 percent went to China, the Soviet Union, and the countries of Eastern Europe, and 17 percent went to Latin America. Indiana ranks eighth in the nation in exports of all commodities, fourth in exports of feed grains, and fifth in exports of

sovbeans. In the 1980's, agricultural exports are expected to be just as important as they were in the 1970's. Experts say that the days of overproduction and surpluses are gone, and that we are entering a new period in which we will have to lift output if we are to meet an increasingly delicate balance between supply and demand worldwide. Key factors underlying the anticipated demand for our agricultural exports include the constant increase in the world's population, the widespread desire for better diets, and the limited ability of foreign countries to expand their production of food significantly. By the end of the century, demand is expected to double for wheat and triple for rice. Exports of corn should increase from 60 to 80 percent, and exports of soybeans should at least double. Since the consumption of food in the rest of the world will grow faster than foreign output of food, the widening gap will have to be filled by food from the United States and a handful of other nations, such as Canada, Australia, New Zealand, and Argentina.

Given the importance of agricultural exports to the United States-and to Indiana and the Ninth District in particularmust try our best to increase them. There are several general guidelines we should follow to help us serve the markets that will be opening to us in the years ahead. Here are ten suggestions:

We should resist monetary policies that favor high interest rates: High interest rates push up the value of the dollar in relation to other currencies, which in turn makes our exports cost more and our competitors' cost less

We should expand our export credit programs: Though only 5 percent of our agri-cultural exports are backed by these programs, they make it easier to export to less likely customers, such as those nations with limited experience in trade.

We must use these programs to improve the "infrastructure" of importing countries: Inadequate receiving, handling, and storage facilities cut demand for our agricultural products in many nations, so we should help these nations make the needed improvements.

We must improve our own infrastructure. Our marketing and transport facilities are sometimes stretched to the limit today, so they will have to be improved if agricultural products are to be delivered on schedule and in good condition.

We should fight against protectionism. Protectionism threatens any major expansion of our agricultural exports because other nations may raise barriers against us if we raise barriers against them.

We should redirect our effort to develop markets. Promotional activities should be 'targeted" to countries such as Algeria, Morocco, China, Brazil, and Chile, which will our most probable customers in the 1980's.

We must continue to negotiate bilateral agreements to supply food to other countries. Bilateral agreements make trade more predictable and protect our farmers and consumers from the potentially severe ef-fects of sudden bursts of demand.

We must insulate our farmers from the ill effects of embargoes. Embargoes hurt our farmers financially and damage our reputation as a reliable supplier, but we can partially offset these effects by hiking price supports automatically when food is embar-

We should encourage competition among agricultural exporters. Since four large companies conduct the bulk of world trade in grains, there is ample opportunity for competitive co-ops and trading companies to get involved in export programs.

We should cut excessive and expensive regulations. Agricultural exports could be increased if we deregulated trade by, for example, clarifying provisions of the Foreign Corrupt Practices Act and reducing taxes on American salesmen who reside abroad.

WHY DOES SPOTLIGHT ATTACK THE REAL ANTI-COMMUNISTS?

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. McDONALD. Mr. Speaker, Liberty Lobby and its publication, Spotlight, claim to be patriotic and anti-Communist. If in fact they are what they claim, why do they spend their

time attacking the conservative anti-Communists while at the same time they collaborate with the strange leftist cult headed by Lyndon LaRouche?

Perhaps the common thread binding the interests of Liberty Lobby to the LaRouche group is that they both support the Palestine Liberation Organization, the Soviet Union's favorite terrorist puppet movement, and that both organizations are anti-Semitic.

Spotlight for September 7, 1981, carried a three-page attack on this Congressman; Robert Welch, the founder of the John Birch Society; John Rees, the Washington editor of the Review of the News; and Herbert Romerstein, a congressional staffer. Robert Welch needs no defense; he was fighting communism long before the Spotlight editors discovered direct mail fundraising. However, a few of the Liberty Lobby/Spotlight distortions deserve correction.

Interestingly enough, much of the Spotlight article appears to have been lifted from the writings of the La Rouche cult. That cult uses a variety of organizational names including the National Caucus of Labor Committees, the U.S. Labor Party, and the National Democratic Policy Committee. The attacks by LaRouche's leftists draw heavily on such pro-Communist sources as Philip Agee's Counter-Spy magazine, the National Lawyers Guild, and the Nation.

These attacks from Liberty Lobby and Spotlight are continuing and remain wildly inaccurate. In the Spotlight edition dated September 14, for example, it is claimed that there is a relationship between my office and muckraking columnist Jack Anderson. My colleagues by now are well aware of how Anderson and I feel about each other, and how inane is such an allegation.

The charges against this Congressman and Mr. Robert Welch by Spotlight attack center around our support for John Rees, a journalist who has for some 15 years exposed terrorist and subversive threats to America, and in doing so has become one of the leading experts in this field. The information published by Spotlight about Mr. Rees is highly inaccurate. What is particularly interesting is that the Spotlight material consists of the same errors of fact found in the attacks published by the overtly leftist LaRouche group. As any teacher can tell you, when two students come up with the same error in a paper, one of them is copying.

For example, here is how La-Rouche's Executive Intelligence Review publication reported the fact that author Grace Metalious left her fortune to John Rees:

Subject is named in Metalious's will. However, he relinquished any claim when it was discovered the estate owed \$200,000 to the government.

The same story in Spotlight:

Rees was named sole heir to her estate, but renounced his legacy quickly when he learned it consisted of approximately \$200,000 in debts.

Spotlight's copying of the LaRouche material is obvious, but more importantly, both Liberty Lobby and the LaRouche cult preferred to publish a major distortion rather than publish the truth which is a matter of easily checkable public record. The facts are that the Metalious estate was assessed on February 26, 1964, at over \$1,000,000 and that 4 days after he found he had been named heir, John Rees signed legal documents renouncing all claims to the fortune in favor of the Metalious children. His concept of morality required that he give the fortune to the Metalious children.

These facts were widely reported by American newspapers and magazines. But LaRouche's Communists chose to print a lie and Spotlight chose to copy

and republish the same lie.

Both the LaRouche group, which admits it is a Communist organization, and Liberty Lobby's Spotlight attack the role John Rees played in Newark, N.J., in 1967 and 1968 against the Communist-instigated rioting. In fact they seem both fascinated and alarmed by the success of John Rees in calming the community tensions that led to rioting, loss of human life, and millions of dollars in property damage.

The Spotlight story, based on the version of events compiled by La Rouche's leftists, accuses Rees of being a "public ally of left-wing dissident groups." In fact, in Newark John Rees was well known as a consultant to the Police Department and close friend of Police Commissioner Dominick Spina who aided in stopping the rioting being promoted by Communistled agitators.

A careful reading of the LaRouche material indicates that their complaint against Rees was that he was attempting to "pacify" the situation—in other words, end the rioting. This is the substance of an article attacking John Rees in the newspaper of Lyndon LaRouche, New Solidarity, January 8, 1973, entitled "The 1967 Riot and the Police-Baraka Deal."

In their attack, the LaRouche leftists charged that the efforts to end the rioting by gaining the support of all Newark community spokesmen and leaders were "mainly pursued by the local police authorities and by the anti-Communist cranks of the House Un-American Activities Committee" and consisted of the fabrication and dissemination of what they termed "Communist conspiracy theories."

What this amounts to is that John Rees and Herbert Romerstein, then an investigator for the House Committee on Un-American Activities, was able to organize a radio program during which the Newark Police Department; the leader of one of the white groups, Anthony Imperiale; and the leader of a black militant group, LeRoi Jones—now known as Imamu Amiri Baraka—urged the rioters to stop rioting, and said that the violence only benefited the white Marxists from the Students for a Democratic Society led by Tom Hayden, who had come into Newark to instigate the violence.

At that time, 1967 and 1968, Lyndon LaRouche's Communist cult was part of the Students for a Democratic Society and used the name the "SDS Labor Committees." I can understand why LaRouche's leftists hate Rees and Romerstein. They spoiled their riots. But why should Liberty Lobby, which claims to be both patriotic and anti-Communist, jump in on LaRouche's side?

Both Spotlight and the LaRouche Executive Intelligence Review report some confused and particularly strange story alleging some kind of relationship between John Rees and the Hanafi Muslim terrorists who staged armed takeovers of three buildings in Washington in 1977, killing a young college reporter and holding hundreds of people hostage at gunpoint. Rees' only connection with the Hanafi terrorists is that as a journalist he wrote an article about the incident.

The LaRouche allegation had some elements that the Spotlight crowd was too embarrassed to report. LaRouche's Communists complained, however, that this Congressman "cited this incident as the raison d'etre for imposing drastic internal security measures upon the U.S. population."

This Congressman indeed pointed to the Hanafi Muslim terrorist action as one of the reasons we need to reestablish our internal security defenses. The Metropolitan Police once had an informant in the Hanafi Muslim movement. The Hanafi group had a history of involvement in violence. When the police intelligence program in Washington, D.C., was destroyed, that informant was pulled out of the Hanafi group. Had he been allowed to remain in place, the Hanafis would have been arrested before the violence took place and the deaths and injuries and trauma suffered by innocent people would have been prevented.

I can well understand why the Communists of LaRouche's U.S. Labor Party are upset by my calls for increases in our internal security defenses. But if Spotlight is supposed to be anti-Communist, I do not know why they are upset.

So we come to the truth about John Rees. He is a journalist and has been a journalist for many years. He has always gone after solid news stories, and especially the news behind the news relating to politics, foreign policy, terrorism, and subversion, John

Rees realized that in order to write accurately and perceptively about the violence-oriented subversive and revolutionary groups, a journalist needed to be acquainted both with the rank and file and with leaders. For 10 years he was able to attend meetings of the most anti-American radical groups. As a journalist, he reported on those activities in his newsletter. Information Digest, and in segments of the mass media including CBS News, Human Events, the Review of the News, National Review, and other publications.

John Rees has always understood

that a journalist also has responsibilities under the law to society. When he observed activities or obtained documents showing evidence of law breaking or of threats to our internal security, he made that information available to the appropriate U.S. Government agencies. He has done that since 1967, when he first started writing about the violence-prone extremist and foreign-dominated subversive organizations in America. In fact, in 1967, following the Newark riots, John Rees came to Capitol Hill and provided evidence on the Newark riots as a journalist evewitness. This was followed in 1968 by his testimony in a secret session of the House Committee on Un-American Activities on the Communists and subversive involvement in the riots at the Democratic Party National Convention in Chicago.

John Rees is not, as the LaRouche Communists and Liberty Lobby's selfstyled conservative anti-Communists have charged, an intelligence agent for the Israeli Mossad, the British, for the Soviet KGB, or for any other foreign intelligence agency. The truth is so simple the Communist left and their anti-Semitic pseudo-conservative allies cannot accept it. But the truth remains that John Rees is simply a good journalist who has done a valuable service in alerting the American people and the American Government to the threats against our security from terrorist, subversive, totalitarian, and extremist organizations. John Rees deserves commendations and accolades from Americans, not the vituperative smears and innuendos originated by Lyndon LaRouche's minions and repeated by Liberty Lobby's Spotlight.

Both Spotlight and the LaRouche publications also attack Herbert Romerstein, former minority chief investigator for the House Committee on Internal Security and a longtime congressional staffer. He is presently a professional staff member of the House Intelligence Committee. While the LaRouchians smear Herbert Romerstein of being an agent of Israeli intelligence, Liberty Lobby's Spotlight copyists translate that as an "agent of the Anti-Defamation League."

The truth is that Herbert Romerstein, a conservative American, is not connected with the ADL and never has been. Neither has he been involved with Mossad or any other for-

eign intelligence agency.

In fact, Mr. Romerstein has been granted some of the highest security clearances of the U.S. Government. Those clearances were granted to him after extensive, full field investigations by the Federal Bureau of Investigation, and under no circumstances could be granted to someone connected with any foreign intelligence serv-

Spotlight copies a LaRouche charge that Mr. Romerstein somehow is anti-American Legion. The truth is that he has written about Soviet Union's support for terrorism in the American Legion magazine. He has also written recent pamphlet about U.S.S.R.'s backing for international terrorism, which is presently being distributed and which I highly recommend to all my colleagues in this Con-

Herbert Romerstein's consistent work against Soviet-support international terrorism undoubtedly is one of the reasons the LaRouchians attack him. Soviet support for international terrorism is one of the facts La Rouche's leftists work very hard to

Both Spotlight and the LaRouche magazine make the point that Romerstein was once a Communist. That is no secret. From the age of 15 to 17 he was. But at age 19, Herbert Romerstein was the first witness to testify before the Senate Subcommittee on Internal Security and reveal the Communist plans to subvert American youth. Furthermore, for the past 30 years, Herbert Romerstein has worked closely with the Federal Bureau of Investigation, the House Committee on Internal Security, and other U.S. Government intelligence agencies in investigating the activities of the Communists in the United States and throughout the world.

After investigating Communist activities for the State of New York, Romerstein became an investigator for the House Committee on Un-American Activities. He was later promoted to minority chief investigator of the House Internal Security Committee. He is very highly regarded as an expert on Communist activities and had frequently testified before various congressional and administrative

bodies on the subject.

An interesting charge by the LaRouchian leftists which Spotlight avoided using was that Romerstein was, "used as a spokesman at World Youth Festivals under programs organized by World Federalist and CIA Director Cord Myer."

The facts are that the World Youth Festivals in question were Communist youth operations held in Vienna in 1959 and in Helsinki in 1962. Cord

Meyer, who was never the Director of CIA, but a CIA official, organized a group of students from the leftist National Students Association to attend the festivals. Herbert Romerstein's role was something quite dramatically different, and was described by Joseph Keeley in his biography of Alfred Kohlberg called "The China Lobby Man." I would like to point out that the late Alfred Kohlberg was a longtime active anti-Communist and also a founder of the American Jewish League Against Communism.

As Joseph Keeley wrote:

Recently many Americans were shocked to learn that our Central Intelligence Agency had subsidized the left-wing Nation-Student Association to the extent of \$3,000,000, and that some of this money had been used to send American college students to international student gatherings. An interesting footnote to this is provided by another of Alfred Kohlberg's ventures into international relations this time by means of an informal organization informally established.

In 1959 he was approached by Herbert Romerstein, who had done some work for him previously. A huge international Communist. rally called the Seventh World Youth Festival was scheduled to be held in Vienna in the summer of that year and Romerstein got the idea of attending with a small group. The gathering was the first of its kind ever to be held outside the Iron Curtain and this gave non-Communists chance to participate.

Kohlberg liked the idea and took the initiative in raising a fund of approximately \$10,000 to send Romerstein and seven others to Vienna. When the festival opened, approximately 17,000 people were present. Of these roughly 400 were Americans, and of the American group approximately a hundred were "sponsored" by the U.S. Government, presumably by the CIA. However, it is doubtful that the entire delegation of government-sponsored U.S. students provided as much anti-Communist propaganda as the handful subsidized by Kohlberg.

One of Romerstein's projects was to have 2,000 pamphlets printed en route in Germany, addressed to the youths attending the festival. These pamphlets, printed in German English, Chinese, and Russian, contained a heavy charge of the usual Communist clichés, as camouflage. But in addition they stressed something that was anathema to the Reds-freedom. The pamphlets exhorted the youths attending the festival to fight for freedom for all peoples, including Hungarians and Tibetans. the commisars running the festival learned of the hoax they were furious. Indignantly the hand-picked "United States delegation" (not those sponsored by the U.S. Government) condemned the pamphlets in a statement to the press. One revealing sentence of this declared: "From whom and with what authority do the authors and disseminators [sic] of this particular piece of ill-meaning literature speak?"

A small riot took place when the big parade of August 2nd was about to begin. Kohlberg's delegates at that point unfurled banners reading "Remember Hungary," "Remember Tibet." and "What About Soviet Imperialism?" This was too much for the comrades. The New York Times of August 3rd told how the small group was

beaten up. Charles W. Wiley, one of them, was knocked to the ground by Communist "enforcers" and his wife Katina, seven months pregnant, was cut and bruised. Thanks to the prompt action of Austrian policemen there were no serious injuries, and the little band was rescued from the furious Reds.

As for the larger group from America, present under government auspices, their activities were considerably more genteel and refined, as befitted ladies and gentlemen of liberal persuasion. They caused the Communists no trouble at all. One of the Kohlberg group told me with amusement of their attitude.

"They made it plain that they deplored our actions, which they insisted were undignified and not the proper way to build friendship and understanding."

The Communist leaders made a more realistic appraisal of the propaganda deficit that had been incurred. In a New York Times story dated October 26, 1959, under the headline "Reds Displeased With Red Fete," several reasons were given for their failure. A special eleven-member evaluating committee, comprised of top Communist Party officials, leveled strong criticism at the festival committee for their "underestimation of the effectiveness of opposition groups and individuals, both in their influence on delegates and in their criticism of the Communist aims of the festival.

At the time of those two Communist World Youth Festivals, Herbert Romerstein was not working with the CIA, which had organized a leftist American youth representation at the festivals. On the contrary, Herbert Romerstein was a very active member of the conservative American students group that fought effectively against the Communists.

And so, again, I can understand why the Communist totalitarian followers of Lyndon LaRouche hate Herbert Romerstein, one of the most articulate and effective enemies of communism in this country. But why does Liberty Lobby, which says it is patriotic and anti-Communist, tell such lies about him?

These examples are typical of the sorts of charges and smears leveled against John Rees and Herbert Romerstein and other anti-Communists. It would take a book to examine, analyze, and refute all of them. But all are equally inaccurate, distorted, and untrue

These articles appearing in the publications of the leftist LaRouche clique and in Liberty Lobby's Spotlight attacking this Congressman and other active anti-Communists make clear a strange relationship between the supposedly anti-Communist Liberty Lobby and the Communist National Caucus of Labor Committees/U.S. Labor Party/National Democratic Policy Committee.

In one of the publications of the LaRouche clique called the New Democratic Policy Committee Bulletin, and subtitled "LaRouche Challenges 'Spike Hoax,'" LaRouche describes the relationship between his organization and the Soviet KGB. LaRouche said:

Once Soviet circles judged that my associates and I were tied to top circles of the U.S. intelligence community, both KGB other Soviet agencies began dropping messages for U.S. intelligence community information into our laps. We became, in that sense, like the spooks' letter-box drop, the proverbial hole in the third oak tree from the corner. Since all of our electronic and mail communications have been under total surveillance of the National Security Agency, any message we received was automatically delivered immediately to both relevant and irrelevant elements of the U.S. intelligence community within minutes or hours, without any further effort on our This activity supplemented our own intelligence evaluations work which was routinely made available to the intelligence community through the relevant publications of my associates and myself.

Despite its many glaring inaccuracies, LaRouche's statement raises some interesting questions.

First though, the inaccuracies include the allegation that the National Security Agency was monitoring La-Rouche's communications. This is clearly untrue. No U.S. Government agency has monitored any of the La-Rouche organization's communications or any other of the activites of the LaRouchians since the FBI closed their case on the group in 1976. I believe that the FBI erred in closing its investigation of this violence-prone radical crackpot group.

The other inaccuracy is that somehow the U.S. intelligence agencies take seriously the "intelligence information" provided by this crackpot extremist group. They most assuredly do not

But what appears to be true is that the KGB has fed information to the LaRouche clique, and that that KGB disinformation found its way into the propaganda publications of the National Caucus of Labor Committees/U.S. Labor Party.

Analysis of the LaRouche/U.S.

Analysis of the LaRouche/U.S. Labor Party publications indicates that on almost every major international issue, the LaRouche clique comes out on the Soviet side of the discussion.

Furthermore, LaRouche's admission that there is a close relationship between the LaRouchians and the KGB has been confirmed by other sources, including other leaders of the LaRouche cult who have boasted of their close relationships with persons in the Soviet U.N. mission. A substantial percentage of the Soviet U.N. mission personnel are KGB officers.

If Liberty Lobby and its publication, Spotlight, intend to continue to claim to be anti-Communist, it is incumbent for them to explain why they ally themselves with Lyndon LaRouche's Communists, and why they spend their time attacking those on the front line of the fight against America's Communist enemies.

Over the years, Liberty Lobby has attacked many of the most active anti-Communists and conservatives in America, including Rev. Jerry Falwell, founder of the Moral Majority, and many distinguished men and women now serving in President Reagan's Cabinet.

In fact, it is clear that Liberty Lobby is not really anti-Communist. It is an anti-Semitic organization pretending to be patriotic. In fact the leaders of Liberty Lobby target as their enemies all anti-Communists who stand up against terrorism carried out by the Palestine Liberation Organization (PLO) and the lunatic regime in Libya.

In sum Liberty Lobby is a fraud, an organization so captive of its pathological hatreds that it prefers to ally itself with the Communists against those who defend America against its enemies.

IN RECOGNITION OF CHRISTOPHER BIERBAUM

HON. CLINT ROBERTS

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

Mr. ROBERTS of South Dakota.
 Mr. Speaker, on September 13, 1981,
 Christopher John Bierbaum of Beresford, S. Dak., will receive the highest honor bestowed by the Boy Scouts of America—the elevation to Eagle Scout.

This award, and enduring symbol of dedication and commitment to the values revered by the Boy Scouts, will long remain a source of pride to Christopher and his family. In recognition of his efforts, I trust that my colleagues in the House of Representatives will join me in congratulating Christopher for securing this high honor.

This accomplishment represents the finest tradition of the youth of South Dakota, and I am proud to honor Christopher Bierbaum here today.

INTEREST RATES HINDERING ECONOMIC RECOVERY

HON. DAVID DREIER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

• Mr. DREIER. Mr. Speaker, excessively high interest rates is the one factor currently standing in the way of American economic recovery. During the recent district work period, I had the opportunity to meet with numerous constituents—most of whom expressed their deep concern over the present level of interest rates. As a new member of the Banking Committee, I feel it is imperative that Con-

gress utilize sound economic principles in addressing this crucial problem.

One lasting legacy of the Carter administration has been a devastatingly high rate of inflation. For the most part, this inflation has been fueled by the Federal Government's policy of deficit spending.

In order to finance this deficit, the Government has entered the private capital market and has borrowed, at high-interest rates, money that would otherwise be available to private businesses and individuals. The Government has also financed this multibillion-dollar debt by selling Treasury notes to the Federal Reserve. This sleight-of-hand creation of dollars has only served to push the inflation rate higher and higher.

In order to cope with this dangerous inflation, the Federal Reserve Board has settled on a policy of high interest rates. Yet, these high interest rates are strangling American business. The housing industry has been particularly hard hit by these excessive rates. Recently released figures show that for a third consecutive month, California homebuilding has continued to decline.

In July, homebuilding in the State of California declined nearly 12 percent from the already depressed levels of June. But this figure tells only part of the story. For businesses such as furniture, appliance, and textile concerns also suffer from this downward spiral in housing starts.

Similar examples of economic distress can be seen in the U.S. auto industry. Lack of available loans has deterred major domestic manufacturers from borrowing the capital necessary to modernize plants and expand production. This retooling and revitalization is badly needed if our industries are to compete with their foreign counterparts.

Mr. Speaker, the message is clear: Excessive interest rates must be adjusted to reasonable levels. If this problem is not adequately and forthrightly addressed, then America will be condemned to suffer several more years of economic stagnation.

A SPECIAL TRIBUTE TO ROY WILKINS

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

• Mr. STOKES. Mr. Speaker, many of my colleagues will be paying tribute to the late Roy Wilkins, former executive director of the National Association for the Advancement of Colored People in the coming days. As we listen to these tributes, remembrances and send our condolences to his wife, Aminda Wilson, I think that it would be appropriate also to insert in the RECORD, an article which appeared in the Washington Post today on this great human being.

Mr. Speaker, the newspaper article which I am referring to is touching and unique because it captures a different perspective on not only the civil rights achievements and the public's image of Roy Wilkins but also provides a commentary on his life as the patriarch of the Wilkins family. The article was written by Mr. Wilkins' nephew, Roger Wilkins.

Mr. Speaker, Roger Wilkins ably communicates in the article the warmth and compassion of Roy Wilkins as not only the leader and shepherd of the civil rights movement but also projects him in that same role as a mentor and family leader. Moreover, Mr. Speaker, the article illuminates the inspirational virtues of this great human being not only for those of us who weighed our children's futures in this Nation on his strength in the struggle for civil rights but also for that same kind of strength and courage he provided his family.

At this time, Mr. Speaker, as Members of this body so appropriately continue their tributes to Roy Wilkins, I would like to insert in the RECORD, the article which appeared in the Washington Post entitled, "The Joy and Power—Remembering Roy Wilkins' Stubborn Struggle":

THE JOY AND THE POWER—REMEMBERING ROY WILKINS' STUBBORN STRUGGLE

(By Roger Wilkins)

There is a picture downstairs in the family room in our house of a tall, black man holding a little black baby. It was taken about 49 years ago on the day when my Uncle Roy and I were getting acquainted.

My mother, father and I lived in Kansas City then and Uncle Roy had just gone to New York to work for the great black scholar W. E. B. DuBois, at the NAACP magazine, The Crisis. During those years, my father, Uncle Roy's younger brother, was very sick and my uncle would come from New York to visit us as often as he could. He was the tallest and handsomest man I knew and he would hang his pants on the closet door. I thought that was wonderful and so when I got tall enough, to my mother's dismay, I, too, would hang my pants on the closet door.

Roy Wilkins wasn't famous in those days, and when he came to Kansas City for my father's funeral 40 years ago, he was just my kind uncle from New York. He took care of both Grandpa and me at the funeral and when they read thanatopsis for Daddy, he touched my hand while Grandpa was crying. I didn't cry because Uncle Roy had told me that little men weren't supposed to do that.

As the years passed and my uncle became more prominent, I saw him through a double lens. He was the closest thing I had to my father, so I would watch him closely for hints of what my father might have been. And then when I grew up and went to the Justice Department, working on the northern urban riots, though he still hung his pants on the closet door, he was also my senior colleague in the civil rights move-

ment. He didn't want the world to think that he had created me and I didn't want the world to think I had a special pipeline to him. In fact, he hadn't and I didn't, but we kept our distance so the appearance would match the reality.

would match the reality.

But there would be Christmas dinners when Uncle Roy would carve the turkey and slice the ham and Aunt Minnie would tell my children and me wonderful stories about my father and grandfather. Uncle Roy and I would talk baseball. He was a Dodger fan long before Jackie Robinson came into the league and he would use those long, graceful hands of his to show me how Pee Wee Reese used to lay down a bunt.

Those long, graceful hands almost got him killed once. Thurgood Marshall told me that in the 1930's, when he and Uncle Roy disguised themselves as sharecroppers and went to Mississippi to investigate conditions there, a white storekeeper in a little town noticed those hands and knew they were not a field man's hands.

"Come on, Roy, let's get the hell out of here," Justice Marshall recalls saying.

So the two of them escaped, but Thurgood says they had been there long enough to get what they were after anyway. Before he went to the NAACP, Uncle Roy

Before he went to the NAACP, Uncle Roy edited a black weekly paper in Kansas City. He always loved the English language and through his years at the NAACP he kept an old battered Underwood next to his desk on which he would compose elegant statements and send or take them out to do the battle for justice to which his life was committed. He did other things in the movement, of course. He marched in demonstrations, he orchestrated the March on Washington in 1963, he met in rooms from battered shacks in Alabama to the Oval Office on Pennsylvania Avenue to help shape strategies to secure more justice for Americans.

But it was the word he loved and used with joy and power in his life's fight.

In the 1960's, people in the Kennedy administration would tell me that he was the civil rights professional on whom they relied. After that, he and Lyndon Johnson grew to love each other. They were men of the same generation, and both of moderate origins. Those associations enabled Uncle Roy to translate the turbulence in the streets into visions of the future that were comprehensible to Washington policymakers. In that way, Uncle Roy and Martin Luther King were closer partners than either of them ever acknowledged. They had different ways of pursuing freedom, you see, because Martin usually fought with the masses behind him on the streets, and Uncle usually fought behind closed doors. They didn't always understand each other's way.

Uncle's hand was large in the Civil Rights Act of 1964, the Voting Rights Act of 1965 and the Fair Housing Act of 1968. And so was Martin's. They were opposite sides of an honorable coin. And they did support each other. I ran into Uncle Roy one day in the mid-1960's at the shuttle terminal at La Guardia Airport. "Where you going?" I asked. "Down to see [J. Edgarl Hoover," he replied, "to try to get him off of Martin's back." A couple of weeks later I saw Martin at a meeting where young militants were calling my uncle an "Uncle Tom" because of his fierce belief in integration.

"Tell Roy I'm with him," Martin said.
Uncle Roy won a lot of honors, the greatst of which was the love and the trust of

est of which was the love and the trust of the people in the NAACP who could afford only to pay \$2 for their memberships. Some of my most vivid memories of him were in airports with redcaps shaking his hand thanking him earnestly for the work he was doing. He loved that because he had once been a redcap himself.

He always had time for the longest local NAACP chapter meetings and then for the last person in the room who wanted to talk to him after that. When I was a kid in Harlem, he would sometimes take me to nearby meetings and when I would come home hours later, I would tell my mother: "Uncle Roy stayed to talk to the last old lady again.

And he was stubborn. Once when he was down at the LBJ Ranch, near the end of the president's life. Uncle Roy decided that he was tired and started up to bed. President Johnson told him it wasn't time to go to bed because the late news hadn't come on yet.

"Mr. President," Uncle Roy replied, "nobody has told me what time to go to bed since my mother died, and that was a long time ago." And then he went to bed with the same dogged stubbornness which he had brought to the civil rights struggle.

We were very different, Uncle and I, but we loved each other very much. Now he has gone to his final rest and the family is gathering. So it is time for me to get my pants down from the closet door and go.

ANTITRUST CHIEF'S VISION: NO PLACE FOR SMALL BUSINESS

HON. BERKLEY BEDELL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

. Mr. BEDELL, Mr. Speaker, I wish to call my colleagues' attention to the August 1981 issue of Dun's Review, a monthly publication for business managers. The magazine features an article entitled, "Big Shift in Antitrust Policy," an interview with William Baxter, the new assistant attorney general in charge of antitrust enforce-

As the enormity of the DuPont-Conoco merger sinks in, and as the latest list of corporate takeover announcements continues to grow, there are many who are wondering what the Justice Department's top antitrust official thinks about all this. Apparently, he thinks the increasing concentration of control of industrial assets and economic power is just fine.

Mr. Baxter does not beat around the bush. He very candidly states that he would not be disturbed by evidence of a marked trend toward greater aggregate concentration in our economy. In fact, he goes so far as to say he would see nothing wrong with greater aggreconcentration of ownership throughout the world. These are his exact words:

There is nothing written in the sky that says that the world would not be a perfectly satisfactory place if there were only 100 companies, provided each one had only 1 percent of every product and service market.

Well, maybe Mr. Baxter would be content to find himself in a world

where there are more national governments than there are business enterprises, but I know many people who would not be happy in such a place. The millions of small businessmen in America probably would not find it very satisfactory living in a world with only 100 companies controlling all commerce and industry, for there would be no place for small business in such a world. And I doubt that most American consumers would be very happy living in a society where entrepreneurs and local businessmen have been completely displaced by multinational corporations.

Conglomerate mergers apparently do not cause Mr. Baxter to lay awake nights. Neither, apparently, number of questionable vertical relationships between producers, distributors, and consumers. Here is another quote from the interview in Dun's:

Vertical structuring of the economy through long-term supply contracts, exclusive dealing arrangements, territorial re-strictions, the selling of products in bundles, often promotes efficiency.

What kind of efficiency is he promoting? The kind in which we have 100 companies dividing up the world into 100 equal shares? Perhaps Mr. Baxter forgets that the British Crown tried doing something similar with royal charters to do business in the New World. The American Revolution and Adam Smith's treatise "On the Wealth of Nations" both appeared in 1776 to prove the error of such concepts.

Elsewhere in his interview with Dun's, Mr. Baxter states:

I have no concerns about vertical mergers

On August 26, testifying before the Judiciary Committee's Subcommittee on Monopolies and Commercial Law, the Justice Department's antitrust chief reiterated his belief that his agency should not concern itself with vertical mergers between suppliers. distributors, and/or users of the same product. The next witness that day was David Clanton, Acting Chairman of the Federal Trade Commission. Mr. Clanton took quite a different position, saying his agency feels that the Federal antitrust laws clearly give the Government a responsibility to monitor vertical merger activity. This difference of opinion serves to underscore the wisdom of having an independent Federal Trade Commission with antitrust enforcement powers.

Mr. Speaker, Dun's Review labeled Mr. Baxter's comments as being provocative. They certainly are. The new assistant attorney general for antitrust has outlined some very radical departures from the antitrust enforcement policies of at least the last three administrations. And he had signaled his willingness to accept a vision of the future that I find very troubling.

As a member of the Small Business Committee's Subcommittee on Antitrust. I intend to keep a careful watch on antitrust enforcement-or lack of it-by the new administration. I do not believe the thousands of small businessmen in my district would tolerate it if I sat idly by while we are brought to the point where 100 Governmentsized businesses control all the economic activity in the world.

TRIBUTE TO LILLIAN JANIS OF CLEVELAND, OHIO

HON. MARY ROSE OAKAR

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

. Ms. OAKAR. Mr. Speaker, recently, one of Greater Cleveland's finest citizens, Lillian Janis, has passed away. Lillian was a source of inspiration and love not only to her family, but to all who knew here. She was a personal role model for me. The following article gives a capsule view of her many interests and concerns. All of us will miss her very much.

LILLIAN FIEDLER JANIS, STARTED LABOR MOVEMENT CAREER AS GIRL

As a girl of 12, Lillian Fiedler Janis started her labor union activity by walking through the snow in Passaic, N.J., to solicit funds for striking coal miners.

She continued her work for union causes as an adult, and during almost six years as a Shaker Heights council member worked for other causes as well.

Mrs. Janis, 68, died yesterday morning in her Shaker Heights home. She had been ill with cancer for 14 months.

She resigned her council seat in June because of her illness. In March she had been elected vice mayor.

Mrs. Janis did not finish high school and in the Depression years of the 1930s was a member of the Young People's Socialist League.

She was an organizer for the Bakery Workers Union as well as the International Ladies Garment Workers Union early in her life. She met her future husband, Sam Janis, on a bakery workers picket line in Elizabeth, N.J.

He had been fired as a presser in a dry cleaning plant for trying to organize a

She was named an honorary member of both the Baker's and Carpenter's unions many years ago.

While on council, Mrs. Janis' special areas of interest included establishing a program for older persons and for the after-school care of children. She also was chairman of the building inspection committee.

In the early 1970s, Mrs. Janis was a volunteer remedial reading tutor in the Cleveland school system.

In 1971, Mrs. Janis received the New Frontier Award from the Cleveland chapter of the Americans for Democratic Action (ADA) for her work as vice chairman of the Cleveland Grape Boycott Committee and as a union organizer. She was also cited as a "champion of society's underdogs."
Also in 1971, the Cleveland AFL-CIO Fed-

eration of Labor Union Counselor Associa-

tion presented its top community award to Mr. and Mrs. Janis for their union work and her participation in the Cleveland peace movement.

Mrs. Janis received an award last year from the Ohio Coalition of Labor Union

She was on the national board of ADA and was a member of the Ohio Committee for the Passage of the Equal Rights Amendment.

She was a member of the county Demo-

cratic committee for six years.

She is survived by her husband who retired in 1978 as regional director and international vice president of the International Ladies' Garment Workers Union; sons, Robert Geneslaw of Killsdale, N.J., and David, of Helena, Mont.; daughter, Barbara of Mayfield Heights, and two grandchildren.

BOTHA THE BITER

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

 Mr. STARK. Mr. Speaker, the other day I came across an article in the Economist that I found very timely, and I thought I would share it with my colleagues.

We can all agree that the issue of South Africa, its apartheid policy, and its increased activity in Angola are of great concern. I think you will also agree, after reading this article, that the Reagan administration's policy of neutrality, is not neutrality at all.

[From the Economist, Sept. 5, 1981]

BOTHA THE BITER

The Soviet and South African governments were delighted by the American use of the veto in the United Nations security council on Monday against a formal con-demnation of the South African armed forces' incursions into Angola. Although the motion was foolishly worded, this veto has infuriated many of the three quarters of the people of the world who are humilated by white South Africa's racial policies. It has strenghened Mr. Pieter Botha and his South African cabinet in the belief that they can count on American protection. It has obliged the friends and allies of the United States to stand apart from it.

These are heavy prices to pay. They include some practical prices in third world. An internationally acceptable settlement in Namibia-one that might have got the Cubans out of Angola-will now be harder to get. Next time America needs the help of a third party, as it needed Algeria's to get its hostages out of Iran, some of the necessary trust may be found no longer to exist. Support at the UN for resolutions condemning Russia-as, for instance, after the invasion of Afghanistan-may not be so forthcoming in future. America has forfeited, at least for a time, some influence in guiding economic development in black Africa and in moderating its extremists. By spitting into the wind of change it has encouraged the Qaddafis of the continent. The colonel was saying some more extraordinary things this week.

NEUTRAL ON WHOSE SIDE?

Mr. Chester Crocker, America's assistant secretary of state for African affairs, ex-

plained the policy by saying that the Reagan administration aims to remain neutral as between the South African government and the black African ones. There are dangers in giving Mr. Botha's government the impression that the United States is not so much "neutral" as neutral on South Africa's side (see page 29). The Americans have made a mistake in assuming that the South African government's response to gentle handling would be to show a corresponding restraint. Instead of seizing Mr. Reagan's outstretched hand, Mr. Botha has to all intents and purposes bitten it. In recent weeks, beside the deep thrust into Angola, there have been smaller but significant South African incursions into other blackruled neighbour states, including for the first time into Lesotho.

As previous reports had said that there might be anything up to 20,000 Cuban troops in Angola, anything up to 5,000 East Germans there, several thousand Russian technical advisers and several hundred Russian soldiers, it is not surprising that the South Africans appear to have captured one Russian warrant officer. Everybody knew that Angola had imported far too many foreign communists. The effects of tougher South African military policies could have destabilising effects on neighbouring blackruled states and increase Russia's chances of putting in more of the same. The free world's interests are the opposite of that.

There are increasing signs that the South African government (not explicitly, perhaps not consciously, but inherently) does not share the American and European concern for the stability of the southern African region. To a greater degree it may share Russia's interest in destabilising it. Given the premises that shape thinking in Pretoria, it is quite logical for people there to suppose that the thing to do now is to draw those Cubans and Russians into combat, and thus hope to ensure that the western world will be forced to rally round Mr. Botha's flag.

NOBODY'S ALLIES

White South Africans need to be disabused of that hope. In a speech in Johannesburg this week Mr. Edward Heath was doing some of the disabusing. He rightly said that, but for white South Africa's racial "we would be natural partners, wedded in common cause against the communist onslaught in southern Africa itself and around the world". However, "unless and until the dismantlement of apartheid is assured, it would be a grave mistake for South Africa to base her strategy on the assumption that when the chips are down the west will stand with her".

The Americans have for several years shared with the four other members of the western "contact group"-Britain, Canada, France and West Germany-the common purpose of bringing Namibia to real inde-pendence, in a way that will not make it more likely that a great many white South Africans will eventually be murdered in their beds. In return for their search for these safeguards, the allies seek to prod South Africa's white rulers faster forward from their present racial policies.

It has been agreed that this pressure in Namibia and on South Africa's internal policy can at present best be exercised very quietly, instead of with much noise. Quietness is not made easier when South Africa's armed forces are locked in loud combat with those of an independent African country, deep inside that country's territory, and when the echoes of this fighting are thun-

dering around startled capitals across the world.

There are many double standards in the condemnations of Mr. Botha's government. A lot of other undemocratic leaders do indecent tribal things to their peoples, and the world plays Olympic sports with them. But America and western Europe cannot afford to appear to be getting into bed with a macho South Africa, especially at a time when America has a right-wing administra-The penalty for such an association would not merely be paid in the rest of Africa and the United Nations, but also in the allies' internal cohesion. The revulsion against South Africa explodes all the way from the playing fields of New Zealand, through the streets of Harlem and Brixton. to university campuses and to congregations of sober, decent, liberal people everywhere. By its long-drawn-out folly, white South Africa has made its society into the polecat of the world. One does not cuddle up close to a polecat when it is baring its teeth.

AWACS SALE IS A CAPITULATION TO BLACKMAIL

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

. Mr. OTTINGER. Mr. Speaker, the administration's decision to sell Saudi Arabia five airborne warning and control systems (AWACS) and other sophisticated weapons to Saudi Arabia is a tragic capitulation to blackmail, a threat to our national security, and a breach of Ronald Reagan's explicit promise to the American people that he would not sell weapons to Arab nations who might threaten the existence of Israel.

Last year, in an interview with the Jewish Telegraphic Agency, candidate Ronald Reagan promised:

A Reagan administration will, by legislative proposal and executive actions, bolster Israel's security against all forms of aggression. Specifically, a Reagan administration will not continue to ship massive quantities of sophisticated armaments to so-called 'moderate" Arab States who, in fact, might directly threaten Israel's existence once they are in possession of such arms.

Yet President Reagan wants to send Saudi Arabia weapons with capabilities far in excess of any possible defensive need. President Reagan wants to send Saudi Arabia the AWACS, the most sophisticated airborne radar system in the world. What is worse is that President Reagan is going back on his word less than 6 months after the Saudis called for a holy war against Israel.

Either candidate Reagan intentionally misled the public or President Reagan has forgotten his own commitment in a dangerous attempt to ap-

pease the OPEC oil cartel.

Indeed, this is not the only promise to be broken with respect to this proposal. The sale of sophisticated offensive components for F-15 aircraft, which President Reagan is including in the AWACS package, is in direct violation of an expressed commitment to Congress at the time the F-15 sale was approved that they would not be given these offensive capabilities.

Mr. Speaker, it is clear that this sale directly contradicts U.S. interests, and rewards intransigence rather than encourages moderation. The Saudis have steadfastly refused to cooperate in effectuating the Camp David accords, and publicly declare repeatedly that Israel is a greater threat to their security than the Soviet Union. The sale of AWACS will enable the Saudis to monitor all of Israel's military move-ments, and such information in the hands of Israel's enemies will bring a new and insidious dimension to any future Arab-Israeli conflict. Further-more, should Saudi Arabia have an Iran-style revolution, the danger of AWACS technology being transferred to the Soviets is considerable.

I urge my colleagues to reject this dangerous proposal, and to join me in cosponsoring a resolution of disapproval to block this sale.

A MODERN PIONEER

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. VANDER JAGT. Mr. Speaker, for the past 72 years, Mrs. Alice Wood, of Muskegon, Mich., has carved an unforgettable niche in the minds of her family and friends. At a young age of 72 years, she still scrambles across the roof of her home to prevent and mend damage of winter storms. She stockpiles enough wood to heat a small city and puts to shame those of us winded by a set of tennis or a climb up a flight of stairs. Mrs. Wood, all 5 feet and 90 pounds of her, flies the American flag every day of the year, weather permitting. She is a modern day pioneer woman who still relies on venison, squirrel, and her garden for food.

For the benefit of my colleagues, I would like to share the following delightful story, written by Ms. Zoe-Ann Ayers and printed in the July 1981 edition of Oasis, a publication of the Social Security Administration, about her first encounter with Mrs. Wood. The story is about the antics and habits of a truly spirited American

pioneer.

A Breath of Spring (By Zoe-Ann Ayers)

A come-in card prompted a visit to the DO by a wee sprightly woman. She threw her arms around me, told me how good it was to see me and then whispered, "Aren't you gaining a bit of weight?" She was right, darn it.

Alice Wood is, at age 72, the most alive

and self-reliant person I know.

I first met Alice when she and her husband, Bill, came into the office on a SSI

problem. His first words were, "Make her stay off the roof." Needless to say, I wasn't sure what was happening, or what wall they were coming off. It turned out that she had been on the roof, putting up metal flashing so the snow would not back up and cause ice damage. His concern was that she would hurt herself, hers was that "it had to be done, and he isn't steady enough." Their concern for one another evolved over 53 years of marriage.

In the course of the conversation, it developed that they cut all their own wood for heating the house—well over 11 cords annually. (For the uninitiated, a cord of wood is 4 feet by 4 feet by 8 feet, which is a considerable amount, especially when the couple involved were 70 and 77 at the time.)

I next saw Alice a year or so later, after Bill had died. She came into the DO for an SSI redetermination. (Alice receives SSI since her Social Security benefit of \$209.10 is low enough to make her eligible. She worked at a crate factory in Hesperia for 20 years. Bill had worked at Teledyne Motors in Muskegon but retired before the company instituted a pension plan.) Before leaving the office she said, "Come see me, anytime. I would love to have you." I soon took her up on her invitation.

You can readily spot Alice's farm—the one with a U.S. flag flying every day. The flagpole is made of two pieces of pipe joined together, and it has a wee tilt to it.

Her homestead is on 85 acres, containing both timber and open sandy areas. The house, when purchased 42 years ago, was in need of a roof, windows and walls, which she and Bill installed themselves. It is a small home, modern in that it has electricity and indoor plumbing. And it is filled with wall-to-wall plants, cats, dogs, and love. I was greeted with a big hug, her three dogs barking wildly, coffee and homemade apple pie (which, of course, I was too polite to refuse).

The furniture is basic yard sale and auction purchases that, with her daughter's help, have been stripped and reworked. (Alice's daughter and three grandchildren live 30 miles away, and she talks to them daily by phone.) Her davenport and chairs have been refinished and upholstered after installing springs from old car seats. She has a gun cabinet that emerged as beautiful white oak after the dirt and old paint were removed. It didn't have a door, so Alice took an old storm door apart and cut it down to fit. It is a fine piece of craftsmanship.

Outside, I looked at the woodpile that she was working on for next year. Her basement is half full of wood, and the pile outside must be 4 feet high and 12 by 16 feet square. I lifted, or attempted to, a piece of oak that had been hauled in the day before, and it weighed around 40-50 pounds. (I failed to mention that Alice is 5 feet tall and weighs about 90 pounds.) She cuts wood with a chain saw, which she handles like a professional.

Alice gardens and cans most of her food. I was taken on a tour of her garden, where she is talking of putting in asparagus—8½ acres worth, more or less. This sounded like a lot of work to me, but she said, "I always like working outside. Guess you can tell by the way my house looks."

She is given venison if some of the family "gets their deer," and friends bring her fish. When she receives an occasional lake trout, she puts it up in half-pint jars for an imitation oyster stew. "I can't afford oysters, but you can't tell the difference." A gun rests in a rack over the table. "I love squirrel. In

fact, that gun is always loaded so if I spot one, well...." She asked if I hunted, which I do, and she gave me the highest compliment a farmer can give—permission to hunt on her property. When I departed that day, she insisted I take along canned vension, chicken and frozen sucker.

Alice inquired if I liked wine, and when I answered in the affirmative, she reached behind a cabinet and brought out a bottle of dandelion wine, homemade from "an old recipe my relatives brought over from France." I also sampled the grape wine her daughter made and marveled at the life she leads, what with dining on venison, fish, fresh vegetables, wine, and apple pie and enjoying good friends and good health.

I wonder if this is the stereotype you have of SSI recipients? I know that my ideas have been changed.

IL PROGRESSO 100TH ANNIVERSARY CELEBRATION

HON. FRANK J. GUARINI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. GUARINI. Mr. Speaker, Il Progresso, the leading Italian language newspaper in America, marks its 100th anniversary today with the printing of a special 100 page issue. This commemorative edition marks a century of the highest quality service

to the Italo-American community.

From its initial start in 1880 serving the growing community of Italian immigrants Il Progresso has grown to a national readership of 200,000. In 1928 this fine paper took a dynamic turn when it was purchased by Generoso Pope. Generoso Pope and his son Fortune Pope were responsible for publishing Il Progresso for the next 52 years, a period which saw the newspaper's influence grow in responsibility and the shaping of events.

During this period Il Progresso worked hard to extend the understanding between Italy and America. It worked to break down the barriers of discrimination, and Il Progresso helped foster an identity of the community. During this period Italian Americans became prouder of their heritage.

Today Il Progresso continues to change with the times. Under its new publisher, I. P. Publications, and its excellent general manager and managing director, Carlo Scarsini and its editor, Andrea Mantineo, Il Progresso is shaping new plans for moving ahead during its second 100 years.

Mr. Speaker, I want to make all Americans aware of the service rendered by this outstanding newspaper. To Il Progresso: You have given your best for 100 years, my best goes to you for another 100 years of service.

Thank you Mr. Speaker.

VIEWPOINT ON PRESIDENT'S ECONOMIC RECOVERY PRO-GRAM

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. BONKER. Mr. Speaker, when Congress took up the President's economic recovery program, many of us were subjected to a rash of calls and letters from inside and outside our congressional districts to support the the GOP bill.

Taking stock of constituent views on important issues is basic to holding public office in a democracy, but assessing those views can prove to be a difficult and illusive matter. Ultimately, we must vote in a manner that is consistent with our judgment of what is right for our district and the Nation as a whole. As an author and a historian, John F. Kennedy wrote extensively about the subject. In his book, "Profiles in Courage," the former President selected Congressmen who took courageous but unpopular positions which led to their political demise only to be reversed later on.

A thoughtful constituent in a letter to the Daily Olympian, commented on my recent vote against the President's tax bill. Because he expressed a viewpoint that many of us share, I am asking that it be inserted at this point in the Congressional Record.

[From the Daily Olympian, Aug. 10, 1981] He Has Praise For Congressman Bonker's Vote On Tax Cut

Editor, the Olympian: I would like to congratulate congressman Don Bonker for recently voting against the president's tax proposal. His decision, despite numerous constituent requests to the contrary, shows extreme political courage.

Bonker, by voting against the apparent will of his constituents, was actually performing his congressional duties in a proper and rational manner. The average constituent does not have the technical expertise required to make specific recommendations on complicated tax proposals. That is why we vote for a congressman—to make the difficult and technical decisions on a myriad of complicated bills before congress.

It appears that the president is attempting to circumvent the power and authority of congress by luring the average American to support him on a specific, complicated piece of legislation. We elected Bonker to represent us and we must trust him to make the proper decision. I believe that Bonker, along with myself, feels that the president's tax cut proposal will not create the positive economic climate that he envisions. The people are only responding to a simplistic, unproven and sugar-coated tax proposal that could further endanger our fragile economy.

What frightens me is that the public, along with Congress, is being lured into a false, overinflated sense of optimism over such an unsound financial tax cut proposal. In the past we have had deficit budgets

because of an overzealous commitment toward social programs. Now the Reagan

economic proposal involves continual federal deficits because of an extreme commitment to defense spending; and to intensify the deficit, the president is suggesting a significant tax cut proposal without substantial incentives for Americans to save and/or invest.

We need lower taxes, but we also need a balanced budget. The Reagan economic plan will insure continual deficit spending by the federal government, and I believe it is for this reason Bonker voted against the President's proposal.

I have voted for a congressman to support and represent me in Congress and to analyze any proposal from the President. I know that many people were swept up by the persuasive charm of the president's tax cut proposal. I am glad that Bonker does not vote on pure emotion, but rather on sound, rational judgment. I believe that Bonker was truly listening to the concerns of all his constituents.

DENNIS MICHAELS,
Olympia.

LEGISLATION TO ALLOW SUIT FOR WILDCAT STRIKE

HON. THOMAS F. HARTNETT

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. HARTNETT. Mr. Speaker, today I am introducing legislation that would correct a blatant legal inequity derived from previous congressional action. This same legislation has also been sponsored in the Senate by the distinguished senior Senator from South Carolina, Senator STROM THURMOND.

Recently the U.S. Supreme Court—under section 301(b) of the Labor Management Relations Act—ruled that an employee may not sue his employees for damages arising out of an intentional breach of a collective bargaining agreement by those employees. In other words, when individual employees participate in a wildcat strike in contravention of a no-strike clause contained in a valid contract, they cannot be sued for damages due to their breach of that contract.

The Court stated that section 301(b) of the Labor Management Relations Act, as passed by Congress, only allows suits against the union itself for contract violations, and the union cannot be held accountable for the damages incurred because of a wildcat strike unless the union authorizes or supports the strike. The Court's interpretation was clearly based on what is perceived as the clear intent of Congress.

The result of this law is that an employee may sue the employer for breach of the contract, but the employer may not sue an individual worker for a union-sponsored breach of contract, nor may the employer sue the union members for breaches that the union has not condoned

The bill which I am introducing will correct this inequity in the current

law by allowing a suit for money damages to be brought against individual officers and members of a labor organization when those individuals, acting in a nonunion capacity and not in behalf of a labor organization, violate a no-strike clause in a collective-bargaining agreement.

There is a definite need to have illegal wildcat strikers made responsible for the consequences of their actions. All other individuals face the possibility of personal liability for damanges caused by their intentional acts. Why should individual union employees be exempt from bearing the responsibilities of their actions? Chief Justice Burger in his dissent opinion on this same Supreme Court decision questioned whether Congress intended to authorize this exemption. Justice Burger stated:

It seems to me that, by now, the American labor movement has matured sufficiently so that neither unions nor their members need this kind of paternalistic protection for admittedly illegal acts—a protection contrary to fundamental, centuries-old concepts of individual accountability. The stability of unions and the harmony of industrial relations will be enhanced, not impaired, by applying to union members the same standards of accountability that govern all other individuals in society * * * I submit that if union members understand that where they breach a contract without the approval of their union, individual liability will follow, we will very likely see fewer unauthorized strikes, for union authority will be enhanced and greater industrial harmony will likely result.

I agree with Chief Justice Burger's comments, and urge my colleagues to carefully review this legal injustice.

SOVIETS UNDERCUT PEACE IN LEBANON

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. KEMP. Mr. Speaker, when we adjourned for recess last month, violence in southern Lebanon was held in check under a shaky ceasefire agreement. Today, that agreement is still in effect, but I fear it is in danger. For there has been no recess in the concerted covert efforts of the Soviet Union to arm terrorist elements in Lebanon for a resurgence and continuation of the violence our diplomatic efforts have sought to defuse.

The following article by nationally syndicated columnist Jack Anderson intelligently documents some of the arms traffic and contacts between the Soviets and the PLO. It is a fresh reminder of the extensive involvement of the Soviet Union in all facets of international terrorism, and of the Soviets' interest in promoting instability and turmoil in the Middle East. And it

is a clear warning that a just resolution of the crisis in Lebanon will never be achieved until Soviet backed foreign elements are forced to withdraw from Lebanon, and to restore to the Lebanese people the sovereign rights and peaceful life they have so long and so wrongfully been denied.

SOVIETS FEEDING WEAPONS TO LEBANON PLO

(By Jack Anderson)

The Kremlin is too busy with its problems in Afghanistan and Poland to risk meddling directly in Lebanon, but intelligence sources have compiled evidence that the Russians have been quietly doing what they can to undermine the fragile ceasefire arranged last July by the special American envoy Philip Habib.

If the Soviets can't ensure victory in southern Lebanon by their client, the Palestine Liberation Organization, they at least intend to see that the PLO is strong enough to hold its own if and when the bitter factional fighting resumes in Lebanon—as most experts gloomily predict it will eventually. So the Russians are approving—if not encouraging—shipments of Soviet arms to the PLO by their Arab allies.

Here's what's been happening since the

ceasefire took effect on July 24:

At least five transport planes originating in Libya have flown to Damascus, Syria, carrying some 40 tons of arms and ammunition. Intelligence sources believe the Syrians then delivered the Soviet-made munitions to the Palestinians in southern Lebanon

In early August, a freighter loaded with arms sailed from Tripoli directly to an undisclosed port in southern Lebanon. A number of ports in the area are believed to

be under the PLO's control.

In the past few weeks, five transport planes carrying munitions flew from South Yemen to Damascus. The weapons were believed to be destined for the PLO in Lebanon.

The shipment of arms to Palestinian forces in southern Lebanon has been made possible by the presence of PLO units in the South Lebanon areas nominally under control of the United Nations Interim Force in Lebanon (UNIFIL). At a recent closed-door briefing for Congress, representatives of the Israeli Defense Forces estimated that there are more than 600 Palestinians operating in the UNIFIL area. One State Dept. official put the figure at more than 1,000.

While there is no solid evidence that the Soviets are actively encouraging their Arab clients to rearm the PLO in southern Lebanon, one State Dept. analyst told my associate Lucette Lagnado that "they are not doing anything to stop the shipments," as

they easily could.

The Soviets seem determined to strengthen their ties to the PLO. The organization's leader, Yasir Arafat, is expected to travel to Moscow again soon. The PLO's "Voice of Palestine" radio recently claimed that the Russians were on the verge of granting the Palestinians full diplomatic status, with their own mission in Moscow. State Dept. officials are not sure the Kremlin will go that far yet, but do believe the Soviets will grant the PLO diplomatic recognition soon.

Meanwhile, the U.S. has resumed arms shipments to Israel, which is, of course, the mainstay of the anti-PLO forces in southern Lebanon. One purpose, apparently, is to let the PLO and other Arab friends of the Soviet Union know that no matter how strong their Russian arms make them feel, they should not delude themselves into

thinking they can break the truce with impunity.

The Reagan administration is determined to make its hard-won ceasefire work. One way to do this would be to strengthen the 6,000-man UN peacekeeping force that has been in Lebanon since 1978.

The shaky situation in southern Lebanon is sure to be high on the agenda when Israeli Prime Minister Menachem Begin arrives in Washington tomorrow for talks with high U.S. officials.

COMPUTER SCIENTISTS PETI-TION SOVIET UNION FOR RE-VERSAL OF BRAILOVSKY VER-DICT

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

 Mr. SOLARZ. Mr. Speaker, I would like to call to the attention of my colleagues action that was taken by the Committee of Concerned Scientists, Inc., to pressure the Soviet Union to release Dr. Viktor Brailovsky.

Dr. Brailovsky, a leader of the emigration movement and cofounder of the Moscow Sunday Scientific Seminar was charged with "defaming the Soviet state" and was sentenced to a 5year sentence of internal exile. During the IEEE Computer Conference on Pattern Recognition and Image Processing in Texas this August, some 40 scientists drafted a petition calling for Brailovsky's sentence to be changed from internal to external exile. They appealed to Academician A. P. Aleksandrov, president of the Soviet Academy of Sciences to reverse the Brailovsky verdict.

These concerned scientists hope that their petition protest will influence the Soviets to change Brailovsky's sentence. Dr. Brailovsky, an outstanding cyberneticist, has made tremendous contributions to the computer sciences. A reversal of Brailovsky's verdict would be appreciated by men and women of free will around the world.

I sincerely hope that my fellow colleagues will join me in condemning the Soviet treatment of Dr. Brailovsky and in supporting this effort and others to protect human rights and to advance the cause of science.

Mr. Speaker, I ask that the text of the petition drafted by the Committee of Concerned Scientists, Inc., be reprinted in today's Record.

Activities at the conference were reported to the Committee of Concerned Scientists, an independent organization representing 4,000 American scientists dedicated to the advancement of human rights and scientific freedom of their colleagues throughout the world.

TEXT OF PETITION

Academician A. P. Aleksandrov, President, Academy of Sciences of the U.S.S.R., Leninsky Prospekt 14, Moscow B-71, RSFSR, U.S.S.R.

We the undersigned participants in the IEEE Computer Society Conference on Pattern Recognition and Image Processing, meeting in Dallas, Texas, August 3-5, are deeply dismayed that our esteemed colleague Viktor Brailovsky has been sentenced to five years internal exile. For seeking to exercise his legal right to emigrate, for advocating the right of his fellow Jews "to choose one's country of residence," and for leading the Moscow Sunday Scientific Seminar to overcome the professional isolation imposed on colleagues excluded from official science, Dr. Brailovsky has been adjudged guilty of defaming the Soviet state.

We understand that none of Dr. Brailovsky's activities violated Soviet law. He is being punished for upholding the right to emigrate and for implementing the "free flow of ideas," endorsed by your Government in a succession of international agreements.

Accordingly, we ask that you intervene with the authorities to release Dr. Brailovsky, whose frail health will be further endangered by the rigors of internal exile. Humanitarian considerations dictate that his sentence be changed from internal exile to external exile. Such action will earn the respect of scores of American scientists.

TWO HUNDRED PEACEFUL, FRIENDSHIP

YEARS OF UNBROKEN

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. VANDER JAGT. Mr. Speaker. on September 3, 1609, Henry Hudson, sailing in the Half Moon up the Hudson River almost to what is today known as Albany, N.Y., initiated, unofficially and coincidentally, a thriving, prosperous alliance between the Netherlands and the United States. In 1776. the Netherlands became the first nation to salute and officially recognize the flag of a fledgling new nation, the United States of America. Just 6 years later, the second President of the United States, John Adams, signed the Treaty of Amity and Commerce with the Netherlands, thus beginning officially an international relationship between our two countries which flourishes even today.

During 1982, the United States and the Netherlands will celebrate 200 years of peaceful and unbroken alliance. In countless ways, the Netherlands has contributed to the social, cultural, and economic climate of the United States. During the two decades following the American Revolution, 60 Dutch Americans served in the U.S. Congress. Presidents Martin Van Buren, our 8th President; Theodore Roosevelt, our 26th President; and Franklin D. Roosevelt, our 32d Presidents.

dent, can trace their family lineage to Dutch families.

To further the celebration of 200 years of peaceful relations, I am introducing a resolution authorizing the striking of commemorative medals. The striking of the bicentennial anniversary medals will accompany a commemorative stamp, to be offered by both Governments, as well as cultural events throughout the coming year.

TOUGH MINDEDNESS, PLEASE
*** ANSWER TO A LIBERAL RIDDLE

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

Mr. BROYHILL. Mr. Speaker, one of my constituents, Howard Sitler of Taylorsville, N.C., recently shared with me a column, "Tough Mindedness, Please * * * Answer to a Liberal Riddle." Mr. Sitler said the editorial was the best he ever expected to see in the Charlotte Observer. I quite agree, although the author, publisher Rolfe Neill, has written a number of editorial columns of equal intelligence and common sense.

Under leave to extend my remarks, I commend the reading of this masterpiece to my colleagues, and I am pleased to reprint it.

Tough Mindedness, Please * * * Answer to

A LIBERAL RIDDLE (By Rolfe Neill)

You have to be tough to care. Nobody has a corner on compassion, especially those

Can America absorb these thoughts? Act on them? Will the press at last become an instrument of enlarged understanding?

This Sabbath morning no one can answer with certainty. All you can say for sure is that we are a divided nation. Those fed up with 50 years of budget folly are eager to begin correction. The other side, by label called liberal, says Reagonomics is the true

Liberals claim the high ground of morality and concern for the less fortunate. Any person insisting his government spend no more than it takes in is written off as uncar-

Caring folks are to be found everywhere, irrespective of politics. But caring people known as conservative have the rougher time in our society. Theirs is not a defect of philosophy. The logic of sound budgets is unassailable, but for any detractors we have a half century of malpractice by which to refute them.

PRESS IS LIBERAL

So if the message of caring conservatives is not at fault, what is the difficulty? A substantial problem lies with the method of transmission. These people depend on the newspapers, magazines and TV/radio to make their voices heard. But the majority of the working press has a liberal cant.

Bias shows in small ways such as frequent ly referring to Sen. Jesse Helms as "ultra-conservative." The same writers would never refer to Sen. Teddy Kennedy as "ultra-liberal." What's needed in this instance is to drop any characterization, report the action and let the reader apply his own label.

More fundamentally, the working press does not understand numbers very well. There is nothing sexy in them. Arithmetic was harder for us in school than English. So, the press does a poor job of explaining economic stories. Yet, today nearly every story is economic.

There is not any way we could have gotten into our budgetary morass or Social Security maelstrom if the press were writing lucidly about these subjects over the years. We have failed in communication.

ANGRY READERS

The angriest letters I get concern my periodic suggestions to set Social Security straight. The writers are beneficiaries who feel an entitlement. They misunderstand the system that provides for them. They are ignorant of the consequences of continuing our present course. They believe they are getting back what they paid in.

Their outrage should be directed at two

groups

Their politicians who have flimflammed them for decades saying there is a free lunch

Their press which has inadequately reported the consequences of their politicians' actions.

There are legitimate philosophical differences over the role of government. But obfuscation occurs when the quarrel centers over who is the more compassionate. Nobody can be compassionate when the cupboard is bare. Every temple, church and social agency will tell you that in the end charity is limited by the bank account.

ASK ANY PARENT

Tough mindedness is a key ingredient of caring. Ask any parent who ever disciplined a child. Or any spouse who dealt with an alcoholic or other problem of abuse. To care properly for someone requires more than indulgence. Discipline is essential.

Every compassionate government program is threatened today by accumulated excesses of fiscal profligacy. There is no wayrepeat no way-that we can get right in a hurry. Too much must be done. So reacquiring balance will demand a much longer term view than today's American has been taught to consider.

The demands on us, if we wish to retain a government that some day can expand the horizons of the disadvantaged, will not be popular. The demands are self-denial, living on a smaller scale, putting off acquisitions and receiving less from Uncle Sam.

In other words, you have to be tough to

GAS DEREGULATION NOT IN PUBLIC INTEREST

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

. Mr. DINGELL. Mr. Speaker, at a time when the administration is trying to control inflation by slashing the budgets of important social programs, giving tax breaks to the wealthy and reducing the size of bureaucracy, it is apparently considering a proposal to immediately deregulate natural gas,

which according to the President's own Council of Economic Advisers would give gas producers a windfall of some \$40 billion in profits. Not only would immediate deregulation of natural gas cause substantial sacrifice by consumers who are already hard pressed by higher energy costs, but it would be downright inflationary.

Decontrol of natural gas in 1981 or 1982 is wrong. The existing law, the Natural Gas Policy Act, gradually decontrols natural gas prices each year until 1985. This phased procedure is correct, especially when the alternative of immediate deregulation of natural gas would increase prices to all gas consumers by as much as 50 to 100 percent of the current price.

Carefully phrased proof that immediate deregulation of natural gas is not in the public interest is found in an article which appeared in the August 5 issue of the Washington Star, which I insert into the Congressional Record. GAS DEREGULATION NOT IN PUBLIC INTEREST

(By Paul E. Reichardt)

national debate continues whether producer prices for most or all of the nation's supplies of natural gas should be quickly deregulated. A critically important factor seems to have been ignored by those who argue philosophically in favor of immediate, complete decontrol of natural gas wellhead prices. To consider that missing aspect of the controversy, two questions must be answered: what is really in the best interest of the country's gas consumers, and what federal actions are needed to accomplish that objective?

A fundamental principle of utility rate regulation for decades provides an answer for the first question. The public interest is best served by having adequate supplies of energy available for consumers at the lowest price that will allow replacement of those supplies at a pace sufficient to meet users'

The answer to the second question is even clearer. The Natural Gas Policy Act passed by the Congress nearly three years ago has worked well in protecting the public interest. Under its provisions, more gas is available now to markets such as the Washington area, and the dramatically increased rate of exploration for new gas supplies promises growing future additions to the nation's natural gas supply base. Neither congressional nor administrative action is needed to improve on the current outlook for adequate gas supplies at prices which, while higher than in past years, are still lower than the cost of alternative fuels.

Those who propose to change completely the results of 18 months of careful congressional consideration that led up to the enactment of the 1978 law put forth several arguments to support their viewpoint.

One such justification is the claim that immediate gas price deregulation would result in greatly increased drilling, and thus

greater gas supplies.

The fact is, though, that drilling and production activities for both oil and gas are now proceeding as fast as possible, with every available drilling crew and rig being pressed into service. Last year, more gas wells were completed than in any previous year, and if the pace of the first part of 1981 holds up for the entire year, new records should be set for both gas and oil wells this

Another rationale of total deregulation advocates is that if the gradual price decon-trol provisions of the Natural Gas Policy Act are allowed to remain unchanged until controls on roughly half of the nation's gas supplies are removed by 1985, the difference between gas and alternate fuel prices at that time will be so great that a sudden price "spike" will burden consumers with an even greater overnight increase in their gas bills than deregulation now would cause.

This argument assumes that gas shortages will exist in 1985, with buyers bidding up the prices for newly-deregulated gas supplies and that prices of such competing energy sources as fuel oil and electric power will continue to rise sharply between now and 1985. Neither assumption is supported by recent developments in the worldwide and domestic energy markets.

Complete deregulation of all old and new gas prices now would impose substantialand quite probably unnecessary-economic burdens on all gas consumers, particularly those with low or fixed incomes. Under total deregulation, home gas bills could rise by anywhere from 50 to 100 percent, and no gas distribution company wants that any more than its customers do.

SUPPORT GROWS FOR ENTER-ZONES AS STATES PRISE ENACT THEIR OWN BILLS

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

. Mr. KEMP. Mr. Speaker, in the 3 months since Representative Bob GARCIA and I reintroduced the Urban Jobs and Enterprise Zone Act, we have seen interest in and support for our legislation grow quickly. The bill now has 75 cosponsors, from both parties. The administration has reaffirmed its commitment to the enactment of enterprise zone legislation in this Congress. And, perhaps most gratifying of all, several States have enacted enterprise zone bills of their own.

The Buffalo Courier-Express, in an editorial published August 4, reviewed the progress of State enterprise zone legislation and urged Congress to move forward quickly to enact a national bill. I commend their informative editorial to the attention of all my colleagues

The article follows:

THE "EZ" WAY

The urban "enterprise zone" conceptfor short-has caught on so quickly that localities across the country are jumping the gun on pending federal legislation and passing "EZ" bills of their own.

Enterprise Zones are not an American innovation. The idea of stimulating economic renewal in depressed urban areas by encouraging local entrepreneurs through tax and regulatory relief was unveiled before the British Parliament in 1978 by Sir Geoffrey Howe, now Chancellor of the Exchequer in Margaret Thatcher's Conservative government. It was transported to the United States the next year by Dr. Stuart M

Butler, an economist and urban policy specialist for the Heritage Foundation. Several implementing bills were introduced in Congress, notably one sponsored by Rep. Jack Kemp, a conservative Republican from Hamburg, and Rep. Robert Garcia, a liberal Democrat from the South Bronx.

The British Parliament created 11 experimental EZ's last November, but Dr. Butler says Sir Geoffrey's vision of "mini-Hong Kongs with bustling small businesses and innovative entrepreneurs" in decaying central cities has somehow gone awry. Several of the sites chosen are in sparsely settled outskirts of cities; one of them on an old industrial park seven miles from the nearest town. Dr. Butler says civil service bureaucrats diluted the daring of the original proposal and the zones threaten to become tax havens for existing businesses, shifting jobs

around but not creating them.
Dr. Butler supports Kemp-Garcia, which says has been fashioned to avoid the British pitfalls. The bill also is supported by President Reagan, President Vernon Jordan of the National Urban League, the NAACP, the National Urban Coalition, and many other urban and business groups. However, it is opposed by the AFL-CIO leadership which attacks the basic concept as aiding "profitable firms" rather than targeting aid more precisely to the poor.

Meanwhile, EZ devotees-impatient to get started and dubious over having their programs controlled from Washington—are pressing ahead at the local level. Eight states already have adopted EZ bills or neighborhood assistance programs with similar business incentives, according to the American Legislative Exchange Council. Connecticut's law offers not only tax incentives and regulatory relief, but \$1,000 grants for each new job created. Florida's benefits include credits against corporate income tax equal to 25 percent of an employe's wages, and a 100 percent 10-year credit for company school taxes. Illinois suspended all zoning and building code requirements, rent controls and licensing rules for companies locating in EZs-and tacked on a \$1,000 state income tax exemption and a break on sales taxes. (An earlier draft would have dropped minimum wage rules and added a right-to-work clause, but these were deleted under pressure from organized labor.) Other states with EZ laws are Delaware, Indiana,

Maryland, Oregon and Pennsylvania.

We support the Enterprise Zone concept and have urged passage of Kemp-Garcia this year to get on with the business of stimdepressed city neighborhoods through the private sector. It would appear, however, that EZs are here to stay no matter what happens in Washington, D.C. And that is encouraging.

INADEQUATE RESERVE FOR RE-PAIRS IN CO-OP AND CONDO-MINIUM CONVERSION

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. ROSENTHAL. Mr. Speaker, I want to call to the attention of my colleagues an article which appeared in New York Magazine dated September 1981. This article addresses the problems resulting from the purchase of condominium or cooperative apartments where the converter provides an inadequate reserve fund for repairs. In the ongoing investigation conducted by the Subcommittee on Commerce. Consumer and Monetary Affairs, which I chair, this problem has been noted repeatedly, especially in the conversion of older buildings from rental to co-op or condo status. Very few States require adequate disclosure of the condition of buildings being converted. New York has one of the best laws, but problems still persist.

The article follows:

Repairs Rack Co-Ops With Inadequate NEST EGGS

Some New York Co-Op owners who were lured into buying by attractively low prices aren't feeling so euphoric these days.

The problem: So-called reserve funds, the building accounts that are supposed to pay for major repairs, are coming up short, leaving apartment owners holding big bills.

"There are several buildings in difficulty." said real-estate lawyer Martin Stamler.

In one Riverside Drive co-op, for example, the \$100,000 reserve fund fell short of paying to repair the leaking roof, and apartment owners were assessed up to \$4,000 each.

Stamler said residents of another Upper West Side co-op are so far in debt from replacing the building's roof, boiler, and plumbing that they are considering having the co-op file for voluntary bankruptcy.

"If they can do that before their creditors foreclose, they can avoid losing their building," Stamler said. He wouldn't identify the

Most of the buildings in trouble were left with low reserve funds by co-op sponsors who tried to keep down the prices of apartments they were selling.

Though the number of shaky co-ops is small, experts said it's likely to increase.

Landlords of many smaller, dilapidated buildings are said to be trying to push through co-op conversion plans, rather than refinance mortgages under the high interest rates prevailing today.

"Many of these buildings have ridiculously low reserve funds," said Robert Dryfoos. an Upper East Side councilman.

Dryfoos is co-sponsoring city legislation that, among other things, would set a minimum size for reserve funds in buildings going co-op. The proposed minimum: 3 percent of the total selling price of all the apartments in the building.

RESERVES ON INSTITUTION MONEY FUNDS WOULD HURT BANK TRUST DEPARTMENTS

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

• Mr. VENTO. Mr. Speaker, as a member of the House Banking Committee, I have followed very closely the recent efforts of the banking and thrift industries, both here in Washington and in numerous State legislatures, to place restrictions on money market mutual funds.

I would like to take this opportunity to point out to my colleagues that one particular class of money market so-called institutional funds. the provides an important and funds highly beneficial service to thousands of bank trust departments across the country. These institutional funds invest the trust assets held by those trust departments at a lower cost and greater efficiency than if the trust departments were to make their own investment decisions.

A fellow Minnesotan and former Director of the Savings Bond Division of the U.S. Treasury, Glen R. Johnson, is the president of a number of institutional funds in the federated group. Mr. Johnson recently submitted a statement to the Senate Banking Committee in which he explained the importance of the function performed by the institutional money market funds in greater detail. His statement was reprinted in the American Banker, and I recommend it to my colleagues.

The statement follows:

[From the American Banker, May 26, 1981] RESERVES ON INSTITUTION MONEY FUNDS WOULD HURT BANK TRUST DEPARTMENTS

(A top executive of the Federated Group of mutual funds says imposing reserve requirements on institutional money market funds would have an adverse impact on the trust departments that use them. Glen R. Johnson, president of several of the money funds, told Congress recently that the public would suffer from what he called unnecessary Federal regulation. He submitted the following statement to the Senate Banking, Housing and Urban Affairs Committee, which is holding hearings on the money funds.)

Federated currently has 14 MMF's in all, with total assets of approximately \$14 bil-

Over 75 percent of our assets are institutional funds, specifically designed to serve bank trust departments and other institutional investors.

I want to begin my remarks by telling you about a program that we at Federated, in cooperation with the Investment Company Institute and the Independent Bankers Association of America, pioneered to invest our funds' assets in the financial institutions of the cities and towns of America. Charges have circulated widely that money market funds invest only in the top 100 banks—thus concentrate assets in a few financial centers. This could leave little capital for banks in smaller cities and towns where productive, basic economic activity must take place.

We resolved to do something about this. Under Federal regulations which reward creativity and efficiency, we designed a purchase plan for \$100,000 certificates of deposit—those of small- and medium-size banks—that responds to the capital requirements of these financial institutions. So far we have concluded agreements with four banks in various parts of the country to act as coordinating agents to facilitate these purchases.

This program has been very successful. To date, we have placed almost \$70 million in 150 small- and medium-sized banks in this country. These results represent important first steps in this program. We have worked long and hard with banks in many states which are interested in this program.

Very briefly, the program works as follows:

First, our MMF's determine the total size of their desired investment and notify the coordinating agent. Interest rates are matched to the Federal Reserve composite for 90-day certificates of deposit. The coordinating agent canvasses smaller banks in its state which may wish to issue certificates of deposit with the required characteristics. The coordinating agent then provides us with a list of participating issuing banks. The issuing banks mail their certificates of deposit to a designated custodian bank (usually the coordinating agent), which notifies us of their receipt and of the total amount of money to be deposited by us on the settlement day. On the settlement day, the MMF's wire the money to the custodian, which debits the funds' accounts and credits the accounts of the issuing banks. At maturity the custodian credits the MMF's accounts with principal and interest, debits the accounts of the issuing banks, marks the CDs paid and returns them to the issuing

Since the FDIC deposit insurance ceiling is \$100,000 each of our MMFs can purchase only one such CD from each issuing bank at any one time. However, 10 of our MMFs currently can purchase these small bank CDs, so that we can invest up to \$1 million in each institution.

The Independent State Bank of Minnesota, the first banker's bank of its kind, working closely with other banks, will be coordinating offerings for us in additional states in the very near future. Negotiations are also continuing with a number of other prospective coordinating agent banks.

Several other MMFs have begun similar programs of their own. Still more will be amending their prospectuses in the near future to permit such purchases. This program, as it expands and as industry participation increases, will greatly assist smaller financial institutions in meeting demands for housing, small business and agricultural loans.

Incidentally, Federated MMFs are among the largest investors in short-term issues of the Federal Farm Credit Banks and also invest heavily in Federal Home Loan Banks discount notes.

I want to conclude my presentation with a few comments about proposals for more Federal regulation of money market funds especially our institutional funds. These views are generally representative of the view of other institutional funds.

We oppose additional Federal regulation of our funds. Our unique role in facilitating investments by bank trust departments is of significant value to these trust departments. We operate efficiently and effectively. We enable our clients, especially those very many small trust departments throughout this country, to earn a fair return that keeps pace with inflation.

I would like to describe briefly how our institutional funds operate. I think it will become clear then why restrictions on return or reserve requirements would be counterproductive and unnecessary.

The portfolios of our institutional funds are limited to the types of instruments in which trust departments themselves may invest under fiduciary law. For example, Money Market Trust confines its portfolio to certificates of deposits of banks. The Trust for Short-Term Government Securities limits its portfolio to U.S. Government securities. The Trust for U.S. Treasury Obligations invests only in direct obligations of

the United States, and Federated Master Trust limits its portfolio to commercial paper and masternotes rated A-1 or P-1 by highly qualified rating services.

Our customers can choose an investment that suits their criteria for yield and safety. At the same time, they can invest trust cash in the chosen investment without regard to the size of the trust estate.

We provide our investors with professional management of their trust accounts. The cost is substantially lower than what they would pay to hire staff and purchase equipment needed to make investment decisions.

Our institutional investors move money into and out of our MMFs as required by changing conditions in the financial market-place. Bank trust officers in particular are under a fiduciary obligation with respect to the monies they control. Telephone redemptions by wire help us help them meet these obligations. In fact, we are now planning to place computer terminals at our client banks, so they may make on-line inquiries and place purchase and redemption orders from their own offices instantaneously.

Now consider what impact a reserve requirement imposed on our institutional funds will have on our bank trust clients. On top of legal and regulatory requirements, an additional burden would be imposed in the form of a reduced yield. Contrary to claims I have heard that reserve requirements on MMFs will help depository institutions, the simple fact is that reserve requirements on institutional funds will hurt by exacting a double penalty. In this day and age, I believe it is scandalous to promote government regulation, especially where we know in advance that regulation will create economic inefficiencies.

There is precedent for the special consideration which must be given to institutional funds. The Federal Reserve Board recognized the unique nature of institutional MMFs in the special credit restraint program, which it instituted in March 1980, under the Credit Control Act of 1969. The Federal Reserve Board's initial regulations required all MMFs to maintain a special deposit with the Federal Reserve equal to 15% of the increase in their total assets after March 15, 1980. However, funds managed by banks and trust companies for the collective investment of trust assets were exempted from such reserve requirements.

Shortly thereafter, Federated requested that the Federal Reserve Board amend its regulations to grant similar exemption for institutional MMFs because they are used almost exclusively by bank trust departments for investing trust cash incidental to the management of trust assets. On March 28, 1980, the Federal Reserve Board did amend the regulations-extending this exemption to the assets of MMFs representing shares held by banks and other fiduciaries investing funds that would be eligible for collective investment by a bank. change was enacted, in part, to allow small banks to use institutional MMFs in lieu of operating their own short-term investment funds and to avoid a double reserve requirement.

Let me stress, we don't depend on thirdparty checks for our success. Our major interest in government regulation is preserving the distinction between banks and investment companies. There are sound historical reasons for keeping these two very different businesses separate. These reasons are as important today as they were in the 1930s. Investment companies are fully regulated by the Securities and Exchange Commission. Many details of operation are completely prescribed by that commission. In addition, key information for investors must be divulged. It must be public knowledge.

We believe it is inappropriate to apply banking regulations to the securities and investment business, especially regulations such as reserve requirements. It is absolutely essential to a discussion of reserve requirements that you be always aware that investment companies, such as our money market mutual funds, do not create money through multiplier effect. We do not make loans. We do not offer checking accounts to the public. We have no desire to engage in the depository business

Federated has worked hard to develop reliable cash management systems which permit timely and economical investment of trust department cash at competitive yields. Restrictions on institutional MMFs such as ours would, by impeding our ability to provide important services to our client banks, burden a multitude of bank trust departments and their trust beneficiaries. The public would suffer again as a result of unnecessary Federal regulation. We oppose

such restrictions.

INDUSTRIAL REVENUE BONDS CAN BE THE MOST POWERFUL ECONOMIC DEVELOPMENT IN-CENTIVE TO STATE AND LOCAL GOVERNMENTS

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

. Mr. MOAKLEY. Mr. Speaker, recent reports by the press have highlighted the abuses which are occurring with industrial development bonds. While swift action is needed to curtail these abuses, we must use due care and caution to insure that benefits from the responsible use of IRB's continue.

Robert E. Patterson, executive director of the Massachusetts Industrial Finance Agency recently stated in economic development commentary that attention has not been paid to the critical role of IRB's in the growth of smaller companies and the redevelopment of many urban areas. Bob Patterson notes the special significance of this development in times of high and volatile interest rates.

I urge my colleagues to read Mr. Patterson's excellent article which not only explains the present debate, but outlines the progressive way in which Massachusetts has administered the program. The article and accompany-

ing tables follow.

INDUSTRIAL REVENUE BONDS-A COST-BENEFIT ASSESSMENT

(By Robert E. Patterson)

Industrial revenue bonds have been subjected to a lot of harsh criticism lately. Stories are told and retold about how IRBs finance fast food chains, regional shopping malls, even topless bars. Newspapers cite billions of dollars in federal tax revenues lost because of IRBs.

The media have paid little attention, however, to the critical role of IRBs in the growth of smaller companies and the redevelopment of many urban areas. This role has been especially important during the past two years of the highest and most volatile interest rates in the nation's history. By cushioning the inflation-induced shock of escalating interest rates on expanding smaller companies and real estate developments, IRBs have enabled these projects to

go forward.

Yet, because recent publicity has focused on foregone federal tax revenues and the sensational uses of IRBs for controversial commercial developments, Congress is now searching for ways to control IRBs. The House Ways and Means Subcommittee Oversight asked the Congressional Budget Office to prepare a report on IRBs, which was issued last April. The Subcommittee held hearings only two weeks later and has been considering a number of measures to limit the IRB program.

But before draconian restrictions are enacted, the IRB debate should be put in perspective. There is more to this issue than has been reported in articles with such catchy titles as "The Burger Bond" and "Topless and Tax Free."

INCREASING IRB VOLUME

An IRB is a tax-exempt bond issued by a state, county or local governmental authority to help private employers invest in fixed assets such as plant and equipment. Current federal law requires that the bond's proceeds be used for land or depreciable assets by a trade or business. Because of the bond's tax-exempt status, the lender, typically a bank, can lower the interest rate on the loan, usually to 60 to 75 percent of the prime lending rate.

No firm is eligible for IRB financing if its capital expenditures in the community exceed \$10 million for three years before and three years following issuance of the bond. This capital expenditure limit-originally set at \$5 million when it was adopted by Congress in 1968-was designed to focus IRBs, on smaller companies and projects.

It is true that the volume of IRBs nationwide has risen sharply in recent years. The doubling of IRB volume in a single yearfrom \$3.5 billion in 1978 to \$7.1 billion in 1979-is not at all surprising, What is surprising is that the volume did not increase even more, given the fact that in 1978 Congress (a) doubled the capital expenditure limit for eligible companies from \$5 million to \$10 million and (b) granted a special \$20 million limit for projects assisted with an Urban Development Action Grant.

Moreover, the increase in IRB volume must be considered against the inflationary pressures of recent years. The tremendous rise in interest rates, for example, has had its harshest effect on real estate develop-ment and highly leveraged smaller companies, which naturally turned in desperation to IRBs to finance their growth.

Furthermore, inflation has vastly reduced the window of eligibility for IRBs. In fact, although Congress raised the capital ex-penditure limit from \$5 million to \$10 mil-lion, today \$10 million will buy less plant and equipment than \$5 million did in 1968. For example, the widely advertised 1980 volume of \$8.4 billion is equivalent to only \$3.7 billion in constant 1968 dollars!

In large measure it is inflation, not overzealous state and local development officials, that is responsible for the nationwide increase in IRBs.

COST OF IRRS

Most newspaper accounts carried the Congressional Budget Office's projections of the cost of industrial revenue bonds to the federal government as \$2.9 billion to \$4.4 billion for fiscal year 1986. Overlooked in the media, although clearly noted in the CBO report, was another projection: if all IRBs were eliminated on July 1, 1981, the net revenue gain to the federal Treasury would be only \$.2 billion in 1982, rising slowly to \$.7 billion in 1986 (see Table 1).

The CBO report also stated a number of other important, although often overlooked, facts:

Despite fears that IRBs have substantially raised the cost of borrowing for state and local governments, in recent years the relative difference between tax-exempt and taxable interest rates has actually widened to 40 percent from the historic 30 percent.

TABLE 1.—REVENUE GAINS RESULTING FROM ELIMINATION OF SMALL ISSUE IRB'S

[In billions of dollars]

Fiscal year	Gross revenue gain ¹	Feedback ²	Net revenue gain	
1981	0.0 0.3 0.7 1.1 1.4 1.8	0.0 0.1 0.2 0.5 0.9	0.0 0.2 0.5 0.6 0.5	

¹ Effective July 1, 1981. Applies only to new issues after that date.
² Feedback — Federal revenue loss caused by decreased investment as a result of elimination of IRB's.

Source: Congressional Budget Office. Small Issue industrial Revenue Bonds Washington, D.C., 1981.

In other words, tax-exempt interest rates have not risen as rapidly as taxable rates in spite of the inflation of recent years. It is hard to believe, therefore, that IRBs have had a serious negative effect on state and municipal borrowing, particularly since the projects financed by IRBs add to state and local tax revenues.

IRBs are used overwhelmingly by smaller companies. The CBO reported that over 90 percent of all firms using IRBs in 1978 and 1979 were not listed on any national or regional stock exchange. These companies, therefore, depended on local lenders for their borrowed capital. For some 8,000 IRBs issued in those two years, the CBO noted that only 7 percent were for "Fortune 1000" firms.

In other words, the restriction adopted in 1968 to limit IRBs to smaller companies has done exactly that. In 1967, the average bond issue was \$7.8 million, leading to the 1968 reform. In 1980, the average IRB was \$1.3 million-one-sixth the size of the average 1967 bond, despite the doubling of prices during that period.

By the CBO's own estimate, if the law overning IRBs does not change in the next five years, IRBs issued in 1986 will create over \$4 billion of additional Gross National Product (see Table 2). This increased GNP will include \$2.2 billion in additional private wages and salaries-enough to employ 150,000 people at \$15,000 a year.

TABLE 2.— IRB-GENERATED INCREASES IN INVESTMENT, GNP. INCOME AND FEDERAL REVENUE

[In billions of dollars]

			ST VA	Taxable in	ncomes

¹ Calendar years ² Fiscal years.

If the 1986 cost of IRBs to the federal taxpayer, again by the CBO's estimates, is \$700 million, then the CBO's numbers make IRBs the federal government's cheapest employment-producing program, at less than \$5,000 per job.

Nor is the CBO report the only word on the cost of IRBs. A recent study by University of Chicago Business School economist Roger Kormendi, sponsored by the Massa-chusetts Industrial Finance Agency and the Small Business Foundation of America, concluded that the CBO's revenue loss estimates are six times greater than the actual

loss to the federal government.

Kormendi based his conclusions and his testimony before the Oversight Subcommit-tee on assumptions about the behavior of lenders that seem more realistic than those used by the CBO. Both the Treasury and CBO assume that if IRBs were eliminated, lenders would replace tax-exempt IRBs with taxable loans. But Kormendi reasoned that lenders would not substitute taxable income for tax-exempt income because the combination of inflation and high taxes would destroy their capital.

For example, a lender in the 50-percent tax bracket who earned 15-percent interest in 1980 paid half that interest to the federal government, for a net return (ignoring state and local taxes) of 7.5 percent. Since inflation in 1980 was 12.8 percent, however, the lender actually lost 5.3 percent of his cap-

To at least keep even with inflation, Kormendi noted, investors would continue to put their funds into investments that are taxed at lower marginal tax rates-equity, real estate or "collectables," for examplerather than into investments yielding taxable income. In reality, therefore, the Treasury loses little revenue when IRB volume increases since most IRB investors are drawn from alternate investments on which they would pay little or no income tax in any event

In addition, if IRBs were eliminated and borrowers forced to pay higher interest rates, then borrowers would have increased deductions for these higher interest costs. Thus, the federal government would be gaining more revenue because of increased taxes on lenders while simultaneously losing revenue because of increased deductions for borrowers' higher interest costs. Even the CBO admitted that such an effect is real but declined to estimate its impact.

The net effect of these adjustments, according to Kormendi, is a gross loss to the federal Treasury of about one-sixth the magnitude estimated by the CBO. When the CBO's own estimates of increased federal revenues from private investment stimulated by IRBs are added to Kormendi's estithe IRB program may actually produce revenue gains for the Treasury.

Although this result might seem surprising, it is hardly an outrageous idea. The same conclusion was reached in a 1980 study of IRBs by Dr. Norman Ture, then a private consultant and currently Under Secretary of the Treasury for Tax Policy.

THE CONTROVERSY

If the cost to the federal government is not the issue, what then is all the fuss about? The controversy reflects an aura of widespread abuse combined with the longstanding opposition of some Congressional and Treasury staff to tax-exempt bonds generally. Recent efforts to stamp out the tax-exemption have included the taxable bond option for all state and municipal bonds, and last year, the successful attempt to nearly eliminate mortgage revenue bonds for single-family housing.

This year's attack on industrial revenue bonds has been aided by ample publicity of a few sensational projects, such as a country club, one go-go bar and a few national retail chains such as McDonald's and K-Mart. Indeed, it is the lack of a true consensus on the appropriate use of industrial revenue bonds that has given the opponents of taxexempt bonds the opportunity to build a full head of steam which threatens to re-

strict or eliminate IRBs.

State and local development officials are often at odds over the appropriate use of IRBs. Most share a general view that small issue industrial revenue bonds should be used by smaller industrial enterprises financing plant and equipment to add jobs and increase employee efficiency. While the CBO report indicates that most IRBs, even in recent years, have in fact been used for this type of project, it also points out that there has been a recent increase in IRBs for commercial real estate development projects. It is these commercial projects that are

creating the trouble.

In many localities, IRBs are being used to finance regional shopping malls and other suburban real estate projects that pose difficult choices for established downtown merchants. Either they can remain downtown while retail traffic is being drawn to the new mall by a powerful anchor store (to whom the developer has in some cases literally given away the store), or they can follow their customers to the mall and pay dramatically increased rents. In most cases, merchants cannot stop these malls on the basis of zoning or other land use control laws, so the IRB provides a focus for attacking the mall.

In Massachusetts and many other states, this type of real estate development is not eligible for IRB assistance. Commercial properties in Massachusetts receive such assistance only if they will contribute to the revitalization of a distressed commercial center. Focusing commercial IRBs on city and town centers has become a very important link in the state's expressed policy of its downtowns. Massachusetts reviving adopted this Commercial Area Revitalization District program for commercial IRBs the executive and legislative because branches recognized in 1978 that such a use IRBs would reinforce an important public purpose for the state.

The public purpose for which IRBs of all types are issued is at the heart of the IRB controversy. State and local officials concerned with economic development, particularly urban development, simply must become more involved in determining the appropriate public purpose of IRBs, espe-

cially for commercial projects.

When one considers that the \$8.4 billion of IRBs issued in 1980 is exactly twice the FY82 proposed Community Development Block Grant appropriation (including the UDAG program), it becomes obvious that IRBs are too critical an incentive to be taken for granted. Appropriately targeted, IRBs can be a state's most powerful and flexible tool. Left untargeted, commercial IRBs threaten to destroy the entire pro-

POSSIBLE RESTRICTIONS

Without appropriate targeting, sooner or later the opponents of tax-exempt financing will succeed. Congress will eventually force states to target or will impose its own restrictions. No one federal definition of "distress" will satisfy everyone, but federally imposed limits are inevitable unless states prove themselves willing to tighten their public purpose requirements.

Particularly dangerous is the proposal to force states to better articulate public purpose by placing a dollar limitation on the IRBs a state can issue in a given year. This proposal has broad appeal at the federal level because it is simple, it sidesteps diffi-cult choices, and it was recently used to nearly eliminate mortgage revenue bonds. Despite its simplicity, however, this type of restriction could be devastating.

For example, limiting IRBs to \$50 per capita in each state would favor states with growing populations. Some 16 states would be forced to reduce their 1980 levels of IRBs; the 10 states that stand to lose the most are listed in Table 3. If such a restriction were enacted, firms that were unable to obtain IRB financing because a state had reached its limit could turn to another state for low-interest financing. Frostbelt states, which issued two-thirds of all IRBs in 1979 and which are already suffering from loss of industry and population, could ill afford such a disincentive.

In addition to accelerating the movement of business away from distressed areas of the country, a state cap on IRBs would pit big business against small business, and suburban areas against rural areas. Many states

Source: Congressional Budget Office, Small Issue Industrial Revenue Bonds, Washington, D.C. 1981.

would need special legislation merely to continue issuing IRBs, and the political pressures would be a nightmare.

Before Congress adopts a state cap or any other major limitation, it should carefully examine the likely consequences of such actions. It is hard to understand the rush to limit IRBs when an analysis of the CBO's position shows that eliminating all commercial IRBs would save only \$40 million to \$50 million in FY82—hardly a significant amount in a budget of \$695 billion.

THE MASSACHUSETTS EXPERIENCE

In Massachusetts, IRBs have helped smaller companies to own their own plants. The bonds have provided a way for small firms to finance these facilities on reasonable terms at a time when thrift institutions have been pushed out of the market and commercial banks have moved to floating rates and shorter maturities. Unlike larger corporations and developers, smaller companies generally do not have easy access to the country's large institutional long-term lenders.

The Massachusetts Industrial Finance Agency (MIFA), an independent state agency that administers IRBs for the Commonwealth of Massachusetts and provides loan guarantees for small companies, has assisted more than 600 firms in its first two years of operation. Over half these companies had annual sales under \$5 million, and three-fourths had sales under \$20 million.

The Hub Mail Company is typical of the many firms that have indicated how essential MIFA's financial assistance was to their expansion. A direct mail service company, Hub employed some 200 workers, earning an average of \$7 per hour, in an old multi-story building in downtown Boston. When its lease expired two years ago, the company wanted to purchase more efficient space in the city close to its labor supply. After an extensive search, Hub Mail settled on two vacant buildings in Columbia Point, a particularly distressed area of the city.

In his testimony to the Oversight Committee, Hub Mail President Walter S. Bernheimer II described the plight of his company: "Unfortunately, Hub Mail, like many smaller companies, was undercapitalized. We lacked sufficient internal funds to finance the expansion. As inflation drove interest rates higher and higher (and this was only the spring of 1979), and since we could only put down a modest down payment, all the lenders we approached declined to finance the acquisition of the Columbia Point facility with a conventional long-term mortage."

The IRB loan and a long guarantee from MIFA enabled Hub Mail to hire 45 additional employees in a depressed urban setting that is accessible to public transportation. According to Bernheimer, "It is not at all an understatement to say that none of this would have happened without industrial revenue bonds."

TABLE 3.—EFFECTS OF \$50 PER CAPITA IRB STATE CAP

STIMMADY

The country clearly needs a larger dose of savings and investment in productive assets. Although the causes of our national economic condition are complex, it is not difficult to understand why Americans are spending rather than saving their money. Their response to inflation has been completely rational, spending on goods for consumption and favoring investments that are untaxed or taxed at low marginal rates. When people believe they can achieve an after-tax rate of return on their money that is likely to exceed inflation, they will return to saving and investing in the future of this country's productive enterprises. IRBs and the tax-exempt market generally have provided investors an opportunity to invest and hope to stay even with inflation.

Given the importance of IRBs to economic development, the CBO's prognosis should be carefully considered before the program is severely restricted:

"If the Congress eliminated tax exemption on all small issue IRBs, some investments might not go forward. Others might move ahead, but changes in the amount and timing of investment would result. Smaller firms would be the ones most affected. Moreover, investment in distressed urban areas might decline because of the large number of UDAG projects that also receive IRB financing."

Is this a result that we can afford?

BUDGET COMMITTEE EARLY WARNING REPORTS

HON. JAMES R. JONES

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. JONES of Oklahoma. Speaker, the week the House of Representatives is scheduled to vote on two appropriation bills that provide spending for fiscal year 1982-Commerce, State, Justice, Judiciary, and Transportation. I have asked the staff of the Budget Committee to continue the briefings that have been provided in the past to members of the Budget Committee and the House. The following materials factually compare the total amount of spending and credit provided in these bills with the targets for such spending and credit that resulted from congressional approval of the first budget resolution for fiscal year 1982. I intend to insert into the Congressional Record these staff analyses, and analyses of all other appropriations, entitlement, or revenue bills as they are scheduled for floor action. It is my hope to provide these "Early Warnings" to interested Members every Monday. I believe that it is very important for the House to have information that compares such bills to the budget resolution—achievement of the resolution spending targets is not likely to occur unless the Members are clearly aware of the budget impact of their votes.

EARLY WARNING—HOUSE BUDGET COMMITTEE H.R. 4169, FISCAL YEAR 1982 DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICI-ARY, AND RELATED AGENCIES

This bill is on target for discretionary spending.

Staff analysis

Committee: Appropriations. Subcommittee: Commerce, Justice, State, Judiciary. Chairman: Mr. Smith (Iowa).

Ranking minority member: Mr. O'Brien (Illinois).

Scheduled: Wednesday, September 9, 1981.

I. Description of bill

This bill provides funds for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for fiscal year 1982.

The bill as a whole is equal to the 302(b) target for this subcommittee on budget authority and \$18 million below in outlays (the sum of lines 5 and 12 below). If amounts assumed in the Budget Resolution but not yet considered are added, and mandatory programs are "fully funded", the subcommittee could be over its targets by \$129 million in budget authority and \$101 million in outlays (the sum of lines 7 and 14).

II. Comparison with target for discretionary appropriations action

Pursuant to the Budget Act and HBC scorekeeping, the subcommittee has two targets: one for discretionary programs and one for mandatory programs. Since the Ap-

propriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Its target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this appropriation bill exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment" provision of Section 305 of the fiscal year 1982 First Budget Resolution. As shown on line 7 below, the bill plus discretionary amounts not yet considered is equal to its 302(b) target for discretionary budget authority and under its outlay target by \$253 million in outlays.

III. Summary table

	Budget authority	Outlays
The amounts shown below are only for discretionary 1982 spending in this bill: 1. Discretionary amounts in bill	8,592	6,600
3. Total action to date	8,592 8,592	6,604 6,853
Over(+)/under(-) Amounts assumed but not yet considered		-253
7. Over(+)/under(-) The amounts shown below are only for mandatory appropriations included in this bill:		-253
8. Mandatory amounts in bill	163	156 3,157
10. Total	163 163	3,313 3,078
12. Over(+)/under(-)	129	+235 124
14. Over(+)/under(-)	+129	+359

IV. Explanation of over/under

Despite the fact that the House Budget Committee is unable to give a definitive answer to the question of where a particular bill is over or under its 302(b) allocation, it does compare the items in a bill to the assumptions contained in the Budget Resolution. It is important to note that the line item assumptions in the Budget Resolution are not binding on a committee. A list of the major areas where this bill differs from the Budget Resolution follows:

Department of State's conduct of foreign affairs is below Resolution assumptions by \$64 million in budget authority and \$29 million in outlays.

International Communications Agency radio facilities is below Resolution assumptions by \$56 million in budget authority.

Economic Development Administration (EDA) assistance program is above Resolution assumptions by \$157 million in budget authority and \$3 million in outlays.

Small Business Administration (SBA) disaster relief fund is above Resolution assumptions by \$87 million in budget authority and \$25 million in outlays.

Payment to the Legal Services Corporation is above Resolution assumptions by \$141 million in budget authority and \$107 million in outlays.

Office of Justice Assistance Research and Statistics is above Resolution assumptions by \$74 million in budget authority and \$14 million in outlays.

Amounts assumed in the Budget Resolution but not yet considered (line 13) consists entirely of funding for the October 1 pay raise. It is this item which causes the mandatory total to be exceeded; the target

seems not to make an allowance for this pay

V. Comparison with the President

This bill is below the President's requests for discretionary items in the bill by \$5 million in budget authority and \$251 million in outlays.

VI. Credit

The Budget Resolution contains non-binding targets for credit program amounts. This is the First year that there has been a credit scorekeeping system. There is no 302(a) and 302(b) allocation for credit program limitations. For comparative purposes only, the table below shows the bill and First Budget Resolution assumptions.

[In millions of dollars]

	Direct loan obligations	Primary guarantee commit- ments	Secondary guarantee commit- ments
Credit program limits in the bill Programs assumed to be limited in the resolution but not acted upon	30	38	
in bill	11,008	15,725	
3. Credit programs not subject to limit.	1794	-295	
Total in bill Budget Resolution assumptions	1,832 1,280	5,468 7,169	
6. Over (+)/Under(-)	+552	-1,701	

¹ Committee report language provided a rationale for increasing or decreasing estimates of credit programs not subject to limit.

The Commerce-Justice-State Subcommittee included no credit limitations in this bill. All of the differences in this subcommittee allocation from the Budget Resolution involve SBA programs. Comments on the differences included in the report are summarized below:

Disaster loan fund is estimated to support \$734 million in new direct loans from \$87 million in new capital appropriated, repayments, carryover, and sale of assets. the resolution included a proposed limitation of \$440 million for disaster loans.

Pollution control equipment contract guarantees were increased by the Omnibus Budget Reconciliation act of 1981 to \$250 million, an amount above both the President's budget and the amount currently authorized for the program.

Business loan and investment fund guarantees are assumed in the report language to be at the level requested by the President. The report states that limitation "language is not necessary since these levels are consistent with the revised authorization for SBA for fiscal year 1982 contained in the Omnibus Budget Reconciliation Act of 1981 as passed by the House."

Surety bond guarantees are assumed in the report to be at \$1.2 billion. Again, the committee did not include a limitation since the program level was consistent with the revised authorization in the Omnibus Reconciliation Act of 1981.

VII. Amendments

None known at this time.

VIII. Definitions of terms in summary table, section III

Line 1. Discretionary amounts in bill: discretionary FY 1982 appropriations in H.R. 4169.

Line 2. Prior action: the FY 1982 budget authority and outlays for this subcommittee that were appropriated in prior bills.

Line 3. Total action to date: line 1 plus line 2.

Line 4. 302(b) target: the target for discretionary appropriations for this subcommittee set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over $(+)/\overline{U}$ nder (-): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: these are amounts assumed in the fiscal year 1982 Budget Resolution for which funding has been deferred by the Appropriations Committee, probably until next Spring's supplemental appropriation bill.

Line 7. Over (+)/Under (-): line 5 plus line 6.

Line 8. Mandatory amounts in bill: funding for mandatory programs (entitlements).

Line 9. Prior action: outlays from budget authority enacted for years prior to fiscal year 1982, plus any permanents assigned to

the Appropriations Committee.

Line 10. Total: line 8 plus line 9.

Line 11. 302(b) target: the target for mandatory amounts for this subcommittee set by the Appropriations Committee. The target set by the Appropriations Committee includes the effect of assumed authorizing legislation that would change the level of mandatory programs.

Line 12. Over (+)/Under (-): line 10 minus line 11.

Line 13. Supplemental amounts needed: amounts for any new entitlement legislation assumed in the Budget Resolution, for the October 1 pay raise, and to fund mandatory items in the bill at the level estimated in the

Budget Resolution.

Line 14. Over (+)/Under (-): line 12 plus

EARLY WARNING HOUSE BUDGET COMMITTEE H.R. 4209, FISCAL YEAR 1982 DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES

This bill is under its targets for discretionary spending.

Staff analysis

Committee: Appropriations. Subcommittee: Transportation. Chairman: Mr. Benjamin (Indiana).

Ranking Minority Member: Mr. Coughlin (Pennsylvania).

Scheduled: Wednesday, September 9, 1981.

I. Description of bill

This bill provides funds for the Department of Transportation and related agencies for fiscal year 1982.

The bill as a whole is under the 302(b) targets for this subcommittee by \$734 million in budget authority and \$42 million in outlays (the sum of lines 5 and 12 below). If amounts assumed in the Budget Resolution but not yet considered are added, and mandatory programs are fully funded, the subcommittee could be under its targets by \$675 million in budget authority and \$15 million in outlays (the sum of lines 7 and 14).

II. Comparison with target for discretionary appropriations action

Pursuant to the Budget Act and HBC scorekeeping the subcommittee has two targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Their target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this appropriation bill exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment"

provision of Section 305 of the fiscal year 1982 First Budget Resolution. As shown on line 7 below, the bill plus discretionary amounts not yet considered is below its 302(b) target for discretionary action \$734 million in budget authority and \$149 million in outlays.

III. Summary table

He millions of dollars?

the page in Town a 18th	Budget authority	Outlays
The amounts shown below are only for discretionary 1982 spending in this bill. 1. Discretionary amounts in bill. 2. Prior action.	10,598	6,561
3. Total action to date	10,598 11,332	6,561 6,710
Over(+)/Under(-) Amounts assumed but not yet considered	—734	149
7. Over(+)/Under(-)	-734	-149
8. Mandatory amounts in bill	337 166	332 13,200
10. Total	503 503	13,532 13,425
12. Over(+)/Under(-)	59	+ 107 57
14. Over(+)/Under(-)	+59	+164

IV. Explanation of over/under

Despite the fact that the House Budget Committee is unable to give a definitive answer to the question of where a particular bill is over or under its 302(b) allocation, it does compare the items in a bill to the assumptions contained in the Budget Resolution. It is important to note the line-item assumptions in the Budget Resolution are not binding on a committee. Although within the totals requested by the Administration and assumed in the Budget Resolution for this bill, the bill makes several changes among funding priorities including:

Reduction of \$119 million in budget authority and an increase of \$40 million in outlays for Federal Railroad Administration

rail service assistance program.

A reduction of \$420 million in budget authority and \$320 million in outlays for the purchase of Consolidated Rail Corporation (ConRail) securities. The Committee has not received a budget request nor does it recommend additional funding to support the operation of ConRail; the Committee anticipates that \$242 million of the \$485 million appropriated for operating expenses in fiscal year 1981 will be sufficient to finance operations through fiscal year 1982.

An increase of \$97 million in budget authority and \$152 million in outlays for AMTRAK.

An increase of \$36 million in budget authority and \$385 million in outlays for Urban Mass Transportation Administration

An increase of \$200 million in budget authority and \$33 million in outlays for interstate highway transfer grants.

A decrease of \$215 million in budget authority and \$32 million in outlays for the Appalachian highway system which is maintained in the Energy and Water Appropria-

A decrease of \$96 million in budget authority and \$21 million in outlays for the facilities and equipment aviation account.

For mandatory items, the bill plus assumed "full funding" of mandatory items would be over its budget authority target only because the target seems not to make an allowance for the civilian agencies pay raise that will become effective this October.

V. Comparison with the President (discretionary amounts only)

This bill is below the President's requests for discretionary items in the bill by \$7 million in budget authority and over by \$12 million in outlays.

VI. Credit

The Budget Resolution contains only nonbinding targets for credit program amounts. This is the first year that there has been a credit scorekeeping system. There is no 302(a) and 302(b) allocation for credit program annual limits. For comparative purposes only, the table below shows the bill and the First Budget Resolution assumptions.

(In millions of dollars)

organis franchischer in 1	Direct loan obligations	Primary guarantee commit- ments	Secondary guarantee commit- ments
Credit program limits in the bill Programs assumed to be limited in the resolution but not acted upon in bill.		445	3
Credit programs not subject to limit.	291	-291	
4. Total in bill	291 291	154 129	3
6. Over(+)/under(-)		+25	

The Transportation Subcommittee total limitations proposed for guarantee programs (in this bill) exceed the Budget Resolution by \$25 million. The Transportation Subcommittee set limitations for guarantee programs that differed from the resolution as follows:

Aircraft purchase loan guarantees are limited to \$125 million, \$75 million above the resolution, but a 50 percent cut from the 1981 level. The Committee expressed concern that an abrupt termination of the program would adversely affect carriers which had made investments based on the availability of guarantees

Railroad rehabilitation and improvement financing fund guarantees are limited to \$270 million, \$50 million below the resolution. The Committee noted that the largest pending loan guarantee application had been withdrawn.

VII. Amendments

None are certain to be offered.

VIII. Definitions of terms in summary table, section III

Line 1. Discretionary amounts in bill: discretionary fiscal year 1982 appropriations in HR 4209

Line 2. Prior action: the fiscal year 1982 budget authority and outlays for this subcommittee that were appropriated in prior

Line 3. Total action to date: line 1 plus line 2.

Line 4. 302(b) target: the target for discretionary appropriations for this subcommittee set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over (+)/Under (-): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: these are amounts assumed in the fiscal year 1982 Budget Resolution for which funding has been deferred by the Appropriations Committee, probably until next Spring's supplemental appropriation

Line 7. Over (+)/Under (-): line 5 plus line 6.

Line 8. Mandatory amounts in bill: funding for mandatory programs (entitlements).

Line 9. Prior action: outlays from budget authority enacted for years prior to fiscal year 1982, plus any permanents assigned to the Appropriations Committee.

Line 10. Total: line 8 plus line 9.

Line 11. 302(b) target: the target for mandatory amounts for this subcommittee set by the Appropriations Committee. target set by the Appropriations Committee includes the effect of assumed authorizing legislation that would change the level of mandatory programs.

Line 12. Over (+)/Under (-): line 10 minus line 11.

Line 13. Supplemental amounts needed: amounts for any new entitlements legislation assumed in the Budget Resolution, for the October 1 pay raise, and to fund mandatory items in the bill at the level estimated in the Budget Resolution.

Line 14. Over (+)/Under (-): line 12 plus 13.

LEGAL SERVICES FUNDING

HON. W. HENSON MOORE

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

Mr. MOORE. Mr. Speaker, today I voted against the amendment by the gentleman from Wisconsin (Mr. SEN-SENBRENNER) to delete \$241 million from H.R. 4169 thereby denying any funds for the Legal Services Corporation for the fiscal year beginning October 1, 1981. In doing so, I want to have it clearly made known that I do not necessarily support the Legal Services Corporation. I do believe it is the reponsibility of Government to provide basic legal advice and service to indigent Americans who otherwise would not receive it due to inability to

On June 18, I voted for H.R. 3480 as a means to authorize the identical amount appropriated today for the Legal Services Corporation. On page E3062 of the Congressional Record of that date, I submitted remarks consistent with these to include a statement of support for Legal Services functions under block grant formula as had been anticipated at that time. Events which followed did not find funds for the Corporation being Legal Services transferred to a block grant during the budget reconciliation process ultimately producing Public Law 97-35 as a means to achieve some \$130 billion in budget savings over the next 3 years.

As the functions of the Legal Service Corporation were not folded into a block grant, this gives us a situation today of having the Legal Services Corporation as the only available conduit of Government aid for basic legal service for the indigent. If such aid is not provided here, it is not provided at all. I cannot agree with voting for this amendment under this situation. I will join in the pursuit of delivery of legal services under a block grant formula when given the opportunity to do so, but for the moment this choice is not available.

> ROLL BACK MEDICARE DEDUCTIBLE INCREASE

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. WEISS. Mr. Speaker, in recent years, skyrocketing health care costs

have exacted painful sacrifices from elderly and disabled Americans, Today I am introducing legislation which help ease the devastating impact that rising medical costs have on this vulnerable group of citizens. This legislation would roll back the increases in medicare deductible payments that were enacted under reconciliation and maintain the deductible amounts authorized under current

Reconciliation Act-recently The signed into law by President Reaganwill slash Federal spending by about \$35 billion in fiscal year 1982. Older Americans, disabled persons, and the poor will be among the major victims of these heavyhanded cuts.

In fact, the vast majority of elderly families will be affected in one way or another by the cutbacks in the Recon-

ciliation Act.

One of the major casualties is medicare, which provides valuable protection for about 28 million older and disabled Americans. The Reconciliation Act will reduce medicare outlays by an estimated \$1.2 billion in fiscal year 1982, including a \$400 million cutback in benefits.

The most severe reduction for older Americans is the change in the formula for the part A hospitalization deductible-the front-end charge that the patient must meet from his or her own resources, private health insurance or otherwise. The effect is to increase the deductible from \$204 to a projected \$256 in January 1982. Under prior law, this charge would have risen to \$228.

This 25-percent boost in the part A deductible will affect an estimated 7 million aged and disabled persons. It is likely to hit those the hardest who can least afford this spiraling cost.

This change will have other spillover effects because hospital charges for long-term stays and skilled nursing payments are pegged to the hospital deductible.

For example, the daily charge for qualifying skilled nursing care will increase from \$25.50 to an estimated \$32 for patients who are in nursing homes from 21 to 100 days.

Patients are now subject to a \$51 daily coinsurance charge if they are hospitalized from 61 to 90 days. The Reconciliation Act raises this amount to \$64. In addition, it will boost the daily coinsurance charge for medicare beneficiaries who must draw upon their 60-day lifetime reserve, from \$102 to \$128 a day.

The sharp increase in the part A deductible may force needy older and disabled Americans to play a dangerous game of Russian roulette with their health. Many may postpone essential hospital care until their illness reaches a critical or crisis stage. And then, the treatment may be ineffective or too late.

These individuals need and deserve all the help they can receive. My bill would help considerably by rolling back the part A deductible to \$228. This would provide welcome relief for aged and disabled Americans because their purchasing power is being eroded by rising prices and other cutbacks in the Reconciliation Act.

Ideally speaking, I would prefer to roll back the part A deductible to a much lower level. But this is simply not attainable, given the composition of the 97th Congress. My proposal, though, is legislatively feasible, and it would help to ease the mounting health care costs for medicare beneficiaries.

The Reconciliation Act also boosts the part B deductible charge by 25 percent in 1982, from \$60 to \$75. This change alone will cut medicare benefits by \$120 million in fiscal year 1982 and \$210 million in 1983.

Part B covers primarily physician services for the aged and disabled. However, other important services are reimbursed, including home health care, physical therapy, speech theroccupational therapy, medical supplies and equipment.

An estimated 19 million aged and disabled persons will be affected by the jump in the part B deductible. Quite often, the elderly and disabled must meet this increased charge from their own resources. Those with private health insurance coverage will almost assuredly be subject to rising premium charges to cover the major cutbacks in the Reconciliation Act.

The net impact is that older Americans and disabled persons stand to lose either way-whether they pay more from their own pocketbooks or indirectly for private health insurance premiums.

Medicare provides essential protection for older Americans. However, it still covers only about 44 percent of their health care expenditures because of gaps in coverage, deductibles, and coinsurance charges. Medicare's coverage will dwindle further when the cutbacks in the Reconciliation Act become fully effective.

The time has come to draw the line on shifting health care costs to the aged and disabled. These individuals oftentimes have limited resources to absorb these added expenditures. When they are piled on top of other cutbacks, the effect can be devastating.

My bill will help to soften the blow from spiraling health care costs by providing relief to millions of already beleaguered aged and disabled per-

Mr. Speaker, I urge prompt and favorable consideration of this measure. In addition, I ask unanimous consent that the text of this bill be printed following my remarks.

H.R. 4447

A bill to amend title XVIII of the Social Security Act to eliminate increases in the medicare part A deductible and coinsurance amounts and the increase in the medicare part B deductible amount effected by the Omnibus Budget Reconciliation Act of 1981

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

Section 1. This Act may be cited as the "Medicare Deductible Rollback Act".

ROLLBACK OF INCREASE IN MEDICARE PART A
DEDUCTIBLE AND COINSURANCE

SEC. 2. (a) Section 1813(b)(2) of the Social Security Act (42 U.S.C. 1395e(b)(2)), as amended by section 2132(a) of the Omnibus Budget Reconciliation Act of 1981, is amended by striking out "\$45" and inserting in lieu thereof "\$40".

(b) The amendment made by subsection (a) shall apply to inpatient hospital services and post-hospital extended care services furnished in calendar years beginning with calendar year 1982.

ROLLBACK OF INCREASE IN MEDICARE PART B DEDUCTIBLE

SEC. 3. (a) If this Act is enacted before January 1, 1982, section 2134 of the Omnibus Budget Reconciliation Act of 1981 is re-

(b)(1) If this Act is enacted on or after January 1, 1982, section 1833(b) of the Social Security Act (42 U.S.C. 13951(b)), as amended by section 2134(a) of the Omnibus Budget Reconciliation Act of 1981, is amended by striking out "\$75" and inserting in lieu thereof "\$60".

(2) The amendment made by paragraph (1) shall take effect on January 1, 1982, and shall apply to the deductible for calendar years beginning with 1982.

PERSONAL EXPLANATION

HON. GUS SAVAGE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. SAVAGE. Mr. Speaker, because pressing official business prevented me from voting today, I wish to take this opportunity to go on record in opposition to several particularly onerous amendments that were offered to H.R. 4169, the Commerce, State, Justice De-

partments appropriations bill for fiscal year 1982.

The Mottl amendment sought to hamstring Justice Department efforts to attack racial discrimination in local housing practices. Fortunately, this blatant attempt to return to the dark era of Jim Crowism was defeated.

Unfortunately, the Walker of Pennsylvania amendment, which seeks to prohibit use of funds to prevent implementation of voluntary school prayer, passed. However, the constitutionality of this amendment is highly questionable, and I would welcome a challenge of it in Federal court.

The Sensenbrenner amendment, which for all intents and purposes sought to eliminate the Legal Services Corporation, was defeated. It is good to know that some element of compassion still exists in this body.

However, had I been able to be present on the House floor today, I would have raised my voice in opposition to and voted against these amendments, for they all represent a retreat to the past.

THERESA S. KOLDIN

HON, STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. SOLARZ. Mr. Speaker, this afternoon in Brooklyn an outstanding member of the Manhattan Beach community, Mrs. Theresa S. Koldin, is being honored at a bonds for Israel luncheon because of the work she has done in behalf of Jewish causes.

I regret very much that I am unable to be present at this celebration of the contributions Theresa Koldin has made during her 45 years as a community activist in Manhattan Beach.

Mrs. Koldin is one of those remarkable women who has been a participant in community affairs her entire life. One of her earliest memories is marching with her mother in a suffragette parade. She graduated from Adelphi University and then obtained a master's degree at Columbia University. Mrs. Koldin pursued her career working professionally as a psychologist, married and raised two daughters, and yet always had time for philanthropic, civic, and political activities whether they focused on local or international issues.

As a founding member of the United Jewish Appeal's Manhattan Beach women's division, Tess Koldin has served as an active member of their board, and helped make their special gifts program a huge success.

As a psychologist concerned about developing human potential, Mrs. Koldin became active in the Organization for Rehabilitation Through Training and founded the Midwood

chapter of Women's American ORT. This progressive organization provides training and rehabilitation services worldwide to lift people from poverty and desperation by offering job and life skills.

I have also had the unique good fortune to get to know Tess Koldin, not only as an informed and articulate community activist, but as a warm, gracious and sensitive. devoted mother-for she is my mother-in-law. She is truly a valiant woman who never ceases to amaze me with the breadth of her knowledge and understanding and her tremendous human compassion. Over the years, she has been a source of inspiration, strength, and guidance to me and to all her family. Throughout her long and productive life she has provided an example of dedication, courage, and commitment to her fellow man that few of us could ever hope to surpass. She has enriched her family and her community by her generosity, her practicality, and her determination to make things happen.

Many people upon meeting this remarkable woman for the first time think that her activism and her interest in politics developed after I became an assemblyman and a Member of Congress, but in fact her own contributions and activities in politics and support of Israel predate my own.

Her interest and commitment to helping others and improving conditions led Tess to contribute thousands of hours as a volunteer in Hadassah, B'nai B'rith, the American Jewish Congress, and the League of Women Voters, as well as the United Jewish Appeal and Women's American ORT. Her alma mater, Adelphi University, has relied on her for years as an active member of its Brooklyn board. And where there was an issue in the community, or someone in need, Tess Koldin was always there.

I am pleased and proud to have this opportunity today to pay tribute to Theresa Koldin who symbolizes to me what one talented and determined person can accomplish when she sets her mind to the task. May the light of her example and the warmth of her love continue to brighten the lives of all of us who know her.

INTRODUCTORY STATEMENT ON AMENDMENTS TO THE URBAN HOMESTEADING PROGRAM

HON. THOMAS A. LUKEN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. LUKEN. Mr. Speaker, today I am introducing legislation that will amend the Housing and Community Development Act of 1974, urban homesteading program to redirect this pro-

gram to provide housing to the low- to moderate-income groups, the truly

needy in our society

When the urban homesteading program was first implemented as a demonstration project in 1974, it was the intent of the law to help revitalize blighted neighborhoods in decaying urban areas by expediting occupancy of abandoned houses. The belief was that a homeowner, rather than a renter or absentee owner, has the in-centive to keep up the house and neighborhood and that once a homesteader fixes up an abandoned house others will become interested in further improving the neighborhood.

The overall intentions of this program are laudable, but in the actual operation of this program one glaring inequity has arisen. The Congress intended local bodies to run urban homesteading programs with freedom and flexibility under broad Federal guidelines. But the requirements are so loose that the Federal Government does not mandate any income limitations on those participants in the program. This omission in the law has resulted in allowing people who could well afford to conventionally finance the buying of a home on the open market to participate in the homestead program. Today, with the recent budget cuts, we must better utilize the remaining Federal money to help the poor and truly needy find housing. We should not be funding a program to help the rich buy homes.

My amendment to the Housing Act would set an income limitation on all those participating in the homesteading program so that only those in the low- to moderate-income groups can receive homes. The homesteaders will be given priority to apply for low interest rehabilitation loans under sec-

tion 312 of the Housing Act.

I urge my colleagues to join me as cosponsors of this worthwhile piece of legislation.

H.R. -

A bill to restrict the urban homesteading program to families with low or moderate incomes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section \$10(b)(1) of the Housing and Community Development Act of 1974 is amended by striking out "an individual or a family" and inserting in lieu thereof "any moderate-income individual or or low-

(b) Section 810(g) of such Act is amended by adding the following new paragraph at

the end thereof:
"(3) The Secretary may not approve any program under paragraph (1) or (2) if the program authorizes any conveyance of residential property to an individual or a family other than a low- or moderate-income indi-

vidual or family."
(c) Section 810 of such Act is amended by adding the following new subsection at the

end thereof:

"(i) For purposes of this section, the term 'low- or moderate-income individual or EXTENSIONS OF REMARKS

family' means any individual or family whose income does not exceed 80 percent of the median income for the area, as determined by the Secretary with adjustments for small and larger families.".

GRISHAM NOTES HISPANIC HERITAGE WEEK

HON. WAYNE GRISHAM

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. GRISHAM. Mr. Speaker, September 16 marks the 171st anniversary of "el grito de Dolores," a time when Mexico proclaimed its independence from Spanish colonial rule, ending forever the reign of foreign tyranny in the Western Hemisphere. In recognition of this important date, and in conjunction with the celebration of National Hispanic Heritage Week, I rise in tribute to the many remarkable contributions Hispanic Americans have made to this Nation.

The Hispanic culture is as colorful and varied as that of America itself. The Hispanic American population, grown to over 15 million in the past 5 years, continues to increase at a rate of over 1 million a year. Americans are just beginning to realize the social, economic, and political gains that have been achieved by members of the His-

panic American community.

But there is still much to be done. We must constantly strive to increase awareness so that conditions will be improved for all Americans. At the same time we must recognize the many contributions Hispanics have made to the development of this country and work to preserve the ethnic origins and traditions which distinguish the Hispanic culture from other

The Hispanic presence is felt all throughout the United States. The fine Mexican architecture, with its adobe walls and rich design, has international appeal. The strong pride represented in outdoor murals signals all that can be accomplished. Los Angeles Dodger Fernando Valenzuela, businessman and former Republican candidate for president, Benjamin Fernandez, Mayor Henry Cisneros of San Antonio, Robert Goizueta, chairman of the Coca-Cola Co., professional golfer Nancy Lopez-Melton, television personalities Ricardo Montalban and Geraldo Rivera, all represent what is new and bright on the horizon for Hispanic Americans.

As the country continues to grow economically, socially and culturally, Hispanics will be a major part of that growth. I join with all Americans in celebrating the proud heritage and culture of the Hispanic American. Its historic past is only shadowed by the prospects of an ever brightening

future.

TWO STATESMEN

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

Mr. GILMAN. Mr. Speaker, this morning I had the honor to be present at the White House when two great statesmen, President Ronald Reagan and Israeli Prime Minister Menachem Begin, met for the first time.

As these leaders begin their deliberations on the trouble-plagued Middle East, we all share the hope that the talks will be fruitful and will result in renewed movement toward a lasting

peace in that region.

Our Nation has an important role to play, as the state of Israel's best friend, and, as Mr. Begin described the President, as "the defender of freedom throughout the world.'

These summit sessions, which I am certain will be productive and friendly, were initiated with a warm welcoming ceremony on the south lawn of the White House this morning.

Mr. Speaker, so that my colleagues can share the thoughts expressed at this historic meeting, I request permission that at this point in the RECORD there be inserted President Reagan's warm greetings and Prime Minister Begin's gracious response.

REMARKS OF THE PRESIDENT AND PRIME MIN-ISTER MENACHEM BEGIN AT ARRIVAL CERE-

The PRESIDENT. Prime Minister Begin, on behalf of the American people, Nancy and I are honored and delighted to welcome you and all those accompanying you.

We're proud to stand beside you this morning, joining a tradition of hospitality for Israel observed by our presidents for more than three decades. Your visit is testimony to the warm friendships, mutual respect, and shared values that bind our people. Today and tomorrow, we'll have an opportunity to meet, to come to know each other, and to discuss in detail the vital issues of peace and security that concern both our countries.

I welcome this chance to further strengthen the unbreakable ties between the United States and Israel and to assure you of our commitment to Israel's security and well-

Israel and America may be thousands of miles apart but we are philosophical neighbors sharing a strong commitment to democracy and the rule of law. What we hold in common are the bonds of trust and friendship-qualities that in our eyes make Israel a great nation. No people have fought longer, struggled harder, or sacrificed more than yours in order to survive, to grow, and to live in freedom.

The United States and Israel share similar beginnings as nations of immigrants, yearning to live in freedom and to fulfill the dreams of our forefathers. We have both sought to establish societies of law, to live in peace, and to develop the full potential of our lands. We share a devotion to democratic institutions, responsible to the wills of our citizens. Our peoples embrace common

ideals of self improvement through hard work and individual initiative. Together, we seek peace for all people. In partnership, we're determined to defend liberty and safeguard the security of our citizens. We know Israelis live in constant peril. But Israel will have our help. She will remain strong and secure and her special character of spirit, genus and faith will prevail.

The prophet Ezekiel spoke of a new age when "land that was desolate has become like the garden of Eden and waste and ruined cities are now inhabited." We saw how miraculously you transformed and made the desert bloom. We see how, despite dangers everyday, your families continue working together to build a better place to live and to prosper in peace and freedom.

Our dream, our challenge, and, yes, our mission, is to make the golden age of peace, prosperity, and brotherhood a living reality in all countries of the Middle East. Let us remember that whether we be Christian or Jew or Moslem, we are all children of Abraham. We are all children of the same God.

Mr. Prime Minister, you come at a time of testing and of hope. The challenges we face are great with the forces of aggression, lawlessness, and tyranny intent on exploiting weakness. They seek to undo the work of generations of our people, to put out a light that we've been tending for these past 6,000 years. But we understand their designs and we're determined to oppose them. Working with all our friends in the Middle East, we seek to reinforce the security of the entire region. As we consult about these problems, rest assured that the security of Israel is a principal objective of this administration and that we regard Israel as an ally in our search for regional stability.

Equally important in our discussions is the commitment of our two countries to advance the cause of peace. Mr. Prime Minister, your strong leadership, great imagination and skilled statesmanship have been indispensable in reaching the milestones of the past few years on the road toward a just and durable peace in the Middle East.

You and the members of your coalition have earned our respect and admiration. Many cynics said Israel would never make peace with Egypt, but you did. Then they said you would not honor your commitment to return the Sinai to Egypt, but you have. Now they say you cannot go forward to work out a just and durable peace with all your neighbors, we know you will.

I look forward to receiving the benefit of your views and advice on the great tasks that remain before us. I'm confident that the United States and Israel will continue their close partnership as difficult negotiations toward peace are pursued. Let me also thank you, Mr. Prime Minister, for helping our special ambassador, Philip Habib, to arrange a cessation of hostilities across your border with Lebanon. Still another considered step for peace and one well taken.

Prime Minister Begin, I know your entire life has been dedicated to security and the well-being of your people. It wasn't always easy. From your earliest days you were acquainted with hunger and sorrow, but as you've written you rarely wept. On one occasion, you did—the night when your beloved state of Israel was proclaimed. You cried that night, you said, because "truly there are tears of salvation as well as tears of grief."

With the help of God and us working together, perhaps one day for all the people in the Middle East, there will be no more tears of grief, only tears of salvation. Shalom,

Shalom; to him that is far off and to him that is near. And again, Mr. Prime Minister, welcome to America. (Applause.)

Prime Minister Begin. Mr. President, my colleagues and I are grateful to you and to Mrs. Reagan for your kind invitation, for having given us the opportunity to discuss with you and your advisors international problems, bilateral issues, the danger to freedom resulting from Soviet expansionist policy in our region and its periphery and elsewhere. And the defense of human liberty, which is the essence of our lives, demotive of our efforts, the reason of our labors.

Our generation, Mr. President, lived through two world wars, with all the sacrifices, the casualties, the misery involved. But the two wars also created and left after them regrettably two illusions. In the early 20s the saying went around the world that was the war to end all the wars. It was not so to be. Only 25 years later another world war broke out, the most horrifying of all in the annals of mankind. Not only were the sacrifices in tens of millions of human beings, but also with atrocities unheard of in history. Ultimately, mankind crushed the darkest tyranny which ever arose to enslave the human soul and then people believed that it is the end of tyranny of man over man. It was not to be.

After May 1945 there were 56 so-called local wars in a period of 36 years alone. In other words, blood-letting and enslavement are going on. Country after country is being taken over by totalitarianism. In nearly 80 years, eight countries were so taken over either by proxy or directly. So, it is obvious that liberty is in danger and all free women and men should stand together to defend it and to assure its future for all generations to come. But the free one-its democracy was proved time and again-true democracy. It is an integral part of the free world. It is a fateful and, through each democratic regime, a stable ally of the United States. We shall stand together and Israel will give its share in defending human liberty.

Mr. President, out of those 56 local wars, five were thrust upon little Israel since its inception. We waged them out of necessity to defend our people and to save its existence and to sustain our independence. This is the simple reason why we not only want peace but we yearn for peace. And therefore, as you rightly said Mr. President, the price of great sacrifices and admittedly undertaken those are very serious risks. We made peace. We signed a peace treaty on this very lawn with our southern neighbor. But we strive to sign peace treaties and make peace forever on all our borders with all our neighbors. And with God's help this noble aim will be achieved too.

Mr. President, thank you for your heartwarming remarks about my people and my country and touching words about my life, which is only one of the uncountable thousands and millions who have suffered and fought and resisted. And so, after a long night, the rise of the sun, the day. I am one of them because this is our generation. But your appreciation of our motives, our efforts, our sacrifices is very dear to all of us because, Mr. President, we see in you not only the President of the United States, but also the defender of freedom throughout the world.

May I, Mr. President, extend to you on behalf of the people and government of Israel our invitation to come and visit our country and its capital, Jerusalem. Then we hope that we shall be able to reciprocate the wonderful hospitality, indeed, in the spirit of all Abraham, whom you mentioned, which was accorded to my colleagues and to myself. Be assured, Mr. President, the people of Israel will receive you, not only with utmost respect, but with deep cordiality

Thank you.

AFL-CIO CALLS SCRUTINIZIING BUDGET

FOR DEFENSE

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

• Mr. FRANK. Mr. Speaker, the AFL-CIO has long been a joint supporter of a strong national defense. It is for this reason that their unhappiness at the way in which the Reagan administration is approaching the question of defense spending deserves serious attention. At its August 5 meeting, the AFL-CIO Executive Council adopted a very thoughtful resolution pointing out some of the financial dangers in the President's defense spending proposals. I think that this very thoughtful statement should be widely read and I ask that it be printed here.

STATEMENT BY THE AFL-CIO EXECUTIVE COUNCIL ON DEFENSE SPENDING

At its February 1981 meeting, the Executive Council stated that "the AFL-CIO remains steadfast in its support for a strong national defense—not as a source of jobs but as a necessary precondition to the survival of democratic institutions, including free trade unions, which are threatened by totalitarian expansionism."

Our support for national defense is not, however, to be taken as a blank check for the Pentagon.

We have consistently opposed the definition of our defense needs in purely dollar terms. Weapons, ready manpower, logistical support, and intelligent strategy—not dollars—are the elements of military strength.

Thus, in past years, the AFL-CIO opposed cuts in the defense budget by fixed dollar amounts or percentages without regard for which weapons would be cut or strategies changed. Similarly, we are not convinced that vast increases in defense spending will in themselves substantially strengthen the U.S. military position. Our standard of judgment is not how much money will be spent but what that money will buy relative to our security needs.

The Reagan Administration has put the cart before the horse. It has asked for huge increases in defense spending without having resolved important issues of strategy or decided what weapons systems are required to implement that strategy. Additional billions have been committed to the Pentagon, but no decisions have been made on deployment of the MX missile, on the B-1 bomber, or on other major defense questions.

The Administration proposes to raise defense spending (in constant 1972 dollars) from \$72.5 billion in 1980 to \$116.4 billion in 1986. Non-defense spending would be reduced from \$222.4 billion to \$201.6 billion in the same period.

The consensus for a stronger defense effort is more fragile than the Administration supposes. By increasing defense spending at the expense of vital social programs, the Administration risks the creation of new anti-defense constituencies among workers the poor, minorities and the elderly. Popular support for a strong defense and foreign policy cannot be sustained by unjust social and economic policies which generate social tension, class conflict and political polarization. Nor will such policies produce the eco-nomic strength required for military strength.

Even in prosperous times, wasteful spending, huge cost overruns, and poor management of defense resources are indefensible. They are intolerable at a time when the defense burden is being shifted more and more

to workers and the poor. AFL-CIO Executive Council calls upon the Congress to subject the Administration's defense budget to the closest scrutiny If as the Administration says. cannot solve our social problems by throwing money at them, then clearly, we cannot solve our defense problems that way either.

A TRIBUTE TO ED POWELL, PLA-CENTIA'S CITY ADMINISTRA-

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

Mr. PATTERSON. Mr. Speaker, it is with great pleasure that I invite my colleagues to join me in honoring Mr. Ed Powell, an outstanding, dedicated public servant who, after serving as city administrator of Placentia for 14

years, is now retiring.

Ed is a veteran of World War II, having served in the U.S. Marine Corps. He graduated from Indiana State University, where he earned a bachelors degree in English. Ed then became assistant coach of Indiana University's basketball team, a team on which he had played under coach John Wooden, who set the pace for the most winning teams. A few years later he joined Coach Wooden at UCLA, serving as assistant coach for the renowned Bruin team.

Ed earned a master's degree in public administration from the University of Southern California, after which he began a career in public service. He was an administrative intern with the city of Inglewood, assistant city manager for the city of Downey, and city manager for the city of Irwindale. Ed assumed his position as city administrator of Placentia on September 3, 1967. During his service there, Placentia has grown from a city of 20,000 to 35,000. Prior to my service in Congress, I worked with Ed Powell when I was city attorney of Placentia.

Ed Powell is a man whose innovation and progressive thought are reflected through his accomplishments in Placentia. In 1972, Placentia was presented with an All-American City Award. Ed was a leader in emphasizing park

development in Placentia, he advocated a 40-hour workweek for firefighters, and initiated the city's teen commissioner program. Placentia acquired a new civic center complex and a modernized police department under Ed's leadership. Both are monuments which commemorate the excellence with which Ed so devotedly served Placentia

In addition to his professional activities Ed has been an active volunteer in many civic organizations. A member of the Orange County City Managers Association for many years, he once served as president of that organization. He has belonged to the International City Managers Association from whom he received the ICMA management innovation award in 1977, for advances in fire productivity. Ed has also served on the human resources committee for the League of California Cities

Henrietta, Ed's wife of 40 years, has also served the Placentia community. Affectionately known as "Hank", Henrietta has participated in the Placentia Meals on Wheels program; has been a member of the Placentia Roundtable; and has affiliated with the local senior citizens club.

Ed Powell's dedicated service has touched the lives of many people including mine, both within and without the city of Placentia, and his contributions will truly be missed.

Mr. Speaker, it is a privilege to ask my colleagues to rise with me in commending an extraordinary public servant-a man who has inspired so many of us-Ed, we thank you.

WE CAN'T IGNORE SOVIET DRIVE FOR ARMS SUPREMACY

HON. LARRY J. HOPKINS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

. Mr. HOPKINS. Mr. Speaker, one of my constituents, Mr. Basil D. Childress of Lexington, Ky., recently wrote an article published in the Lexington Leader setting forth his views on the threat of ignoring the Soviet Unions' clear intention of obtaining a coercive strategic advantage over the United

As a member of the Armed Services Committee, I share Mr. Childress' concern and strongly urge all my colleagues to read his well-reasoned analysis of what is without a doubt, the major problems facing our Nation today.

WE CAN'T IGNORE SOVIET DRIVE FOR ARMS SUPREMACY

(By Basil D. Childress)

The necessity for public understanding of our present-day defense needs is crucial to meeting the challenges we face. One of the most important challenges is the nuclear

arms question, but there is a very real lack of understanding about what is necessary to avoid nuclear war.

In order to understand our situation, we must review the thinking which today dominates the Western military mind. There are three salient ideas important in grasping the problem of nuclear weaponry

The first of these is that military power not only has actual operational value, but it also has coercive value if used by an aggressor, or deterrent value if used by a defender. Both the coercive value and deterrent value of military power are based on the idea of perceived threat and find expression in a nation's diplomatic efforts.

The second point is implied by the first. that an aggressor can place another nation in so vulnerable a position, whether perceived or actual, that it surrenders without a shot being fired. Indeed, the aggressor would consider the above ideal.

Finally, any nation's purpose in war is to force the enemy to conform to one's will. whatever that may be, which implies the possibility of limited goals and means.

The deterrent value was demonstrated in 1962, when Kennedy used our tremendous nuclear advantage of that period to force the removal of the Soviet missile base in Cuba. Ominously, however, the then first secretary of foreign affairs, Vasily Kuznetzov, told his American host, "You Americans will never be able to do this again.

The unprecedented, ongoing Soviet buildarms categories must be understood within this context. This is especially true when one considers the new nuclear policy we adopted in the mid '60s, which came to be known as Mutual Assured Destruction (MAD). The idea was that, if the Soviets were allowed to pull even with us (parity), each side retaining the ability to inflict unacceptable levels of civilian casualties, the Russians would allow the status quo developed to stand.

On this theoretical base Robert S. McNamara as secretary of war, administered the unilateral disarmament of much of our strategic capability. It was felt at the time that we could thus spend less on defense and still

deter the Russians.

The Russians, though, have ignored our ill-founded theorizing and have continued in an unrelenting drive for supremacy. Their level of spending alone, since the lessening of our capability, conclusively proves the Russians have no interest in parity.

Even if the Russians were interested in parity, the concept of Mutual Assured Destruction is fatally flawed. It assumes what is unacceptable loss for us is the same for the Russians. This is difficult to imagine, since the known Russian dead from political assassination, famine and war since 1914 alone approaches 70 million. Our war dead since 1776 barely reaches 1 million.

MAD assumes all-out attack. It is based on terror, an activity we find so reprehensible when practiced by organizations such as the PLO. It is militarily valueless since our only option in case of limited attack would not be primarily to destroy Soviet capability for further attack, but the slaughter of Russian civilians. This kind of pointless killing not only is never militarily valid, but is outright immoral and as such should not be part of U.S. defense strategy.

If we recognize the bankruptcy of MAD, we will be free from its folly and be finally able to face the challenge of true Soviet

strategy.

The apparent Soviet strategy referred to is coercive in nature and is based on the sure knowledge that we can count. It involves obtaining the ability to destroy in an initial attack enough of our counterblow capability, so that what we are able to launch against them would still leave them with

some capability for a final blow.

To the militarily naive, the above is nonsense. They feel that there is no such thing as a limited attack, because even a limited attack would destroy civilization. They miss the point, that "the button" would never be pushed, since any nation put in the above situation would surrender rather than commit collective suicide.

This is not to say that ever-increasing levels of expensive arms are necessary to maintain a nuclear stalemate. It is to that higher levels of spending have resulted from the Russian drive for supremacy.

The Reagan defense budget's huge increases illustrate this administration's perception of our situation. That budget, however, should emphasize the force mix and weapon systems solutions available to neutralize the approaching Soviet threat, rather than driving now for long-term supe-

riority.
Outright superiority is today neither economically nor politically feasible. When we regain it, what remains to us is parity. But parity must be redefined in terms of our determination to prevent the Russians from obtaining the coercive ability of a strategic

advantage.

We must shake ourselves from our naivete and understand the nature of the challenge. For too long we have left our futures in the hands of the experts who gave us MAD. However immoral we may consider it, the problem is a military one and must be so dealt with. If we ignore it, the very real probability is our quick surrender, or at the least a long inexorable descent into Soviet domination.

Someone once said that the price of freedom is eternal vigilance. If that is true, we are dangerously close to being accused of

not being very vigilant.

COAL EXPORT MEETING WITH ADMINISTRATION'S COAL IN-TERAGENCY WORKING GROUP

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. RAHALL. Mr. Speaker, it is reassuring to note that the Reagan administration has recognized the importance of coal exports in reducing this Nation's balance-of-payments deficit and for providing an element of energy security to our allies. Recently, the Department of Commerce unveiled a coal export policy which includes the promise that the administration will engage in an active coal export promotion program in addition to providing foreign investment assistance. To provide the impetus for reaching the goals of the coal export policy, the administration has formed the Coal Interagency Working Group, chaired by Commerce Assistant Secretary for Trade Development William Morris. Participants in the working group include representatives from various Federal agencies with an interest in coal and the Nation's seaports.

EXTENSIONS OF REMARKS

In light of this highly commendable action, on behalf of the Congressional Coal Group I have called a meeting with Assistant Secretary Morris and members of the Coal Interagency Working Group to discuss coal export and related issues such as port dredging proposals with interested Members of Congress. Today, I sent invitations to members of the Subcommittee on Water Resources, Subcommittee on Merchant Marine, Subcommittee on Energy and Water Development, the chairmen of the Congressional Port Caucus, Congressional Shipyard Coalition, and the Congressional Export Task Force in this regard.

I would like to take this opportunity to invite any other Members with an interest in this subject to attend the meeting, which will be held on October 7. Please contact my office for ad-

ditional information.

EFFECTIVE ANTICRIME LEGISLATION INTRODUCED

HON. BOBBI FIEDLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

. Ms. FIEDLER. Mr. Speaker, I am proud today to introduce a package of six pieces of legislation that I believe will help in the fight against crime in our country. As we all know, the vast majority of crime legislation is handled by the various State legislatures. However, after months of research, I have discovered a number of areas in which Congress can help.

In a recent newsletter, I asked the people of my district what they thought the most important problem is facing our community. The overwhelming answer was "crime". In fact, Mr. Speaker, over one-third of all the thousands of people who responded

gave this answer.

The six bills I am introducing today deal with six specific problems. They

BILL NO. 1-THE EXCLUSIONARY RULE

Problem: The fourth amendment to the U.S. Constitution protects Americans from unreasonable search and seizure by the police. Until 1961, neither Congress nor the U.S. Supreme Court told the states how to enforce that right.

In 1961, the U.S. Supreme Court ruled that in all state court trials, if evidence of a crime was obtained by an unreasonable search it could not be admitted into evidence against the criminal. The theory behind this rule was that the policeman would be deterred from intentionally seizing evidence unreasonably if he was punished by having the evidence kept out of court.

However, in recent years, the overwhelming number of searches determined to be "unreasonable" have not been intentional. In other words, the policeman thought he was obeying the law. As a result, it makes no sense to use the exclusion of evidence as a deterrent because unintended acts cannot

be deterred.

Not only is the exclusionary rule not accomplishing its goal, but it only helps criminals because it provides no redress to innocent victims of police misconduct. The rule acts only to throw out valid evidence of criminal conduct.

Solution: This bill eliminates the exclusionary rule in state court trials as a means of protecting the public's right to be free from unreasonable searches. In place of the rule, this bill creates a right for money damages for both innocent and guilty victims of

such violations.

The bill will gradate the size of the award based on whether the violation was in good faith or was willful. It also allows less damages if the person searched was convicted of the crime than if he was innocent of any crime.

This approach to protecting the public from unreasonable searches is followed throughout the free world. The United States is the only country that has an exclusionary rule on the books.

BILL NO. 2-HOLDING FEDERAL PAROLE OFFICIALS LIABLE FOR GROSS NEGLIGENCE

Problem: Under existing law, if a prisoner is released on parole and commits further violent crimes, the new victims have no cause of action against the parole authorities even if they should have known of the potential danger of the parolee's release.

Solution: This bill creates a cause of action allowing aggrieved parties to sue the government for the gross negligence of parole authorities in the release of danger-

ous criminals.

(Background material): The U.S. Department of Justice conducted a study of federal parolees during the 1970s. The study tracked the records of hundreds of randomly chosen federal prisoners following their release on parole. It found that 62.5% were arrested at least once during their parole for either a new crime or a parole violation. 41% were arrested more than once.

In that same study, it was shown that within 5 years 48% of the youth parolees had committed sufficiently serious offenses to require recommitment. For adults the

rate was 40%.

There are between 7,500 and 8,500 federal prisoners on parole every year. This means that every year federal parole authorities are releasing approximately 3,500 dangerous criminals who, statistically, will go out and commit new and violent crimes again.

In the March 27, 1981 Washington Post, it was reported that 26 prisoners in Maryland operating on a work-release program were indicted on 61 charges of murder, rape, armed robbery and narcotics violations committed while on release under the program.

BILL NO. 3-DENIAL OF BAIL

Problem: Under existing law, inmates in state prisons, already convicted of a crime, may be granted bail by federal judges as soon as the inmate appeals his conviction in federal court.

Solution: This bill will outlaw the granting of bail to any inmate in a state prison, even if he is appealing his state conviction in the federal courts.

BILL NO. 4-PRESUMPTION THAT PLEA BARGAINS WERE VALID

Problem: Under existing law, a convicted criminal can go into federal court years after he has plead guilty to a crime state court. He can then claim that his guilty plea was forced and not voluntary. This is the case even if the state court trial record shows that the criminal entered his

plea bargain in open court, with the full advice of counsel after being told all of his rights.

As a result, the state is required to go into federal court and defend the validity of the original plea bargain. Although these claims by criminals are rarely successful, they are made all the time and require the expenditure of taxpayer's money to pay for the lawyers, judges, courtroom time, etc. In other words, the state is required to prove the validity of a plea bargain that is manifestly valid based on official court records.

Solution: This bill will establish that if a

Solution: This bill will establish that if a plea bargain has been entered on the record with all the requirements of law having been expressly complied with, that record will constitute conclusive evidence of a proper plea bargain.

BILL NO. 5-LIMITS FEDERAL COURT INQUIRY

INTO STATE PRISONS

Problem: Under existing law, a single federal judge can determine, based on his own set of standards, that a state must change the physical conditions in their prisons. This can cost the taxpayers of a state untold millions of dollars or allow for the premature release of hardened criminals.

Solution: This bill limits the authority of federal judges to make such determinations in two ways: (1) it requires that all the issues raised by a state prison inmate be first presented to that state's courts before being admissable in federal court and, (2) it requires the federal judge to defer to the judgment of the state court so long as the state court provided a fair hearing for the prisoner.

(Statistical background): Petitions filed by state inmates in the federal district courts is increasing. In the last five years they have increased by over 90%. As of June, 1980 (last complete records) state prison inmate filings comprise 11.6% of all civil filings in the federal trial courts across the country.

(Example): Last month a federal judge in Arkansas ordered the release of 25 convicted felons, including murderers, because the federal judge was not satisfied with the physical conditions in the state prison.

BILL NO. 6—TIGHTENING FEDERAL WRIT REVIEW PROCEDURES

Problem: The federal writ of Habeas Corpus was created by Congress in 1867. At that time, the law allowed a person being held in a state prison without being charged the right to go into federal court to get released from the illegal detention.

Over the years, however, the federal courts have expanded the issues that could be considered under a federal writ of Habeas Corpus. In other words, instead of merely checking to see if the inmate had been properly charged by state officials, the federal courts started using the writ process as a vehicle for reviewing the entire state criminal trial process. This has created great friction between states and the federal courts.

As a result, in 1966 Congress amended the 1867 act in an effort to stop the federal courts from overstepping their proper role. In that act Congress laid out specific limitations on what the federal courts could review.

However, since 1966 many federal judges have again attempted to overstep their Congressionally-limited scope of review. By using hypertechnical procedural tricks the federal courts have attempted to substitute their judgment for that of the state courts in state criminal trials.

Solution: This bill tightens the conditions under which the federal courts may over-

rule valid state court decisions. It requires state inmates to raise every complaint in the state courts before raising them in the federal courts.

The bill also requires the federal court to wait until the state court has made a ruling on the merits of the inmate's claims before reviewing the case.

As a further protection of the integrity of the state court system, this bill requires the federal courts to honor state court procedures. In other words, a federal judge would not be able to overturn a valid state conviction just because the federal judge disagrees with the procedures duly enacted by a state legislature for the administration of state trials and appeals.

Additionally, Mr. Speaker, I am announcing my cosponsorship of two additional pieces of legislation introduced by colleagues that also deal with the growing problem of crime. The problems they address are:

Problem: Under existing federal law, a criminal who uses a firearm during the commission of a crime may never serve a day in prison. At the discretion of the court, such a violent convicted criminal may get off with probation.

Solution: H.R. 27 takes that discretion out of the hands of federal judges. Rather, this bill requires an automatic minimum prison term of 5 years for any criminal convicted of using a firearm during the Commission of a crime. This sentence must be added to any other sentence given for the crime. A second firearms conviction would be a minimum ten year additional sentence.

Problem: Under existing federal law bail is available to defendants even if they are a clear and present danger to the community. The only condition that must be met before granting bail is to assure the presence of the defendant at his trial. As a result, clearly dangerous criminals are being released into the community every day.

An example is the case of Christopher Boyce, the convicted Russian spy who escaped from federal prison 2 years ago and has just been recaptured. The federal judge who arraigned him last week set ball for him.

Solution: H.R. 4362 establishes more sensible criteria: (1) it permits detention of a person arrested while free on bail, probation, or parole for a period of 10 days to permit the appropriate court, probation or parole recommitment process to take place; (2) it provides for detention of an arrested person if a judicial officer concludes that no conditions will reasonably assure their appearance in court or to protect the community: (3) it requires a hearing to inquire into possible flight and community safety in all cases involving a crime of violence, an offense punishable by life in prison or the death penalty and in certain narcotic offenses; (4) provides that in making bail decisions judges must consider the nature and circumstances of the offense, the weight of evidence against the defendant, the history of the defendant and the nature and seriousness of the danger to a person or the community that would be posed by release; (5) provides for the enforcement of subpoenas of material witnesses.

Mr. Speaker, the people of our country are demanding freedom from preying criminals who make them fear for their safety even in their own homes. I think this package of legislation is a start toward giving people that free-

dom from fear. I urge my colleagues to join with me in supporting this legislation to get and keep criminals off the streets.

JOBS FOR WHOM?

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

• Mr. HAWKINS. Mr. Speaker, President Reagan has constantly talked about jobs. "The best social program is a job; 13 million new jobs by 1986. Jobs, jobs, and more jobs." How can he reconcile this rhetoric with the catastrophe going on in the black community?

The official unemployment rate for black teenagers is over 50 percent and undoubtedly, the actual rate in our hardest hit communities is even higher; 300,000 CETA workers are in the process of losing their posts. Construction and manufacturing firms are laying workers off right and left. There is a do-nothing urban policy concensus in the White House. All this and the worst effects of the budget cuts are yet to come. I fear, as does the cabbie in William Raspberry's Post column this morning, that the administration really does not know where it is going. And that bodes ill for all of

> Jobs: Which Way Is Up? (By William Raspberry)

"Boy, that Reagan is really putting it to us now," the cabbie said. "I suppose you saw the report the other day that unemployment is up again."

"Sure, I saw the report," I told him, "but I'm not sure I see what you are so excited about. After all, the overall jobless rate was only up two-tenths of a percent—from 7 percent to 7.2. That's not good, of course, but I hardly see how you could describe that as putting it to the American worker."

"I didn't say he was putting it to the American worker," the cabbie shot back. "I said he was putting it to us. As you may have noticed, I'm black. And unless my bifocals need changing again. I believe you are, too.

"That 7.2 percent is for them white folks. For us, unemployment went up from 13and-change to 15 percent."

I conceded his point and admitted the trend was not good.

"Not good!" he screamed. "It's a damn disaster, is what it is. And did you see the numbers for black teenagers? Over 50 percent, I tell you, that man's economic program is just about to wipe us out."

"The trouble with people like you is that you have no patience," I told him. "You shouldn't be that upset about a temporary increase—a blip on the screen, so to speak. That is only a natural consequence of the president's efforts to squeeze the fat out of the economy. The long-term result will be a much healthier economy."

"Healthier for who?" the cabbie demanded

"Whom," I corrected.

A TRIBUTE TO GEORGE ARTHUR ANDERSON

HON. BO GINN

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

"And when people really start feeling the pinch of all the cuts Reagan is making in food stamps and job training and medical care and so forth, it's not going to be healthy for any of us. I mean, folks aren't going to just sit there and quietly starve to death."

"Look I told him "if you want to criticize

'Okay, Mr. Intellectual, whom. Well, I can

tell you it's not healthier for my nephew

who lost his CETA job last week. It's not healthier for my mother, not when she

stands to have her Social Security cut back. It's not healthier for my brother-in-law

who's been looking for a job for six months

now and is already into me for \$400.

"Look, I told him, "if you want to criticize Reagan because you're still in love with JFK, then go right ahead. But if you want to understand something about supply-side economics, I'd be happy to explain it to you."

"What's to explain?" the cabbie yelled.
"More people are out of work, especially my
people. Business is stagnating even for
white folks, Interest rates are so high I
can't even afford to replace this brokendown cab. Don't you read your own newspaper?"

"As a matter of fact, I do," I said calmly.
"If you read it instead of just going off about one or two little negatives, you'd understand what the long-term payoff really

"Didn't you read the president's Labor Day statement? I've got it right here. Listen: 'Our goal in this program is: jobs, jobs and more jobs. I see the creation of 3 million more jobs by 1986, in addition to the 10 million already expected. I see an era in which wage earners will be taking home more money in real dollars and an era in which fewer of us will be looking for work.' That's what the man said."

"And did he say where all those millions of jobs are coming from?" the cabbie asked. "Well, it was only a short statement," I said.

"Did he say anything at all to show that his supply-side mumbo jumbo is working?" the cabble persisted.

"Well, let me see," I said, scanning the presidential statement. "Oh, yes, here it is: 'Our policy has been and will continue to be: What is good for the American worker is good for America.'"

"Is cutting back on school lunches and medical care good for the American worker?" the cabbie wanted to know.

"Well, not directly, at least," I conceded.

"Is a 20 percent prime good for the American worker?"

"Of course not," I said.

"Is it good for the American worker when 7½ million American workers are not working?"

"Come on, man, what's your point?"

"My point," the cabbie said, "is that as far as I can see, the president's program isn't working very well for the American worker or for America either."

"You're being misled by short-term indications," I assured him.

"Well, let me ask you this, good buddy. If I told you I was taking you to 39th Street and the short-term indications, as you call them, showed you I was passing 24th Street and then 23rd and 22nd, what would you think?"

"Why, I'd think you didn't know where you were going," I told him.

"You know, you're not quite as dumb as I thought," the cabble said.

• Mr. GINN. Mr. Speaker, it is with great sadness that I note the death on August 23 of George Anderson of St. Simons, Ga. George contributed more than three decades of his life to innovative forestry practices and environmental responsibility in managing the pine woods of southern Georgia. George was manager of forest improvement for the Brunswick Pulp &

Paper Co., in Brunswick, Ga.

George's start with Brunswick, as a field forester in 1948, marked the beginning of a remarkable career. At the time of his death, George was the manager of Brunswick's Forest Improvement department. There, he directed a major research program for more effective management of Brunswick's forest lands, including work on site preparation, plantation density control, forest genetics, forest nursery maintenance and development, forest fertilization, and hardwood management.

A number of professional achievements are reflected in George's career. In 1967, he helped organize a program of cooperative research in forest fertilization. This cooperative program between industry, the University of Florida, and U.S. Forest Service has led the way to improved techniques for fertilization and growth of southern pines. In 1979, Brunswick received national recognition for a program, initiated by George, to help small Georgia landowners reforest and manage their lands.

George Anderson always believed that any system used to improve forest productivity should not be damaging to the environment. In the past, he has testified before congressional committees, sharing with us his expert knowledge of forestry practices. He has expanded our understanding of forestry by spending countless hours on field trips showing Brunswick operations to House and Senate Members and aides.

Although he was born in Illinois, and educated in forestry in Colorado and North Carolina, we in south Georgia claim George as one of our own. Our sympathy goes out to his widow Maytrude, and his daughters Barbara and Christine.

Cicero, citing the Roman poet Caecilius Statius in 149 B.C., stated that, "He plants trees to benefit another generation." George Anderson has undoubtedly benefited future generations through his life and work.

ADAM SMITH AT THE GREAT WALL

HON. BILL GREEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

• Mr. GREEN. Mr. Speaker, Donald M. Blinken, chairman of the State University of New York board of trustees recently visited the People's Republic of China as a guest of that country's academy of sciences, the Academia Sinica. I am very pleased to have this opportunity to share Mr. Blinken's observations of China with my colleagues.

Finding Milton Friedman at the Great Wall exemplified for Mr. Blinken the paradoxes that characterize today's China. China is in midst of a period of great change; and cultural, academic, and scientific exchange programs with American institutions are among the most important vehicles of this upheaval. Mr. Blinken believes that:

Some leavening of central planning, of an omnipotent state role in decisionmaking of all kinds, combined with an increasing if limited measure of personal choice and reward based on merit, is bound to follow as a consequence of academic exchange with the West.

I am sure my colleagues will be very interested in Donald M. Blinken's comments, and ask that they be printed below.

Adam Smith At The Great Wall (By Donald M. Blinken)

Climbing resolutely up the Great Wall of China last month, we encountered Milton Friedman, valiantly chugging by us in the opposite direction. The presence of this symbol of free choice paying cultural homage to centuries of highly centralized autocratic planning, put into focus the overwhelming impression we gained of China; there are more questions than answers and paradoxes abound.

What does seem clear, though, is that China's current thrust toward pragmatism and openness, important elements of which are its exchange programs with American universities and scientific institutions, will profoundly change the attitudes of its political leaders and scholars.

It is not difficult to see why. Since 1949, China, has, by any measure, lost ground, its political and social turmoil aggravated by doubling of its population in the past 30 years. The value of technology, consumer goods, services of all kinds as we in the West understand them, was almost totally discounted.

The new Chinese leadership, which seems above all to be pragmatic, recognizes that it must leapfrog events by focusing boldly on those areas of high technology and science which will enable the country to achieve large-scale, complex projects if further convulsions are to be avoided. Such scientific and technological advances require Western "know-how," both in theory and in practice. It is quite logical, therefore, that the Chinese recognize the great potential value which exchange programs with our universi-

ties offer in playing catch-up. Even as their own institutions are shaking off the disastrous effects of the cultural revolution (this year, for the first time since 1963-64, students are completing four uninterrupted years of academic work) they must dip into their relatively scarce supply of scholars and experts in order to sample as quickly as possible what the West has to offer intellectually. Their visits to American institutions of higher education-our universities, teaching hospitals, liberal arts or specialized col--give them an opportunity to swallow the latest technology in large gulps, with a view towards digesting it and carrying it back to China. At the same time, the Chinese are very anxious to re-establish personal and institutional contacts, after almost 30 years of isolation.

Even more important, they are just beginning to understand that their real problem lies not so much in mastering some of the advances in science and technology which disappeared from their view from 1949 to 1976, but in applying what they learn to the basic problems of everyday life. The Chinese are becoming more aware that the ability to design and build atomic weapons or advanced computers will, by itself, achieve little unless they can bring the practical applications of this technology to everyday industrial, commercial, and personal life. Precisely because institutions like the State University of New York are so diversified and so goal-oriented in many aspects of their research and public service activities, the Chinese scholars visiting our campuses find the experience particularly valuable.

But, one may ask, while of obvious value to the People's Republic, what benefits accrue to us? The Chinese visiting our campuses are focusing on the sciences and technology, disciplines whose very tangible areas of knowledge and technique can be applied on the return to their homeland. American scholars in China, on the other hand, are often engaged in more scholarly and humanistic pursuits—important for the advancement of knowledge and understanding, but less readily quantifiable in practical

I think the value to us is both considerable and profound. In the first place, these exchanges will facilitate the broadening of our contacts and understanding with the leaders of a country of more than one billion people. They will provide us with the chance to meet China's leading scholars after a hiatus of 30 years. They will create an opportunity, which we hope to expand, for our scholars to visit and work in the People's Republic of China.

Taking a broader view, these exchanges will ultimately contribute to the betterment of mankind through our sharing of science and technology with an increasingly significant segment of the world's population. And, they will help us to revive a long and fundamentally friendly history of United States-Chinese relations, which may have a very beneficial influence on China's understanding of how the world really works and the role China can play as part of that world.

For if Adam Smith's "invisible hand" is not yet evident at the Chin Emperior's Great Wall, some leavening of central planning, of an omnipotent state role in decision making of all kinds, combined with an increasing if limited measure of personal choice and reward based on merit, is bound to follow as a consequence of academic exchange with the West. But, how much the new China can absorb and what it will come

to be, remains one of the unanswered questions.

Donald M. Blinken was named Chairman of the State University of New York Board of Trustees by Governor Hugh L. Carey on June 5, 1978. Mr. Blinken, who was orignally appointed to the SUNY Board in September 1976, is Senior Vice President and Chairman of the Executive Committee of E. M. Warburg, Pincus & Co. Inc., investment bankers. He joined the firm in 1959 after five years as Vice President of Steins Stores Inc. of New York City. Mr. Blinken served as President of the Board of Directors of the Brooklyn Academy of Music from 1971 to 1976 and currently is a member of the Commentary magazine publishing committee, a member of the Mark Rothko Foundation, Co-chairman of the Concerned Citizens for Arts in New York State, and a former trustee of the Institute of Man and Science in Rensselaerville.

Chairman of the SUNY Board of Trustees Donald M. Blinken and Mrs. Blinken recently visited the People's Republic of China as guests of that country's academy of sciences, the Academia Sinica. Dr. Frederick F. Kao, professor of physiology at the University's Downstate Medical Center, accompanied the Blinkens on their journey.

IMPORTS MUST BE CURTAILED

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. HUBBARD. Mr. Speaker, Mrs. Jessie Allred, of 1137 Wilford Street, Apartment 2, Mayfield, Ky., my hometown, recently sent me an editorial published by the Mayfield Messenger. The Messenger's editorial writer points out how the excessive importation of foreign products into this country is stifling American production in Mayfield and throughout the Nation. I feel the editorial is one which should be shared with my colleagues and I wish to do so at this time. The editorial follows:

There is no doubt that imports are destroying jobs at a rate that is absolutely unacceptable for a healthy economy. This paper cannot understand why any legislator would permit such a large imbalance of trade with foreign countries of hundreds of products which flood our market place and cause the demise of small and large businesses alike.

This editorial asks why, when our economy is suffering, and while there have been wholesale layoffs in the automobile and allied industries, that the Administration, the House, and the Senate are insensitive to this situation. All it will take is to put a quota on products or demand parity with any country.

The main offender is Japan, whose government subsidizes their industries and dumps some \$13 billion in cars and hundreds of electronic products into the United States every year. Voluntarism on their part while commendable is hardly the proper manner to approach so vital a matter. Just stop it or demand that we sell to them as

much as they sell to us and do this in every country where the inbalance is so great. One out of every 5 workers in the U.S. is employed because of the automotive industry. Many workers here in Mayfield are not working because imports of clothing and automobiles. It is past time when we can continue to buy foreign made products. It is time for businesses to know where their products are coming from. The public should look at the labels and try where possible to buy U.S. made products.

Those who defend an "open and free market" note that it is a two way street and when we act to restrict imports, we could be jeopardizing jobs here in this nation. We are not suggesting absolute parity with every country, but primarily Japan, which spends virtually nothing on their own defense, while we maintain a vast arsenal for their defense costing us billions of dollars.

They take the money they save and help their industries undersell us. All the advantages are going to them while unemployment in this country is excessive, especially here where we could be furnishing tires for American made vehicles and enhance the sales and profits of our largest industry, General Tire and Rubber Company.

This is the largest plant of General Tire and if demand increases, we could expect it to reap the benefits. Consequently, this would mean more unemployed put back to work.

It is no secret that foreign labor has the reputation for less work stoppages, higher productivity, and generally lower rates of pay per hour. These are problems that can be solved in this country with negotiations that take into consideration both labor and management needs.

Labor must make wages necessary for them to have a decent living standard. Management must have the prerogatives to manage. In these times of double-digit inflation, where the survival of plants and jobs are at stake, it is imperative that any adversary situation be avoided and that negotiations be made in a positive, intelligent manner reflecting the responsibilities of both parties.

We believe this can be done and that circumstances have dictated here and across the nation that everyone give their best effort to whatever job they have. Otherwise, we can expect worse conditions than now exist.

A good attitude and a new appreciation of the necessity of higher productivity would do wonders for this nation. We are optimistic that the economy will improve, but it depends upon every individual having an appreciation of the free enterprise system.

The present Administration is on the right track by curtailing costly regulations, lowering taxes, seeking to balance the budget, eliminating an intolerable bureaucracy, and seeking to turn government back to the people.

Government exists because we created it. It needs at every level to recognize that to be an elected representative requires an understanding that government is our servant and not our master.

Please write to the President, Representative Hubbard and to Senators Ford and Huddleston asking relief from the burden of imports. It is in your interest to do so and their responsibility to stop it now.

AN ACT OF CYNICISM

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

. Mr. HAWKINS. Mr. Speaker, an often used but frequently unfounded charge levied against politicians of all stripes is that of being hypocritical cynics. However, as the Post points out in an editorial this morning, the recent decision to halve the amount of personal possessions allowed to be owned by a welfare recipient is the ultimate act of cynicism. While the rich have been bestowed with a tremendous amount of congressional largesse this year, the poor have suffered programmatic cuts and tax increases. And now, the decision to limit to \$1,000 the amount of personal possessions owned by a welfare family. Surely we are a better people than is shown by this cynical act. The text of the editorial follows:

AN ACT OF CYNICISM

Two thousand dollars worth of possessions not counting your living quarters, essential household goods and car, if you have one, does not exactly represent a royal patrimony. You could maybe have a couple of real luxury items for that or an accumulation (though not a very large one) of things that could be given up without doing harm to your health, safety or sanity. But basically \$2,000 doesn't buy an awful lot of anything these days. Still, to the self-denying, spartan-living members of the U.S. Congress and the Reagan administration it seems a rich and princely sum indeed, far too rich and princely for a welfare family-yecch! a welfare family-to possess. So it is that the government in its wisdom has decided to reduce from \$2,000 to \$1,000 the worth of personal property outside the necessities that a person may have and still qualify for welfare.

A lot of the trimming back on domestic social programs that has occurred over the past several months has been warranted. Some of it has been questionable. This particular initiative, however, taking place as it has in the Age of the Senate Steam Room and under the Sign of Harper's Bazaar, is disgusting. We suppose that if you persist in viewing all welfare recipients as variations on the spectacular cheaters and "welfare queens" who are periodically uncovered, it makes sense. But if you believe that welfare recipients are something other than a class of criminals and subhumans who need to be punished, believe that they are in fact much what we otherwise describe as "people"-people who would like to keep their families together and to enjoy a dignified, productive relationship to societythen you will see this punitive, degrading act for what it is.

The economics of the effort are a joke. What is the merit of a one-shot gain that comes from disposing of those assets a welfare recipient has in excess of \$1,000 in value, when the present limit is \$2,000? What is the effect to be on those numerous people who go on and off welfare as their job opportunities and fortunes change with the changing economic times? If you want help for a few months, you'd better sell off

that second thousand dollars worth of inessential goods. Are we not trying to strengthen the stability and self-confidence of the people who are on welfare, to enlarge and protect the stake they feel they have in the society as a whole—to bring them into the normal middle-class economic order in which most of us live? Do you do this by ensuring that anything they have acquired beyond \$1,000 worth must be sold off before they get help?

The Congress that was so solicitous of inherited wealth, making sure this summer that the estate tax laws would be revised so as to ensure that family acquisitions could passed on from one generation to another, seems not to have any idea at all that a few permanently held, valuable possessions might have a beneficial effect on a welfare family far in excess of any good to be had by making it sell these things. The Congress that went to such lengths to guarantee that the independent oilmen should have the greatest capital gains blessings the government could provide them is worried that a welfare recipient might have, at \$2,000 worth just to darn many assets. It sounds as though they really just want to make sure that these people never get any sense, however dim, that things for them, materially, can get better. It is bad economics and wretched social policy. Our guess is that they know it too, that we are dealing here not with mindlessness, but with sheer cynicism.

REFUGEES AND REASON

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

 Mr. FRANK, Mr. Speaker, the subject of American refugee policy, particularly with reference to people from Southeast Asia, has been a controversial one. Several Members of this body and other public figures have spoken out in favor of restricting the entry of the Southeast Asian exiles to America. I was very pleased to read a recent editorial in the Wall Street Journal expressing strongly the view that America continues to have an obligation to those who were the victims of the war in Indochina. Mr. Speaker, I do not think we should begrudge to those unfortunate people the chance to join the tens of millions of earlier immigrants who have come to this country and helped it grow and prosper. I am very pleased that the Wall Street Journal has spoken out so forcefully on this important issue and I wish to share its views with the membership.

[From the Wall Street Journal, Aug. 24, 1981]

REFUGEES AND REASON

Two years after the great exodus of refugees from Communist Indochina reached its height, a huge number of Indochinese—particularly Vietnamese—are still trying to escape to the U.S. and other Free World havens, and they'll probably continue trying to do so for years. This is the conclusion of a major review of the situation by a special State Department advisory group.

Meanwhile, we're hearing from a growing gaggle of Congressmen, immigration bureaucrats and Third World ideologues that the U.S. is admitting too many refugees. These critics claim the U.S., boasting of its wealth and freedom, is exerting more of a "pull" on the Indochinese than the Communist regime, with its dictatorship and economic failure, is exerting a "push." The result, they say, is that we're not really seeing "refugees" now but "economic migrants," who shouldn't be allowed in under the law.

Senator Huddleston, for example, is pushing for an investigation of whether any "economic migrants" are slipping into the U.S. under the refugee program. If they are, he wants to see the progam curtailed or closed down. And a group of House Judiciary Committee members, junketing in Asia, said in Bangkok the other day it would recommend tightening up on refugee laws and predicted Congress would scrutinize administration policy.

The law defines a refugee as someone outside his country of nationality who is unwilling or unable to return "because of persecution or a well-founded fear of persecution on account of race, religion, nationality, membership in a particular social group, or political opinion . . ." The State Department notes that a large number leaving Indochina clearly face persecution if they return. But it notes that others, in interviews, "manifest a desire for an improved station in life, and fled primarily because of the economic or social conditions" back home.

The State Department's panel—led by Marshall Green, a former Assistant Secretary of State for Asia—recommended in effect that the 225,000 Indochina refugees now festering in camps be presumed to be proper refugees. But it also contended more generally that a proper refugee policy "must distinguish between those who fled out of a fear of persecution * * * as against those who seek to emigrate to ameliorate living conditions."

It seems to us that what a proper refugee policy really ought to do is take cognizance of the fact that economic persecution is just as bad as any other type of persecution, and it's one of the specialties of the type of Communist government that's running Indochina these days. Being denied the right to profit from your work strikes us as no less oppressive than being denied the right to pray or speak. And if Indochina's refugees are fleeing so they can get to a place where they can keep the fruits of their labors, we ought to write a law that is generous toward them.

America has special obligations in Indochina, obligations going far beyond any we might have toward refugees from trouble, oppression and poverty in other parts of the world. The U.S. shares in the responsibility for Indochina's plight. America asked for and won the faith of millions in Vietnam, Cambodia and Laos. It failed them in war. But it need not fail them in defeat, and is faced now with the opportunity of demonstrating the nobility that has been all along in its cause.

TRIBUTE TO RABBI SAMUEL I. PORRATH

HON, JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

 Mr. LaFALCE. Mr. Speaker, I rise to pay tribute to a truly outstanding citizen and public servant whom I proudly represent in Congress, Dr. Samuel I.

Rabbi Porrath is celebrating his 50th anniversary in the Rabbinate on the Niagara Frontier. He will be honored at a banquet September 13, 1981, sponsored by Temple Beth El of Greater Buffalo and Temple Beth Israel of Niagara Falls. I ask my coleagues today to join me in honoring this most respected member of our community.

There is reason for celebration. Rabbi Porrath has had a distinguished career and a significant impact upon the lives of so many, both through his religious and secular teachings and involvement. The words of the prophet Jeremiah have special meaning when applied to Rabbi Porrath: "He shall be as a tree planted by the water, and that spreadeth out her roots by the River."

Rabbi Porrath was born in Jerusalem and is a 16th generation rabbi. He is proud of his heritage and delights in sharing stories about his rabbi family with his congregants. They are stories about his roots that have influenced the thinking and activities of many in our community and throughout the

Nation.

Mr. Speaker, Rabbi Porrath possesses a special warmth and vitality. Throughout his 50 years as a rabbi, as a Hebrew and Bible scholar, he has shared that vitality from the pulpit, from the lecturn, in writing, and through travel. His congregants are honoring him because he has so positively influenced their lives, by spreading out his roots and because they are so proud of his accomplishments in the rabbinate.

Mr. Speaker, all of us have reason to be proud of Rabbi Porrath. He is one of those individuals who seeks new horizons and creative involvement to

better serve society.

He is a founder and former trustee of Niagara County Community College as well as the founder of the innovative Institute of Transportation Travel and Tourism at Niagara University. His curriculum for a new career program in executive and managerial skills has been copied in many colleges and universities throughout the country.

Rabbi Porrath has been a motivating force in numerous local and national organizations and is the recipient of many awards and citations for his civic work, including the Niagara Falls Rainbow Award. He has been a leader in the community for furthering interfaith and interracial relationships and, as such, has been the recipient of the B'nai B'rith Interfaith Award.

Mr. Speaker, I know my colleagues join me in extending the heartiest congratulations to Rabbi Porrath on this special occasion. Rabbi Porrath has led the way for so many. He is an in-

spiration to all of us.

Again, quoting Jeremiah, "Stand ye in the ways, and see, and ask for the old paths, where is the good way, and walk therein." Rabbi Porrath brings us the treasures of the "old paths," has pointed so many to the "good way," and has influenced all he has met to "walk therein."

MONETARISM-BROKEN RUDDER OF REAGANOMICS

HON, BRUCE VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES Wednesday, September 9, 1981

• Mr. VENTO. Mr. Speaker, on May 12, 1981, I placed in the Record a statement discussing the need for more economic information about capital needs. Recently, the Wall Street Journal published an article entitled "Monetarism—Broken Rudder of Reaganomics" that again highlights our need to know more facts so that money and credit can be directed efficiently to productive purposes. I recommend the article to my colleagues.

It was written by Eugene Birnbaum of Intercontinental Casualty Insurance Co., a senior fellow with the Wharton EFA world economic program and Philip Braverman, vice president and monetary economist for the Chase Manhattan Bank. While gentlemen credit two the Reagan economic program and the tight money policy of the Federal Reserve for some moderation of the inflation, which I feel is of questionable validity, the main import of their article is a dire warning against rigid adherence to a pure monetarist approach I believe this article deserves our close study.

They say, concerning the money supply instability affecting not only our economy but European economies as well.

The cornerstone assumption of monetarism is that as money goes, so goes the economy. If that ever was an accurate assessment, recent experience refutes it. . .

Changes in the money growth rates have had anything but a stable relationship with corresponding changes in economic activity. This relationship gyrates wildly as shown in the quarter-to-quarter data covering more than a decade. . .

Money supply instability is an outgrowth of shifting seasonal patterns and changing depositor and borrower preferences, which are strongly influenced by continuous structural changes in the global financial environment. These changes set off Fed interventions to stabilize the money supply, which pummel the money and bond markets, foreign exchange markets, equities markets and commodities markets. The monetarist obsession with stabilizing only money growth is a prescription for destabilizing the economy.

Strict monetarist policies based on assumptions that inflation is possible only with spurts in money supply, they suggest, are futile and potentially dangerous also because the quantity of money relative to total economic activity has declined significantly. At the turn of the century the money supply was 40 percent of the GNP. Now it is 15 percent. They conclude that effective control of monetary aggregates. while theoretically possible, is not practicable. They reason that injecting or withdrawing reserves from the banking system according strictly to the dictates of monetarist theory would produce uncertainty that could lead to wholesale calling of loans and financial panic.

A major dilemma, according to these authors, arises by the pursuit of monetarism. They write as follows:

Whenever interest rates are allowed to weaken, the foreign exchange value of the dollar declines, thereby lessening the restraint on U.S. product prices and sowing the seeds for renewed inflation. On the other hand, if the sharply lower inflation rate is maintained through a combination of such exceptionally high real interest rates and a strong dollar, the formula may ultimately crush the economy—just as a strong pound sterling combined with high interest rates inevitably brought major problems to Britain—a la Thatcher.

Monetarism, which places its sole confidence in stabilizing the growth of some esoteric monetary aggregate to the exclusion of other concerns, is a prescription for calamity.

We are witnessing its consequences virtually everywhere in the Western world. It would be unfortunate if monetarist orthodoxy poisoned the Reagan administration's otherwise strong economic policies.

Mr. Speaker, there is another dilemma these authors do not discuss, and that is the inflationary impact that is likely to arise from the additional "incentives" President Reagan's tax legislation provides for wealthy individuals and giant corporations. Some of the funds from these incentives will no doubt add to productivity. But I fear that most of the funds will merely fuel speculative activity and unnecessary spending in much the same manner as we have witnessed in recent merger activity. Mergers concentrate economic power and will neither create jobs nor increase productivity.

In an economy so short of available credit that it cannot meet its essential capital needs, this waste cannot be permitted to continue. It is a farce when officials of the Federal Reserve and Treasury Department testify, as they did recently before Congress.

that only the free market can determine who should have access to credit. The simple fact is that the free market did not limit the money supply. The Federal Reserve, composed of officials and bureaucrats just like any other Government agency, took the action causing the present crisis. Now, as always in the past, tight money has denied credit to small business, agriculture, State and local government, and homebuilders and home buyers. The Federal Reserve made the tight money decision with full approval of the Reagan administration. That, I submit, is allocation of credit. American genius and American creativity should be able to find a better way to choose.

I ask consent to have my remarks and a copy of the Birnbaum and Braverman article reprinted in the RECORD.

[From the Wall Street Journal, July 23, 1981]

MONETARISM—BROKEN RUDDER OF REAGANOMICS

(By Eugene A. Birnbaum and Philip Braverman)

A near unanimity seems to exist among many commentators that the pronounced moderation of inflation now evident has nothing to do with the Reagan administration. We take exception to this view.

The turnaround in inflation is first of all attributable to the market's favorable response to the reordering of priorities that made countering inflation paramount; this confidence is especially apparent in the foreign exchange markets.

The dollar's rise against foreign currencies is a powerful inhibition against raising the domestic prices of all goods. The sharpened competitiveness of foreign goods strikes across the board, and the vulnerability of U.S. companies to such competition may even stimulate greater productivity.

The second powerful blow against inflation was Mr. Reagan's decontrol of oil prices. Suddenly U.S. consumers joined foreigners everywhere who had to pay more marks, francs, yen or lire to purchase the same \$34 barrel of oil. The resulting global conservation and supply-side impetus contributed greatly to the oil glut and recent decrease in the dollar price of oil.

U.S. economic policy management is not home free, however. A stern adherence to the theories of monetarism can be the undoing of the administration's effort to kill inflation without driving the economy into deep recession.

MONETARISTS' IMPLICIT FAITH

The assumptions of monetarists are heroic. The size of the federal budget deficit or the attendant credit expansion is irrelevant in their view because no speedup of inflation is possible without a companion spurt of money growth. Monetarists also have implicit faith that the Fed can control the growth of the money supply. Though the Fed's focus on the money supply has produced historically high short- and long-term interest rates, these are grudgingly tolerated in the holy war against money growth.

The cornerstone assumption of monetarism is that as money goes, so goes the economy. If that ever was an accurate assessment, recent experience refutes it.

In the first quarter of this year there was a 0.8% annual rate of decline in the much watched and monetarist-preferred M1-B measure of the money supply. Yet during that quarter GNP surged forward at an astounding 19% clip. At the same time the Fed, concerned over the lack of significant money growth, increased reserves through the open market sufficiently to depress the federal funds rate from 19%-plus at the turn of the year to under 14% by late March. Like a bevy of ducklings trailing their mother, other money market rates followed obediently downstream.

The Fed reversed course in April and May, marching the funds rate back toward the 19%-plus area, carrying other short-term rates with it. Why? Because money growth accelerated to a 16.9% annual rate in April, even though the economy had by this time turned sluggish.

Since then, market rates have continued to gyrate, not only in response to what the Fed was doing, but in anticipation of what might come next from a Fed subjected to a relentless barrage of monetarist criticism in and outside the administration. The money supply numbers have recently spurted again, and there's no telling the direction of the next stumble.

Changes in the money growth rates have had anything but a stable relationship with corresponding changes in economic activity. This relationship gyrates wildly as shown in the quarter-to-quarter data covering more than a decade.

Money supply instability is an outgrowth of shifting seasonal patterns and changing depositor and borrower preferences, which are strongly influenced by continuous structural changes in the global financial environment. These changes set off Fed interventions to stabilize the money supply, which pummel the money and bond markets, foreign exchange markets, equities markets and commodities markets. The monetarist obsession with stabilizing only money growth is a prescription for destabilizing the economy.

lizing the economy.

The monetarists cite reams of historical data to support the central tenet of their faith, that to control money growth is to control the economy. However such observations refer largely to earlier centuries when capital markets were in their infancy and, as a growing supplement to specie, banks became the primary source of money and credit.

The landmark study by Milton Friedman and Anna Schwartz, "A Monetary History of the United States: 1867-1960," found a relatively stable relationship between the growth of the so-called broadly defined money supply and the gross national product.

But a stream of recent financial innovation has encouraged the proliferation and substitution of near-money, credit, or merely assured access to credit, for money. The high degree of liquidity in credit lines, RPs, money funds, jumbo-CDs, Treasury securities nearing maturity, commercial paper, Eurodollars and bankers acceptance is self-evident. Each of these instruments can be readily exchanged for cash.

No wonder any of the officially designated money supply measurements can stagnate even as economic growth may be accelerating rapidly. Conversely, just let concern develop about the safety or liquidity of some near-money substitute, and the official money supply numbers will balloon, even in a period of economic decline.

The declining importance of the quantity of money relative to the economy is also ap-

parent in the reduction of the ratio of the money supply to the GNP. At the turn of the century this ratio was 40%. It is only about 15% now.

The various money supply measures can and do move in opposite directions, with respect to each other and with respect to nominal GNP. When Fed policy is predicated on countering "aberrant" money growth, the result is the chaotic gyrations we are witnessing in every market. The monetarist policy approach to guiding the economy, depending as it does on tenuous linkages, is like trying to walk a dog with a leash a block long.

The truth is that effective control of the monetary aggregates is achievable in theory, but not in practice. In theory the Fed could indeed inject or withdraw reserves from the banking system with no holds barred and on an unswerving course. The problem is that this would produce much uncertainty over the availability of reserves. A misstep could lead to a wholesale calling in of loans and a spiraling descent to financial panic.

This is why every week the Fed understandably acts in such a way as to fully accommodate the reserve requirements of the banking system (whatever these may be). The Fed can never refuse to provide the required reserves unless it would deliberately risk setting off a spiraling contraction of credit. So it contents itself with choosing between channels—open market operations or the Federal Reserve discount window—to supply the requisite reserves.

The more reserves provided through the open market, the lower the federal funds rate will be and the less the banks will need to resort to the discount window. Conversely, holding back on reserves through the open market pushes up the funds rate to a level where banks move to the discount window.

The point is this: The Fed does not control the quantity of bank reserves—monetarist prattling to the contrary notwithstanding. Rather it controls the level of the funds rate by its choices of the channel through which to meet predetermined bank reserve needs.

It is of course thought that higher interest-rate levels eventually dampen the economy, slowing borrowing and lending sufficiently to achieve longer term moneygrowth goals. But the Fed has been forced to use dramatic increases and decreases in interest rates in the attempt to achieve such money growth objectives.

To reemphasize a critical distinction: Money growth-goals are one thing, but economic performance is another. In the 1930s the Fed tried to get the banks to lend but found that piling up excess bank reserves was like pushing on a string. In the current era we have the opposite condition: Since reserve needs must be met, trying to restrain, excess money growth by actions which force up the funds rate is about as effective as pulling on a limp noodle.

COSTS CAN BE PASSED ALONG

The underlying conventional theory holds that higher interest rates are deflationary, since they increase costs that may prove difficult to pass along. However, just as banks can keep lending in the knowledge that reserve needs will always be met, borrowers take a similar view of higher interest rates; they assume those costs can usually be passed along and so are not dissuaded from borrowing until rates are at astronomical levels.

That brings us back to where this article began: We are witnessing a sharp restraint on U.S. inflation, as the strong dollar allows the extraordinarily high interest rate levels to bite. The pursuit of monetarism, however has brought policy to a major dilemma.

er, has brought policy to a major dilemma. Whenever interest rates are allowed to weaken, the foreign exchange value of the dollar declines, thereby lessening the restraint on U.S. product prices and sowing the seeds for renewed inflation. On the other hand, if the sharply lower inflation rate is maintained through a combination of such exceptionally high real interest rates and a strong dollar, the formula may ultimately crush the economy—just as a strong pound sterling combined with high interest rates inevitably brought major problems to Britain—a la Thatcher.

Monetarism, which places its sole confi-

We are witnessing its consequences virtually everywhere in the Western world. It would be unfortunate if monetarist orthodoxy poisoned the Reagan administration's otherwise strong economic policies.

LEGISLATION TO PROMOTE EPIDEMIOLOGICAL RESEARCH

HON. ANTHONY TOBY MOFFETT

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

• Mr. MOFFETT. Mr. Speaker, I am today introducing legislation to improve the ability of the National Institute for Occupational Safety and Health (NIOSH) to root out the causes of illnesses contracted by workers. Our colleagues Representatives Ford, Scheuer, Downey, and Walgren are joining in this effort.

Last year, the House Commerce Subcommittee on Oversight and Investigations produced an excellent report titled "Data Transfer Restrictions Impede Epidemiological Research." The report described, with the utmost detail and care, the problems which frustrate scientific researchers who attempt to discover the root causes of occupation-related diseases.

Our former colleague, Bob Eckhardt,

wrote at that time:

All of us have been touched directly or indirectly by the harsh reality of occupational disease—cancer, respiratory illness, birth defects. All of us ask questions: How did this happen? What was the cause? How can this human tragedy be avoided in the future? Unfortunately, many of these questions cannot be answered fully at the present time.

The report which Bob and our subcommittee produced disclosed that the Internal Revenue Code barred the release of certain critical information to the National Institute of Occupational Safety and Health. And, if these restrictions were modified—in a manner which was consistent with the 1974 Privacy Act—health research and disease prevention would be immeasurably enhanced.

Our amendment to the Internal Revenue Code to authorize the Social Security Administration to disclose to NIOSH the information needed to further this research. Let me again quote the subcommittee report to describe how such an amendment would be helpful:

Assume that NIOSH determines that there is an unusually high incidence of bladder cancer in County A. NIOSH also learns that several of the bladder cancer victims have been previously employed by Plant X, and the agency concludes that they should evaluate whether occupational factors at Plant X might be related to the increase in cancer incidence.

Although all of the cancer victims might have also worked at Plant Y, NIOSH re-searchers might not readily identify this common factor under current methods of epidemiological research. This is because the agency could not rapidly receive the detailed employment histories available under the proposed amendment. Rather such employment histories would only be available after months of research (and possibly not even at that point). Without the proposed amendment, employment histories can only be acquired by conducting lengthy interviews with next of kin or by obtaining Social Security records from the Administrator, trustee or executor of an estate. This amendment is crucial if we are to supplement information from animal studies with sound epidemiological research.

This important research information should be available to NIOSH.

Our proposed amendment to the Internal Revenue Code would provide for complete compensation to the Social Security Administration. Thus, the information transfer would not deplete the funds in the social security trust funds in any way. Also, no additional Government bureauracy would be created by this legislation.

The protection of worker health is still a priority in the United States. By discovering the causes of occupational illnesses, we can make our workplaces safer and more productive at the same time. The amendment we are offering has been recommended only after thorough oversight and investigation by the House Energy and Commerce Committee.

I urge our colleagues to cosponsor and support passage of this legislation.

MILITARY WASTE

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 9, 1981

• Mr. ASPIN. Mr. Speaker, if the Reagan administration is seriously looking for areas of waste in the military, it does not have to look far. I suggest OMB Director Dave Stockman just look at his plate the next time he dines at the Pentagon. A lunch built around a pastrami sandwich in the pri-

vate dining room operated for the top

officials of the Defense Department costs taxpayers \$12.

There are five private dining rooms operated in the Pentagon, one each for the three service chiefs, one for the Office of the Chairman of the Joint Chiefs of Staff and one for the Office of the Secretary of Defense. Those five dining rooms were subsidized last year to the tune of \$1,438,322, according to figures given me by the Pentagon in response to my questions.

If we single out the Defense Secretary's dining room, we find the kind of appalling disdain for the value of a dollar that ought to goad any administration into action. The dining room is clearly overstaffed and run with no concern for cost. The worst part, of course, is that the taxpayer is expected to pick up the tab for 81 percent of the cost of the lunches served there.

This private dining room is open to only 100 "selected senior level members" of Defense Secretary Caspar Weinberger's staff. The dining room charges no membership fees. Its a la carte prices include such charges as 55 cents for soup, \$3.55 for a Delmonico steak, \$2 for a hot pastrami sandwich on rye and 50 cents for ice cream. Diners pay an average of \$2.87 for each meal.

The charges cover the cost of buying the foodstuffs. But the wages for the 19 service men and women who staff the place, as well as utilities, maintenance and most other costs are paid for with Government money.

The following figures were supplied to me by the Pentagon in response to specific questions.

DATA ON SECRETARY OF DEFENSE MESS—FISCAL YEAR 1980

[Meals served in fiscal year 1980 = 26,004]

THE CHARGE THE STATE	Total cost	Cost/meal
Military personnel pay	\$278,860 34,728	
Total appropriated funds	313,588 74,739	\$12.06 2.87
Totals	388,327	14.93

I think \$14.93 for a hot pastrami sandwich is a wee bit steep—no matter who you get to dine with. But in this case, the one getting stiffed is not the diner but the taxpayer, who does not even get a glance at the decor of this private dining room.

The total cost of the dining room is not much when you consider the total defense budget this coming year will be \$222 billion. It is the aura of wastefulness right at the heart of the Nation's largest Federal agency that is so disturbing. I do not blame Mr. Weinberger. He did not open this dining room. It has been around many years and he just inherited it. But he does

have the authority to do something about it.

In keeping with the stated goals of the administration, all officials should be turning their backs on decades of wastefulness and generating a new spirit of concern for the value of the dollar. What better place for the Secretary of Defense to begin than at his own dining table. Let us clear the mess from the Defense Secretary's messhall; let us have a new ambience, an ambience of parsimony rather than prodigality, of economy rather than extravagance, of savings rather than subsidy. That is what the public wants.

WARREN-SHERMAN PROJECT

HON. ED WEBER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 9, 1981

. Mr. WEBER of Ohio. Mr. Speaker, today I wish to focus attention on the need our country has to create new jobs. The concept of urban enterprise zones has been suggested as a partial solution to the problem of unemployment. Through the promotion of areas with special incentives to encourage private businesses to create jobs in our urban centers, relief can be provided for the people who suffer most because of unemployment. The August 1981 unemployment figures show that 7.2 percent of the citizens of this country are out of work and that 45.7 percent of the minority teenagers are unable to find a job. In 1978, the people of the Toledotrust Corp. in Toledo, Ohio, along with other busistarted work on a project called Warren-Sherman. This project is an attempt to make the concept of urban enterprise zones work. Over the past 3 years much progress has been made and a major step forward will occur this fall when Magnetic Peripherals, Inc., in conjunction with Scott High School, will start a job training program which provides 90 part-time jobs in a new electronics assembly plant. Efforts such as this must be encouraged by the Congress.

I submit for publication in the RECORD testimony Mr. George Haigh, chairman of the Toledo Economic Planning Council, gave before a subcommittee hearing on the subject of urban enterprise zones in July and letters from both myself and Governor James Rhodes of Ohio to President Reagan in support of the Warren-Sherman project:

STATEMENT OF GEORGE W. HAIGH, CHAIRMAN, TOLEDO ECONOMIC PLANNING COUNCIL

Mr. Chairman and members of the committee, I am George W. Haigh, chairman of the Toledo Economic Planning Council. I appear before the Subcommittee in support of S. 1310, the proposed Urban Jobs and Enterprise Zone Act, and the Warren-Sherman

urban redevelopment project in Toledo, Ohio, a project consistent with the intent and qualifications set forth in S. 1310. I appear in this matter on behalf of the Toledo Economic Planning Council (TEPC); the city of Toledo, which has given strong est support to the project; the community and neighborhood within which it is located and offering hope to those persons living there; the corporations which have located in the area and created additional jobs by doing so; and the Toledo Trust Company, the principal financial supporter of the project, of which I am also president and

chief executive officer.

The subcommittee is to be commended for beginning prompt Congressional hearings on an idea which should become a reality at the earliest possible date. Much is already known about the urban enterprise concept. Competing proposals have been examined in the adversarial context of conferences and academic studies. The Administration, Congress, has more than one concept under consideration. There have been several projects, like Warren-Sherman, which have yielded evidence on what works. Urban redevelopment could be slowed by any inexplicable delay in Congress setting forth the policy and statutory framework for future urban development.

Warren-Sherman project, Toledo's successful effort to revitalize its most distressed inner-city neighborhood, provides an excellent model for demonstrating how a city's private and public sectors can join forces to solve urban problems. This project has as its goal the restoration of economic and social stability to a neighborhood that is characterized by high unemployment, poverty and welfare dependency, blighted housing and other indicators of urban decay. Today, Warren-Sherman is well on its way to becoming an attractive and viable neighborhood because of a unique combination of factors.

COMPREHENSIVE REDEVELOPMENT

Perhaps the most important of these factors is the comprehensive nature of the approach. Previous experience project throughout the country clearly demonstrat ed the futility of one-dimensional attempts to deal with urban development problems. It was recognized at the inception of the project that the ability to effectively coordinate economic, social and physical improvements was a prime requisite of success. Consequently, the project has been oriented toward viable solutions to a wide range of problems, and addresses job creation and job training, enterprise development, redevelopment of commercial services, health care, day care, recreation, and other social support services. Job creation was of immediate concern, since little impact would be expected from other efforts without employment opportunities for the neighborhood residents. Jobs would have to be closely matched with the abilities of the residents, and job training programs were developed for those without skills. Support for the development of small businesses was designed into the project. It was obvious that significant improvement of the housing stock would be a major need, and the project includes development of substantial new market-rate housing, as well as new subsidized housing and extensive rehabilitation. The neighborhood has no local convenience of commercial services, and this is being remedied by development of a neighborhood shopping center and a commercial development. Health care, day care, and other social services are also being dramatically

improved. Essentially, the Warren-Sherman project addresses the need to deal with all of the major problems facing the neighborhood. For example, jobs without improved housing, commercial redevelopment, and social services would lead to further abandonment and blight even if it were initially possible to attract jobs into the neighborhood without these improvements. On the other hand, improvements in social physical characteristics of the neighborhood without providing mainstream economic participation for the residents is unlikely to lead to a viable neighborhood. While the coordination of this effort is difficult, any approach less comprehensive in scope would not be successful.

TRIAD OF INTERESTS

A second major factor contributing to the success of the project is the unique triad of interests which are working together to bring the plans to fruition. These are the private sector, the public sector and a nonprofit developer. The private sector involvement is led to Toledo Trust, the City's largest financial institution, which has been instrumental in obtaining private sector support, investment, and job commitments, and arranging financing for various project components. The bank's willingness to take a lead role and its excellent contacts throughout the business community have been extremely important. Also participating from the private sector are several Toledo corporations which have made commitments to establish light manufacturing facilities in the neighborhood and provide jobs for neighborhood residents. These include Owens-Illinois, Libbey-Owens-Ford, and Sheller-Globe Corporation. Their commitments, along with others now being actively pursued, will provide the employment base for a redeveloped community. Finally, important private sector actor has been City Venture Corporation, a for-profit marketer of private sector expertise in urban development. One of City Venture's major stock-holders, Control Data Corporation is making a substantial neighborhood investment in developing a Business and Technology Center, a small business incubator, and is also under contract to provide unique job training to neighborhood residents. The public sector is represented by the City of Toledo and its Department of Community Development, who have taken responsibility for all public improvements including housing, land acquisition, and street and utility upgrading. The City's strong support for this project, led by the Mayor and the Community Development Director, has ensured that available public sector resources have been directed to the project. The state of Ohio is becoming actively involved in the project and is expected to provide support for several project components. Governor Rhodes recently expressed his strong endorsement of the Warren-Sherman project and its conceptual approach to urban development in letter to President Reagan, and Congressman Weber from Toledo's 9th District, and has taken an active interest in furthering the project. The third partner in the triad is the Toledo Economic Planning Council, a non-profit development corporation, which has served as overall project sponsor and is acting as developer of the 23 acre Warren-Sherman Industrial Park. This organization has served as an important project facilitator by providing a bridge between the public and private sectors who are jointly represented on its Board of Directors. The cooperation of all these participants has been one of the key ingredients to the project's success which has resulted in over \$30 million of private investment and an estimated 1,500 jobs within 5 years.

NEIGHBORHOOD INVOLVEMENT

The third major factor is the unique way in which residents of the neighborhood have participated in the project. One of the primary concerns in planning the project was to ensure that the benefits accrued to current residents. It was important not to create a situation in which residents would not be able to obtain the new jobs or afford the new housing in the neighborhood. Conneighborhood residents, under the leadership of a strong neighborhood organization, have been extensively involved in the project since its inception. In a continuing series of neighborhood meetings, residents have participated in establishing project goals, planning the project elements, and are taking part in implementing the various components. Early and continuing participation by the residents has not only ensured their acceptance and support but has improved project concept through utilization of their suggestions and desires.

THE ROLE OF THE FEDERAL GOVERNMENT

The combination of the above three major factors provides perhaps the best available model for redeveloping inner-city neighbor-Warren-Sherman approach The should be duplicated and, in fact, is being used in two other Toledo neighborhoods at Every major city in the United present. States has at least one neighborhood similar to Warren-Sherman and the elements necessary to follow the Warren-Sherman approach. Cities, by providing leadership, commitment, local planning, and vision, can establish most of the basic conditions necessary to redevelop their inner-city neighborhoods. However, many cities do not have the resources to undertake basic public improvements.

Therefore, the Federal role is crucial. Tax incentives, economic development block grant programs, and targeted job training will provide important assistance in creating possible environments for the attraction of private investment to inner-city neighborhoods. In order to ensure the success of these programs, it is suggested that they would function most effectively if the key components of the Warren-Sherman approach were present. A comprehensive redevelopment effort will ensure maximum impact from each project element; strong partnership between the public and private sector will maximize response to development opportunities; and effective participation by neighborhood residents will assist in creating project concepts that are feasible and accepted.

The proposed Urban Jobs and Enterprise Zone Act will be a key component in maximizing the benefits from the Warren-Sherman project. The tax incentives contained in the Act will ensure a rapid and significant response by Toledo's business community to the opportunities now existing in Warren-Sherman. As successful as the project has been to date, incentives such as those contained in the Enterprise Zone Concept are still necessary to overcome initial resistance and provide a sound future basis for healthy private sector growth. Warren-Sherman, because of the preparatory work now nearing completion, will, in fact, provide a very useful model to demonstrate the positive impacts of tax incentives on urban development.

Using the Warren-Sherman model, other cities and states could program proposed

economic development block grant funds to provide public improvements, organize effective partnerships, and utilize the tax incentives contained in the Urban Jobs and Enterprise Zone Act to attract private investment to inner-city neighborhoods.

While my comments have been necessarily brief. I am appending a more completed description of the project for your examination. Please feel free to call on Toledo if there is any way in which we can be of as-

Thank you.

HOUSE OF REPRESENTATIVES, Washington, D.C., July 10, 1981.

THE PRESIDENT, The White House Washington, D.C.

DEAR MR. PRESIDENT: I wholeheartedly support the concept of urban enterprise zones as a means of urban neighborhood revitalization.

The Warren-Sherman Project in Toledo, Ohio is a shining example of successful application of the theories and principles of urban enterprise zones. Because Toledo's public and private sectors have worked together to make this project succeed, it stands as a model for cities wishing to undertake a similar program.

Until recently, Warren-Sherman was con-dered "a hopless case." The population of this 300-acre area faced more than 30 percent unemployment, severely limited job opportunities, high crime rate, low-level formal education, and property deterioration due to arson and vandalism. Of the 3,500 residents, 90 percent were Black and 40 percent earned less than \$5,000 per year.

There seemed no way out.
The formation of the Toledo Economic Planning Council, consisting of private and public sector representatives, established the bridge that was needed in order to allow the entire community to work efficiently to solve the problem of Warren-Sherman. It hasn't been easy. The work has been arduous and the workers dedicated; as much has been learned through our mistakes as our

The people living and working in Warren-Sherman were skeptical at first about the depth of community commitment to the revitalization of their neighborhood. But as work continues and there is steady progress in rebuilding and job development, relations between Warren-Sherman residents and the entire Toledo community continue to improve.

The Warren-Sherman Project would be an excellent model for other cities as they attempt similar programs. After urban enterprise zone legislation is enacted Warren-Sherman, if selected, would be several steps ahead of other selected sites and could provide valuable guidance and experience. I am proud of what has been accomplished in this once-blighted neighborhood.

Sincerely.

ED WEBER, Member of Congress.

STATE OF OHIO, OFFICE OF THE GOVERNOR, Columbus, Ohio, July 2, 1981.

Hon. RONALD W. REAGAN, President of the United States. The White House, Washington, D.C.

DEAR MR. PRESIDENT: You have made the economic recovery of the Nation your highest immediate domestic priority, and the people of Ohio support your effort. It is most encouraging that the recovery plan in-

cludes a clear-cut plan to return the residents of inner cities to the mainstream of America's economy. I refer, of course, specifically to your intention to create jobs for urban area residents through the establishment of enterprise zones.

Consistent with your philosophy of government, Ohio's private sector has never abandoned its commitment to create jobs. The private and public sectors in Ohio have worked closely together to foster the cli-mate required for creating jobs for its citizens. Partnership with the private sector is a must to insure success for a governmental venture aimed at improving the economic status of a specific group of residents. I want to mention to you an example of cooperation that shows what can be accomplished in urban redevelopment

This is the story of Toledo's Warren-Sherman neighborhood, a 100-year old section that is home for 3,500 people. Until recently, this neighborhood was a mirror image of decaying areas found in cities throughout

America.

Warren-Sherman is an area of 300 acres, adjacent to Toledo's downtown. Of its 3,500 residents, 90 percent are black and 40 percent earn less than \$5,000 a year. The jobless rate in this area surpassed 30 percent, with job opportunities very limited. Forty percent of the residents had not finished high school and crime was rampant. In short, there was little hope that conditions would improve, and there was less hope that anyone outside the area really cared.

Some people, however, did care, A few at first, and then many joined after a well-defined, workable program to help Warren-Sherman emerge. Through the leadership of Toledo Trust, a Toledo Trustcorp bank, support of the private and public sectors at all levels was harnessed. The basic concept was simple: banks are members of their communities, they are not institutions set apart. They have a very real stake in everything that happens in their cities and neighborhoods. So, too, do the businesses which, in the absence of a healthy economic environment, consider locating elsewhere.

The Toledo Economic Planning Council was formed to focus the community's commitment, and the private sector stepped forward with its contribution. Today, Owens-Illinois Inc., Libbey-Owens-Ford and Control Data Corp., have agreed to build facilities in the Warren-Sherman area, creating new jobs where they are needed the most. Toledo Trust has invested \$5 million in loans and investments in the neighborhood.

Warren-Sherman is a story that the Nation should hear. It wasn't easy, but the results are worth the hard work, Warren-Sherman exemplifies what can be accomplished in America's urban areas; helping the most disadvantaged help themselves to become productive members of society. Warren-Sherman need not be an isolated success story. Its experience can be the model for other cities, showing that urban enterprise zones are the building blocks needed to restore economic health.

Warren-Sherman can play an important role in proving that the enterprise zone is not only a concept, but is a reality. Warren-Sherman can be the showcase to which you can point in urging Congress to enact enabling legislation. Warren-Sherman can also be the one zone that has sufficiently progressed so it can be a reference point to other cities that decide to use this approach to fight economic blight.

I therefore not only support the urban enterprise zones proposal not being finalized

by your office, but urge the inclusion of the Warren-Sherman project among the zones selected by your administration. Warren-Sherman can be the ongoing model upon which others can look for help and guidance.

Sincerely.

JAMES A. RHODES, Governor.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee-of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the Congressional RECORD on Monday and Wednesday of

each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, September 10, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

SEPTEMBER 11

9:30 a.m.

Finance Taxation and Debt Management Subcom-

To hold hearings on proposed extension of the temporary limit on the public debt.

2221 Dirksen Building

HOUSE OF REPRESENTATIVES—Thursday, September 10, 1981

The House met at 10 a.m.

The Reverend W. Terry Schoener, Woods Memorial Presbyterian Church, Severna Park, Md., offered the following prayer:

Holy God, You rule over the affairs of every person and every government. And so, we present ourselves before You as the first act of this reconvening Congress. You know how each Member of this Congress will be expected to decide on matters of peace and weaponry, economy and national purpose, care of our young and old, even your deepest secret: When is life human, all the while subjected to opinions and pressures, unknown to most people, until sometimes what is truly right is no longer clear. So we ask for some compelling sense of your presence.

For we are children of this age: No less than others we can be beguiled by power, self-interest, and the narrow perspective of some whom we serve. Invade these Chambers, our offices, our luncheons, our hearts so that whether we legislate or preach, we may strive to be ambassadors of hope and peace.

We bow before You not only as children of this age, but as children of the founders of this Nation. We, with those founders, are genuinely seeking to create here, and share with the world, a social system that honors all Your children. Help each of us to advance this human enterprise which is inspired by Your promised kingdom.

We come not just as children of this age nor just as children of the founders, we come as Your children vaguely realizing that our family is not party, race, ideology; our family is every one of Your children, each cherished and sought. So our first act of this Congress is not to legislate, nor even to pray for ourselves. We lift to You our people.

Our people who sent us here and our people who fight us; our people who have much to give and our people who are dependent; our people from our district or State, and our people in different parts of our Nation, culture, world. Bless them, Father; and use us to bless them.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

THE REVEREND DR. W. TERRY SCHOENER

(Mrs. HOLT asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. HOLT. Mr. Speaker, I am happy to welcome to the Halls of Congress, the Reverend Dr. W. Terry Schoener of the Woods Memorial Presbyterian Church, Severna Park, Md., where we greeted him with pleasure in July 1979.

Born in Pittsburgh, Pa., Dr. Schoener was educated in the public schools there. He is a graduate of Muskingum College in Ohio, and earned his master of divinity and doctor of ministry at the Pittsburgh Theological Seminary. He came to us at Woods from the Presbyterian Church in Warren, Ohio.

He is married to the former Brenda Hall, who is a teacher in the Anne Arundel County public school system. They have three children: Hallé, 16; Matthew, 14; and Brad, 13.

Since 1979, Dr. Schoener has developed innovative programs for families and community involvement. This summer, through the youth program at the church, he introduced several of our young people to the pleasures of weekend sailing on the Chesapeake Bay in his boat, his favorite recreation. He also finds time for long-distance running and tennis. Working closely with the director, he has a day to day involvement in the church's already strong program for older people. Again, welcome, Dr. Schoener.

FARM SELLOUT NO WAY TO IMPROVE ECONOMY

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Speaker, the American farmer is taking it on the chin. No other industry is affected as severely by disastrously high interest rates. In the case of grain farmers, prices are relatively similar to what they were 10 years ago, not even taking inflation into account. What other sector in America could maintain itself under such conditions? It is no surprise, therefore, that farmers are being forced out of business in record numbers.

What is the remedy? The administration seems to accept high interest rates without question. The administration is proposing, to put it kindly, a wishy-washy farm bill which in no way

addresses the problems farmers now face.

In fact, Secretary Block was recently reported to have stated that the highest priority of the administration farm bill was to reduce Federal expenditures for agriculture; rather than to preserve the family farm and strengthen the farm economy.

The House has an obligation to produce meaningful farm legislation that will insure the continued viability of American agriculture to produce food fiber to meet not only minimum needs, but those of hungry people throughout the world.

All of us, not just Members from farm States, have a stake in the vitality of American agriculture. We cannot afford to destroy this most significant sector of our economy in the guise of the President's economic recovery programs or in fear of a veto threat.

PEOPLE SHOULD TAKE THEIR COMPLAINTS TO WHITE HOUSE

(Mr. FROST asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FROST. Mr. Speaker, every one of us has at one time or another been on the receiving end of a letterwriting campaign. The most recent—and probably the best orchestrated—was the campaign generated by the White House in support of the President's tax bill.

Well, I am now seeing the early signs of the next flurry of letters. In the past few weeks, I have been contacted by the business community in my district on the subject of high interest rates. The letters are coming from the credit-sensitive industries and I bet if I did a cross match I would find that they were coming from many of the same individuals who were so anxious for me to vote for the President's tax legislation.

Those letters may be coming to my attention, but I believe the business community will soon begin to understand where the source of this problem is.

It is the President who has failed to assure the financial markets that his supply-side theories can work. And it is the President who made the grandiose promises—he promised to balance the budget, cut taxes massively, increase defense spending, and reduce inflation while holding the line on unemployment. It is understandable that

[☐] This symbol represents the time of day during the House proceedings, e.g., ☐ 1407 is 2:07 p.m.

[•] This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

the President's promises are beginning to ring hollow on Wall Street.

The President cannot adequately defend his policies to his natural constituency. And lacking assurance, the financial markets are reacting predictably—real interest rates are much higher than they should be, even taking into account the effects of a tight monetary policy.

The President was warned that the economic assumptions he used to justify his recovery program were faulty. And now that things have taken a turn for the worse, his aides are tripping all over themselves looking for ways to correct these mistakes before they threaten the success of the entire

recovery program.

This keystone cops routine will continue to affect interest rates—housing starts will continue to decline, auto sales will not pick up, more savings and loans could falter. And the letters to our offices will increase.

But I am confident that the people who are victimized by this situation will begin to make the right connections. They will soon understand where to take their complaints—not to the Congress, but to the man in the White House.

LACK OF LEADERSHIP ON U.S. REFUGEE POLICY

(Mr. MAZZOLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAZZOLI. Mr. Speaker, I am deeply concerned about the seeming indifference in the administration toward the formulation and implementation of U.S. immigration and refugee policy.

To cite but a few examples of many

available:

At the State Department, no U.S. coordinator for refugee affairs has been appointed, and there is no permanent Director of the Office of Refugee Programs.

At the Department of Health and Human Services, the Office of Refugee Resettlement has been relegated to a suboffice within the Social Security Administration, despite the clear congressional intent that this office should be a visible and accountable office reporting directly to the Secretary of Health and Human Services.

Likewise, guidelines and regulations governing the U.S. refugee resettlement program have yet to be issued by this office and reports required under the Refugee Act have not been sub-

mitted.

At the Justice Department, a Commissioner for the Immigration and Naturalization Service has still not been appointed and this long-term vacancy has seriously impeded immigration and refugee policymaking in that Department.

This casualness and indifference in the administration to one of the most pressing problems facing America and the world today underscores the real need for Congress to take an active part in the development of U.S. refugee policy for the coming year.

I am hopeful that the administration's proposal on the numbers and categories of refugees to be admitted during the next fiscal year will be submitted promptly so that the full Judiciary Committee, and my Subcommittee on Immigration, Refugees and International Law will be able to play the substantive consultative role contemplated by the 1980 Refugee Act.

HIGH INTEREST RATES

(Mr. WATKINS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WATKINS. Mr. Speaker, before coming to Congress, I was a home-builder. There is one factor I would like to point out to my colleagues and that is the fact that the No. 1 economic factor, for the supply side economics

to work is interest rates.

With high interest rates, the supply side economics will not work. I fear that the Reagan-Stockman economic package has backed us into what I call a quicksand economy. Any way we wiggle now, we are going to have higher deficits and also higher interest rates. There is not a cattleman I know that can borrow money and have a mama cow operation with 20-percent interest rates.

As a former homebuilder and land developer, I know for a fact that you cannot build more houses and leave them sitting with 20-percent interest rates.

I repeat, with high interest rates, supply side economics will not work. Unless something is changed, I predict that we will see 25-percent interest rates in the next 6 months and I think we will see a collapse of many businesses.

For the cattlemen, farmers, and small businessmen throughout this country, the highest inflation any of

them can have is bankruptcy.

Mr. Speaker, when some of the interest rates being charged today are higher than the Baltimore Orioles' team batting average, I get worried. And since I am not a big baseball fan, it is not the team I am worried about, but the spectators—both in urban ball-parks and rural America—who are bearing the brunt in terms of higher debt load, higher consumer prices, and dwindling housing stock.

Wall Street is plainly concerned that our economy is about to strike out. That same concern was voiced by our constituents back home during the August district work period. Even some of our colleagues from the other side of the aisle are getting worried about interest rates and the rapidly rising deficit.

I am urging my colleagues to join me in cosponsoring H.R. 2333, the Federal Reserve Act Amendments of 1981. This legislation would change the makeup of the Federal Reserve Board, providing that no less than three members shall come from the agricultural sector, the industrial sector, the commercial sector, or financial institutions with assets of less than \$150 million, but more important, the passage of the bill will get the attention of the Federal Reserve Board.

This legislation is not a cureall. But at least it would guarantee that some members of the Federal Reserve Board would have firsthand knowledge of the problems faced by small businesses, farmers, and the small borrowers

Meanwhile, it is the bottom of the ninth, and the Reagan team and the Federal Reserve Board at bat, with no runs, no hits, but a whole bunch of errors in the economic prediction for the economy.

PRESIDENT'S ECONOMIC RECOVERY PROGRAM IS A FAILURE

(Mr. BONKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BONKER. Mr. Speaker, I join with the gentleman from Oklahoma and my other colleagues in protesting the intolerably high level interest rates that are plaguing the country.

We should make no mistake about where the current administration stands on this issue. On June 13, Treasury Secretary Regan stated that you cannot get inflation under control without having high interest rates.

This policy has been particularly damaging to the Third District in Washington State, which I represent. This area is heavily dependent on the wood products industry and home building industry.

Mr. Speaker, I have just returned from a tour of my district and I found that in every single county unemployment is up in the double-digit levels. In fact, in many of the wood-producing counties unemployment is averaging over 14 percent, and goes up to 25 percent in one particular county.

In the past 2 years, because of mill closures that have come about because of the housing slump, over 10,000 working people have been put out of their jobs.

We have just passed the President's economic recovery program, but there is nothing in that program that will bring down the high level of interest rates. Indeed, there is nothing in that program that will take inflationary

pressures off interest rates.

Mr. Speaker, in this respect, as it relates to the housing industry, the wood products industry and the persistently high level rates of interest that we are experiencing nationwide, I would have to say that the President's economic recovery program is a failure.

□ 1015

INTEREST RATES

(Mr. RATCHFORD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RATCHFORD. Mr. Speaker, for months, the President has asked the American people to take it on faith that his budget and tax policies would magically reduce inflationary expectations, and bring interest rates down from their current usurious levels.

What the President forgot to tell the American people during his campaign to sell his personal brand of economic theology was that achieving balanced budgets requires more than economic assumptions, and a media blitz.

As many economists warned, the President's spending and tax programs are now on a collision course, with his tight monetary policies. The prime interest rate is hovering around 20 percent and the Federal Government faces a \$50 to \$70 billion deficit. The President speaks of reducing social security benefits. This would place the burden of the President's austerity plan on those who can least afford it, the old and infirm.

the old and infirm.
Social security, Mr. Speaker, is not the cause of the high interest rates in America.

FALL GUY FOR HIGH INTEREST RATES

(Mr. MILLER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MILLER of California. Mr. Speaker, I find it very interesting that the President and the leaders of his party in the Congress are now beginning a search for a fall guy to blame for soaring interest rates and the hostility of the financial community to their economic strategy.

In the spirit of bipartisanship, I want to help them out.

They need look no further than at their own legislative agenda.

Less than 2 months ago, some of us stood on this floor and argued against the \$750 billion tax cut on the grounds it would fuel inflation, boost interest rates, and discourage productive investment. Today, the accuracy of that prediction is displayed in the financial pages of every newspaper in the country.

try.

Less than 2 months ago, some of us stood on this floor and argued to cut

\$8 billion in waste, fraud, and abuse from the military budget. Republican leaders themselves had admitted there were \$25 billion in needless spending in that budget. But almost every member of that party opposed the modest \$8 billion cut.

Either they were playing politics 2 months ago when they opposed a military budget reduction which their own budget analysts called modest, or they are playing politics today.

In the meantime, they have rammed through an irresponsible tax bill, and they are trying to pin the blame for a \$65 billion deficit on middle-income people, social security recipients, educators, and nutrition programs.

I hope that neither the Democratic majority in this House, nor the American people, permit this duplicity to continue much longer.

REALITY HAS SET IN TO THE REAGAN ECONOMIC PLAN

(Mr. VENTO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. VENTO. Mr. Speaker, this past month President Reagan has met reality at about the rate of \$1 billion a

The change in the budget deficit forecasts are indeed sobering. This Reagan economic plan must go down as one of the most glaring economic errors in the history of any administration

The Reagan budget, rubberstamped by a euphoric Republican Senate and accommodating House, now is a shamble; one of the biggest economic gambles in history is holding a very weak hand.

Interest rates and monetary policy, credit availability, admittedly too restrictive for the past 2 years, when they have failed to throttle inflation, and even added to it, are today being attacked from all sides.

It is interesting that when Reagan and the Republican Members had a chance to do something about the Federal Government economic impact that they sought political expediency—exhorbitant special interest tax cuts and wasteful and outlandish increases in military spending, with devastating cuts in social programs.

Now that Reagan has put in place all these policies, the Republicans are ringing their hands over high interest rates, budget deficits, and the state of the economy.

Amazing that our Republican colleagues now propose to grant the President, the Reagan administration that has so badly misread the needs of our economy, autocratic powers such as impoundment.

A better solution would be for this Congress to begin its role as deliberative and balancing power in economic decisionmaking.

It should be clear that the demand stimulus of the Reagan tax cut and military spending will directly result in a restrictive monetary policy, something the Democrats have been saying the past 8 months.

Change is still possible in this economic scenario, but it will be a significant challenge and take a willingness by the Federal Government to play a positive role in the economy by channeling credit, paring back wasteful military spending, and a cooperative Government involvement with the private sector in fighting inflation.

REPAIRS FOR SUPPLY SIDE ECONOMICS

(Mr. DORGAN of North Dakota asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DORGAN of North Dakota. Mr. Speaker, I have been reading the newspapers accounts of the repairs that are now necessary for "supply side economics" policies to work in this country. Supply side economics really does represent a puzzle with pieces that do not fit.

First, we have a fiscal policy in this country called supply side economics that requires steady economic growth of over 4 percent for 5 straight years.

On the second hand, we have a monetary policy that attempts to retard economic growth through high interest rates.

It is destined for failure—a fiscal policy that requires economic growth, coupled with a monetary policy designed to retard economic growth. It is a policy that does not make any economic sense.

It is destined for failure. The unfortunate part of it is that there are probably going to be hundreds of thousands of small businesses who are going to be part of that failure as well.

People talk about a tight money policy. Well, we do have high interest rates, but it does not represent tight money for everybody. Du Pont and Mobil, they can surely get money. Newspaper accounts tell us of their credit lines of billions of dollars for acquisition purposes; so it is not tight money for everybody.

Du Pont and Mobil can get money, but mom and pop businesses cannot.

It reminds me of the old Ray Charles refrain, "Them that's got is them that gets and I ain't got nothing lately." That is true of the fiscal policy that has been adopted by the administration and it is true of the monetary policy as well.

OVER HALF OF MEMBERS OF HOUSE HAVE SIGNED RESOLU-TION DISAPPROVING SALE OF AWACS TO SAUDI ARABIA

(Mr. SCHUMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, a conresolution introduced gressional before the August recess disapproving the sale of AWACS and offensive F-15 equipment to Saudi Arabia has been signed by over one-half of the Members of the House. Why has such a resolution received such resounding bipartisan support when the administration is strongly urging congressional

approval of the sale?

It is because the majority of the Members of the House are concerned that our most advanced reconnaissance system would be compromised and potentially fall into the hands of those with strong anti-U.S. interests. It is because the sale of AWACS will not lessen the internal threats to Saudi stability, and we fear that we will be forced to learn again the painful lesson of Iran, only with more of American security at stake. It is because the sale of AWACS to Saudi Arabia will be ineffective in countering the Soviet threat in the Middle East. It is because the history of arms sales to the Saudis demonstrates that such sales will not elicit Saudi moderation on oil pricing, nor on the Arab-Israeli conflict. And it is because the sale of AWACS will undeniably threaten our closest ally against Soviet aggression in the Middle East, the State of Israel.

Two hundred and fifty-two Members of the House of Representatives have thus far declared that they do not believe that the sale of AWACS to Saudi Arabia is in the best interest of the United States, in Israel's best interest, or in the best interest of those who truly desire peace in the Middle East. The administration would be well advised to listen to the views of the 252

Members of Congress.

WHO STARTED DEFICIT FINANC-ING AND CAUSED HIGH INTER-EST RATES?

(Mr. ROUSSELOT asked and was given permission to address the House for 1 minute and to revise and extend

his remarks.)

Mr. ROUSSELOT. Mr. Speaker, I am fascinated sitting here today and listening to all this whining from my Democrat colleagues who are complaining about high interest rates and also the fact that the budget is out of balance and that we have so much deficit spending.

Who do you think created that deficit spending? The big liberal spenders who are up here today whining about the big deficit and the resulting high

leadership that for years have been spending, spending, spending.

Now, let me remind my colleagues that Mr. Reagan's program does not go into effect until October 1. They are up here claiming that the President is responsible for the economic mess-which in reality he inherited. As the President so accurately pointed out this week: The program for economic recovery "isn't working" yet. That is because it does not start for another 21 days. It would therefore appear to me, Mr. Speaker, that those liberals who are responsible for the continued deficit spending for the last several years, are trying to hide from the responsibilities of their past actions. What fascinates me is that they would attempt to do this some 3 weeks before the positive steps of the President's program even begin. Maybe they did not understand that the fiscal year begins October 1; so a little patience is necessary.

None of us like high interest rates, but 30 percent of the marketplace is absorbed by deficit financing from the Federal Treasury. Let the record show, as it does, that the deficit financing was created by the liberal Democrat leadership for the last 10

AGRICULTURE SECRETARY BLOCK SHOULD IMMEDIATELY ANNOUNCE DETAILS OF THE WHEAT SET-ASIDE PROGRAM

(Mr. WHITTAKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WHITTAKER. Mr. Speaker, I would like to bring to the attention of my colleagues in the House that today I have requested that Agriculture Secretary John Block immediately announce the details of the 15-percent wheat set-aside that he announced last

Currently the USDA is estimating a carryover surplus of over 1 billion bushels from the record 1981 crop, and the set-aside will help to prevent further stockpiling and depressing of prices.

Unless Secretary Block announces the details of his program now, the program will be too late to help. Many of the wheat farmers in Kansas have already begun to plant their 1982 crop, and in a matter of a few days, it could be too late for many of this Nation's farmers to participate in the program. The result will then be more surplus wheat, lower prices, and the need for even more production controls at greater expense to the Federal Treasury.

If we act now, we can prevent a future crisis. I urge my colleagues to join me in asking Secretary Block to

interest rates. The Democrat liberal immediately announce the details of his plan.

> CHANGES NEEDED IN OUR IMMI-GRATION AND REFUGEE POLICY

> (Mr. McCOLLUM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

> Mr. McCOLLUM. Mr. Speaker, there are many important issues facing this body and our country at this time, social security, the Voting Rights Act, the failure of our criminal justice system; but aside from national defense and the economy, which have to be the two singly most important issues, I believe that the third most important issue facing us today is the great need to make some changes in our immigration and refugee policy in this country before it continues to the point where we cannot correct the chaos that is there today.

There is no particular institution or agency in this Government that is more underfunded, more overworked, more understaffed, than the Immigration and Naturalization Service.

I join my distinguished colleague, the gentleman from Kentucky, who a few moments ago asked the President and asked the administration to move in an area that Congress cannot move in and move swiftly to appoint a new Commissioner of the Immigration and Naturalization Service, a permanent one, and a coordinator of refugee affairs. We need to move on in that area and we need the support of this administration now to do so.

A PAPER MONETARY SYSTEM LEADS TO HIGHER INTEREST RATES

(Mr. PAUL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PAUL. Mr. Speaker, great concern is now being expressed over the persistent high interest rates-and rightfully so. High interest rates are typical of a failing currency. Paper currency that is deliberately and steadily depreciated by expanding its supply will always command a high interest rate.

The rule of supply and demand operates for money just as it does for wheat and corn. When money loses its value, as it has dramatically under the totally managed fiat system of the past 10 years, interest rates must rise to compensate for the loss. Anticipation of further depreciation of the currency will amplify this.

Credit controls and controls on interest rates, no matter how well intended, will not work any better than price controls on oil and gasoline, which caused the gasoline lines to form in 1979.

Fiat money historically has always caused high interest rates.

Sound money, money of intrinsic value such as gold, historically always produced low interest rates-traditionally 3-4 percent.

Continuing with the paper monetary system that we have today will lead to yet higher interest rates regardless of public expressions of displeasure. High interest rates and inflation go hand in hand and are a result of the monetary policy of the past 50 years. High interest rates are not in themselves a fiscal or budgetary problem. Only a currency of real value, such as gold, will lower interest rates and restore order to the financial markets.

□ 1030

GIVE REAGANOMICS A CHANCE

(Mr. JEFFRIES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JEFFRIES. Mr. Speaker, even though President Reagan has only been in office 71/2 months, his critics have already sent the bloodhounds after him. Sure we still have high interest rates, but the tax cuts are part of the solution, and they do not even go into effect until October 1. Many of the most beneficial tax cut provisions designed to induce investment, savings, and production will not begin until next year, and many will not be totally phased in for 5 years. As the tax cuts and new income become available for use by the private sector, the bidding for money in the credit markets will slacken, thus forcing interest rates downward.

Tax cuts are not enough, however. The Reagan administration must continue to ask Congress to slash away at the Federal budget and the growing deficit. I sincerely hope President Reagan will come before Congress again and ask for still further reductions in the budget, because only then will the public believe we are all serious about restoring the economy, and that the passage of the budget and tax bills was not simply a one-shot item meant for show.

PRESENT ECONOMIC PROGRAM INITIATED BY DEMOCRATS

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, we heard several interesting comments from the emerging Democratic Party minority here on the House floor this morning. It seemed to me that as they defined the economic situation, they were very good at defining disaster, but very confused about where the cause was

One spokesman, for instance, indicated that the economic program has failed. He thought it was the Reagan economic program. The economic program that has failed is the one that the Democrats put into effect this time last year in this House. Yes; it has failed.

We have high interest rates as a result of that particular program. There was talk here about record high interest rates. The interest rates are not as high now as they were during the Carter administration.

What we are suffering from now is a hangover from those policies, from those record high interest rates.

I think it is about time, Mr. Speaker, that we end the confusion on this issue and realize that we have a real problem in this country, but it is a problem not created by the Reagan administration but created by the Democratic Party, the past administration, and in this Congress. My fear is that the Democratic Party spokesmen that were on this floor today hope that by predicting failure they will help create failure, and that is a tragedy for a supposedly responsible political party.

THE NEED FOR THE VOTING RIGHTS ACT

(Mr. GARCIA asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. GARCIA. Mr. Speaker, the right to vote is inherent to the democratic process. Since 1965 the Voting Rights Act has made sure that this is true.

The Voting Rights Act of 1965 is now being considered for extension. I am proud to say that I am a cosponsor of the bill that would extend this historically significant act.

The argument against the Voting Rights Act is made most vocally by those States that have had the worst history of discrimination, and it is these same States that now claim that they are being unjustly treated. Some of the arguments against the act say it is unfairly directed against the South. This is not true. My State, New York, three boroughs-Manhattan, Brooklyn, and the Bronx-that are covered by the act.

On September 8, 1981, a special Federal court stopped all citywide primary elections scheduled for Thursday in the city of New York. This was the result of a dispute over reapportion-ment of New York City's voting districts. The court's decision came after the city's failure to provide adequate information to the U.S. Department of Justice as to how they drew up the new districts.

The point is that the debate over the Voting Rights Act is not a North-

South problem. The act is designed to assure that all Americans are guaranteed the right to vote. It is an issue that should be of concern to all Ameri-

APPOINTMENT OF MEMBERS TO ATTEND THE FUNERAL OF THE LATE HONORABLE WIL-LIAM R. COTTER

The SPEAKER pro tempore (Mr. MURTHA). Pursuant to House Resolution 206, the Chair appoints as members of the Funeral Committee of the late William R. Cotter the following Members on the part of the House:

Mr. McKinney of Connecticut:

Mr. O'NEILL of Massachusetts:

Mr. Foley of Washington;

Mr. Moffett of Connecticut: Mr. RATCHFORD of Connecticut:

Mr. DENARDIS of Connecticut;

Mr. Gejdenson of Connecticut;

Mr. Boland of Massachusetts;

Mr. Conte of Massachusetts:

Mr. ROSTENKOWSKI of Illinois:

Mr. ST GERMAIN of Rhode Island;

Mr. PICKLE of Texas;

Mr. Duncan of Tennessee:

Mr. ALEXANDER of Arkansas:

Mr. ROUSSELOT of California: Mr. Moakley of Massachusetts:

Mr. STARK of California;

Mr. Murtha of Pennsylvania;

Mr. Early of Massachusetts;

Mr. Russo of Illinois:

Mr. SCHULZE of Pennsylvania: Mr. FOWLER of Georgia;

Mr. Anthony of Arkansas:

Mr. Donnelly of Massachusetts:

Mr. GUARINI of New Jersey;

Mr. Shannon of Massachusetts: and

Mr. DE Lugo of the Virgin Islands.

GENERAL LEAVE

Mr. BENJAMIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill (H.R. 4209) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purposes, and that I may be permitted to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

DEPARTMENT OF TRANSPORTA-TION AND RELATED AGENCIES APPROPRIATIONS, 1982

Mr. BENJAMIN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4209) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate be limited to not to exceed 1 hour, the time to be equally divided and controlled by the gentleman from Pennsylvania (Mr. Coughlin) myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Indiana (Mr. BEN-

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ROUSSELOT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were-yeas 367, nays 3, answered "present" 2, not voting 61, as follows:

So the motion was agreed to. The result of the vote was announced as above recorded.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill. H.R. 4209, with Mr. GEPHARDT in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the unanimous-consent agreement, the gentleman from Indiana (Mr. BENJAMIN) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. Coughlin) will be recognized for 30

The Committee will rise informally in order that the House may receive a message.

MESSAGE FROM THE PRESIDENT

The SPEAKER pro tempore. (Mr. MURTHA) assumed the chair.

The SPEAKER pro tempore. The Chair will receive a message.

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

The SPEAKER pro tempore. The Committee will resume its sitting.

DEPARTMENT OF TRANSPORTA-TION AND RELATED AGENCIES APPROPRIATIONS, 1982

The Committee resumed its sitting. The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania (Mr. BENJAMIN).

Mr. BENJAMIN. Mr. Chairman, I yield myself such time as I may con-

Mr. Chairman, we submit for your consideration and for the consideration of the Committee the bill, H.R. 4209, the Department of Transportation and related agencies appropriation bill for fiscal year 1982.

I am joined in this endeavor by my good friends and colleagues on the subcommittee, including the gentleman from Florida (Mr. LEHMAN), the gentleman from Minnesota (Mr. Sabo). the gentleman from Oregon (Mr. AUCOIN), the gentleman from Pennsylvania (Mr. Gray), the gentleman from Massachusetts (Mr. CONTE), the gentleman from Alabama (Mr. wards), and the gentleman from Michigan (Mr. Pursell).

I want to make special mention of my respect for our friend, the gentleman from Pennsylvania (Mr. Coughlin). His views have been perceptive and thoughtful. I know the subcommittee has greatly benefited from his wisdom and his participation, and I personally have appreciated both his counsel and his ability to present alternative viewpoints.

TRANSPORTATION AND ECONOMIC DEVELOPMENT Mr. Chairman, with the host of budgetary issues confronting this body concerning such important matters as social security, defense, food stamps, or taxes, many of us tend to underestimate the importance of some of the other areas supported by the taxpayers; including transportation. I suspect that one of the reasons we sometimes take transportation for granted is that the public-private partnership that has existed to develop our transportation system has worked so well. We have indeed developed a transportation system that is second to noneour highway and air transport systems are the envy of the world; our rail freight system is highly developed and provides efficient service to hundreds of thousands of shippers; transit systems currently exist in 279 urban areas around the country. Our transportation network is unmatched anywhere in the world.

The importance of our transportation system to the national defense and the American economy cannot be overstated. We can build all the planes and tanks the generals ever dreamed of, but if we don't have the system to move them where they are needed quickly and efficiently, their utility is greatly restricted. We can double our steel or agricultural output, but this will do little good if we are not able to get those products and goods to the market. If you doubt this, I invite you to think back to the last time the major highways in your State were closed due to weather, or when transit service was halted in our large cities of New York, Boston, Washington, D.C., or Chicago. Inadequate transportation can have disastrous economic effects.

But, like any other capital investment, our transportation facilities must be adequately preserved and upgraded if they are to continue to serve their purpose. The committee has been concerned that our transportation needs have not received the attention they deserve. For instance, recent reports indicate that we are failing to adequately replenish our national investment in highways. On the interstate system, pavement needs changed from 4 percent of the mileage requiring major rehabilitation in 1975 to 10 percent needing resurfacing in 1978. Similarly, the percentage of deficient bridges on the interstate increased from 4 percent in 1975 to 13 percent in 1978. These trends will continue to worsen as the interstate system ages.

Presently, 2,000 miles of interstate pavement reach their 20-year "design life" every year.

For aviation, the FAA is projecting that air travel will double in the next 10 years, placing heavy new demands on our airports and air traffic control systems. In the transit area, there is already a deficiency in transit capacity to meet projected ridership needs without considering the potential added demand that future energy shortfalls will have on transit use. For railroads, Federal regulatory policies have severely impaired the financial health of our national rail freight industry and it will take continued action to nurse that industry back to financial health.

The committee, however, also recognizes the need to reduce Federal Government spending to curb the inflation which large deficits have helped produce. The recommendations in this bill are consistent with that objective. The committee has tempered its desire to improve our national transportation system and has reduced the new budget authority in this bill to a level which is nearly \$1.7 billion, approximately 13 percent, below the amount recommended for similar programs in fiscal year 1981. Under less stringent fiscal conditions, some items which have been deleted might have been approved.

The committee cautions, however, that a continuous failure to adequately maintain and upgrade our transportation system will impede future industrial and economic development. Inadequate and higher cost transportation can increase the cost of production. It can also limit the ability of producers to market their products, thereby reducing competition. These factors result in higher prices being paid by consumers. If the problems are not promptly and adequately addressed, the costs to recover in future years will be significantly greater. For instance, if a highway segment that requires repaving is exposed to just one extra winter season, it could require complete reconstruction-a far more costly proposition. Ignoring these problems may postpone the day of reckoning, but it cannot prevent that day from coming.

SUMMARY OF THE BILL

Mr. Chairman, the bill before you contains \$11.101 billion in new budget authority. Compared to the President's proposals, the bill is \$1,905,000 under the budget. It is also \$567,867,765 lower in budget authority than the subcommittee's 1982 allocation under section 302 of the Budget Act.

OFFICE OF THE SECRETARY

For the functions of the Office of the Secretary of Transportation, the bill contains \$43,457,000, a decrease of \$3,538,690 from the current level and a decrease of \$5,993,000 compared to the budget. In a year when the Secretary has proposed substantial reductions in most of the operating administrations within the Department of Transportation, the committee believes the Secretary must also take his fair share of cuts within his immediate office. The administration's budget request proposed to cut back funding for the Department as a whole by 9.7 percent while increasing funding for the Office of the Secretary by 5.2 percent. We believe it is wholly inappropriate to fund the Secretary's office at this level when we are cutting back the people in the field who are on the front lines doing the job that the American people have asked them to do. Under the committee's recommendation, funding for the Department will be reduced by 9.5 percent and the Secretary's office will be reduced by 7.5 percent. Besides being more consistent with the recommended levels for the entire Department, we believe this level will actually serve to enhance the quality of the Secretary's immediate staff support by eliminating unnecessary functions which drain valuable time from the Secretary's key staff advisers.

COAST GUARD

Moving to the Coast Guard, let me remind my colleagues of the 1962 Coast Guard roles and missions study performed by the Secretary of the Treasury which was an example of how comprehensive and thorough analyses can be used as a basis for important policy decisions. Much of what came out of that study has been implemented. Since the 1960's, however, the Coast Guard has assumed many additional responsibilities in environmental protection, fisheries and law enforcement, and Outer Continental Shelf management which have been stacked on top of growing workloads in other, more traditional areas of responsibility. For instance, there are over 150 specific statutory provisions which authorize or require the Coast Guard to promulgate regulations. Last year, we directed the Department to conduct a new roles and missions review to sort out those programs which might be eliminated or transferred to other public or private organizations, as well as those activities which can and should remain in the Coast Guard. The Department has indicated that this study will be completed by the first quarter of 1982, and it is our intent to use this as the basis for making our budgetary decisions in the years ahead.

For fiscal year 1982, the bill contains \$1,402,898,000 for operating expenses, which is the same as the budget request and \$65.7 million over the fiscal year 1981 level. Approximately \$44 million of the recommended increase over fiscal year 1981 is to cover the added cost of inflation. The remaining

part of the increase is associated primarily with upgrading training, improving the housing for Coast Guard personnel, providing additional equipment maintenance and operating two new medium endurance cutters. For acquisition, construction, and improvements, we are recommending \$391 million. This will continue the procurement programs for medium endurance cutters, medium-range surveillance aircraft, and short-range helicopters. It will also provide funds for a buoy tender upgrading, patrol boat renovation, and shore facility rehabilitation. The bill includes \$17.5 million for the alteration of five bridges that are unreasonable obstructions to waterborne commerce and \$29.73 million for research, development, test and evaluation. We have deleted \$9 million from the \$288 million request for retired pay in anticipation of legislation to convert cost-of-living adjustments to a single annual adjustment. For Reserve training, the supply fund, and the offshore oil pollution compensation fund, we have approved the full budget requests or made some small reductions. FEDERAL AVIATION ADMINISTRATION

The largest single appropriation in the bill is \$2,406,200,000 for the operation of our national air traffic control system and for the execution of the aviation regulatory, research, and financial assistance programs. I know many of you are interested in the air traffic controller situation. According to the FAA, a total of 11,438 termination notices have been sent out. Approximately 1,000 new controller personnel have already been hired or reemployed and an additional 819 military controllers are currently assisting the FAA. We have, of course, been assured by DOT officials that our air transportation system is operating safely.

In addition, the bill includes appropriations of \$19 million for facilities, engineering, and development; \$353.57 million for facilities and equipment; \$80 million for research, engineering, and development; and \$69,493,000 for the operation and capital improvements at Dulles and National airports. For the grants-in-aid for airport development, we are recommending a \$650 million limitation on obligations, and for new aircraft purchase loan guarantees the bill includes a \$175 million ceiling.

FEDERAL HIGHWAY ADMINISTRATION

Under the Federal Highway Administration, the bill includes a limitation on contract authority obligations for the Federal-aid highways program of \$8.2 billion during fiscal year 1982. This is \$50 million more than the level proposed in the Budget and \$550 million less than the current limitation of \$8.75 billion.

The bill also contains \$400 million for highway projects substituted for interstate highway segments. This

amount is \$200 million more than the budget request. We believe that this increased funding level is required to keep up with realistic estimates of inflation in highway construction costs and to make a meaningful reduction in the large balance of unfunded authority under this program. That balance, as of December 31, 1980, was over \$5.4 billion, and, according to estimates of the Federal Highway Administration, may rise to as much as \$13.7 billion by the end of 1983. We believe that higher funding levels must be provided for this program if we are to avoid making this a permanent grant program.

The bill also includes appropriations for motor carrier safety, highway safety research and development, highway beautification, railroad-highway crossings demonstration projects, and territorial highways. General operating expenses of FHWA would be limited to \$200.4 million in fiscal year 1982, a reduction of \$12.6 million from the budget request.

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

For the National Highway Traffic Safety Administration, the bill includes \$85,876,000 for operations and research which is the same as the fiscal year 1981 level.

The administration has been quick to blame the safety programs and regulations of the National Highway Safety Administration for Traffic many of the financial ills plaguing our auto industry. Even though we doubt that NHTSA is the real villain in this story, we hesitate to recommend additional funding for an agency whose mission has not been clearly articulated by the new administration. The administration has simply not adequately explained how it plans to manage the programs and responsibilities of this agency in a consistent fashion with its rhetoric extolling the evils of auto safety regulation and the necessity for transferring Federal governmental functions to State and local jurisdictions. Until we can be assured that the taxpayers dollars will be used effectively, we cannot recommend higher funding levels for this pro-

With respect to those highway safety programs financed with contract authority, we are recommending a limitation on obligations of \$77 million, which is the amount requested in the budget. This is a reduction of more than \$73 million from the fiscal year 1981 level and reflects the widely held belief that many eligible items in this program are not effective in reducing highway accidents and injuries.

FEDERAL RAILROAD ADMINISTRATION

Mr. Chairman, for the Federal Railroad Administration, major recommendations include \$26,904,000 for railroad safety, \$34 million for research and development, \$15,624,000

for rail service assistance, \$200 million for the Northeast corridor improvement project, and a limitation on loan guarantees under section 511 of the Railroad Revitalization and Regulatory Reform Act of 1976 of \$770 million.

The committee does not, at this time, recommend additional funding to purchase redeemable preference shares from railroads to finance the rehabilitation of rail facilities. We are not convinced that the benefits from this program justify continuing the high spending levels of past years, and have asked the Department to conduct a comprehensive review of this program to document how effective past section 505 investments have been. The committee plans to consider future preference share funding requests after it has reviewed the results of this study, and if sufficient funds are authorized.

The bill would also provide \$544 million for Amtrak which, together with \$166 million in previous appropriations for fiscal year 1982 and \$25 million in estimated carryover funds, would provide a total of \$735 million for fiscal year 1982. This \$735 million program level is consistent with the omnibus budget reconciliation bill and would be allocated in accordance with that bill as well; that is \$625 million for operating expenses, \$100 million for capital grants and \$10 million for labor protection. We understand that Amtrak has estimated that it can operate nearly all of its existing system under this funding level.

URBAN MASS TRANSPORTATION ADMINISTRATION

Under the committee recommendations, a total program level of \$4.036 billion would be provided for the activities of the Urban Mass Transportation Administration for fiscal year 1982. This is \$56.85 million more than the President's request, but it is \$170.4 million less than the amounts provided for similar activities for fiscal year 1981. Under this recommendation, \$1.48 billion would be provided for the section 5 "urban formula" program which provides subsidies to our transit authorities around the country to operate their systems. This is \$25 million more than last year's level. The bill also provides \$1.786 billion for urban discretionary grants to buy buses; extend and modernize existing rail transit systems; continue construction of new rail transit systems in Miami, Atlanta, Buffalo, and Portland; and continue the construction of transit malls, intermodal terminals, and joint development projects. The bill also continues the fiscal year 1981 funding level of \$72.5 million for the nonurban formula program in fiscal year 1982. This program is designed to assist in the development of public transportation in small communities and rural areas. In addition, we estimate that \$25 million in carryover funds will be available for this program in fiscal year 1982 making a total of \$97.5 million available in 1982.

The bill also includes \$600 million for transit projects which have been substituted for interstate highway segments. As I stated earlier, we are concerned about the unfunded balance in this program which is currently hovering at \$5.5 billion. Without significant appropriations to draw down this balance, interstate transfers will become a permanent fixture in our budget, which was not the intent of Congress.

The bill also includes \$97.3 million for the research and administrative expenses of UMTA.

RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION

The bill includes \$29,837,000 for the Research and Special Programs Administration, which includes the materials transportation bureau, the transportation systems center and grants to States for natural gas pipeline safety. The amount recommended is \$210,000 less than the budget request.

OFFICE OF INSPECTOR GENERAL

For the Office of Inspector General, the bill contains an appropriation of \$14,826,000 and an additional \$9,454,000 by transfer, for a total of \$24,280,000 in fiscal year 1982. This is the amount requested in the President's budget.

TITLE II-RELATED AGENCIES

Title II of the bill contains \$653,721,000 for seven transportation related agencies and commissions. This is \$18,258,000 below the budget request and \$579,133 million below last year's level. The reasons for this significant reduction largely stem from recent legislation to deregulate our airlines, railroads and motor carriers which has lessened the need for oversight from our Federal regulatory agencies.

More specifically, the committee is recommending \$2,070,000 for the Architectural and Transportation Barriers Compliance Board; \$19.125 million for the National Transportation Safety Board; \$87.28 million for the Civil Aeronautics Board; \$74.15 million for the Interstate Commerce Commission; \$418.51 million for the Panama Canal Commission; \$1 million for administrative expenses of the U.S. Railway Association; and \$51,586,000 for the Washington Metropolitan Transit Authority. I want to make special mention of one of the committee's recommendations.

The bill includes \$74.15 million for the salaries and expenses of the Interstate Commerce Commission. This would provide for a staffing level of 1,500 positions, which is 100 positions less than the President's request.

The committee was actually presented with two ICC budget proposals for fiscal year 1982—the official budget submission, which requested funds for

1,600 positions and an alternative proposal authorized by one of the five Commissioners requesting funds for 1,000 positions. The alternative package was based on the premise that major efficiencies could be achieved through structural realinement and elimination of functions that are now nonessential because of deregulation.

The Congress and the Commission have emphasized the importance of reducing harmful, artificial barriers to competition in the trucking and railroad industries, but that same rigor has not been applied to overhauling the structure and functions of the Commission itself. Testimony before the committee pointed out several instances of bureaucratic duplication, inefficiency, and misplaced priorities which thwart the goals of deregulation as intended by Congress. The committee's recommendation provides for a leaner, trimmer ICC which will force better definition of the lines of authority within the Commission, more efficient use of personnel, and a realinement of Commission priorities in line with the goals of deregulation. The committee is satisfied that all of the ICC's statutory obligations can be met at this budget level.

Mr. Chairman, the bill before you is the product of our very able subcommittee. The bill was reported by the full Appropriations Committee on July 17. The committee held 27 days of hearings and received testimony from 10 Members of Congress, 141 officials from the executive branch and 95 interested individuals and representatives of groups and organizations. The committee printed 8 volumes of hearings, numbering 6,218 pages.

Mr. Chairman, I believe we are bringing a balanced and carefully considered bill to the committee today and I ask for its favorable consideration and approval.

□ 1100

Mr. COUGHLIN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I would like to begin my remarks by complimenting the distinguished chairman of the subcommittee, the gentleman from Indiana, Mr. Adam Benjamin, Jr., on the very splendid job he has done with this bill.

Although this is his maiden voyage in bringing a regular transportation appropriation bill to the floor, one certainly would not know it, due to the very fair way he has treated all Members during the hearings, due to the extensive leadership he has shown in crafting this bill, and due to his vast knowledge of transportation planning and funding. It has been a real pleasure to work with him.

Since this is also my maiden voyage as ranking minority member of this particular subcommittee, let me pause to recognize the distinguished ranking minority member of the full committee, the gentleman from Massachusetts, Mr. Silvio Conte. He preceded me as the ranking minority member of this subcommittee. His knowledge of transportation problems has been invaluable as he continues to serve on the subcommittee and he certainly has been very helpful to me.

All members of this subcommittee, the gentleman from Alabama, Mr. Jack Edwards, the gentleman from Michigan, Mr. Carl Pursell, the gentleman from Florida, Mr. William Lehman, the gentleman from Minnesota, Mr. Marty Sabo, the gentleman from Oregon, Mr. Les Aucoin, and the gentleman from Pennsylvania, Mr. Bill Gray, have had a hand in crafting this bill, and the bill is the better for it.

Let me also thank the staff: Tom Kingfield, Greg Dahlberg, Jeni Leasor, and Betsy Stark for the majority, and Kenny Kraft and Greg Dole for the minority, for the work they have done on the bill.

This is not an easy bill, Mr. Chairman. I suppose one could refer to it as a transferral bill. There are lots of pulls and tugs involved in any appropriation bill of this magnitude, and the chairman has done an admirable job of accommodating these pulls and tugs.

The administration, under the strong leadership of Secretary of Transportation Drew Lewis, proposed dramatic changes in the area of transportation, and most of those changes have indeed been accommodated in the bill. A number were not accommodated in the bill; they were threshed out in committee, and I am sure my colleagues will be pleased to know that I do not intend to rethresh them out here on the floor. However I do feel obliged to call attention to some of the differences between the bill coming before us and the administration's proposals.

In the area of interstate transfer grants for highways, the subcommittee added \$200 million. Now, in fact, there is a huge backlog in this area, and it is an area in which States feel, since they have forgone some interstate highway funds in one area, that they are entitled to them in another, and the additional \$200 million was put in to address that question.

In the highway trust fund area, the \$8.2 billion limitation on the highway trust fund is within the reconciliation provisions, but we did exclude from that limitation emergency bridge projects, which could add some \$200 million in outlays to the bill over and above the administration's request.

In the aviation area we increased spending from the airport and airways trust fund by some \$200 million, and we are in fact about \$50 million over the reconciliation figure in that area.

This will also have both a budgetary and an inflationary effect.

In the area of urban mass transportation, the administration proposed the elimination of new starts on people movers and on light rail. There were some projects such as Miami and Detroit which represented previous commitments and which are continued. There are others such as Los Angeles and Indianapolis which are the first installments on things which could end up being very, very expensive.

There are two areas I would call attention to in which we have reduced funding in a way that I think is deleterious. First, the U.S. Railway Association has had its funding reduced from \$29 million last year to only \$1 million this year. Obviously it cannot function that way, and I would hope this will be rectified.

The Federal Railroad Administration has had it funding reduced from \$8 million to \$4 million. It is unlikely it can operate at that funding level, and again I would hope that will be reconciled.

Overall, Mr. Chairman, the bill is within our section 302 allocation. It is \$1.9 million under the budget request, it is \$1.7 million less than the fiscal year 1981 budget, and I certainly urge support for the bill by Members on both sides of the aisle.

Mr. Chairman, at this time I yield to the distinguished subcommittee chairman for a colloquy in which he wishes to engage.

Mr. BENJAMIN. Mr. Chairman, I thank the gentleman for yielding.

In the conference report on the Department of Transportation and related agencies appropriation bill for fiscal year 1981, specific guidance was given to UMTA on how it should resolve any problems arising from the imposition of a State or local "Buy America" law and the "Buy America" provision in section 401 of Public Law 95-599, the Surface Transportation Assistance Act of 1978. I would include those pages, 16 and 17, as a part of these remarks, as follows:

Amendment No. 43: Deletes language proposed by the House and inserts language proposed by the Senate regarding the "Buy America" provisions of section 401 of Public Law 95-599.

The conference agreement includes language which requires that UMTA apply the Buy America domestic preference provisions of Section 401 of Public Law 95-599 to grants awarded in fiscal year 1981 which use funds appropriated by this Act. The purpose of this provision is to ensure that appropriations that are authorized by statutes enacted after Public Law 95-599 are administered in a manner that provides incentives to manufacture in the United States and to employ United States workers. At a time when inflation and unemployment are presenting problems here in the United States, the conference language ensures that domestic companies and domestic jobs will be protected when capital grants are awarded for any highway or transit project.

The conferees believe that Section 401 of Public Law 95-599 provides uniform, national domestic preference requirements for transit equipment and construction supplies purchased with UMTA funds. Thus, the conference agreement language which is intended to ensure that no highway or transit funds be made available unless such funds are obligated pursuant to the provisions of Section 401 of Public Law 95-599. Under Section 401 only American-made materials are to be used in highway and transit projects unless one of four exceptions apply—public interest, unavailability, and two exceptions for unreasonable cost. The conferees believe these should be the only exceptions.

Over the past several years, many states have enacted domestic preference legislation related to procurements using state funds. A problem might arise in the case of joint state-Federal participation in a project, such as UMTA-funded procurement, where a state will wish to impose its domes tic preference law. If a contract bid does not fall within the scope of any of the excep-tions cited in Section 401 of Public Law 95-599, then the grantee should not be denied UMTA financial assistance simply because of the imposition of a state domestic preference law. The conferees do not intend the "state domestic preference law" to include so-called "buy-state laws" which repreferences for products manufactured in a particular state or subdivision and any such state laws shall not prevail over Federal law. On the other hand, if the imposition of a state domestic preference law causes the contract bid to fall within the scope of any or all of the exceptions cited in Section 401 of Public Law 95-599, then UMTA financial assistance could be denied because state statutes are undoubtedly subject to Federal law prescribing the "Buy America" exceptions of public interest, unavailability and unreasonable cost,

In addition to implementation of Section 401 of Public Law 95-599, the conferees direct UMTA to explore additional regulatory approaches to enhance domestic protections, including, but not limited to, measures to encourage the use of American steel and high technology assemblies in any foreign-made components that are incorporated into United States products. UMTA should cooperate with other Federal agencies to lessen the opportunity for unfair trade practices in transit procurements. UMTA should also monitor the implementation of state preference provisions to determine if it would be in the national interest to apply at the Federal level any provisions that states apply to their self-funded proj-

Mr. Chairman, UMTA issued its final "Buy America" requirements on January 19, 1981, in the Federal Register, volume 46, No. 12, pages 5808-29. On page 5808 the regulation states:

We have received specific guidance from the Congress in the resolution of this issue for the current fiscal year which ends on September 30, 1981 . . The guidance that applies to all of these non-Federal preference laws after September 30, 1981 will depend on the future instructions from the Congress.

It is through these remarks today that we are instructing UMTA that the guidance given on pages 16 and 17 of House Report No. 98-1400, dated September 25, 1980, with respect to

Buy American is to be continued and applicable during the fiscal year beginning October 1, 1981, and ending September 30, 1982.

Mr. Chairman, I ask the gentleman from Pennsylvania (Mr. COUGHLIN), the distinguished ranking minority member of the Transportation Appropriations Subcommittee, if he would join me in this observation.

Mr. COUGHLIN. Mr. Chairman, I thank the gentleman from Indiana (Mr. Benjamin) and wholeheartedly endorse his remarks.

In fact, we had a situation in Philadelphia where the Southeastern Pennsylvania Transit Authority was going to apply the Pennsylvania Buy America law as a contract condition. UMTA told the Southeastern Pennsylvania Transit Authority that if this occurred, UMTA would withdraw funding. With UMTA funding as the bulk of the financing, SEPTA gave in, putting itself in technical violation of Pennsylvania State law. UMTA's regulation covering this situation was not founded on congressional mandate or intent. It was this type of regulatory overkill that led us to take the action we did in last year's appropriation bill and to continue it for the fiscal year, 1981-82. Hopefully, the Surface Transportation Assistance Act will be reauthorized during this Congress and the issue can be resolved in that bill. However, until that time we must take steps to insure that funds spent are reasonably and fairly spent in behalf of our economy and our workers.

Mr. BENJAMIN. Mr. Chairman, I thank the gentleman from Pennsylvania (Mr. Coughlin) for his concurrence in this matter. At a time when Federal dollars are so scarce, I share his view that it is our duty to reasonably and fairly insure that our economy and our workers get a fair share of those dollars.

Mr. COUGHLIN. Mr. Chairman, I reserve the balance of my time.

Mr. BENJAMIN. Mr. Chairman, I yield 1 minute to the gentleman from Florida (Mr. Lehman), a member of the subcommittee.

Mr. LEHMAN. Mr. Chairman, I rise in strong support of H.R. 4209, the Department of Transportation and related agencies appropriation bill for fiscal year 1982.

I would like to say at the outset that it has been a great privilege to work this year with our very able subcommittee chairman, the gentleman from Indiana, Mr. Adam Benjamin Jr., and with our capable ranking minority leader, the gentleman from Pennsylvania, Mr. Larry Coughlin. Our chairman has done a masterful job of putting together a bill in a difficult budgetary climate. I would also like to note that our subcommittee has worked well together to form a bipartisan bill

which deserves the support of every House Member.

This is a good bill. Our chairman has already explained the major provisions, so I will not belabor them, but I would like to make a couple of comments.

First, this bill balances the need for Federal spending restraint—it contains nearly \$1,700 million less than was made available for similar activities in fiscal year 1981-with the need for continued Federal investments in our transportation network. Nation's Many of us have doubts about how long we can skimp on transportation investments without damaging our Nation's ability to move people and goods, in service of both the economy and the national defense. Our committee's report addresses this issue more fully.

Second, on a more parochial level, the bill continues to meet Federal commitments to south Florida, particularly in continuing support for the rapid transit program in Dade County, which is vital to our area's continued economic health. The urban mass transportation sections of the bill contain \$70 million for the heavy rail line, as agreed in the full funding contract between UMTA and Dade County, and \$26 million for the downtown circulator, to carry out Federal commitments going back to Transportation Secretary Coleman.

Mr. Chairman, I urge my colleagues to support this bill.

□ 1115

Mr. COUGHLIN. Mr. Chairman, I yield 2 minutes to the gentleman from Illinois (Mr. MADIGAN).

Mr. MADIGAN. Mr. Chairman, I want to thank the gentleman from Pennsylvania (Mr. Coughlin) for yielding. I would ask the gentleman from Indiana (Mr. BENJAMIN) if I might have his attention very briefly for the purpose of engaging in a colloquy concerning the priority primary program. That particular program, Mr. Chairman, in my judgment, is an outstanding example of a Federal program designed to target funds to a critical national highway problem.

While the \$125 million set-aside still falls far short of what is desirable, it is sufficient to insure significant accomplishments in those States that are seriously committed to completing work on priority primary routes. Illinois is clearly ready and willing to obligate on the order of \$50 million in priority primary funding in fiscal year 1982. The State is seriously committed to completing its routes and will fully obligate its allocation.

I should like to ask the gentleman from Indiana (Mr. BENJAMIN) if he would agree that it would be reasonable and appropriate for Illinois to receive a substantial amount of fiscal year 1982 priority primary funding,

given its past performance and clear commitment to future progress on its

two priority primary routes.

Mr. BENJAMIN. Mr. Chairman, will the gentleman yield?

Mr. MADIGAN. I yield to the gentleman from Indiana (Mr. BENJAMIN).

Mr. BENJAMIN. Yes, I agree that Illinois has clearly demonstrated a commitment to constructing its priority primary routes and is ready and willing to obligate large sums in fiscal year 1982. Consequently I feel that Illinois should be considered for a substantial portion of the fiscal year 1982 priority primary funds, and I would trust the Department of Transportation would act accordingly.

Mr. MADIGAN. I want to thank the gentleman for his answer and again thank the gentleman from Pennsylvania (Mr. Coughlin) for yielding.

Mr. BENJAMIN. Mr. Chairman, I yield 6 minutes to the gentleman from Massachusetts (Mr. Studds).

Mr. STUDDS. Mr. Chairman, intend to offer an amendment which would provide the Coast Guard with an additional \$84 million in fiscal 1982. enough money-perhaps-to keep pace with inflation.

As chairman of the Subcommittee on Coast Guard and Navigation, I would not be doing my job if I did not take this floor today to issue a warning to all those in this Chamber whose constituents expect the Coast Guard to be there when needed; whether for law enforcement, search and rescue, maintaining aids to navigation, or cleaning up oil spills. The Coast Guard is in deep trouble and unless Congress does something about it, beginning today, the slogan which traditionally has characterized the Coast Guard—"Always Prepared"—will become little more than an ironic joke.

Over the past decade legislation required to prevent and clean up spills of oil and hazardous substances, to regulate foreign fishing within 200 miles of our coast, to prevent the smuggling of drugs, and to recover the oil, minerals, and energy found in the sea has burdened the Coast Guard with a plethora of new and complicated duties with which they are demonstrably unprepared to deal.

Consider, for example, that: The number of Coast Guard cutters has declined from 339 to 246 in the past decade;

The entire fleet of Coast Guard vessels averages more than 27 years in age; the cutter Cuyahoga, which sank in 1978 at the cost of 11 lives, was 52 years old:

Many Coast Guard vessels would be unable to meet the safety or manning standards imposed by the Coast Guard itself on merchant ships;

The average Coast Guard enlistee now has less than 2 years experience; reenlistment rates have declined by one-half since 1976:

A recent General Accounting Office study found that "The Coast Guard's responsibilities have increased without a commensurate growth in its resources;"

The Coast Guard estimates it must nearly double in size by 1990 to meet its responsibilities mandated by law: and

An OMB initiated study found that: Adequate maintenance has not been performed, personnel are undertrained for required tasks, people are required to work excessive overtime, and large numbers of experienced personnel are leaving.

You should remember that Coast Guard personnel must be capable of handling a variety of tasks in a competent, professional manner. Enforcement of the 200-mile fishing limit against foreign fishing boats requires people who are part policemen, part diplomats, part linguists, part accountants, part marine biologists, and fulltime sailors. But there is not enough time-and not enough money-to give Coast Guard recruits the training they need, and there exist too few incentives to keep new recruits around long enough to develop needed skills.

For those concerned with our Nation's defense, let me remind you that the Coast Guard is one of the five branches of the armed services of the United States, and our oldest seagoing armed force. From skirmishes with the ships of pre-Napoleonic France until the war in Vietnam, the Coast Guard has been involved in every war and nearly every other significant military action in U.S. history. Just 6 months ago, a joint Navy-Coast Guard Board identified three new and five expanded wartime missions for the Coast Guard. Last March when the Vice Chief of Naval Operations testified before our subcommittee he said:

I hope this presentation here, which is rather a first for the United States Navy and the Coast Guard, will be a precursor of other discussions we are going to have with responsible committees for the Armed Services in Congress to recognize that we do need the Coast Guard desperately.

We do want them to receive their fair share of the real growth for defense, which is our primary concern . . . We expect them to be there. We expect them to carry out certain wartime functions and the more units we have of the Coast Guard, the more flexibility the President is going to have. We are going to need every ship.

But Coast Guard ships are being held in port because they are often unsafe to sail. Unlike the other armed services, the Coast Guard budget has been reduced in real terms; its civilian personnel cut, and planned procurement of new equipment shelved.

The amendment I am offering is extremely modest. It recognizes the most urgent needs of the moment, but does not address the basic Coast Guard problems, which require a quantum leap in funding over the next few years. In cooperation with the subcommittee's ranking minority member, DON YOUNG, our subcommittee is undertaking this year a comprehensive review of all the roles and missions of the Coast Guard. We intend to give serious attention to proposals aimed at charging user fees for some of the services provided by the Coast Guard, and we are looking for ways to reduce the number of duties which are placed on the agency by law. Obviously, we have reached a time of critical change for the Coast Guard, a time during which the Nation itself, speaking through the Congress, is being asked to redefine the Coast Guard and its missions, and to decide whether we are truly serious about having a Coast Guard at all.

This is clearly not a partisan issue. Representative Young, Senators Packwood and Stevens, and numerous other Republicans have spoken out repeatedly this year in behalf of additional funds for the Coast Guard.

Let me remind you that the money I am proposing here will be used simply to allow the Coast Guard to stand still, to tread water, to cope with the rising cost of fuel, the lifeblood of its missions, and to meet its most basic and most urgent maintenance, acquisition, and training needs.

I, for one, am tired of stories about Coast Guard vessels so decrepit they cannot be put to sea; I am tired of stories about Coast Guardmen being killed when their 52-year-old-vessel sinks; let us all remember, in closing, that it was only a year ago that the Coast Guard plucked hundreds of frightened tourists from a burning cruise ship in near-Arctic waters off the Alaskan coast. It will be to no one's advantage if the next time the alarm bell sounds, the distress call emanates from the Coast Guard, itself

Mr. COUGHLIN. Mr. Chairman, I have no further request for time and yield back the balance of my time.

Mr. BENJAMIN. Mr. Chairman, I yield 10 minutes to the gentleman from California (Mr. Anderson), chairman of the Surface Transportation Subcommittee.

Mr. ANDERSON. Mr. Chairman, I want to thank Chairman Benjamin for yielding.

I would like to congratulate the gentleman from Indiana for his efforts this year, his first, in producing what can generally be regarded as a fine piece of legislation during what we can all agree are trying times. At this particular point in our consideration of the bill, though, I would request the attention of our colleagues as we address a particular problem—a serious problem—that several of us have, not with the legislation itself, but with parts of the committee report, 97–186, accompanying the bill.

Mr. SHUSTER. Mr. Chairman, will the gentleman yield for a question?

The report accompanying this Department of Transportation appropriations bill directs that priority consideration be given to funding certain projects under the priority primary program. What is your understanding of the effect of these designations in the aforesaid report?

Mr. ANDERSON. I thank the gentleman for asking. We are certainly pleased that the Appropriations Committee has decided to let us know which projects they think should be accorded priority consideration when we deliberate on our highway legislation. However, the designation of the four projects in House Report No. 97-186 must certainly not be accorded the force and effect of that legislative history which is, from time to time, developed for the priority primary program by the Public Works and Transportation Committee.

Mr. CLAUSEN. If the gentleman will yield to me, is it your understanding that the Appropriations Committee has jurisdiction to designate specific transportation projects such as the ones contained in the priority primary program?

Mr. ANDERSON. I thank the gentleman from California, the ranking minority member on the House Public Works and Transportation Committee. As you know, the jurisdiction for designating specific projects within the priority primary program rests, in the House, solely with the Public Works Committee, as this is a contract authority program. All such programs have been traditionally recognized to be under the exclusive jurisdiction of the Public Works Committee.

Mr. HOWARD. If the gentleman will yield. Let me say that, clearly, any reading of the law will confirm the statement just made by the gentleman from California. The Public Works and Transportation Committee has exclusive jurisdiction in the House of Representatives over the creation of contract authority for the Federal-aid highway program-which is to say that the Public Works Committee has jurisdiction over both the authorization of Federal-aid highway funds and creation of budget authority which permits the obligation of Federal-aid highway funds. Therefore, the Public Works Committee has sole responsibility in the House for setting priorities for the Federal-aid highway program, and for the program's direction. The Appropriations Committee should not be involved in these activities.

Mr. SHUSTER. I would certainly concur with the gentleman's assessment of the situation, and say that, not only should the Appropriations Committee not be involved in these activities, but that they have no authority to be involved with these activities. But let me point out to my colleagues that not only are projects listed in the

report under the priority primary program, but that 10 bridge projects are also mentioned, with language that they receive priority consideration in receiving discretionary bridge rehabilitation and replacement funds. The report also recommends that two highways be considered for emergency relief funds. What is the understanding of my colleagues on the effects of these listings?

Mr. CLAUSEN. If the gentleman will yield, these are interesting listings indeed. But, again, the force and effect of this report language pertaining to the discretionary bridge and emergency relief programs is similar to the language concerning the priority primary program. To reiterate, the designation of Federal-aid highway projects funded with contract authority rests solely, in the House, with the Public Works and Transportation Committee. The Subcommittee on Surface Transportation, and the House Public Works and Transportation Committee will, I am certain, be glad to give due consideration to those recommendations of our Appropriations Committee which are contained in House Report No. 97-186. But until those projects are designated by the Public Works and Transportation Committee, they should not be accorded any weight regarding the legislative history.

Mr. HOWARD. I concur with the statement of my colleague, the gentleman from California. The Federal-aid highway program would be better served if four different committees had not involved themselves naming projects and setting priorities for the priority primary and discrebridge programs. To the tionary extent that this occurs, these programs become more difficult to administer. Priority primary and discretionary bridge projects have been added with absolutely no regard to the availability of Federal funds.

Mr. ANDERSON. If the gentleman will yield. The whole purpose of Public Works Committee contract authority programs is to insure for the grantee that the full faith and credit of the U.S. Government will be available to satisfy the contractual obligation inherent in the ability to obligate contract authority funds. Unlike other programs, the role of the Appropriations Committee is simply to provide liquidating funds necessary to fulfill the Government's contractual commitment. For this reason, the authorizing committee is granted full jurisdiction over the law and legislative history involving projects to be funded through such programs.

Mr. HOWARD. The gentleman is correct. If the recommendations made in this committee report are heeded by the administration—and I believe they should not be—these programs

will be burdened with far too many projects, and a level of funding which was once sufficient but which would now certainly be woefully inadequate. For this very reason, the Public Works and Transportation Committee turned down many requests this year to add additional priority primary and discretionary bridge projects as part of our committee's consideration of H.R. 3210, the committee's 1-year highway bill. We felt it would be irresponsible and certainly not in the best interests of these programs, or the Nation, to add additional projects at this time. The Public Works Committee may have to consider major program reforms, and perhaps even the drastic measure of eliminating these programs altogether when it takes up a multiyear highway bill next year.

Mr. CLAUSEN. I agree with the chairman in everything he has said, and would only reiterate his point that adding new discretionary projects at this point in time is simply bad public

policy.
Mr. ANDERSON. The addition of projects suggested for designation in the committee report would serve to greatly dilute funds available under these programs for those truly priority projects which have been designat-

ed in past years.

SHUSTER. The chairman Mr. makes an excellent point when he talks about diluting funds available for already designated projects. That is why, this year, recognizing this very problem, I withdrew my request to have a project in my own State designated as priority primary.

Mr. ANDERSON. The gentleman from Pennsylvania, as a knowledgeable member of our committee, and one who has long worked on these matters, was cognizant of the problem, and indeed, was very statesmanlike in

withdrawing his request.

Ms. FERRARO. Mr. Chairman, I rise in support of the bill, and I ask unanimous consent to revise and

extend my remarks.

Mr. Chairman, I would first like to commend the members of the Appropriations Committee, and especially Subcommittee Chairman BENJAMIN, for the work they have done. But I would like to address particularly one matter of major concern to me.

One of the issues that is addressed in the commmittee's report on this bill is the Federal Aviation Administration's proposals to reorganize its regional office structure. On June 12, the FAA had announced plans to consolidate its regional offices, resulting in a reduction from 11 to 6 offices. One of the offices scheduled to be closed was the eastern regional office. which is located at John F. Kennedy Airport in New York, which by the way is the center of operations for airports in the entire middle Atlantic region, including six major hubs.

Many of us whose districts would be affected protested the planned reorganization on the basis that it would impair the FAA's ability to carry out its functions, and would also as severely disrupt the lives of hundreds of agency employees.

Responding to our concerns, Chairman Benjamin took the lead in putting language in the committee report to have the FAA report to the committee on the cost-savings to be achieved by any reorganization before putting

the plan into effect.

I was extremely pleased when last week the FAA announced that it had abandoned its plans to close the regional office in New York as well as the offices in Chicago and Los Angeles, which had also been scheduled to be closed.

I want to thank Chairman BENJAMIN for his assistance in this effort to keep these regional offices open and to insure the efficient performance of

the FAA's functions.

Mr. YOUNG of Alaska. Mr. Chairman, I rise today in support of the amendment offered by Representative STUDDS, chairman of the Coast Guard and Navigation Subcommittee. Although this amendment represents an increase in the amounts reported by the Appropriations Committee, I believe it represents fiscal restraint in that much more may be needed for the Coast Guard to be adequately prepared for its military, enforcement, and safety operations, as well as upgrading its vessels and equipment and adequately training its personnel.

The committee on which Chairman STUDDS and I sit has worked hard this year to arrive at a budget to fully fund the U.S. Coast Guard. This multimission agency is essential to the navigational safety and commerce, as well as the security of our Nation because of the number of maritime functions it performs while being one of our vital military branches. To be adequately prepared for its military enforcement and safety operations the vessels and equipment of the Coast Guard need severe upgrading and additional training will be required for its personnel. This was the focus of the Coast Guard and Navigation Subcommittee this year in its hearings on the Coast Guard budget.

years legislation has heaped additional responsibilities on the Coast Guard. The budget, however, has simply not kept pace with the additional duties. This coupled with inflation and unwarranted administrative budget cuts

As many of us know, during recent

of the past, have taken their toll on the effectiveness of the Coast Guard. Upgrading the Coast Guard results in many-fold returns to this country. That is, the Coast Guard by improving the performance of this military role simultaneously upgrades the perform-

ance of its valuable peacetime missions

and vice versa. Further, full funding will assure the availability and continuance of the Coast Guard as a flexible and responsive agency. The recent experience with the Cuban refugee exodus, which required an agency which could render a humanitarian service as well as professionally bring to bear law enforcement capabilities, indicates the value of the Coast Guard. Numerous Government reports dramatically demonstrate this need for additional funding.

As the Representative for Alaska, I am concerned with the adverse effects fisheries enforcement and on search and rescue efforts. As you may know, the State of Alaska has a larger coastline and Outer Continental Shelf area than the rest of the United States. Therefore, Alaska has had and will continue to have an ever-recurring need for Coast Guard coverage off its vast coastline. I have been greatly concerned regarding adequate search and rescue coverage in the Gulf of Alaska. The recent rescue of passengers on the cruise liner, Prinsendam, dramatically underscores the potential perils in this region. In addition, increased shipping has occurred to and from the Port of Valdez generated by the Alaskan pipeline. This is not to mention the numerous smaller fishing vessels which operate in this area producing a vital source of protein for the United States. Quick, responsive search and rescue in this region is a matter of life and death. Without adequate funding these pressing issues cannot be addressed.

As the ranking minority member of the Coast Guard and Navigation Subcommittee. I am concerned with the effects that shortages of funds would have throughout the Nation. The functions performed by the Coast Guard are by no means isolated in one section of the country. Coast Guard functions facilitate waterborne commerce and other activities in every region of the United States along the east, west, and gulf coasts as well as the Great Lakes and the extensive inland waterway system. The detrimental consequences of not adequately funding the Coast Guard therefore cannot be taken lightly. One continuing concern of mine is the ability of the Coast Guard to purchase fuel which is the lifeblood of its essential lifesaving, safety, and enforcement missions. This was of particular concern to us in our hearings and we believe is addressed in the amendment offered by Mr. STUDDS. In addition, needed operating capital and research items of primary importance are covered.

Mr. Chairman, we have heard a number of arguments that cutbacks can be made in the Coast Guard. I can assure you that I view nonessential functions and activities in a dim light. In this regard the Coast Guard and Navigation Subcommittee is undertaking an extensive series of oversight hearings this year which has not been done in quite some time. Therefore, changes in future recommendations by our subcommittee will be made where necessary and justified. For the time being, however, I believe it is necessary for us to approve funding at a level which will permit the Coast Guard to perform its current missions which are so essential to the seafarers of this Nation.

Therefore, I strongly urge adoption

of this amendment.

Mr. SAVAGE. Mr. Chairman, I support passage of H.R. 4209, the transportation and related agencies appropriations bill for fiscal year 1982.

While my support for passage of this legislation was not without reservation, I do believe that, given the prevailing climate around here, this bill is just about the best that someone of my persuasion could reasonably expect.

However, I do want to make a few observations about transportation funding in the context of budget developments of the last few months.

If history has taught us anything about transportation, it is that Government involvement in and support of transportation are key elements of economic growth and a better way of life for all who live in this country. Therefore, it is essential that we have continued—and increased, Federal participation in helping transportation if we ever are to have the economic ren-

aissance Reagan talks about.

It is highly disturbing to know that many of our Nation's highways, bridges, and public transit systems are deteriorating at an alarming rate. For instance, my hometown of Chicago is now in the throes of a mass transit financial crisis. Many other urban areas-not just in the Northeast-Midwest regions, are, or soon will be, facing similar transit-financing problems. And what does Reagan do? He gives localities the shift-shaft. While seeking to return authority to States and localities, he puts them on notice that they cannot expect future financial assistance in certain areas to help meet their budgetary obligations.

Make no mistake about it: I am both aware and supportive of the need to curb Government waste in spending and to curb inflation. But, I am also aware that the failure to upgrade and maintain our transportation system, which is the lifeline of our economy, may halt economic and industrial de-

velopment.

In its committee report, the House Committee on Appropriations states that in its zeal to reduce Federal spending to curb inflation—presumably which large deficits helped to produce—the committee "* * * tempered its desire to improve our nation-

al transportation system," and "* * * reduced the budget authority in the accompanying bill to a level that is nearly \$1.7 billion, approximately 13 percent, below the amount recommended for similar programs in fiscal year 1981."

I am not certain that this is something that the committee should be proud of. It should be clear that improved and lower cost transportation provides enhanced competition and economic growth. We need to rededicate ourselves to the sound proposition that the Federal Government should have more than simply a diminishing role in transportation policy and financing.

• Mr. CONTE. Mr. Chairman, I rise in support of the committee bill for the Department of Transportation and related agencies appropriations for fiscal year 1982. The bill provides \$11.101 billion in new budget authority for the programs of the Department of Transportation and related agencies. This represents an amount \$1.905 million below the President's request and \$1.678 billion below the total amount appropriated for these programs for fiscal year 1981.

Funding levels for some of the major programs are: \$1.555 billion, together with \$220 million of carryover funds and \$11 million derived by transfer, for the urban discretionary grants pro-gram of the Urban Mass Transportation Administration; a general provision providing for obligations of not to exceed \$8.2 billion for Federal-aid highways; \$1.480 billion for urban mass transportation formula grants; total funding level of \$735 million for continued Amtrak service; \$391 million for the capital acquisition, construction, and improvement programs of the Coast Guard; and approval of the budget request of \$200 million for the Northeast corridor improvement proj-

Mr. Chairman, without the ability to move goods and people cheaply and quickly, the industrial development of our United States would have been impossible. This requirement of efficient mobility is essential if our Nation is to continue to function effectively and prosper. It is clear that our highways, bridges, railroads, waterways, and airports constitute the infrastructure of the American economy. It is imperative that we consider the status of this deteriorating infrastructure. Recent GAO reports indicate that we are not paying adequate attention to our highways and bridges. The committee, however, clearly recognizes the need to reduce Federal spending in an effort to control the high rates of inflation and interest which our economy is experiencing.

The funds in this bill provide for not only the daily transportation needs of our Nation's travelers on the high-

ways, rails, and airways, but also provide for our national defense needs. The Department of Transportation Act declares that the Department should "develop and recommend * * national transportation policies and programs with the full and appropriate consideration of the needs of * * * national defense." This declaration is the genesis for a number of specific grant assistance or regulatory programs within the Department, including the Coast Guard, Federal Aviation Administration, Federal Highway Administration, Federal Railroad Administration, and Research and Special Program Administration. There is a direct and continuing relationship between the requirements of our national defense system and the planning and provision of those transportation services and facilities which are the concern and responsibility of the Department of Transportation.

I urge you to support the committee bill which provides a balanced approach for the maintenance and further construction of our Nation's transportation system, a system which is required if we are to maintain our

national security posture.

Mr. BENJAMIN. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Pursuant to House Resolution 187, title I is considered as having been read and open to amendment at any point.

Are there any points of order against title I?

Are there any amendments to title I?

AMENDMENTS OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Chairman, I offer three amendments to title I. I ask unanimous consent that the amendments be considered en bloc, that they be considered as read and printed in the Record.

The CHAIRMAN. Is there objection to the request of the gentleman from

Indiana?

There was no objection.

The portion of title I to which the amendment on page 6, line 16, relates is as follows:

FEDERAL AVIATION ADMINISTRATION

OPERATIONS

(INCLUDING TRANSFER OF FUNDS)

For necessary expenses of the Federal Aviation Administration, not otherwise provided for, including administrative expenses for research and development and for establishment of air navigation facilities, and carrying out the provisions of the Airport and Airway Development Act, as amended, or other provisions of law authorizing obligation of funds for similar programs of airport and airway development or improvement; purchase of four passenger motor vehicles for replacement only and purchase and repair of skis and snowshoes, \$2,406,200,000 of which not to exceed \$900,000,000 shall be derived from the Airport and Airway Trust

Fund and, in addition, \$3,400,000 from unobligated balances in the appropriations for "Civil supersonic aircraft development", "Civil supersonic aircraft development ter-mination", and "Research and development": Provided, That there may be credited to this appropriation, funds received from States, counties, municipalities, other public authorities, and private sources, for expenses incurred in the maintenance and operation of air navigation facilities: Provided further, That none of these funds shall be available for new applicants for the second career training program: Provided further, That not to exceed \$1,027,275,000 shall be available for all activities funded under this heading except personnel compensation and benefits for the following subactivities: Operation of air route traffic control centers, Operation of airport traffic control towers, Operation of flight service stations and field maintenance.

The amendments are as follows:

Amendments offered by Mr. Benjamin: On page 3, after line 2, insert the following:

COMMUTER RAIL SERVICE

For necessary expenses to carry out the commuter rail activities authorized by section 601(d) of the Rail Passenger Service Act (45 U.S.C. 601), as amended, \$20,000,000 and for necessary expenses to carry out section 1139(b) of Public Law 97-35, \$2,000,000.

On page 6, line 16, strike out \$2,406,200,000 and insert in lieu thereof \$2,306,200,000 and strike out \$900,000,000 and insert in lieu thereof \$850,000,000 and on page 7, line 2, strike out the colon and all that follows down to and including the word "maintenance" on line 8.

On page 20, after line 3, insert the follow-

RAILROAD RESTRUCTURING ASSISTANCE

The Secretary of Transportation is hereby authorized to expend proceeds from the sale of fund anticipation notes to the Secretary of the Treasury and any other moneys deposited in the Railroad Rehabilitation and Improvement Fund pursuant to sections 502, 505-507 and 509 of the Railroad Revitalization and Regulatory Reform Act of 1976 (Public Law 94-210), as amended, and section 803 of Public Law 95-620, for the St. Louis Terminal restructuring project, in amounts not to exceed \$50,000,000.

INVESTMENT IN FUND ANTICIPATION NOTES

For the Secretary of the Treasury for acquisition, in accordance with section 509 of the Railroad Revitalization and Regulatory Reform Act of 1976, as amended, and section 803 of Public Law 95-620, of fund anticipation notes, \$50,000,000.

Mr. BENJAMIN. Mr. Chairman, these three amendments are simply designed to update our bill to account for several major actions which have happened since our bill was reported out of committee.

As you know, our bill was reported July 17 of this year. Since then, we have had the air traffic controller strike and the passage of the omnibus reconciliation bill.

The first amendment in this package would reduce the operations appropriation of the Federal Aviation Administration by \$100 million. This reflects the fact that more than 11,000 termination notices have been sent out by the FAA as a result of the air traffic controller strike.

The savings in FAA operating costs resulting from this action should amount to more than \$400 million in fiscal year 1982. However, this savings will be reduced by the added costs associated with training an increased number of new controllers. We have attempted to obtain a precise figure from FAA on how many new controllers they plan to hire during the upcoming year. To date, we have not received any specific information on this matter.

We, of course, want to provide the FAA with sufficient funds to safely operate and maintain our air transportation as well as to increase the system's capacity to the level that existed prior to the strike. If the Department or the FAA believes that additional funds will be needed to accomplish this during fiscal year 1982, we will consider these requirements in connection with any supplemental request that is submitted. Our estimate, however, is that a minimum of \$100 million should be saved as a result of the reduction in FAA employment.

The remaining two amendments would provide \$20 million in commuter rail subsidies for the Regional Transit Authority in Chicago, \$2 million to start up the newly authorized Amtrak Commuter Services Corporation, and \$50 million to purchase redeemable preference shares for the rail restructuring project in East St. Louis, Ill. Both of these amendments are consistent with new authorizations contained in the omnibus reconciliation bill.

In toto, these amendments would save an additional \$28 million from the bill that is presently before us, and I urge their passage.

Mr. COUGHLIN. Mr. Chairman, I rise in support of the amendments.

Mr. Chairman, it is indeed difficult to estimate the exact amount of money that will be saved as a result of the strike of the air controllers. It is difficult, because we do not know the costs exactly of training new controllers, and we do not know the costs of continuing to operate our air traffic system. I think that the amendments that have been proposed by the chairman are reasonable amendments and that we can anticipate some savings. I hope that the committee will adopt the amendments.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Indiana (Mr. Benjamin).

The amendments were agreed to. AMENDMENTS OFFERED BY MR. STUDDS

Mr. STUDDS. Mr. Chairman, I offer amendments, and I ask unanimous consent that they be considered en bloc

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The CHAIRMAN. The Clerk will report the amendments.

The portion of title I to which the amendments relate is as follows:

COAST GUARD

OPERATING EXPENSES

For necessary expenses for the operation and maintenance of the Coast Guard, not otherwise provided for; purchase of not to exceed eight passenger motor vehicles, for replacement only; and recreation and welfare, \$1,402,898,000, of which \$244,073 shall be applied to Capehart Housing debt reduction: Provided, That the number of aircraft on hand at any one time shall not exceed one hundred and seventy-nine exclusive of planes and parts stored to meet future attrition: Provided further, That none of the funds appropriated in this or any other Act shall be available for pay or administrative expenses in connection with shipping commissioners in the United States: Provided further, That none of the funds provided in this Act shall be available for expenses incurred for yacht documentation under 46 U.S.C. 103 except to the extent fees are collected from yacht owners and credited to this appropriation, and, notwithstanding any other law, the Secretary may prescribe fees to recover the expenses of yacht documentation

Acquisition, Construction, and Improvements

For necessary expenses of acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto; to remain available until September 30, 1986, \$391,000,000.

ALTERATION OF BRIDGES

For necessary expenses for alteration or removal of obstructive bridges, \$17,500,000, to remain available until expended.

RETIRED PAY

For retired pay including the payment of obligations therefore otherwise chargeable to lapsed appropriations for this purpose, and payments under the Retired Serviceman's Family Protection and Survivor Benefit Plans, \$279,000,000.

RESERVE TRAINING

For all necessary expenses for the Coast Guard Reserve, as authorized by law; maintenance and operation of facilities; and supplies, equipment, and services, \$50,900,000.

RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

For necessary expenses, not otherwise provided for, for basic and applied scientific research, development, test, and evaluation; maintenance, rehabilitation, lease, and operation of facilities and equipment, as authorized by law, \$29,730,000, to remain available until expended: Provided, That there may be credited to this appropriation, funds received from State and local governments, other public authorities, private sources and foreign countries for expenses incurred for research, development, testing and evaluation.

OFFSHORE OIL POLLUTION COMPENSATION FUND

For necessary expenses to carry out the provisions of title III of the Outer Continental Shelf Lands Act Amendments of 1978 (Public Law 95-372), \$9,550,000, to be derived from the Offshore Oil Pollution Compensation Fund and to remain available until expended. In addition, the Secretary of Transportation is authorized to issue to the Secretary of the Treasury, to meet the obligations of the Fund, notes or other obligations of the Fund, notes or other obligations.

gations pursuant to section 302 of the Amendments in such amounts and at such times as may be necessary.

COAST GUARD SUPPLY FUND

To increase the capital of the Coast Guard Supply Fund, \$1,500,000, to remain available until expended.

DEEPWATER PORT LIABILITY FUND

For necessary expenses to carry out the provisions of section 18 of the Deepwater Port Act of 1974 (Public Law 93-627), \$5,000,000 to be derived from the Deepwater Port Liability Fund and to remain available until expended. In addition, the Secretary of Transportation is authorized to issue, and the Secretary of the Treasury is authorized to purchase, without fiscal year limitation, notes or other obligations pursuant to section 18(f)(3) of the Act in such amounts and at such times as may be necessary to meet the obligations of the Fund.

The Clerk read as follows:

Amendments offered by Mr. STUDDS: On page 3, line 9, strike "\$1,402,898,000" and insert in lieu thereof "\$1,450,000,000".
On page 4, line 3, strike "391,000,000" and

On page 4, line 3, strike "391,000,000" and insert in lieu thereof "\$425,000,000".

On page 4, line 24, strike "\$29,730,000"

On page 4, line 24, strike "\$29,730,000" and insert in lieu thereof "\$33,000,000".

Mr. STUDDS. Mr. Chairman, these are the amendments to which I referred in my remarks in general debate. Taken together, they increase funding for the U.S. Coast Guard by some \$84 million. And in so doing, let me point out, although it would increase the spending for the Coast Guard by approximately \$75 million over the President's budget request, would keep funding for this vital agency roughly—roughly—even with inflation. It would just about hold the

Let me, if I can, portray to my colleagues the urgency for this modest amendment. First of all, the U.S. Coast Guard is in very, very serious trouble. The average Coast Guard cutter is 27 years old. The average naval vessel is 14 years old. The number of Coast Guard cutters has declined in the past 10 years from 339 to 246.

As an example, the cutter Cuyahoga, which sank 3 years ago, costing 11 Coast Guard lives, was 52 years old.

Increasingly, scheduled Coast Guard patrols have been canceled throughout this country due to severe maintenance problems. The Coast Guard is able to meet only 20 percent of its goal for intercepting the smuggling of drugs into the United States, and its goal is to stop 75 percent of it.

Coast Guard search and rescue missions—and I would ask my colleagues to listen to this—have become steadily less successful proportionately in saving property, which we can put a dollar figure on, and in saving human lives, which no one would want to put a dollar figure on.

The average Coast Guard enlistee has less than 2 years of service. On May 1, of this year, the Coast Guard shut down all marine environmental patrols in this Nation, it shut down 90 percent of its Pacific area drug enforcement, it shut down 20 percent of its Pacific area fisheries enforcement, and it shut down 60 percent of its Atlantic fisheries enforcement because it had run out of fuel and could not afford any more fuel through the end of this fiscal year at the end of this month.

Second, I make the point that the missions of the Coast Guard are both important and they are cost effective, something that one cannot say about all components of this Government of ours.

Coast Guard search and rescue efforts save 6,000 lives a year. And I defy anyone to attempt to put a dollar figure on that.

In addition to that, the value of property saved by the Coast Guard is equal to the entire operating budget of that agency for each of the past 2 years.

I ask you how many agencies of the Federal Government can state that, in property alone saved which otherwise would have been lost. The Coast Guard has met its operating budget in each of these 2 years.

The Coast Guard annually seizes, for example, an amount of marihuana equal in value to the entire operating budget of the agency.

Coast Guard law enforcement prevents the theft of our fisheries resources by foreign fishery vessels.

Coast Guard aids to navigation and commercial vessels safety programs prevents an enormous amount of damage to life, to property, and to the environment every year.

The Coast Guard has played an active role in every foreign war and in almost every significant military operation in the history of the United States. More and more the oceans are becoming the scene of military, diplomatic, and economic competition, and Coast Guard skills will grow steadily more vital in future years.

Third, let me make the point that as the duties imposed by the Coast Guard by this Congress are increasing, the resources given to the Coast Guard by this Congress to fulfill those duties are shrinking.

Point: The administration's immigration policy apparently will not require the use of Coast Guard cutters to halt illegal immigration from Haiti. A Navy-Coast Guard task force recently identified three new military missions and five expanded military roles for the Coast Guard. Expanded oil drilling operations in the Arctic and on the Outer Continental Shelf throughout the United States, deep seabed mining and the likely expansion of ocean dumping will require new Coast Guard resources.

The administration's budget request for the Coast Guard is less than 6 percent over the figures for last year, which is to say less than enough to keep pace even with inflation.

The administration has ordered a reduction in civilian personnel amounting to a 14-percent cut over 3 years. The GAO reported last year that the Coast Guard's responsibilities have increased without a commensurate growth in its resources.

Mr. WILSON, Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I yield to the gentleman from Texas.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

(On request of Mr. Wilson and by unanimous consent, Mr. Studds was allowed to proceed for 5 additional minutes.)

Mr. WILSON. Mr. Chairman, I want to associate myself with the gentleman's amendments and compliment him on them.

Does the gentleman agree—he touched on it briefly—that certainly in the case of illegal aliens, the Coast Guard's reduced role and preventing illegal aliens from entering the country and, once they get here, certainly cost more than the gentleman's amendments would do?

□ 1145

Mr. STUDDS. I could not agree with the gentleman more. If the Coast Guard had a dollar for each speech about the problems of illegal aliens which has been given in this body, it would have less of a problem.

Let me say a word about the substance of the amendment. The amendment before us would increase Coast Guard funding by \$84 million over that approved by the Appropriations Committee in the bill before us. That is \$78 million more than the administration's request. The new level would be that approved by the Merchant Marine and Fisheries Committee in the 1982 Coast Guard authorization bill, which is on the calendar of the House at this moment and it is our judgment it is the minimum amount necessary for the Coast Guard to function during 1982 at a level equal to that of the past year.

No more, no new funds, simply to keep us even with inflation. The added funds would be used for new personnel in order to permit performance of long overdue maintenance and training activities, which would otherwise require cutbacks in normal operating missions, such as law enforcement, and search and rescue. It would also be used to make a small dent in the Coast Guard's billion dollar backlog of deferred equipment, procurement, and maintenance projects.

I would ask my colleagues, particularly those in great numbers who have given speeches in the past few months about the problem of Haitian and

Cuban refugees, about the problem of illegal immigration in this country, about the problem of how we interdict the illegal drug trade coming into this country, about the loss of human lives at sea, about the increasing threats to the sanctity of the marine environment because of the extension of offshore drilling activities, to give some thought to how very hollow those speeches are going to sound if those problems continue to grow precisely because we have refused to put even a minimum amount of resources where our speeches were.

Remember, I plead with the Members, that the Coast Guard cannot save lives, it cannot arrest drug smugglers, it cannot halt illegal immigration, it cannot maintain aids to navigation, it cannot clean up oil spills, and it cannot maintain military readiness essential to the defense posture of this country and keep an eye on foreign fishermen if it cannot buy fuel, if it cannot operate safely, and if it cannot

train its personnel.

Let me plead with my colleagues, the amendment before us is modest in the extreme. It is my hope and that of the members of the Subcommittee on the Coast Guard that in the coming fiscal year, in the following year, we can come to the Members with a comprehensive review of all of the missions of the Coast Guard and with some very serious proposals with respect to whether or not we wish to have a U.S. Coast Guard.

In the meantime, I plead with the Members to support an amendment, as modest as this, so that at the very least we will not be going further backward with an agency which is perhaps as popular and as constructive and as useful as any component of the

Federal Government.

Mr. LOWRY of Washington. Mr. Chairman, will the gentleman yield? Mr. STUDDS. I yield to the gentle-

man from Washington.

Mr. LOWRY of Washington. I thank

the gentleman for yielding.

As a member of the subcommittee of the gentleman in the well, I rise in strong support of this amendment. I believe every member of our subcommittee, after looking at the responsibilities of the Coast Guard, and the drastic underfunding, believes this amendment is a necessity if we are to provide for the vital economic and defense interests of this Nation.

I compliment the gentleman and urge the adoption of his amendment.

Mr. STUDDS. I thank the gentle-

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I yield to the gentleman from Florida.

Mr. YOUNG of Florida. I thank the

gentleman for yielding.

Mr. Chairman, the Coast Guard has

fellow Americans, and nowhere in the United States has its impact been greater than in my State of Florida.

We could fill this Chamber many times over with people from my State whose lives have been touched by the Coast Guard. In fact, Mr. Speaker, there are 6,000 people throughout the Nation who are alive today because of the Coast Guard's emergency actions last year alone.

Saving lives is only one of many Coast Guard responsibilities. Few people realize that the Coast Guard is our first defense against an enemy attack on our country's shorelines. The Guard also plays an active role in our Nation's defense away from the coasts. It has been involved in every foreign war and most of the significant military conflicts in our Nation's history. And, as you know from recent developments in the Mediterranean, the seas are becoming the scene of more and more military conflicts. which the Coast Guard must continue to prepare for. Realizing the importance of the Coast Guard, the Navy has identified five expanded military roles for the Guard. And a Navy-Coast Guard task force recently identified three new military missions for it.

The Guard is, however, being asked to carry out these newly expanded duties with seriously outdated equipment. The average Coast Guard ship is 27 years old. Not only is the equipment obsolete, it is also becoming unsafe for our guardsmen who man

the vessels.

The amendment my colleague from Massachusetts is offering will add \$84 million to the Coast Guard appropriation to allow for long overdue maintenance and training activities which would otherwise require cutbacks. The increase would also be used to make headway in the Coast Guard's billion dollar backlog of deferred equipment procurement.

Mr. Chairman, the Coast Guard is a vital national resource that is being allowed to fall apart before our eyes. At a time when we are placing a national priority on the combating of our Nation's drug problem, the Coast Guard has been forced to reduce some drug interdiction efforts because it cannot afford to buy fuel for its ships and aircraft.

And while the Guard has had to curtail this vital mission, the administration has recently released an immigration and refugee policy that requires the Coast Guard to stop refugee ships at sea, without providing additional resources to carry out this activity.

Mr. Chairman, you know my record on budgetary restraint. We must continue to carefully examine the areas in the budget where spending can be reduced. However, at a time when we are being asked to approve a \$3.2 billion replenishment for the International repeatedly come to the rescue of our Development Association, we are being

asked to trim back one of the most important and efficent agencies we fund, the U.S. Coast Guard. The amend-ment before us is necessary to the United States and should be adopted.

Mr. SHAW. Mr. Chairman, will the

gentleman yield?

Mr. STUDDS. I yield to the gentleman from Florida.

Mr. SHAW. I thank the gentleman for yielding.

I would also like to extend my expression of support to the amendment that is being offered by the gentleman from Massachusetts and the chairman of the Subcommittee on the Coast Guard.

I would like to, if I may for just a moment, express the problems that we have in Florida, as I believe that the chairman has very adequately and precisely expressed an overview of the problems that the Coast Guard has in operating under a financial hardship.

In Florida, right now, we have a crisis. We have a war going on in the Caribbean, one that we are not even winning, one we are not even funding. We are undermanned. We are outgunned. We are outequipped. Our first line of defense in south Florida in protecting our borders and protecting the Caribbean is the U.S. Coast Guard.

We have added to it the awesome responsibility of trying to curb or stem the flow of drugs into this country.

The CHAIRMAN. The time of the gentleman from Massachusetts (Mr. STUDDS) has expired.

(At the request of Mr. Shaw and by unanimous consent, Mr. Studds was allowed to proceed for 5 additional minutes.)

Mr. SHAW. If the gentleman will yield further, the Coast Guard has now been charged with the additional responsibility of curbing an even more insidious type of smuggling, and that is the smuggling of people into our country.

This administration has, I believe, come out with a program that will bear fruit and will produce good results; that is the program of interdiction at sea. This administration has voiced that it is going to depend upon the Coast Guard in order to perform this most difficult function, and I might say dangerous function, and one that is going to take extraordinary care, because we are dealing with human lives.

I am hopeful that this interdiction will start shortly. It is long overdue. But we cannot continue to put more and more responsibilities upon the U.S. Coast Guard without funding it. They are not only a law enforcement arm of this country of ours but they are also a military arm, one that we have sorely neglected.

It is sheer folly to expect more and more from the U.S. Coast Guard without additional funding.

Mr. STUDDS. I thank the gentleman for his remarks.

Mrs. SCHNEIDER. Mr. Chairman,

will the gentleman yield?

Mr. STUDDS. I yield to the gentle-woman from Rhode Island (Mrs. SCHNEIDER).

Mrs. SCHNEIDER. I thank the gen-

tleman for yielding.

I rise in support of the amendment offered by the gentleman from Massachusetts.

The amendment, as has already been indicated, would merely increase the appropriations for the Coast Guard by a very modest sum of \$84 million to meet the authorization approved already by the Committee on Merchant Marine and Fisheries on which I serve.

The Committee on Merchant Marine and Fisheries had very far-reaching and careful studies of the difficult conditions that the Coast Guard is currently facing, particularly in regard to its increasing responsibilities in the area of fisheries, in the area of saving peoples' lives, and also in narcotics enforcement.

So I urge my colleagues to join me in support of this amendment and to recognize that the costs are minimal but the benefits will be far reaching.

Mr. STUDDS. I thank the gentle-

woman for her comments.

Mr. DE LUGO. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I yield to the gentle-man from the Virgin Islands.

Mr. DE LUGO. I thank the gentle-

man for yielding.

As a former member of the subcommittee, I rise in support of the amendment offered to the fiscal year 1982 transportation appropriations bill by my distinguished colleague and chairman of the Coast Guard Subcommittee, GERRY STUDDS, that increases the appropriation for the U.S. Coast Guard by \$84 million. As a former member of the Coast Guard Subcommittee I have had the pleasure to work closely with Chairman STUDDS on issues of importance to the Service and I commend him for offering this amendment that will insure that the important and vital services offered by the Coast Guard across the Nation will not be seriously impaired.

For nearly 200 years the Coast Guard has served this Nation through the performance of a variety of maritime enforcement and safety-related missions. For the people of the U.S. Virgin Islands, the presence of a wellequipped Coast Guard is absolutely vital. As you know, the seas off the islands of St. Croix, St. Thomas, and St. John, can often be very treacherous. This often makes it a matter of life and death that the Coast Guard be capable of conducting search and rescue

operations.

In addition to safeguarding life and property that might be imperiled on the high seas, the Coast Guard performs other functions of equal importance, particularly in the area of national security. Among them are: Providing protection against terrorist operations in ports and harbors, conducting coastal intelligence and surveil-lance, directing commercial vessel safety, and providing ship-to-shore communication services. These and other important functions served by the Coast Guard need our support and should not suffer any more than their fair share of budget cuts.

Mr. Chairman, during the hearings on this bill the Commandant of the Coast Guard admitted that the administration's budget request "barely held the line" against inflation, and was no-"quantum leap" near the needed for the Service to perform all of its missions satisfactorily. adoption of the Studds amendment will restore much of that money and will help the Coast Guard to carry out its historical functions. Therefore, I urge my colleagues to support the STUDDS amendment.

Mr. STUDDS. I thank the gentle-

In conclusion, let me point out while feel certain that the committee will feel constrained to oppose the amendment in defense, as committees always are, of their own bill, let me point out that the amendment would raise us to the figure authorized in the bill from the Subcommittee on Coast Guard Committee on Merchant and the Marine.

For those who are a bit nervous at the prospect of additional Federal funding, no matter how worthy the cause, let me quote from Senator PACKWOOD:

We get more bang per buck out of the Coast Guard than almost any other branch of the Government, military, or civilian. I am going to do the best I can to significantly increase your budget.

The Senate, may I say, has passed a Coast Guard authorizing bill of \$162 million above that proposed by the administration, whereas the amendment before us in its almost embarrassing modesty is only one-half of that, \$78 million more than that proposed by the administration, less than half the increase already approved by the U.S. Senate.

It seems to me under those circumstances the very least this body can do is say to the U.S. Coast Guard: "If we are to continue to impose upon you increased legislative responsibilities and mandates, we are going to have to have sufficient respect for you and ourselves and for the intelligence of the people of this country to give you minimal resources needed to do the

I would urge the support of the amendment.

Mr. BENJAMIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment. I regret that I have to oppose this amendment, because I believe the Coast Guard is one of our finest and most cost effective Government agencies. However, in new budget authority this bill, as reported by the committee, is \$1.9 million below the President's request. According to the Congressional Budget Office, the bill is slightly above-about \$3 million-the President's budget. If this amendment is agreed to, the bill would be over the budget and, quite frankly, I am not sure the President would sign it. If this happens, nobody benefits.

In addition, I believe the committee has been more than fair to the Coast Guard, both this year and in past years. In fact, over the past 6 years the total appropriations recommended by the committee for the Coast Guard have exceeded those requested by the President. The amount contained in this year's bill also represents a significant increase over the funding provided in previous years. For example, in fiscal year 1977-just 5 years ago-the Congress appropriated \$1.3 billion for the Coast Guard. This year's bill includes nearly \$2.2 billion, an increase of \$900 million or about 70 percent in just 5 years. The increase we are recommending over fiscal year 1981 is \$146 million

Let us examine how the Coast Guard was affected by this year's budget reductions. For operating expenses and acquisition, construction, and improvements the Carter budget included \$1.787 billion. This was reduced to \$1.778 billion by the Reagan budget, a reduction of only \$9 million. For these two appropriations, we are recommending a total of \$1.794 billion, which is \$16 million more than the Reagan budget request and \$7 million more than the original Carter budget. To put this in its proper perspective, I should point out that the other programs within the Department of Transportation have been reduced by approximately 20 percent from the levels proposed in the original January budget.

However, the Coast Guard has been increased. More specifically, in terms of the A.C. & I. account, the bill that we have before us prior to the amendment being offered is \$16 million over budget. In research it is at the budget. In operating expenses, it is at the budget.

We have also directed the Department to conduct a new roles and mission review to sort out those programs which might be eliminated or transferred to other public or private activities as well as those activities which can and should remain in the Coast Guard.

The Department has indicated that this study will be completed by the first quarter of 1982 and it is our

intent to use this as the basis for making our budgetary decisions for

fiscal year 1983 and beyond.

As I have mentioned, I believe the Coast Guard is an important component of our Nation's transportation system. But so are the Federal Highway Administration, the Urban Mass Transportation Administration, and all the other DOT operating administrations. I do not think we should be adding more funds to the Coast Guard when the committee has already added funds. This is particularly true when all the other transportation programs have been significantly reduced.

Now, as I urge this amendment to be defeated, I recall some of the personalities who advocate its adoption. I remind the Members that many of them voted for Gramm-Latta I and

Gramm-Latta II.

The constraint that we have placed on this subcommittee is to live within the framework of those actions which have been hailed by many of the Members. If we adopt this amendment, it will place us about \$55 million over the budget.

In addition, the request made by this amendment alludes to an authorization bill that was reported out of the Committee on Merchant Marine and Fisheries but never adopted by this

body.

I ask my colleagues not to bust this bill. There was no attempt by this amendment to take funds out of any other transportation agency, only to add \$84 million, and we do not have \$84 million additional funds.

I ask that the amendment be defeat-

ed.

Mr. COUGHLIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in reluctant opposition to the amendment.

The distinguished chairman of the subcommittee has very correctly stated the proposition that we have before us.

I have great, great admiration for the Coast Guard. I have great sympathy for the need to increase funding for the Coast Guard as time goes on and, in fact, this subcommittee did substantially increase the funding for the Coast Guard over the budget request.

I have concern about the problem of drug running into the United States, and that is one of the Coast Guard's main missions, and it is an important mission.

I serve on the Select Committee on Narcotics Abuse and Control and it is an increasingly serious problem.

But as with so many other things, at some point we have to say that is all we have, that is all we can spend, that is all that there is in the budget.

There are so many other good programs that we would like to add money to. This is a good program. We

would like to add money to this. But at some point we have to say that is where we are, that is all we can spend, that is all we can do.

And as the distinguished chairman of the subcommittee has pointed out, if we adopt this amendment, we will bust the budget.

□ 1200

We will bust the section 302 allocation and this bill will be much more likely to be subject to a veto than it already is.

So I would urge my colleagues not to tempt fate, not to start a string of amendments that will bust the budget, by adopting this amendment. I hope the amendment will be opposed.

Mr. SHAW. Mr. Chairman, will the

gentleman yield?

Mr. COUGHLIN. I would be happy to yield.

Mr. SHAW. Mr. Chairman, I would like to point out as a fellow member of the subcommittee actively involved with the hearings on this that the responsibility of the Coast Guard has been expanded by the stated intention of this administration since such time as we had hearings.

I think it is important in this particular aspect to reexamine what this is going to do to our Coast Guard budget. We are right now in this country spending tens of millions of dollars to support and to process and to attempt to deport the illegal aliens that have come into just south Florida. With interdiction at sea, turning these people around before they get into the territorial waters of the United States, in my opinion will in itself come out with a great benefit in dollars to this country, dollars saved from having to care for these people once they reach our shores illegally. I think this interdiction at sea is going to be of greater expense to the Coast Guard. It is going to require the diversion of existing equipment and personnel from much needed areas in order to take about this new very difficult process.

This I do not think was contemplated by any of us in the subcommittee hearings. Because of this, I think it is most important that we adjust at this particular juncture and support the amendment and increase the budget.

Mr. COUGHLIN. I appreciate the gentleman's feelings on this and I appreciate the seriousness of the problem of illegal aliens.

I appreciate the mission of the Coast Guard in that connection; but as I said earlier in my remarks, we can say that of so many other things that come before this House.

I still hope the amendment will be opposed.

Mr. HUGHES. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong support of the Studds amendment. I do so

reluctantly, because I am mindful of the straitjacket in which the able chairman of the subcommittee and ranking minority member find themselves as a result of Gramm-Latta I, II, and what have you.

I have listened quite attentively to those who have suggested that we just have so much money. I agree with that. It is a matter of ordering and reordering priorities; but if you think in terms of the new functions that we have given to the Coast Guard over the last several months, as my colleague, the gentleman from Florida, just referred to, we can understand how they have been stretched so thin that they have gotten to the point where they cannot do a decent job on anything that is within their jurisdiction.

That is what has happened in the area of law enforcement, whether you talk about drug interdiction, whether you are trying to deal with the flow of illegal immigrants in this country in the southeastern part of the country, whether you are talking about environmental constraints that they have to enforce, whether you are talking about air and sea rescue. They have had to cease many of these operations because they do not have enough fuel.

When you think that the entire Coast Guard budget is less than one aircraft carrier, you have got to begin to wonder where our priorities are.

Now, the Coast Guard believes that they interdict about 15 percent of the drug smugglers trying to slip marihuana and other forms of controlled substances into this country, 15 percent.

They had to stop their drug interdiction efforts on the Pacific coast because they did not have enough fuel under the existing budget to maintain their operations.

Just within the past month the Attorney General's task force reported back their recommendations. Among their most major recommendations was a recommendation that we beef up the resources of the Coast Guard. Well, this does not represent beefing up the resources. This represents a retreat.

Now, I say to my able colleague, the gentleman from Indiana, I understand the gentleman's problem. I cannot begin to tell the gentleman how the priorities within the gentleman's committee's jurisdiction should be reordered; but there is something wrong with our priorities when we do not have enough money for the first line of defense for this country, the Coast Guard.

You know, they have been a stepchild, really, of the budget process. There has been some suggestion that we ought to move them perhaps out of the Department of Transportation because they do not get the recognition they deserve. I had my subcommittee on crime in Florida and I listened to law enforcement officer after law enforcement officer testify before our committee in Florida and tell us how things were hopeless in the State of Florida in trying to combat drug interdiction, drug smuggling, the war that is taking place in that part of the country, and the Coast Guard happens to be the major component of our law enforcement efforts. They are hamstrung. Their hands are tied because they have inadequate resources to do a half decent job.

I just hope my colleagues support this modest amendment. It restores \$84 million of that approved by the Appropriations Committee, \$78 million more than was requested by the administration's budget request. It represents what was reported out of our Coast Guard Subcommittee as a minimum amount of funding for this next fiscal year.

I urge my colleagues to support this modest amendment.

Mr. SNYDER. Mr. Chairman, I rise in opposition to the amendment proposed by the gentleman from Massachusetts

Last year, I urged my colleagues to find cost-effective methods of providing essential services and to seize upon every reasonable opportunity to reduce the cost of Government. Apparently, that plea went unnoticed by the gentleman and by others who would support his amendment.

Permit me to bring to your attention some facts which might otherwise be overlooked. For those Coast Guard budget categories which fall within the jurisdiction of the Committee on Merchant Marine and Fisheries, the amounts appropriated under H.R. 4209 exceed the President's fiscal year 1982 authorization request by \$16 million. While such a recommendation by this or any other Congress may not be entirely noteworthy, it is important to highlight the President's original request, for it demonstrates the extent and reasonableness of his commitment to Coast Guard operations for the next fiscal year.

At a time when, as the Members are well aware, many if not most Federal agencies' budget requests were slashed to the bare bones, President Reagan's fiscal year 1982 request for Coast Guard operating expenses, acquisition, construction and improvements, and research and development totaled \$277.4 million above the previous administration's fiscal year 1981 request. I submit that those are substantial increases. Yet, in these fiscally pressing times, the gentleman from Massachuwould ask for an additional \$84,372,000 above those amounts. I find this generosity overwhelming and unjustified, particularly in light of other ongoing examinations and reex-

aminations of Coast Guard missions and performance.

The administration is currently conducting the Coast Guard roles and missions study, due for completion early in 1982. I do not think anyone honestly believes that no change in the Coast Guard's statutory responsibilities, operations, or funding requirements will be the net study output. The central theme is clear: change is in order. At the same time, I am convinced that there are no preconceptions built into the study. In light of these uncertainties, the administration's requested increase in fiscal year 1982 Coast Guard budget authorization is all the more reasonable and adequate. To add an additional \$84.7 million on top of the Appropriations Committee's \$16 million increase, as the gentleman's amendment would do, is simply unwarranted.

I might remind my colleagues of one other highly significant point: The gentleman's amendment is designed to bring the Coast Guard portion of DOT appropriations up to the levels contained in the Coast Guard authorization bill, H.R. 2559, which has been reported to the House but still awaits a rule for consideration. If we adopt this amendment and H.R. 2559, the additional \$100 million-plus is dollars which, by the terms of the Omnibus Reconciliation Act of 1981, must come out of some other transportation-related program or programs. Are my colleagues prepared to take that action? Which program do you want to cut—mass transit, Federal highway aid, the airport and airway development program? It seems much more logical to keep Coast Guard appropriations at or near the President's re-

We have all been asked, and have agreed, to sacrifice some of our personal interests to the overall need for fiscal restraint and economic recovery. And, I am pleased that this Congress has responded in such unselfish fashion. There is no sacrifice in rejecting amendment of the gentleman from Massachusetts. Coast Guard programs are not being cut for fiscal year 1982; they have been proposed for funding at levels above the fiscal year 1981 authorization. Voting against this amendment will keep those increases intact, and without engaging in wildeyed spending. I urge my colleagues to vote "no" on the gentleman's proposal.

Mr. STUDDS. Mr. Chairman, will the gentleman yield?

Mr. SNYDER. Most assuredly.

Mr. STUDDS. Let me just point out to the gentleman that inflation in the past year ran I believe at roughly the level, plus or minus, of 12 percent.

The gentleman is entirely correct. The administration has requested more funds for fiscal year 1982 than for fiscal year 1981; but the point is that they requested 6 percent more

funds, half of that necessary to keep even with inflation; so in real dollars it is not an increase. It is a decrease.

Mr. DAVIS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise to support the amendment and commend the chairman of the Subcommittee on the Coast Guard of the Merchant Marine and Fisheries Committee, the gentleman from Massachusetts.

I want to make a comment before addressing the amendment before us, to both the ranking member on the Committee on Merchant Marine and Fisheries and to the subcommittee chairman of the Appropriations Committee in regard to their comments about those of us who supported the Gramm-Latta proposal; that in supporting this amendment or any other amendment we would be busting the budget.

I do not know about the rest of the Members, but when I voted for the Gramm-Latta proposal, I also indicated to many people that this did not mean that at the appropriate time, on any particular appropriations bill, that would not support an amendment that I felt had some merit. I think that if you will look at my record from here on, I will probably be voting to cut the budget in many more instances than I would be voting to increase the budget; but I do not think that we should ignore an amendment's merits because we will in one individual case be spending more money than the budget resolution calls for, and not give each amendment its opportunity for consideration.

When we talk about the Coast Guard, I know most of us talk about the oceans and what the Coast Guard does in regard to protecting our shores on the oceans. I happen to come from Michigan, a Great Lakes State, and the Coast Guard plays an extremely important role in the Great Lakes and in my particular area the Coast Guard is relied upon very heavily. In many instances during the past year, as a matter of fact during the past 2 years, we have had to deal with circumstances where the Coast Guard has indicated they are going to close one of our facilities.

One such facility is in Grand Marais, Mich., on Lake Superior, where the Edmond Fitzgerald went down and we think we have reached a compromise in that area; but we are asking them now to leave a vessel there so that the auxiliary will have the means to assist those people in need and the Coast Guard, of course, is telling us that they want to move the vessel out of that area, when it becomes auxiliary operated.

I do not think it is in the best interests of the people in this country who need the Coast Guard's services to lower the level of support that the

Coast Guard Subcommittee, of which I am a member, granted in our authorization bill.

There are many instances in which I have had to deal with the Coast Guard involving services on the Great Lakes where their response is that because of budget constraints we have to do this, we have to pull this vessel out, we are going to have to close this facility. I know that if they had the funds available, they would not want to close those particular facilities.

Therefore, I think this is an appropriate amendment and although it does go beyond the amount of dollars in the budget resolution, I believe that it is a worthwhile amendment and I intend to support it.

□ 1215

Mr. BIAGGI. Mr. Chairman, I move to strike the requisite number of

Mr. Chairman, I rise in support of the amendment to the appropriations for the Coast Guard offered by the gentleman from Massachusetts (Mr. STUDDS), the present chairman of the Subcommittee on Coast Guard and Navigation.

I, as the prior chairman of that subcommittee for the past three Congresses, have been very close to the many aspects of Coast Guard operations and am well-versed and knowledgeable of the needs of this service.

Coast Guard missions are important to the public at large. Their service is probably the most cost-effective service our Government has to offer. Their activities touch all of us—from the Great Lakes to the Gulf of Mexico—from the east coast to the west coast and Alaska—and all of the thousands of waterways in our inland navigational system.

Time and time again, we hear of calls for Coast Guard assistance. More and more duties are being imposed upon this small service organization, while Coast Guard resources keep shrinking. This simply cannot continue. We must provide them with the tools they need to do the job we expect them to do.

The subcommittee always goes to great extremes to review all aspects of Coast Guard needs. This year, they have even delved further—and they have come up with a reasonable figure consistent with overall budgetary considerations.

I feel that the least the appropriations procedure should do is to recognize the work and effort of the authorization process.

Therefore, I fully support the efforts of the present chairman of the Subcommittee on Coast Guard and Navigation—and request the additional support of all other Members.

Mr. Chairman, frankly, I think the amount of money involved here is not extraordinary when you consider the service the Coast Guard performs. I think the case has been made on the facts. I would like to isolate just one segment of the many, many Coast Guard missions and ask the Members to assess the value of that performance.

The Coast Guard never, up until a few years ago, focused attention on drug interdiction. It was not their traditional mission; at least that is what they contended.

We placed a special emphasis on this mission, and they responded. Let me give you some figures.

Previously they had confiscated one vessel and some 40,000 or 50,000 pounds of contraband. Over a short period they went from 1 vessel to 180 vessels, with millions and millions of tons of contraband seized.

If we were to embark on a drug interdiction program by itself, as a separate issue, this House would vote for it. This House would vote for more than \$84 million, because we know the nature and the gravity of that problem. We know about the popular political appeal of going home and saying that, "I have voted for money to fight the drug problem," even if it was necessary to create an entire new program. This was not necessary. The Coast Guard responded in heroic fashion, and the statistics so indicate.

Frankly, more money should be provided, and given directly to that program area. The \$84 million that the gentleman's amendment contains, frankly, is very, very modest indeed.

Now, aside from the drug issue, the Coast Guard is a service that has been an absolute team player with every administration. They do not make inordinate requests. They take it out of hide. They have done that, notwithstanding the inflationary spiral.

The difficulty is that they have no more hide and they will be required to cut down on any number of missions. The one mission you can be sure they will cut down on, of necessity and not because they desire to, will be the drug interdiction program.

I congratulate the chairman, because I know how he feels about it, and I know he is responding to a grave need. He is fundamentally very conservative with dollars. When he offers this amendment, he is offering an opportunity for Members to do right by the Coast Guard and their law enforcement efforts. In the end you will do right to the whole drug interdiction effort in our country.

You can point with satisfaction and pride when you go home and say, "Yes, this is what we have done to help the Coast Guard," They are one of the major forces in interdicting drugs, and you can point to that record with pride.

I understand the fiscal responsibilities and the fiscal considerations here. However, holding the line intrac-

tably, simply because you want to hold the line, is not in my judgment a judicious consideration.

I say hold the line, but when a case is made, undeniably and consistent with the sentiment of the House, then there should be a relaxation. Again, I request your support for this amendment, an amendment that is in the public interest.

Mr. DUNN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment.

I wonder if I could have the attention of the gentleman from Massachusetts to ask the gentleman a couple of questions, please, sir.

The administration originally proposed user fees. My question is: Did the subcommittee take a look at this as an alternative proposal for funding; and second, would that have addressed the cash crunch which the gentleman is trying to address here, and would it do it in a more effective manner?

Mr. STUDDS. If the gentleman would yield, let me say that the administration did transmit to us late in the legislative year a bill providing for user fees for some Coast Guard services. We took a look at that bill, and I think the gentleman would concur with us, if he had done likewise, setting aside for the moment the question of whether or not user fees constitutes a wise approach to funding some of the Coast Guard's missions, that the draft legislation submitted by the administration was certainly not the way to do it. It was an open ended, unthoughtout piece of legislation which would simply have authorized the Secretary of Transportation to promulgate whatever regulations he chose to provide for user fees. No one had thought out which functions of the Coast Guard might or might not be appropriately funded in this way, or how one would go about assessing them.

When we asked them what thought were facetious questions like. 'Are you going to station somebody on every aid to navigation and buoy and take the numbers of vessels going around them and send them a bill," or "Are you going to ask the captain of a sinking vessel for his credit rating prior to determining whether or not you are going to rescue him," obviously not. But nobody was sure what they were going to do. And the burden, incidentally, may I say, for what they apparently have in mind would fall not so much on the private yachtsman, which might be a relatively easier thing to justify, as it would on commercial fishermen who, as the gentleman I am sure knows, are hard up against it for a variety of reasons throughout the country, and on commercial shipping.

The fact of the matter is, I sat down with the Secretary of Transportation. He agreed with me that it had not been carefully thought out, that the legislation had not yet been properly drafted and we have agreed to work with him in the future on whatever legislation the administration may subsequently send us.

Let me say one other thing, if the gentleman will continue to yield.

The administration's view of user fees apparently is not a way to provide additional funding for the Coast Guard but, at least as far as we are able to understand it, it is a way to allow them to spend even less on the Coast Guard and to make up for it by user fees imposed on what they consider to be the beneficiaries of Coast Guard services.

So there are a lot of different questions, legislative and philosophical and financial, raised by the proposal, and we have pledged in our subcommittee to take a very careful look at that in the coming year.

Mr. DUNN. I was not rising in support of any particular piece of legislation from the administration, but merely to say that the subcommittee, I guess, if they are not going to be able to do it this year, in the future will they do it so we do not find ourselves in the same predicament?

Mr. STUDDS. I will say to the gentleman, as chairman of the authorizing subcommittee, it is my intention and that of the subcommittee to look with great care at any proposals from the administration or elsewhere with respect to the possibility of imposing user fees for some services provided by the Coast Guard. I think the gentleman will agree there are some very serious philosophical questions with respect to whether or not the kinds of services provided by the Coast Guard ought most appropriately to be funded by the general revenues of the United States, or at least in some instances to be at least shared by those who primarily benefit from the services. I recognize the legitimacy of those questions and I can promise the gentleman and Members of the House we will look at them with great care.

Mr. DUNN. I thank the gentleman.

The CHAIRMAN. The question is on the amendments offered by the gen-Massachusetts tleman from STUDDS).

The question was taken; and on a division (demanded by Mr. BENJAMIN) there were-ayes 19, noes 12.

RECORDED VOTE

Mr. BENJAMIN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were-ayes 129, noes 260, not voting 44, as follows:

The Clerk announced the following pairs:

On this vote:

Mr. Pepper for, with Mrs. Collins of Illinois against.

Mr. Dixon for, with Mr. Cheney against. Mr. Florio for, with Mr. Kindness against. Mr. Young of Alaska for, with Mr. Marlenee against.

Mr. Gilman for, with Mr. Rhodes against. Mr. Mitchell of New York for, with Mr. Emerson against.

Mr. DeNardis for, with Mr. Philip M. Crane against.

BLANCHARD. Messrs. SEIBER-LING, and GINN changed their votes from "no" to "aye."

So the amendments were rejected. The result of the vote nounced as above recorded.

AMENDMENT OFFERED BY MR. DINGELL

Mr. DINGELL. Mr. Chairman, I offer an amendment.

The portion of title I to which the amendment relates is as follows:

SALARIES AND EXPENSES

For necessary expenses of the Office of the Secretary of Transportation, including

not to exceed \$27,000 for allocation within the Department of official reception and representation expenses as the Secretary may determine, \$36,207,000: Provided, That none of the funds in this Act shall be available for the execution of the sale or transference of any Government-owned securities of the Consolidated Rail Corporation without the prior approval of the House and Senate Committees on Appropriations.

The Clerk read as follows:

Amendment offered by Mr. DINGELL: Page 2, line 9, strike out "\$36,207,000" and insert in lieu thereof "\$35,193,204"

Mr. DINGELL. Mr. Chairman, this amendment would save about \$1 million. It would cut the Office of the Secretary of Transportation by about \$1 million or a little more. It would bring the funds appropriated to the Office of the Secretary down to the levels agreed to in the reconciliation package which passed the House.

If we do not make this cut, in the words of my good friend and colleague from Pennsylvania, Mr. Coughlin, who spoke in great concern about the previous amendment, we would be engaging in busting the budget, disregarding the reconciliation package, and in expending more, in this instance on behalf on the part of the Department of Transportation, than was approved in the reconciliation package. Now, I had some difficulties with the reconciliation package, as all of my colleagues here did, but one thing is very clear; if the reconciliation process, the budget process are to have meaning, they must be adhered to.

□ 1245

Mr. Chairman, if the committee is to carry out its responsibilities in accordwith the budget process, we should see to it that the committee does not increase the levels appropriated above those levels which are fixed in the appropriation process. That is the only function of this amendment, that is, to reduce the expenditures of the Office of the Secretary of Transportation down to the levels which were included in the reconciliation process.

Now, by way of support of the amendment, I would like to read from the report of the committee at page 7, at the bottom of that page and the top of the next page, which says as follows:

In connection with these position reductions, the Committee notes information contained in a 1979 DOT study showing that the size of the Secretary's policy office is three times larger than the average size of comparable offices in 10 other major Departments. The Committee is not convinced by arguments of the Department that this office has significantly more diverse responsibilities than other cabinet-level policy offices. The Committee is also disappointed in the past performance of this office in providing effective policy oversight, guidance and advice. The Committee, therefore, strongly recommends that any necessary therefore, staffing reductions be made primarily in the

office of the assistant secretary for policy and international affairs.

Mr. Chairman, the figure to which this amendment would reduce the Secretary's budget is equal to the level which was fixed in the reconciliation conference by conferees from the Committee on Energy and Commerce in the House, the Committee on Merchant Marine and Fisheries in the House, and the Committee on Public Works and Transportation in the and by conferees from the House Senate Commerce Committee. So we are not engaged here in fiscal irresponsibility in reducing this level down to levels which were fixed by the reconciliation conference report.

The authorized amount was found adequate by the committees which considered this matter to enable the Secretary to fully discharge his responsibilities. The amount of the reduction is a mere 2.8 percent as a reduction from the amount appropriated to the Office of the Secretary in fiscal year 1981, and it is only \$1 million or just a hair more than the amount provided in the bill before us today.

In these times of fiscal austerity and diminished availability of Federal resources, all Americans, including Cabinet officials, should be called upon to share equally in the sacrifice and to economize in order to reduce Federal spending and combat inflation.

I would point out to my colleagues that it has been coming to light in the last day or so that we are probably going to have a budgetary deficit by reason of the reconciliation package and tax cut of something between \$60 billion and \$90 billion. I am only asking a cut of a little over \$1 million, and that cut is only to conform the appropriation bill now before us to the reconciliation conference report which was agreed on a little while back.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. DIN-GELL) has expired.

(By unanimous consent, Mr. DINGELL was allowed to proceed for 1 additional minute.)

Mr. DINGELL. Mr. Chairman, in a time when we are contemplating cuts for social security recipients, when we contemplating termination moneys for conservation and water pollution grants to the States, and when we are contemplating massive cuts to the poor, the unfortunate, the aged, and the sick, I believe that staying within the budget with regard to the appropriations and keeping the appropriations in conformity with the reconciliation package is just good fiscal responsibility and just good fiscal discipline by this body, and I, therefore, urge my colleagues to support this modest amendment conforming the appropriation bill to the reconciliation package.

Mr. BENJAMIN. Mr. Chairman, will

the gentleman yield?

Mr. DINGELL. I yield to my good friend, the gentleman from Indiana.

Mr. BENJAMIN. Mr. Chairman, I thank the gentleman for yielding.

I would just point out that the committee has already made the cuts in keeping with the report language that the gentleman shared with us. The committee has cut \$3.5 million from the budget request.

Mr. DINGELL. Mr. Chairman, I commend the committee for that, and I commend the gentleman from Indi-

ana.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. DIN-GELL) has again expired.

(On request of Mr. Benjamin, and by unanimous consent, Mr. DINGELL was allowed to proceed for 1 additional minute.)

Mr. BENJAMIN. Mr. Chairman, will the gentleman yield further?

Mr. DINGELL. I am glad to yield to

my dear friend again.

Mr. BENJAMIN. Mr. Chairman, I thank the gentleman for again yielding, and I would point out that the decrease from the budget request is nearly \$3.6 million in this bill. It would provide no increase over the fiscal year 1981 appropriation.

Mr. DINGELL, Mr. Chairman, I commend the gentleman for that, and I yield back the balance of my time.

Mr. COUGHLIN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, the distinguished gentleman from Michigan (Mr. DIN-GELL) cited the committee report on the Office of the Secretary, and it cited the past performance of the Office of the Secretary. Of course, we now have a new Secretary, and I think we have a different kind of performance and, I am sure we will have a different kind of performance in the future.

In any administration the Office of the Secretary has always been given the highest priority in terms of providing the Secretary with the tools and the staff that he or she needs to perform the duties of that office. The No. 1 priority in any department is the Office of the Secretary. We certainly know that we have a Secretary who is attempting to effect very major changes in the field of transportation. We have a Secretary who has certainly proved to be a dynamic Secretary and a busy Secretary, and I think to hamstring the Secretary of Transportation in this way by denying him the funds that he needs to operate that Office would be a very bad thing to do.

Mr. Chairman, I urge defeat of the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan (Mr. DINGELL).

The question was taken; and the Chairman announced that the noes appeared to have it.

Reuss

Mr. DINGELL. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

Evidently CHAIRMAN. The quorum is not present.

Pursuant to the provisions of clause 2 of rule XXIII, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device, if ordered, will be taken on the pending question following the quorum call. Members will record their presence by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

Mrs. MARTIN of Illinois and Mr. DUNN changed their votes from "aye" to "no."

Messrs. JEFFRIES, MICA, WINN, D'AMOURS, NAPIER, and AKAKA changed their votes from "no" "aye."

So the amendment was agreed to. The result of the vote was announced as above recorded.

AMENDMENTS OFFERED BY MR. STUDDS Mr. STUDDS. Mr. Chairman, I offer amendments.

The Clerk read as follows:

Amendments offered by Mr. STUDDS: On page 3, line 9, strike "\$1,402,898,000" and insert in its place "\$1,409,086,000".

Page 38, after line 15, insert the following new section:

Sec. 322. None of the funds appropriated by this Act may be used to reduce the number of civilian employees of the Coast Guard below that level existing at the end of Fiscal Year 1981.

Mr. STUDDS. Mr. Chairman, I ask unanimous consent that the amendments be considered en bloc, notwithstanding the fact that one part appears at the end of the bill.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. STUDDS. Mr. Chairman, this amendment represents what I hope the Committee will agree is a minimum fall-back position, given the rejection of the amendment which I offered earlier today.

The amendment would \$6.188 million, thereby bringing the committee bill precisely to the level requested by the Reagan administration and, in the process, would forestall any further cuts in civilian personnel, as currently contemplated in the coming fiscal year by the administration.

Mr. BENJAMIN. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I yield to the chairman of the subcommittee.

Mr. BENJAMIN. Mr. Chairman, we would find the amendment acceptable to us. The gentleman's explanation is absolutely correct. We feel that the amendment ought to be placed in the bill, and we would indicate that this side supports the amendment

Mr. STUDDS. I thank the distin-

guished Chairman.

Mr. COUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I yield to the ranking minority member of the subcommittee, the gentleman from Pennsylvania.

Mr. COUGHLIN. Mr. Chairman, we have no objection to the amendment. and I think it is a well taken amend-

Ms. MIKULSKI. Mr. Chairman, will the gentleman yield?

Mr. STUDDS. I yield to the gentlewoman from Maryland.

Ms. MIKULSKI. Mr. Chairman, I would like to associate myself with remarks made earlier today by the gentleman from Massachusetts, the chairman of the Subcommittee on Coast Guard and Navigation of the Committee on Merchant Marine and Fisheries, regarding the fiscal year 1982 appropriations for the U.S. Coast Guard. I would also like to voice my strong support for the Studds amendments to H.R. 4209.

The U.S. Coast Guard is currently facing an expansion of its statutory responsibilities and simultaneously a move to cut its budget and the number of people needed to carry out those responsibilities. We cannot logically expect the Coast Guard to discharge its duties safely and competently by reducing their already inadequate resources. At present, we have a Coast Guard of brave men and women who are asked to provide aids to navigation, to conduct search and rescue missions, to interdict drug traffic, and to enforce our immigration laws, among numerous other tasks. We are asking them to take on these often very dangerous duties with old ships, many dating back to World War II, and aircraft and shore facilities that need replacing. In addition, the Coast Guard has been directed to reduce its civilian complement of employees. This directive has had a particularly serious impact on my district in Baltimore, Md., in which many of the furloughed employees of the Curtis Bay, Md., Coast Guard yard live.

As a Member of Congress who represents an important and busy port, I know the vital mission that the Coast Guard fulfills. It is sheer folly for us to expect the Coast Guard to live up

to its motto of semper paratus, always prepared, if we are not prepared to provide adequate levels of funding and personnel

Mr. STUDDS. I thank the gentlewoman for her comments.

Does the gentlewoman from New Jersey (Mrs. Fenwick) wish me to yield to her?

Mrs. FENWICK. Mr. Chairman, I hope that this Committee will have a recorded vote on this measure. That is all I rose to say, that we make sure, in spending \$6 million, we have a recorded vote, as we did on the \$1 million that we just voted on.

Mr. STUDDS. Mr. Chairman, let me just remind the gentlewoman that the amendments, which have now been accepted by both the majority and the minority members of the managing subcommittee, simply restore the funding in the bill to the level requested by the President.

Mrs. FENWICK. Mr. Chairman, I thank my colleagues for his explanation. But it was precisely the agreement between the majority and the minority that caused me to make this request.

Mr. STUDDS. Mr. Chairman, I understand the gentlewoman's philosophical reservations, as a matter of general principle; but in this case they are unneeded.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Massachusetts STUDDS).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mrs. FENWICK. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were-ayes 283, noes 98, not voting 52, as follows:

□ 1330

The Clerk announced the following pairs:

On this vote:

Mr. Mitchell of New York for, with Mr. Philip M. Crane against.

Mr. Young of Alaska for, with Mr. Erdahl

Mr. LELAND changed his vote from "no" to "aye."

So the amendments were agreed to. The result of the vote was announced as above recorded.

Mr. NOWAK. Mr. Chairman, I move

to strike the last word.

Mr. Chairman, the Appropriations Committee is to be commended for its effort in producing a workable bill within current stringent budgetary constraints. I would like to give special recognition to the distinguished chairman of the subcommittee, ADAM BEN-JAMIN, under whose excellent leadership this bill has been successfully brought to the House floor. Several years ago, in concert with some of my other colleagues in the Public Works and Transportation Committee I created a discretionary program to help the States finance highway projects of unusually high cost or which require long periods of time for construction. Over the years a number of worthwhile projects in several States have been identified by legislative intent and are being funded through the discretionary priority primary program. One such project with a long legislative history-cited in Report No. 95-1485-Route 219 in New York. I note with some concern that the committee report "directs that priority consideration be given to allocating fiscal year 1982 priority primary funds" to three new projects in Illinois and Texas. I am certain that it is not the intent of Congress to accord these new projects higher priority than the uncompleted projects with a long legislative history. would specifically cite the construction of a 6.5-mile section of Route 219 which runs together with Route 17 southwest of Salamanca as an example of the type of project which was intended to be financed with discretionary priority primary funds.

I ask the gentleman, am I correct in assuming that this project should be accorded the same consideration as the new projects cited in committee Report 97-186?

Mr. BENJAMIN. Mr. Chairman, will the gentleman yield?

Mr. NOWAK. I yield to the gentleman from Indiana.

Mr. BENJAMIN. I thank the gentleman for yielding.

I appreciate the gentleman's concern with our choice of report language.

Let me clarify that language by agreeing with you that it is not our intent to provide the newly cited projects any higher priority in the allocation of fiscal year 1982 funds for the discretionary priority primary program than for any other project with prior legislative history under this program.

Mr. NOWAK. I thank the gentleman.

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. NOWAK. I yield to the gentle-man from New Jersey.

Mr. HOWARD. I thank the gentleman for yielding.

I would like to state for the record once again that we had an extensive colloquy on this very subject earlier in the day in debate on this and we felt it was not in any way the prerogative of Appropriations Committee to highlight certain projects over any others. This colloquy, in which the gentleman has engaged, should itself be accorded no weight with respect to the priorities the Department should recognize, because it has already been stated that recommendations by the Appropriations Committee regard to priority privacy projects are inappropriate. The priority primary program involves spending authority for specific projects, the jurisdiction for which lies within the Committee on Public Works and Transportation.

Mr. NOWAK. I appreciate the comments by the gentleman and yield back the balance of my time.

□ 1345

Mr. BEREUTER. Mr. Chairman. I move to strike the last word.

Mr. Chairman, I would like to take this opportunity to call to the attention of the committee a bridge which is located partially in my district and partially in that of the gentleman from Iowa (Mr. HARKIN). The Nebraska City Bridge, located on Nebraska Route 2 crossing the Missouri River, was built in 1929, and is now too narrow and in such a state of disrepair that it will soon become necessary to limit traffic on the bridge to one lane or, worse yet, to close the bridge entirely. The inconvenience and economic loss to the surrounding area should the bridge be closed would be devastating. Transportation officials from both Nebraska and Iowa have designated the replacement of this structure as a top priority and have asked me to seek assistance from the Secretary of Transportation in obtaining funding through the Secretary's discretionary bridge fund. Some preliminary planning for a replacement structure has been completed, and the estimated cost of replacement is \$17.9 million; thus the minimum cost criteria for consideration under section 144 of the Federal Aid Highway Act will be met.

I do have a question for the distinguished gentleman from Indiana, if the gentleman is willing to respond. Mr. Chairman, am I correct in assuming that the replacement of this type of obsolete bridge would be an appropriate use of the funds appropriated for the Secretary's discretionary bridge fund?

Mr. BENJAMIN. Mr. Chairman, will

the gentleman yield?

Mr. BEREUTER. I would yield to

the gentleman.

Mr. BENJAMIN. I thank the gentleman from Nebraska for his diligence in bringing this matter to the attention of the committee. I understand the nature of the problems created by this obsolete bridge, and I would say to the gentleman that, assuming that his cost figures are accurate, the replacement of this structure using the Secretary's discretionary bridge funds would be an appropriate use of those funds.

Mr. HOWARD. Mr. Chairman, will

the gentleman yield?

Mr. BEREUTER. I would be pleased to yield to the gentleman from New

Jersey.

Mr. HOWARD. I would just like to say that in view of the past colloquy that we have had, that I do agree with the statement just made by the gentleman from Indiana, the chairman of the subcommittee (Mr. Benjamin). This bridge could, of course, be legally eligible for discretionary funds, but a colloquy on this measure is an inappropriate point to discuss these types of contract authority projects.

of contract authority projects.

Mr. BEREUTER. I understand the
thrust of Mr. Howard's previous com-

ments.

Mr. COUGHLIN. Mr. Chairman, will

the gentleman yield?

Mr. BEREUTER. I would be pleased to yield to our distinguished colleague, the gentleman from Pennsylvania.

Mr. COUGHLIN. I want to commend the gentleman for his efforts on behalf of this bridge. It certainly is a very appropriate use of the Secretary's discretionary bridge funds. I think the gentleman has done an excellent job.

Mr. BEREUTER. I thank the gentleman from Pennsylvania and I thank the gentleman from Indiana for their

help and cooperation.

AMENDMENT OFFERED BY MR. OBERSTAR Mr. OBERSTAR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. OBERSTAR: Page 14, line 24, strike out the period and insert in lieu thereof a colon and the following: "Provided further: That of the funds appropriated under this heading, \$1,000,000 shall be available only for the operation of the National Driver Register.".

Mr. OBERSTAR. Mr. Chairman, the purpose of this amendment is basically to prevent the dismantling of a very effective and essential transportation safety program, the National Driver Register, which was initiated some 20 years ago by our present colleague in this House, the gentleman from Arizona (Mr. Rhodes), who was the original author and guiding inspiration behind the program to identify individuals with unsafe driving records.

Since 1960 when the program was initiated, some 250 million driver information requests have been processed by the National Driver Register. Every year some 250,000 persons who have been issued licenses in several States, despite having had a license removed by one State for moving violations or for other infractions of State law, have been identified and countless accidents that might have been caused by such unsafe drivers have

been prevented.

Now, what I am proposing to do in this amendment is to assure adequate financial resources for the National Driver Register so that it can continue to operate in a responsible and effective fashion. Currently, 47 States participate in the National Driver Register. The Carter administration operated the program at a level of \$1½ million and that amount was in the Carter budget request to the Congress for this year. That amount was cut by nearly \$1 million by the budget process and by the Appropriations Committee.

I am not adding any funds with this amendment. I am merely requesting that, within the amount this committee proposes to be appropriated, an additional amount of \$455,000 be focused on the National Driver Register. This is merely earmarking to assure that this program can continue to operate.

I will not go into the many details of tragic accidents, of lives that have been lost in accidents caused by drivers who could have and should have been caught by an effective National Driver Register. That story can await

telling another day.

I will not go into any great detail on the legislation I have introduced and which will be considered by the Public Works Committee to streamline and upgrade the National Driver Register, putting it on a real-time computer basis. That will be the subject of later legislation.

It would be a mistake to end this program now. Even the administration

is currently reassessing its own position. Ray Peck, the new Administrator of NHTSA, stated publicly that the Register is and should be a Federal responsibility.

OMB's contention that the Register is not effective is inaccurate. Last year the States made over 25 million requests resulting in 269,000 identifications of drivers who have had their licenses revoked or suspended. Denial of a driver's license remains one of the most effective ways to keep problem drivers off the roads. The cost to society, if one can place a value on human death and injury, was close to \$50 billion last year. This is 2,400 times the amount currently spent on the NDR. Elimination of the program is not justified by any criterion. In fact, on a cost/benefit basis, it deserves to be continued.

Legislation that I and the gentleman from Arizona introduced in February 1981, would make the NDR a more effective and responsive system. I agree with the administration that the NDR should be upgraded and streamlined. My bill, H.R. 2052, would change the existing Register index system to a pointer system, which data would remain with the States. Currently, all information processing at the Register is done by mail. Obviously, this tends to make the present Register ineffective. H.R. 2052 would computerize the Register and thus quicken response time, provide greater accessibility to records, and increase the usability of data. And I have made sure that my proposal was drafted to comply with stringent privacy laws already on the books. The bill has 25 cosponsors and as many Republicans as Democrats are cosponsors.

This amendment and the concept of the NDR is supported by the American Trucking Institute, the American Automobile Association, the American Association of Motor Vehicle Administrators, the NTSB's Bureau of Motor Carrier Safety, and the National Safety Council. I have also received numerous letters of support from State highway and law enforcement officials.

Just for now, I think it is important to keep the present system functioning effectively. It has saved lives and, given the thrust of Transportation Secretary Drew Lewis' program of focusing transportation safety programs on the driver. I think the administration would be well advised to accept the amendment that I am offering and to concentrate this additional money on making the National Driver Register effective.

I urge adoption of the amendment.

AMENDMENT OFFERED BY MR. COUGHLIN TO THE
AMENDMENT OFFERED BY MR. OBERSTAR

Mr. COUGHLIN. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. COUGHLIN to the amendment offered by Mr. OBERSTAR: After "\$1,000,000" insert the following: "and 16 permanent positions".

Mr. COUGHLIN. Mr. Chairman, I am offering this amendment to the amendment offered by the gentleman from Minnesota, which I understand is acceptable to both the gentleman from Minnesota and to the chairman of the subcommittee.

Mr. Chairman, just very briefly, I have been informed that the earmarking of the money could not be administered unless they also have the positions to go with it, and this would provide the positions.

vide the positions.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. Coughlin) to the amendment offered by the gentleman from Minnesota (Mr. Oberstar).

The amendment to the amendment was agreed to.

Mr. BENJAMIN. Mr. Chairman, I rise in support of the amendment as amended.

Mr. Chairman, I believe the gentleman from Minnesota shares our concern that the National Driver Register [NDR] as it is presently configured is not as effective as it should be. Our view is that it ought to be eliminated if it is not improved.

We have followed with interest the gentleman's bill which would authorize a new NDR system based on updated technology. We believe that a new system which: first, meets the provisions of the Privacy Act; second, is principally funded by the States; and third, provides reasonable assurance that those States will participate in a new NDR would be effective.

I would urge that such a system be given favorable consideration by the authorizing committee. In the meantime, we are willing to recommend that the existing system be continued another year to provide for a smooth transition. However, we are not willing to fund the current system ad infinitum. Unless a new authorization is forthcoming, we could not guarantee committee support for the program beyond fiscal year 1982.

Consequently, I would ask that the committee of the House join with the gentleman from Minnesota and support the amendment as amended.

Mr. OBERSTAR. Mr. Chairman, would the gentleman yield?

Mr. BENJAMIN. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. Mr. Chairman, I thank the chairman of the subcommittee for his statement and for his support. I think the gentleman has stated a very sound position.

The National Driver Registration should be upgraded, should be streamlined and modernized. I hope that through the Public Works and Transportation Committee and their work on the highway legislation that we will be able to accomplish that in a relatively short period of time.

In the meantime, the gentleman's acceptance of the amendment will mean this program can continue to function.

I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota (Mr. Oberstar), as amended.

The amendment, as amended, was agreed to.

Mr. WEISS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, many of the Members of this body and Americans across the country saw pictures in their newspapers and on television this week of President Reagan presenting a symbolic 5-foot Federal check to the mayor of the city of New York in the amount of \$85 million. What many people may not realize is that that \$85 million, when and if it is ever actually paid by a real check will be only the first down payment on a 4-mile length of interstate highway in New York City called Westway. The total cost will be somewhere in excess of \$2.3 billion and perhaps as much as \$5 billion by the time construction would be completed in some 10 years.

Many people in the city of New York, have been urging the mayor of the city of New York and the Governor of the State of New York to apply under the interstate transfer grant program for a trade-in of those moneys for mass transit purposes. Imagine, spending \$2.3 billion to \$5 billion for 4 miles of highway; never in history has such extravagance been proposed.

My reason for taking the well at this point is simply to alert the Members that should this matter proceed, and it is still in the courts at this point, we will be presenting more information about this project.

I have no criticism of the committees involved, nor, indeed, of the administration. The administration and the President have made it very clear that they are subject to the desires of the mayor and the Governor of the city and State of New York, since under the law they are the ones who can make the application for a tradein.

It is important to note, however, that the highway trust fund from which this particular highway would be funded has run a deficit for the last 2 years. These are the first deficits in history.

The highway trust fund currently has some \$11.5 billion committed for interstate highway projects across the country. It has a current balance of about \$10.1 billion, so that it is questionable as to where that money will be coming from to pay for this and all

the other interstate highway programs without an increase in the gasoline taxes.

It is also instructive to point out that the mass transit system of the city of New York is in a very serious condition and that the money would be best spent by trading in the interstate highway funds for mass transit improvements.

Again, given the time of fiscal austerity that we are in, given the tremendous shortage of moneys and the cutbacks in all areas, I want to alert my colleagues to the fact that we will be presenting information as we go along as to the proper and appropriate utilization of these moneys, rather than the squandering which would take place if the present plans go through.

The CHAIRMAN. Are there further amendments to title I?

Hearing none, the Clerk will read. The Clerk read as follows:

OPERATIONS AND RESEARCH

For expenses necessary to discharge the functions of the Secretary with respect to traffic and highway safety and functions under the Motor Vehicle Information and Cost Savings Act (Public Law 92-513, as amended), \$85,876,000, of which \$27,185,300 shall be derived from the Highway Trust Fund: Provided, That not to exceed \$39,664,700 shall remain available until expended, of which \$12,512,000 shall be derived from the Highway Trust Fund: Provided further, That, of the funds appropriated under this heading \$10,500,000 shall be available only for activities at the Transportation Systems Center.

PARLIAMENTARY INQUIRY

Mr. SNYDER. Mr. Chairman, I have a parliamentary inquiry. Are we on the Panama Canal section? The gentleman from Kentucky (Mr. Hubbard) wants to offer an amendment.

The CHAIRMAN. The Chair will recognize the gentleman.

Mr. SNYDER. I thought I heard the Clerk read "Panama Canal."

□ 1400

AMENDMENTS OFFERED BY MR. HUBBARD

Mr. HUBBARD. Mr. Chairman, I offer amendments relating to those provisions of the bill which make appropriations for the Panama Canal Commission. I ask unanimous consent that these amendments be considered out of order and that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The portion of the bill to which the amendments relate is as follows:

PANAMA CANAL COMMISSION

OPERATING EXPENSES

For operating expenses necessary for the Panama Canal Commission, including hire of passenger motor vehicles and aircraft; uniforms or allowances therefor, as authorized by law (5 U.S.C. 5901-5902); official reception and representation expenses of the

Board; operation of guide services; residence for the administrator; contingencies of the administrator; not to exceed \$25,000 for official reception and representation expenses of the administrator; and to employ services as authorized by law (5 U.S.C. 3109); maintaining, improving, and altering facilities of other United States Government agencies in the Republic of Panama and facilities of the Government of the Republic of Panama for Panama Canal Commission use; and payment of liabilities of the Panama Canal Company and Canal Zone Government that were pending on September 30, 1979, or that have accrued thereafter, including accounts payable for capital projects, \$398,744,000, to be derived from the Panama Canal Commission Fund: Provided, That there may be credited to this appropriation, funds re-ceived from the Panama Canal Commission's capital outlay account for expenses incurred for supplies and services provided for capital projects and funds received from officers and employees of the Commission and/or commercial insurors of Commission employees for payment to other United States Government agencies for expenditures made for services provided to Commission employees and their dependents by such other agencies: Provided further, That to the extent that the resources of the Fund are not adequate to provide the amount of budget authority provided above, the Commission may incur obligations in advance of adequate receipts in the Fund.

The CHAIRMAN. The Clerk will report the amendments.

The Clerk read as follows:

Amendments offered By Mr. HUBBARD: On page 27, lines 6 and 7, strike out the words "official reception and representation expenses of the Board"

On page 27, line 10, strike out the words

"of the Administrator"

On page 27, line 20, after the comma following the word Provided," insert the following: "That of the funds appropriated by this section:

"(1) not more than \$272,000 shall be avail-

able for operation of guide services

'(2) not more than \$60,000 shall be available for the maintenance of a residence for the Administrator, including staffing, as authorized by section 5913 of title 5, United States Code;

"(3) not more than \$25,000 shall be available for disbursement by the Administrator for employee recreation and community

projects;

"(4) not more than \$520,000 shall be available for procurement of expert and consultant services as provided by section 3109 of

title 5, United States Code:

not more than \$3,724,000 shall be available for maintenance and alteration of facilities of the Government of the Republic of Panama, used by the Commission, of which the United States retains use pursuant to the Panama Canal Treaty of 1977 and related agreements; and

(6) not more than \$50,000 shall be available for expenses of the supervisory Board established pursuant to section 1102 of Public Law 96-70 (93 Stat. 456), including travel and transportation expenses under section 5703 of title 5, United States Code:

Provided further,"

On page 28, line 3, change the colon to a period and strike out the remainder of line 3

and all of lines 4 through 7.

On page 28, line 20, after the comma following the words "Provided, That" insert the following: "of the sums referred to in

this paragraph, not more than the following amounts shall be available for the following purposes

'(1) for transit projects, \$13,764,000; "(2) for general support projects,

\$3,252,000:

"(3) for utilities projects, \$1,870,000; and "(4) for quarters improvement projects: \$880,000: Provided further:'

On page 28, line 22, change the colon to a period and strike out the remainder of line 22 and all of lines 23 and 24.

On page 29 strike out lines 1 and 2 in their entirety.

Mr. BENJAMIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HUBBARD. Mr. Chairman, my amendments would bring the appropriations bill H.R. 4209, into conformity with certain limitations provided in the Panama Canal authorization bill. That bill, H.R. 2596, was reported by the Merchant Marine and Fisheries Committee on May 19, and is expected to come to the floor later this month. I have the honor of serving as chairman of the Subcommittee on Panama Canal and Outer Continental Shelf.

First, let me make clear that my amendments in no way increase spending above the amount approved by the Appropriations Committee in H.R.

4209.

My amendments do several things.

First, our authorization bill lists several specific categories of spending and then sets dollar limits for each category. Today's appropriations bill does not coincide with these provisions of the authorization bill. In some cases, the committee report accompanying H.R. 4209 mentions these categories, but even here the dollar limits are not always the same as those in the authorization bill. And, of course, report recommendations do not have the same force as specific statutory language. My amendments would incorporate into the appropriation bill the same spending limits and categories approved by the Merchant Marine and Fisheries Committee.

Briefly, the categories and limits in

my amendments are:

In operating expenses:

For guide services, \$272,000;

For maintenance and staffing the Administrator's residence, \$60,000;

For employee recreation, \$25,000; For consultant services, \$520,000:

For official reception and representation expenses, \$25,000 (this would include entertainment);

For expenses of the Supervisory

Board, \$50,000; and

For improvements for employee housing, \$3,724,000 (these are housing units that have been transferred to the Government of Panama, but

which our country may use to house the decreasing number of American citizens employed at the canal).

In capital outlays:

For transit projects, \$13,764,000;

general support projects, \$3,252,000:

For utilities projects, \$1,870,000; and For quarters improvement projects, \$880,000.

Next, my amendments delete wording which would let the Supervisory Board spend unlimited money from the Commission's general operating budget for entertainment; this would be over and above the existing lineitem account for reception and representation, which has traditionally been designed to cover entertainment.

Finally, my amendments also delete two provisos which would allow the Commission to incur obligations in advance of receipts from the Panama Canal Commission fund. These provisos would have the effect of exempting the Commission from the Anti-Deficiency Act, although the act is not referred to by name or by citation. These provisos would render inoperative that part of the 1979 Panama Canal Act which limits appropriations to the amount of canal revenues derived from operation of the canal and paid into the U.S. Treasury. My amendment will make sure that the canal's operations are financed solely by funds generated by tolls and other collected revenues, instead of being subsidized by tax moneys. Incidentally, during the authorization process, our committee was supplied a draft authorization bill containing the two provisos in question, but we overwhelmingly rejected them when we approved H.R. 2956.

Mr. Chairman, I believe Members on both sides of the aisle will find these amendments worthy of support. I know there was bipartisan support for them when the Merchant Marine and Fisheries Committee incorporated them in the authorization bill. There is precedent for accepting them in the appropriations bill because last year this House adopted by voice vote a very similar amendment which I offered under nearly identical circumstances. I recommend that we adopt these amendments to conform the appropriations bill with the authorizations bill. By doing so we preserve the close congressional oversight we contemplated and endorsed in 1979 when we enacted the statutes implementing the Panama Canal Treaties.

Mr. SNYDER. Mr. Chairman, will

the gentleman yield?

Mr. HUBBARD. I yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, I rise in support of the amendment by the distinguished gentleman from Kentucky, Mr. HUBBARD, the chairman of the Panama Canal/OCS Subcommittee of the Merchant Marine and Fisheries Committee.

The question we face in considering this amendment is, are we or are we not going to insist on financial responsibility and accountability in the expenditure of appropriated funds. This is particularly crucial because of the strategic economic and military importance of the Panama Canal.

These are the same questions, however, we have faced this entire Congress—through the entire budget process we have responded to the economic crisis this country faces and to our constituents in requesting frugal and

responsible fiscal activity.

The differences between H.R. 4209 and the amendment under consideration is not the dollar amount for the total appropriation, but the manner in which the funds are appropriated. The amendment requires strict accountability for the expenditure of appropriated funds. That is, the amendment provides limitations to administrative expenditures in seven categories, and limitations on four categories of capital expenditures. In addition, the amendment prohibits the Panama Canal Commission from incurring any debts that have not been specifically authorized by Congress by requiring compliance with the Anti-Deficiency

H.R. 4209 simply appropriates funds in three categories of administrative expenses, one area of capital expenditure, and exempts the Commission from the Anti-Deficiency Act without even amending that act. In other words, H.R. 4209 allows funds to be shifted to any category of expenditure at the whim of the Administrator of the Commission and allows him to incur debts prior to the approval of Congress.

Mr. Chairman, these are the very issues that were highly contested this year during the markup of the 1982 Panama Canal Authorization, H.R. 2596. This authorization bill contains language almost identical to the amendment under consideration.

Last year we faced a similar situation with H.R. 7831, the 1981 appropriation bill which offered a lump-sum appropriation. However, an amendment was also offered by my colleague from Kentucky, the chairman of the Panama Canal/OCS Subcommittee, Mr. Hubbard, that required line item limitations on expenditures.

It appears obvious that last year's and this year's authorization bill more accurately reflect this year's congressional, Presidential, and public budgetary philosophy than does the appropriation bill we are considering today.

During consideration of the Panama Canal authorization this year by the Merchant Marine and Fisheries Committee the argument was put forward that by exempting the Commission from the Anti-Deficiency Act, it would allow any excess profits accrued during this fiscal year to be expended on canal activities rather than being turned over to the Panamanian Government as called for by Public Law 96-70.

That is a fallacious argument since the testimony of the Administrator of the Panama Canal Commission, General McCullough, and the monthly reports of the Panama Canal activities clearly show that our concern is not what to do with any excess profits, but rather how we can limit the deficit that is obviously going to occur.

It was also argued that there should be no \$25,000 limitation on entertainment expenses by the Commission. The fact is the GAO report requested by Chairman Jones and being held up by the Commission will show that the Commission has already overspent its entertainment budget for this year. I would like to point out that H.R. 4209 contains a limitation on entertainment for the Administrator of \$25,000 but has an open-ended authority for entertainment for the Commission. The amendment by my colleague from Kentucky contains the same language as the authorization bill and limits the total expenditure for entertainment to \$25,000.

Another argument against line item limitations was that \$60,000 was not enough money for the Administrator's residence. You will find this very interesting in that the request of the Commission was \$127,000. It would appear that this figure alone explains one of the reasons that line item limitations are necessary since this year's budget request for roughly the same items for the Vice President's residence was \$125,000. I would also like to point out that the GAO report I have just referred to will show that the actual expenditure for the Administrator's residence in 1980 was well over \$200,000.

I feel that H.R. 4209 was reported in disregard for the authorization process since it represents the view of the small minority of the authorizing committee, and was reported a full 2 months after the authorization bill was reported by the House Merchant Marine and Fisheries Committee.

Mr. Chairman, article 3 of the Panama Canal Treaty calls for, among other things, the creation of the Panama Canal Commission with a board of nine members—five Americans and four Panamanians—to supervise the operations of the canal in accordance with the laws of the United States. The fruit of the efforts of Congress was Public Law 96-70, the law implementing the Panama Canal Treaty.

In fulfilling our responsibilities under the treaty, we have attempted to keep track of the expenditures of the Commission, the activities of the Supervisory Board, and the activities of the Administrator. Unfortunately, we have not met with a great deal of success, which is a major reason for the need for this amendment.

It is of the utmost importance that Congress, as well as this administration, maintain a close watch on the activities of the Panama Canal Commission not only to fulfill our oversight responsibilities, but because of the potentially volatile situation in that part of the world.

It is my belief that the amendment offered by the gentleman from Kentucky (Mr. Hubbard) will accomplish these goals.

Mr. LENT. Mr. Chairman, will the gentleman yield?

Mr. HUBBARD. I yield to the gentleman from New York.

Mr. LENT. Mr. Chairman, as ranking minority member of the Panama Canal/OCS Subcommittee, I rise in support of the amendment offered by the distinguished chairman of the Merchant Marine and Fisheries Committee, Mr. Jones. The purpose of the amendment is to conform the Panama Canal Commission funding language in the Department of Transportation Appropriation bill, H.R. 4209, with that in the 1982 Panama Canal Authorization bill, H.R. 2596, reported by our committee on May 19, 1981.

The conference report on last year's Department of Transportation Appropriation (Public Law 96-400) specified the appropriate authorizing committees should review the matter of the Panama Canal Commission's incurring obligations in advance of receipts in the Panama Canal Commission Fund.

The Panama Canal/OCS Subcommittee did review this matter this year. We overwhelmingly rejected allowing the incurrence of obligations in advance of receipts in the Commission Fund because it violates the Antideficiency Act which applies to all Government agencies. Our committee's support for spending accountability is reflected in H.R. 2596, the fiscal year 1982 Panama Canal Commission authorization which is awaiting House floor action.

Moreover, the Merchant Marine and Fisheries Committee's approach is supported by a recent GAO report of August 5, 1981 (ID-81-57) which found the Commission in near violation of the Antideficiency Act. For example, GAO found travel expenses alone increased over 240 percent above the preceding 12-month period in the first 6 months of fiscal year 1981.

Thus, it is deeply disturbing that the Panama Canal Commission Appropriation provided in H.R. 4209 before us today not only provides great latitude in spending, but it runs counter to the Antideficiency Act by providing the Commission may incur obligations in advance of adequate receipts in the Fund.

Obviously we need spending limits, and adoption of the Jones amendment will provide them.

It would incorporate in the appropriation bill the same seven specific limitations on spending for operating expenses as are found in H.R. 2596. It would also specify four areas for capital spending. Each of those \$11 limits is consistent with the budget and consistent with the dollar amounts included in testimony by the Administrator of the Panama Canal Commission before our subcommittee. It would also assure compliance with the Anti-deficiency Act.

Without the Jones amendment, this appropriation amounts to a blank check representing total abdication of Congress responsibility to oversee the Canal and assure it is operated at no additional expense to the U.S. taxpayer.

The language in H.R. 4209 as reported runs totally counter to the will of the Committee on Merchant Marine and Fisheries which has primary jurisdiction over the activities of the Panama Canal Commission.

I urge my colleagues on both sides of the aisle to vote for the Jones amendment. It is an amendment to assure accountability and spending restraint. It merits this body's support.

Thank you.

Mr. BENJAMIN. Mr. Chairman, will the gentleman yield?

Mr. HUBBARD. I yield to the gentleman from Indiana.

Mr. BENJAMIN. Mr. Chairman, this side will accept the gentleman's amendments. As he so clearly said, they basically relate to placing the language which is in our committee report within the scope of the bill. It does not change the figures and follows the current law. More importantly, it does the same thing that we did in the fiscal year 1981 Appropriations Act. We would have no objections to the amendments.

Mr. COUGHLIN. Mr. Chairman, will

the gentleman yield?

Mr. HUBBARD. I yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. Mr. Chairman, we have no objection to the amendments on this side, and we will accept them.

Mr. HUBBARD. Mr. Chairman, I learned years ago as an attorney in the courtroom that when you had your case won, you best not argue it too much longer.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Kentucky (Mr. Hubbard). The amendments were agreed to.

AMENDMENT OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Benjamin: On page 29, line 8, strike out "\$1,000,000" and insert in lieu thereof "\$13,000,000".

Mr. BENJAMIN. Mr. Chairman, this amendment is very simple. It changes the USRA appropriation from \$1 to \$13 million. The original appropriation was set at the reconciliation level that was passed by the House. When the reconciliation bill emerged from conference and there were certain things done for the continuation of Conrail. that figure became \$13 million. As a consequence, we ask that the USRA appropriation be the same as provided in the Reconciliation Act so that the USRA may discharge its duties under the procedures of that act. There is room within the budget pursuant to the earlier amendments that would accommodate this.

Mr. COUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. BENJAMIN. I yield to the gen-

tleman from Pennsylvania.

Mr. COUGHLIN. Mr. Chairman, I enthusiastically support the chairman in this. Certainly it is necessary to enable the USRA to carry out its

duties.
Mr. BENJAMIN. I thank the gentle-

I yield back the balance of my time. The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana (Mr. Benjamin).

The amendment was agreed to.
The CHAIRMAN. The Clerk will

The Clerk read as follows:
UNITED STATES RAILWAY
ASSOCIATION

ADMINISTRATIVE EXPENSES

For necessary administrative expenses to enable the United States Railway Association to carry out its functions under the Regional Rail Reorganization Act of 1973, as amended, \$1,000,000, of which not to exceed \$1,000 may be available for official reception and representation expenses.

SEC. 304. None of the funds provided under this Act shall be available for the planning or execution of programs, the total obligations for which are in excess of \$77,000,000 in fiscal year 1982 for "State and Community Highway Safety": Provided, That none of the funds under State and Community Highway Safety shall be used for construction, rehabilitation or remodeling costs or for office furnishings and fixtures for State, local, or private buildings or structures.

AMENDMENT OFFERED BY MR. HOWARD Mr. HOWARD. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Howard: Page 30, line 12, strike out "\$77,000,000" and insert in lieu therof "\$100,000,000".

Mr. HOWARD. Mr. Chairman, section 304 of the bill would limit fiscal year 1982 funding for State and community highway safety to \$77 million. This section impacts on a provision of the Omnibus Budget Reconciliation Act which created contract authority for the National Highway Traffic Safety Administration to administer section 402 of the Highway Safety Act. Section 1107 of the Reconciliation Act

created \$100 million in contract authority for each of the next 3 fiscal years including \$20 million per year 55-mile-per-hour enforcement. This is a form of spending authority which is under the primary jurisdiction of the Committee on Public Works and Transportation, because the contractual obligations are supported by the highway trust fund. Section 1107 also imposes a limitation on obligations of \$100 million on the NHTSA expenditure of these funds during fiscal year 1982, fiscal year 1983, and fiscal year 1984. The Committee on Public Works and Transportation included this provision in the reconciliation package in full compliance with the Gramm-Latta requirements.

My amendment simply strikes out the \$77 million amount in the bill and substitutes the Gramm-Latta amount of \$100 million. Although this would increase next year's obligational authority by \$23 million, the Members should be aware that other transportation programs were cut drastically in the Gramm-Latta process to make room for these levels. As the Members may know, this Member is not a leading advocate of reconciliation. Notwithstanding that fact, the Committee on Public Works and Transportation achieved the fullest substantive compliance with reconciliation directives.

As the committee which has preeminent jurisdiction over highway safety contract authority, and, which has made the other cuts that allow for this \$100 million, the Committee on Public Works and Transportation considers this a simple conforming amendment. Because of the nature of the language in section 1107(b) of the Reconciliation Act, the limitation in that subsection would probably take precedence over the language in this appropriation bill. That is why this represents a conforming amendment, and should not generate any significant controversy. Although section 304 would be a subsequent enactment to section 1107 of the Reconciliation Act, subsection (b)'s obligation limitation language begins with the phrase "Notwithstanding any other provision of law," would then produce the result of having the Reconciliation Act provision take precedence over this appropriation measure with regard to the limitation of NHTSA highway safety obligations.

Mr. Chairman, this may be considered as outlay money, but we would like to state that it is only an obligation ceiling and it is only an obligation ceiling involving highway trust fund money. So it would not in any way indicate additional taxpayer money which must be collected in order to provide for better safety on our highways. It is money that has been collected, is being collected, by the people

who use the highways, who deserve to emphasize have these safety provisions, and it is money that will come from the high-

way trust fund.

In meeting the reconciliation requirements, in fact going beyond them, Mr. Chairman, we were forced to cut highway safety programs in this Nation by a higher percentage than anything else in transportation-\$100 million was in the Democratic Reconciliation Act. It was in the Republican reconciliation bill which was supported by the President and the adminis-

All we are asking is to have this conforming amendment to comply with

that. I would like to state that in support of this amendment, I have heard from many States and I have heard from the head of the chiefs of police, I have heard from the safety representatives of the States, I have heard from the Governors of many States, to name just a few, not only from the safest State in the Nation, my own State of Jersey, but from New York, Maryland, Iowa, Ohio, North Carolina, New Hampshire, Utah, Alaska, Louisiana, Maine, Massachusetts, Wyoming, Missouri, Kansas, Oklahoma, Delaware, California, and Michigan, just to name a few, and I certainly hope that the committee and the chairman will

accept this conforming amendment. I would be very happy to yield to the gentleman from Indiana (Mr. BENJA-

MIN) if he so desires.

Mr. BENJAMIN. I thank the gentleman from New Jersey for yielding. The gentleman is quite right. There

was considerable testimony during the time that we entertained public witnesses in support of this program. The \$77 million in the House bill was the level requested by the President. However, through the process of reconciliation the amount was increased to \$100 million.

As the gentleman has stated, it is no increase in budget authority. moneys do come from the trust fund which is supported by the highway users, not the general fund.

This side is supportive of the gentleman's proposal and would accept it.

Mr. HOWARD. I thank the gentle-

man very much.

Mr. Chairman, I would like to state that the head of the State police of my own State of New Jersey, which is the safest State in the Nation, says they would not have been able to save the lives that they have without this limited Federal input. To be able to help them save lives in my own State, and in other States, I just hope that the amendment is agreed to.

I yield back the balance of my time. Mr. SHUSTER. Mr. Chairman, I move to strike the requisite number of

Mr. Chairman, I rise in support of this amendment. I think we should

that this amendment simply conforms to the provisions regarding the obligation ceiling for the State and community highway safety programs to the levels established in the Omnibus Reconciliation Act. That is all this does. To say at this point that we want to reduce the funding for highway safety, which already was approved in reconciliation, I believe would be a step in the wrong direction.

We have just completed, Mr. Chairman, this Labor Day weekend. We are told that the number of fatalities, highway deaths, over this recent weekend is probably, when the count is finally tallied, going to exceed 700 people. Indeed, that is a figure higher than previous Labor Day weekends. We are told further, on an annual basis, when you look at the annual fatalities on the Nation's highways, we see it creeping up beyond the 50,000 death level, approaching over the next few years, based on the trend back to that all-time high, 56,000 deaths. It seems to me that so long as we are within budget-and I emphasize thatso long as we are within budget, as we are here, we should not further strip funding for highway safety. It is the wrong time, it is the wrong program to further cut. So long as we are within budget, recognizing the fatalities, recognizing 2 million Americans will be seriously injured this year in highway accidents, it seems to me that we should make every effort possible to preserve funding for highway safety.

We are talking about saving lives. We are talking about stopping accidents. For that reason, and because this is within budget, I would urge the support of this amendment.

Mrs. FENWICK. Mr. Chairman, will

the gentleman yield?

Mr. SHUSTER. I would be happy to yield to the gentlewoman from New Jersey.

Mrs. FENWICK. What do they use the money for? Am I correctly informed that not one penny of this goes for salaries; that it is all for

equipment? Is that correct? Mr. SHUSTER. I cannot say that not one penny goes for salaries. But the vast bulk, if not all, goes to provide for promoting highway safety at the State and at the community level. Now, I believe some of the funding, I would say in all probability, does go to State police.

Mrs. FENWICK. You mean for salaries?

Mr. SHUSTER. I would yield to my friend, the gentleman from New

Mr. HOWARD. Under the existing law, funds could go for salaries. Of course, a significant amount does go for items other than salaries. As I understand it, the administration has come out-which I assume the gentlewoman is talking to-with the idea that that ought to be a State responsibility. That is the administration's position. So I would presume that they would want none of this money to go for salaries. It is not legally prohibited at this time. I understand that it is the position of the administration to try to avoid paying salaries. Obviously, these funds will have to support salaries.

Mrs. FENWICK. I see. There is nothing about that in the bill.

Mr. HOWARD. No, it is not in the

Mrs. FENWICK. I would like to clarify my understanding of it. As I understood the \$100 million, \$20 million was going to go to enforce the 55-mile-anhour speed limit.

□ 1415

Mr. HOWARD. I would like to speak to that also. As the gentlewoman knows, as the author of that I am very, very much supportive of it. The legislation which was written by the full committee, title XI of the Omnibus Reconciliation Act, does have the \$100 million and does provide that \$20 million of that go for 55. However, of the \$77 million we are talking about now, we want to raise to the \$100 million, \$62 million of that is past years' money which would not be subject to the \$20 million set-aside for 55 enforcement.

I myself would hope that at least an equal proportion of what we have would go for 55, but as I say, \$62 million of it being past years' money would not be mandated for 55.

Mrs. FENWICK. I have two more questions, if the gentleman would yield. One, what happens to the rest of it, the rest of the money if you have \$20 million-

Mr. HOWARD. They have informational programs, educational programs, so many programs. I am not certain where each one will go, but even starting with elementary school programs of education on how to teach young children how to cross the street and when not to cross the street, has to do with highway safety. So, there are a great number of programs that have been most effective. and of course we do have a limited Federal input, but that is felt to be very important at this time. This program on highway safety, which has been so effective, has been cut from \$225 million to an overall reconciliation figure of \$110 million.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

(At the request of Mrs. Fenwick and by unanimous consent, Mr. Shuster was allowed to proceed for 1 additional

Mrs. FENWICK. But the gentleman says that this comes out of the highway trust funds?

Mr. HOWARD. Yes.

Mrs. FENWICK. Does that mean, in other words, this will not be an extra expense on the American public?

Mr. HOWARD. I am glad the gentlewoman from New Jersey brings that up. This is highway trust fund money. It is money continually being collected from the users of the highways. It will in no way require additional taxing of the people of the United States.

Mrs. FENWICK. I thank my col-

Mr. COUGHLIN. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment. I do so with great reluctance in opposing the amendment sponsored by my distinguished friend and colleague from New Jersey and by my very distinguished friend and colleague from Pennsylvania, but I do amendment oppose the grounds.

First, there is a tendency to say that if you are spending highway trust fund money or increasing obligational ceilings, you are not really spending money because the money is there. However, this involves outlays, the very problems about which OMB is concerned, the President is concerned, and we are concerned. No matter how you look at it, this extra money, we have to go out and borrow it. We borrow at high interest rates, increasing inflation, and so there is money involved here in the form of outlays.

Mr. SHUSTER. Mr. Chairman, will

my friend yield on that point?

Mr. COUGHLIN. I yield. Mr. SHUSTER. I am sure my dear friend and colleague from Pennsylvania knows that in the highway trust fund there is a balance today of over \$12 billion, and while it is true that that balance of \$12 billion can be used to help fund the deficit out of the general fund, indeed that money there is precisely, legally dedicated and committed to programs such as these. So, this is not a matter of having to go out and borrow money for this program. There are \$12 billion in the trust fund.

Mr. COUGHLIN. The gentleman makes my point very exactly. Yes, there are \$12 billion earmarked in the trust fund, but that is not cash in the bank. We still have to go out and borrow the money every time we make an outlay that is in excess of revenues coming into the Federal Government overall. So, there is no question about the fact that this affects outlays and

creates additional outlays.

The second basic objection I have to this amendment is that a substantial part of it does go for the 55-mile-anhour speed limit enforcement. It seems to me that if the law says that the speed limit is 55 miles an hour, that the States and communities should enforce that law. It is the law of the land. They enforce other laws and they do not require such funds for it. I feel that program is not one that

should be funded by the Federal Government. The States should enforce the laws themselves.

Mr. ANDERSON. Mr. Chairman, I move to strike the requisite number of

words.

Mr. Chairman, I rise in strong support of the amendment offered by my friend and colleague, the gentleman from New Jersey. I do so because I believe that the promotion of highway safety is a valid, vital, and necessary Federal undertaking; one that should be supported; and one that should be supported with a sufficient amount of funding.

One might conceivably ask, "What is a sufficient amount." I do not enjoy the trite games of those who attempt to place a price tag on the value of human life. But I do note that the highway death toll in this country reached about 53,000 last year. This constitutes the greatest amount of roadway carnage that has occurred in a single year since 1973. And for the fourth straight year, in 1980 the amount of deaths per 100 million vehicle miles increased. Based on current trends, each person born this year can expect to be involved in a crash every 10 years. One in sixty will be killed, and 1 in 20 will be seriously injured.

How is it proposed that we react to these tragic figures? And let me say, these are more than just figures. If you could read the letters from the families of people who lost loved ones in traffic accidents, you would see and feel the anguish behind these tragic

totals

And yet, it has been proposed that funding for the NHTSA section 402 program be slashed from \$225 million to \$77 million. As part of the reconcilliation conference report, we convinced our Senate colleague to increase the budget figure to \$100 million, with \$20 million set aside for 55 enforcement. To do this, frankly, we had to trade away things from other programs under our committee's jurisdiction that we will not get back. But it was that important to us that some semblance of reason be maintained with respect to this important program. So, as I say, we had a \$100 million obligation ceiling imposed on section 402. I am not claiming this as a victory which must be protected today, though. It is not a victory when 53,000 people die on the roads, and an important highway safety program is cut by more than half.

What I am asking, is that we all stand together, collectively and as individuals, and say that 53,000 people dead is enough. And that \$77 million is

not enough.

There are those who question the merits of the section 402 program. Like any Government program, it is not perfect. And though we know it can never be made perfect, we are working to improve it. The types of projects funded under this program will be more greatly restricted in the future.

But let me say this; section 402 has been successful in the past. In 1966, when the Highway Safety Act was enacted, the fatality rate per 100 million miles was 5.48. Although the rate has increased the past few years, since the benchmark year of 1966 we have seen a marked decline. During hearings of the Surface Transportation Subcommittee earlier this year, we were told that, had the 1966 level remained static, there would have been 30,000 more deaths in 1979 than there actually were. Let me repeat that; 30,000 deaths were prevented in 1 year alone. And it is suggested that the funding for this program be cut by two-thirds. We are saying today; don't let this happen.

To be sure, the program will be cut. I have already played a part in acquiescing to that. If the amendment which is on the floor is adopted, funding levels in the reconciliation bill will be restored, and I remind you once again that those levels already constitute a tremendous cut; from \$225 million to \$100 million. We do not need to cut that level any further. We do need to try and protect the health, the safety, and the very lives of our friends, our loved ones, our constituents, and total strangers who travel on the Nation's highways. The section 402 has been proven to do this; saving 30,000 lives a year.

So, at a time when the highway death rate is going up, I ask all our colleagues' support for this amendment.

Mr. CLAUSEN. Mr. Chairman. I move to strike the requisite number of words, and I rise to support the amendment.

Mr. Chairman, I rise in support of the amendment offered by the distinguished gentleman from New Jersey (Mr. Howard). As has been stated by previous speaker in support of the amendment, we need to remind our-selves that the highway safety program, as Mr. Anderson stated, was cut more than 50 precent.

Again, placing emphasis on what my friend from Pennsylvania (Mr. Shuster) has stated, this amendment simply conforms to the provisions regarding the obligational ceiling for the State and community highway safety programs to the levels established in the Omnibus Reconciliation Act of 1981. So, the substantial provision has already been agreed to by the conferees, both the House Public Works Committee as well as the Senate Environmental and Public Works Committee, and we can add to that the Senate Commerce Committee, during that very extensive and comprehensive reconciliation process.

So, in order to maintain consistency I strongly urge the adoption of this amendment, and urge that it be accepted by my colleagues.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Jersey (Mr. Howard). The amendment was agreed to.

Mr. ERTEL. Mr. Chairman, I move

to strike the last word.

Mr. Chairman, I rise to enter into a colloquy with the chairman of the Transportation Subcommittee, gentleman from Indiana (Mr. BENJA-MIN).

Mr. Chairman, I want to call to the committee's attention a serious bridge problem in my congressional districtactually, my district and Congressman SHUSTER'S district. The bridge connects our two districts. I refer specifically to the Bainbridge Street Bridge, designated by the Pennsylvania Department of Transportation as Northumberland County, L. R. 25, STA.

The Bainbridge Street Bridge was constructed in 1928 and today is functionally inadequate and unsafe. It is too narrow and does not have enough lanes to satisfy either the present or future traffic needs. The Pennsylvania Department of Transportation reports that the bridge's condition was associated with no fewer than 15 accidents 1978 through 1980.

The Pennsylvania Department of Transportation reports that there are section losses from corrosion in excess of 25 percent on the bottom flange angles, the angles attached to the girder web to support the edge of the deck and slabs and the lower portion of the girder web. From a structural point of view, this is a severe condi-

The Pennsylvania Department of Transportation also reports that most of the transverse web stiffeners and floorbeam attachment brackets have sustained traffic damage and are bent. The reinforced concrete deck is transversely cracked and spalling, patching is a continued need. The reinforced concrete sidewalk is heavily spalled and is deteriorating rapidly. Underscour is a problem during periods of abnormally high flows in the Susquehanna River. The floods associated with Agnes in 1972 and Eloise in 1975 cause severe underscouring. Finally, Pennsylvania Department of Transportation reports that the Bainbridge Street Bridge problems has resulted in a loss of industry from the Sunbury, Pa. area.

Mr. chairman, a letter from the Pennsylvania Department of Transportation dated September 3 notes

Even if the planning for the new bridge gets underway very soon, * * * it will be up to 8 years until the new bridge can be opened to traffic. During this period, the existing bridge's inadequacies and deficiencies will become more and more severe and intol-

The cost to replace the existing bridge is estimated at \$16.5 million.

Mr. BENJAMIN I understand the Bainbridge Street Bridge has a sufficiency rating of less than 50 and has been submitted by the Pennsylvania Department of Transportation for consideration by the Secretary of Transportation under the discretionary bridge program.

Mr. ERTEL. That is correct. The sufficiency rating is 47 and the Governor has submitted the bridge as a candidate for discretionary planning. Unfortunately, the subcommittee already had completed its deliberations when the Bainbridge Street request was made by the State to the Secretary of Transportation.

Mr. BENJAMIN. The discretionary bridge program was established to provide additional assistance to States with major bridge problems and Pennsylvania certainly faces serious bridge problems. The authorizing committee, of which you are a member, also recommended that discretionary funding be reserved for major bridge projectsfor those costing more than \$10 million. The Bainbridge Street Bridge qualifies in this regard and I certainly would urge the Secretary of Transportation to give this bridge priority consideration.

□ 1430

Mr. ERTEL. Mr. Chairman, I thank the subcommittee chairman for his consideration and for his colloguy, and I yield back the balance of my time.

Mr. ANDERSON. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I wish to enter into a colloquy with the chairman of the Appropriations Subcommittee on Transportation, if I may.

Aside from my already-stated concern about the level of funding for the Nation's highway safety program, I am also alarmed by the apparent reluctance of the administration and the committee to commit funds for the bicycle safety and pedestrian safety programs.

The committee report suggests that about 80 percent of the amount be allocated among four safety programs, leaving only 10.4 percent for other eligible areas. The Senate Commerce Committee, upon looking into this matter, has recommended that bicycle safety and pedestrian safety programs be accorded priority status along with the four programs mentioned in the committee report.

Based upon information with which I have been provided, the Senate Commerce Committee action appears to make sense. A study prepared by Department of Transportation officials, and reported in Traffic Quarterly, would indicate that in a ranking of the cost effectiveness of highway safety cycle and pedestrian safety programs

countermeasures, bicycle and pedestrian safety programs are among the most cost effective, far exceeding the effectiveness of alcohol safety and emergency medical service programs.

And yet, I have been told State highway safety officials are hearing from NHTSA that bicycle and pedestrian safety programs would not be funded in fiscal year 1982 and so should be dropped from State plans. I am most distressed at hearing this.

I am distressed because I know that of the 53,000 highway deaths last year, 9,800 resulted from collisions with pedestrians and another 1,300 from collisions with bicycles and other pedaled vehicles.

My purpose in rising, then, is simply to point out that there is a body of support in the House for the funding of bicycle and pedestrian safety programs by NHTSA, and that I for one would be most disappointed if some such funding is not forthcoming.

The reconciliation bill which has been signed into law calls upon the administration to study the cost effectiveness of the various highway safety standards and to begin funding those which fare best under their study, pending possible review by Congress. We must wait until that study is completed before any conclusions reached as to the advisability of which programs are funded, and I am afraid that the committee is a bit premature in reaching their own conclusions.

Mr. Chairman, I would like to have the gentleman comment on that at this time.

Mr. BENJAMIN. Mr. Chairman, if the gentleman will yield, there are all types of Federal and State programs on pedestrian safety independent of Federal programs.

Mr. ANDERSON. I refer to bicycle and pedestrian programs.

Mr. BENJAMIN. And the information we received is that \$45 million per year is available from the regular Federal highway funds for these projects. So there is money in the bill, but the determination must be made by the States and local communities.

The gentleman's committee actually chastised this subcommittee earlier in the proceedings today for attempting to determine where the money is to be placed. So, consequently in these larger funds there is money for both bicycle and pedestrian use and for safety programs, and it is not the intent of this subcommittee to go further other than to say that we share the gentleman's concern, but it is not our intent to specify what the States and local communities will decide to do with these funds, including the 402 funds.

Mr. ANDERSON. But, Mr. Chairman, as I stated, State highway officials are hearing from NHTSA that bi-

will not be funded in fiscal year 1982, and so they are saying that these should be dropped from the State plans. Is that the chain of events?

Mr. BENJAMIN. Mr. Chairman, we can check on that. That direction has not come out of this subcommittee. We have been very receptive to them and have helped in the very larger scale programs, but we have not made assigned categories by saying this is available in the overall funding of safety programs.

We would agree with the gentleman's contention that this should be a high priority. We are not aware of whatever thought process has been developed or has been suggested to someone that there not be funding in 1982, and we do not believe that is true. We did not certainly make the directives ourselves.

Mr. ANDERSON. Mr. Chairman, I thank the gentleman from Indiana (Mr. BENJAMIN).

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 310. (a) Notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and highway safety construction programs for fiscal year 1982 shall not exceed \$8,200,000,000. This limitation shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, or projects covered under section 147 of the Surface Transportation Assistance Act of 1978, or any ongoing emergency project for replacement or rehabilitation of a bridge the Federal share of the costs of which is obligated at the discretion of the Secretary under section 144 of title 23. No obligation constraints shall be placed upon any ongoing emergency project carried our under section 125 of title 23, United States Code, or section 147 of the Surface Transportation Assistance Act of 1978 of upon any ongoing emergency project for replacement or rehabilitation of bridge the Federal share of the costs of which is obligated at the discretion of the

Secretary under section 144 of title 23.

(b) For fiscal year 1982, the Secretary of Transportation shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to each State for fiscal year 1982 bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocat-

ed to all the States for such fiscal year.

(c) During the period October 1 through December 31, 1981, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b). and the total of all State obligations during such period shall exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and

(c), the Secretary shall—
(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction have been apportioned or allocated to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, 1982, revise a distribu-tion of the funds made available under subsection (b) if a State will not obligate the amount distributed during fiscal year 1982 and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during fiscal year 1982; and

(3) not distribute amounts authorized for administrative expenses and forest high-

AMENDMENT OFFERED BY MR. BENJAMIN

Mr. BENJAMIN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Benjamin: On page 33, strike out line 4 and all that follows through line 4 on page 35 and insert in lieu thereof:

SEC. 310. (a) Notwithstanding any other provision of law, the total of all obligations Federal-aid highways and highway safety construction programs for fiscal year 1982 shall not exceed \$8,200,000,000. This limitation shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, or projects covered under section 147 of the Surface Transportation Assistance Act of 1978. No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States Code, or section 147 of the Surface Transportation Assistance Act of 1978.

(b) For fiscal year 1982, the Secretary of Transportation shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned to all the States for such fiscal

(c) During the period October 1 through December 31, 1981, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b). and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and

(c), the Secretary shall—
(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United

States Code; (2) after August 1, 1982, revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year; and

(3) not distribute amounts authorized for administrative expenses and forest high-

BENJAMIN (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. BENJAMIN. Mr. Chairman, this amendment simply conforms the limitation on obligations for Federal-aid highways and highway safety construction programs for fiscal year 1982 to the budget reconciliation bill. It makes no change in the \$8.2 billion level included in the committee bill. only in the distribution formula contained in the reported committee bill.

Very simply, Mr. Chairman, it conforms section 310 precisely to the rec-

onciliation bill.

Mr. COUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. BENJAMIN. I yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. Mr. Chairman, I certainly support the distinguished subcommittee chairman in the amendment, and I think it is a good amendment. It is acceptable to this side.

Mr. BENJAMIN. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana (Mr. BENJAMIN).

The amendment was agreed to. The CHAIRMAN. The Clerk will

The Clerk read as follows:

SEC. 321. The weeks of June 13 through July 4, 1982, are designated as "National Clean-up and Flag-up America's Highways Weeks", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe this period with appropriate ceremonies and activities.

AMENDMENT OFFERED BY MR. ERTEL

Mr. ERTEL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ERTEL: Page 38 after line 15 insert the following new sec-

SEC. 322. None of the funds provided in the Act to any Department or Agency shall be obligated or expended to provide a personal cook, chauffeur, or other personal servants to any officer or employee of such Department or Agency, excluding those positions from this provision which serve dual roles pertaining to a security or law enforcement function.

SEC. 323. Except for security mission automobiles, none of the funds provided in this Act to any Department or Agency shall be obligated or expended to procure passenger automobiles as defined in 15 U.S.C. 2001 with an EPA estimated miles per gallon average of less than 22 miles per gallon.

Mr. ERTEL (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD, since I have provided copies at both tables.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. ERTEL. Mr. Chairman, this is the same amendment I have offered on all the other appropriation bills. It merely stops the practice of having services provided private-type to people within the respective departments by persons such as cooks, chauffeurs, or personal servants.

More importantly than that, the amendment contains the language that the automobiles which would be obtained by that agency would have to have an average EPA estimated mileage of 22 miles per gallon, and that qualifies a great number of American cars. It will cut down on the cost of fuel and will help them to be more economical and cost saving for the Government.

Mr. Chairman, my understanding is that the chairman of the subcommittee will accept the amendment.

Mr. BENJAMIN. Mr. Chairman, if the gentleman will yield, the erudite gentleman from Pennsylvania (Mr. ERTEL) has been so persuasive that we will accept those provisions numbered 322 and 323 dealing with personal services, and EPA estimated mileage for automobiles to be purchased by the U.S. Government.

Mr. ERTEL. Mr. Chairman, I thank the gentleman.

Mr. COUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. ERTEL. I am happy to yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. Mr. Chairman, I feel sure that amendments of this sort make good press, but I am concerned about the fact that they somehow imply that the various officials of the Government have all these kinds of servants and cooks and all these kinds of things, and I feel quite sure they do not.

Does the gentleman have any evidence specifically that any officials have these kinds of servants, chauffeurs, or what have you, that are not connected with security?

Mr. ERTEL. Yes, Mr. Chairman, I do have such evidence. I have put evidence in the RECORD previously.

I have outlined the cost of drivers in the Department of Transportation and the fact that there are five personnel that served as mess stewards at the cost of over \$100,000 for the Secretary of Transportation.

I have evidence of other people. For instance, the Treasury Department pays a driver approximately \$16,000. The expense for the car is \$4,197, and there are dining room salaries of \$22,000.

I can go through a whole list of every department in the Government, and part of that includes the Transportation Department.

Mr. Chairman, I think it appropriate that we put this kind of amendment in the bill. It shows people that we are serious about cutting frills.

Mr. COUGHLIN. May I ask. Mr. Chairman, do the drivers relate to personal security?

Mr. ERTEL. If they are for personal security, then, of course, they are not chauffeurs. They are not personal servants nor are they cooks. They would be security personnel, and they would not fall in this category.

Mr. COUGHLIN. And I presume a mess employee would not be personal cook either?

Mr. ERTEL. If the mess employee were there for the personal use of the Secretary; yes, he would.

Mr. COUGHLIN. That would be a

personal cook?

Mr. ERTEL. It is the same thing. If it is for the personal use of the Secretary of the Department of Transportation, yes.

Mr. COUGHLIN. Neither this administration nor other administrations that I have heard of have had a personal cook

Mr. ERTEL. On the contrary, years ago the Secretary of then HEW, Mr. Joseph Califano, had a personal cook on his payroll, and I had that removed at that time. I offered an amendment, and the Secretary called me and sent me a letter to assure me that that would not be done any more. So it was corrected.

Mr. COUGHLIN. Mr. Chairman, let me make a further inquiry, if I may.

The definition of a passenger automobile, as defined by 15 U.S.C. 2001 is a car with a capacity of 10 or fewer people, and as I would understand it, this would prohibit the Department from acquiring a van, for example, that got less than 22 miles per gallon. Is that correct?

Mr. ERTEL. No; on the contrary, vans are specifically defined, and vans would not be covered by the prohibition of vehicles because they would carry over 10. They are stated by definition, as are pickup trucks.

Mr. COUGHLIN. The definition in 15 U.S.C. 2001 which the gentleman cited includes as a passenger vehicle any vehicle with a capacity of 10 or less, which would include a van.

Mr. ERTEL. If the gentleman would go further in that section, he would find that they define what a van is specifically

Mr. COUGHLIN. As I read it from the 1981 gas mileage table from EPA, there would not be an American-made van that would be able to be purchased by DOT under this amend-

Mr. ERTEL. A van is defined as a vehicle that can carry 10 or more people. Mr. COUGHLIN. A van carrying 10

or less people could not be purchased? Mr. ERTEL. I do not know of any van that would qualify in that regard. A van is not covered under this

Mr. COUGHLIN. Or a vehicle that would carry 10 or fewer people?

Mr. ERTEL. That type vehicle is covered under this, if it is primarily for carrying people. For instance, they have pickup trucks which carry people and which carry fewer than 10 people. They may have a club cab pickup truck, but it is primarily for things other than the moving of people. That is excluded, and we can go through all the exclusions. This would also exclude a van.

□ 1445

Mr. COUGHLIN. I would oppose the amendment, of course.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. ERTEL).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WILSON Mr. WILSON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Wilson: Page 38, line 16:

Sec. 324. No funds appropriated by this Act shall be used to pay any salary or other expense for the purpose of putting into effect or enforcing any rule or order which requires any reduction in the total daily number of flights by (a) air carriers except air taxis, or (b) air taxis, at Washington National Airport below the number operated on July 31, 1981; except that this limitation shall not apply to Special Federal Aviation Regulation 44, amendments thereto or orders issued thereunder.

Mr. WILSON, Mr. Chairman, perhaps the chairman of the subcommittee would want to accept this amend-

No, the gentleman says he does not want to accept the amendment.

Mr. Chairman, this amendment is very simple. It simply freezes the amount of slots that are now presently allotted at National Airport.

There are many reasons for this amendment to be passed. One is that it will prevent passenger inconvenience: it will prevent reduction of service to many cities in the United States. the cities of Milwaukee, for instance, Louisville, Philadelphia, Boston, Pittsburgh, and Chicago.

But more than anything else, if this amendment is not passed it will reduce competition. If the amendment is not adopted it will provide Eastern Airlines with a virtual monopoly at National Airport.

The proposed rules have a clear bias. have a clear bias in favor of Eastern. They are exempt from the hourly flight limitations with the ability to put on a second shuttle from New York. Everyone in this chamber who has ever taken the shuttle knows that since New York Air has been competing with Eastern that not only has New York Air provided excellent service at much lower prices to New York and to Boston from Washington, but also the Eastern shuttle has substantially improved, simply because of the law of the marketplace and because of the discipline of competition.

This is a very narrow amendment. It prevents reduction in service. It prevents reduction in competition. It does not in any way inhibit the Department of Transportation from any noise limitation efforts that it might make or any improvement in access or incentive for Dulles Airport.

I believe this amendment is strongly in the national interest. I believe this amendment is in the interest of fairness and I believe it should be adopted.

Mr. BENJAMIN. Mr. Chairman, I rise in opposition to the amendment.

For over 10 years the Department of Transportation has been working on a policy for National and Dulles Airports. It is time to resolve this issue and provide the Washington area with safe and efficient airport facilities.

The lack of a definitive policy on air carrier slots is impeding the ability of the National Airport scheduling committee in allocating slots. There is also a need to address the issue of aircraft noise and to achieve a better balance of the air traffic between National and Dulles. Once a definitive policy is implemented, it will then be possible to move forward with the badly needed improvements to the airport facilities at National.

Mr. Chairman, I believe the policy proposed by the Secretary of Transportation is a sound one. It doesn't provide everything for anybody, but it does provide a balanced and fair approach to the competing interests of the airlines, their passengers, the local community, and Members of Congress.

The policy provides for 37 air carrier operations per hour between 7 a.m. and 9:59 p.m. This compares with the current level of 40 per hour. The policy also would increase the present perimeter of 650 miles for nonstop service to 1,000 miles and establish noise limitations. The proposed noise levels would permit only relatively quiet aircraft to operate during the nighttime hours. In the future, these levels would be reduced to bring about a change in the fleet mix serving the airport. This phased-in reduction should permit sufficient time for the airlines to take the actions necessary to assure an adequate fleet capable of meeting the noise standard.

Mr. WILSON. Mr. Chairman, will the gentleman yield?

the gentleman yield?

Mr. BENJAMIN. I am happy to yield to the gentleman.

Mr. WILSON. The gentleman does acknowledge that my amendment does not affect any kind of noise abate-

Mr. BENJAMIN. Yes, I acknowledge the gentleman's point.

Mr. Chairman, it is time to face the fact that National Airport is an over-crowded facility. There are too many planes, too many people and too much

ground congestion. The airport is already being used beyond the design capacity of its terminal and roadways. A 1977 study identified large portions of the public space within the terminal, as well as the curbside and traffic circle area, as inadequate to serve the number of people using those facilities. And, unless these problems are addressed now, the situation will continue to deteriorate. Estimates provided by the FAA indicate that, unless some airport policy changes are made, in just a few years-4 years-there will be more than 19 million passengers at National Airport. This is about a 30percent increase over the current level. So, if you think National is crowded now, just wait a few years, and if nothing is done it will be intolerable.

Mr. Chairman, I believe the Secretary has proposed a responsible and fair policy for National and Dulles Airports. The alternative is continued growth and congestion, which is not in the best interest of the Government, the airlines or the users of this facility

Ten years is long enough to consider an airport policy. It is time to move forward to implement the policy and make the necessary improvements so that we have two airports worthy of our Nation's Capital.

I might reflect that whatever we do will certainly effect usage of the Baltimore-Washington International Airport.

I would also indicate to the Members of the House that it was this bill in fiscal year 1981 that served as the device preventing the previous Secretary from resolving this problem. It was indicated in that bill that nothing could be done until April 26 on the basis that we would have further hearings. We have had ample opportunity every year since I have been in the Congress, since 1977, and we are never going to get any closer to resolution because everybody wants everything out of Washington National Airport.

Someone has to call the shots. This Secretary has been courageous enough to do so. We ought to support him.

Mr. BENJAMIN. Mr. Chairman, I ask unanimous consent that the debate on this particular amendment be limited to 1 hour with half of that time given to the gentleman from Texas (Mr. Wilson) and the other half given to the gentleman from Pennsylvania (Mr. Coughlin).

The CHAIRMAN. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. WILSON. Mr. Chairman, I yield 5 minutes to the gentlewoman from New York (Ms. Ferraro).

Ms. FERRARO. Mr. Chairman, I rise in support of the amendment and I ask unanimous consent to revise and extend my remarks.

Mr. Chairman, one of the major issues that has been raised in opposition to this amendment is the need to control aviation noise at National Airport. That being the case, and given my consistent record of strong support for stronger antinoise guidelines, I would like to try to clear the air, so to speak, on the noise issue.

The amendment before us does not veto the entire DOT National Airport policy described by the distinguished chairman. The policy DOT has proposed contains several specific provisions establishing limits on noise at National Airport. The Wilson amendment does not affect those provisions—much to the dismay, I am sure, of my good friend the gentleman from Kentucky, with whom I have so frequently disagreed in the past on noise questions.

The reason Gene Snyder and Gerry Ferraro agree on this amendment is that it is not a noise amendment. DOT's own environmental impact statement of the National Airport policy stated clearly that the slot reduction scheme would have, and I am quoting, "no significant impact" on noise levels at the airport. And this amendment affects only the slot reductions. So it is simply inaccurate to label this a noise issue.

Now let me talk about certain provisions of the slot reduction plan, which, I should point out, were not included in the National Airport policy proposed by the Carter administration, which I supported.

I do not oppose slot reduction per se. Concerns that have been raised regarding safety and air and ground congestion at National justify firm steps to control the traffic load. Measures to shift some of the traffic to Dulles, which is shamefully underutilized, are long past due.

So what is my objection?

The slot reduction scheme that has been hatched by DOT is anticompetitive, anticonsumer, and antideregulation.

DOT's plans call for ending ATC operations at National, under which airlines can operate more flights than they have slots simply by getting clearance from the air traffic control system. This so-called loophole has been crucial to the market entry and the growth of new airlines which, in the finest spirit of deregulation, have brought needed competition, and reduced fares, to the airline industry.

The DOT plan, by closing the ATC rule and leaving open the extra sections rule, benefits larger, established carriers, one in particular, threatens to cripple newer carriers, and thereby undermines the procompetitive effects of deregulation causing a return to monopoly routes and higher fares.

I ask you, when you cast your vote on this amendment, to base your decision on the facts, and not on the rhetoric. It's easy to say this amendment is pronoise and procongestion, but I think close analysis of the issue shows this just is not so. I urge a vote for the amendment, for competition in the airline industry, and for the consumer. Mr. COUGHLIN. Mr. Chairman, I

yield 5 minutes to the gentleman from

Virginia (Mr. Wolf). Mr. WOLF. Mr. Chairman, I rise in opposition to the amendment of the gentleman from Texas.

CONGESTION

Unless prompt action is taken, National Airport will soon clog with passengers, cars, and airplanes. The genamendment would mean tleman's delays, holding patterns, traffic snarls, congestion, noise, and mounting hassle at Washington National. If agreed to, the amendment before us would prevent the Federal Aviation Administration (FAA) from containing National's growth. The result would be an aluminum sky over some of Washington's most urban population centers.

SAFETY

In addition to the anxiety and frustration caused by congested conditions at National, overcrowding there only serves to increase the risks inherent in a facility that was designed to accommodate roughly 6 million passengers annually on DC-3's and now is the principle Washington area airport providing over 14.5 million passengers each year with jet services.

National Airport has the shortest main jet runway in America. Its twisting, turning, downriver approach is difficult and only one approach has instrument landing capability. Uncontrolled growth in the number of flights at National would only reduce

the margin for error.

Given the conditions at National, the excellent safety record to date is a tribute to the pilots who fly into District of Columbia Airport. The more we overtax National Airport, the more there is reason for concern.

KEEP NATIONAL VIABLE AND OPEN

Some airline lobbyists and a few Members would have you think that the Department of Transportation's proposed policy would close National Airport. It would not. I would never support such an idea. I represent the district that is home for both Dulles and National. Both are vitally important to Virginia's 10th District. I could no more support a plan to drastically curtail National Airport than I could one that ignores the problems there.

One of the concerns addressed by the proposed policy is noise. Both visitors-your constituents-and residents find their enjoyment of our Capital diminished by the intrusive roar of jet planes. The plan before FAA would respond to this concern by encouraging the use of quieter planes here when they become available. It also addressed the frequency of overflights.

SLOTS

The policy proposed would reduce the number of flights each day slightly, but those reductions would be quite modest and are offset by permitting an increase in the number of passengers that may be served at National thus encouraging the use of quieter, more efficient airplanes. In spite of what some airline lobbyists have argued, no discussion about how to meet those reductions have been made. Many airline lobbyists have threatened widespread service cuts to stampede the House into opposing the proposed policy which is the result of effort by at least three Secretarys of Transportation. You may be sure, if a route is profitable, the airlines will work to keep it.

ABOUT THE POLICY

The policy that has been proposed is a balanced and reasonable one. It permits annual passenger volume at National to grow to an additional 1.5 million passengers. It would encourage the use of quieter planes 5 years from now when they are available. It would make ground access to Dulles much convenient. It would cause more future air travel growth to occur either at Dulles or Baltimore-Washington International Airports.

A PLAN IS NEEDED NOW

DOT has spent 10 years writing a policy to prepare for the future air travel needs of the Washington area. It is past time that a plan for the future of National and Dulles be approved. The airlines need to know how to plan for the increased air travel that is expected here.

ATC STRIKE-AN OPPORTUNITY

The air controllers strike has provided a unique opportunity to implement a policy for these airports. The 25 percent cutback in operations at National far exceeds any changes resulting from the proposed DOT rule. If implemented now, the policy would provide for growth in operations from present depressed levels. It may be easier now than ever to put a responsible policy in place.

DOT RULEMAKING IS NOT COMPLETED

The amendment before the committee would stop the DOT proposed policy before the plan is finalized. All interested parties have had ample opportunity to comment on the plan and a final rule is expected soon.

ONE-YEAR REVIEW

It is important to recognize that the proposed policy provides for a review after a 1-year-trial period. If improvements are needed, there will be an opportunity to make them.

Earlier this week over 100 community, civic, and political leaders joined me in trying to underscore the fact that the Washington community is united in the view that the problems

the policy addresses must be solved, that a responsible policy is needed now, and that such a policy must be given an opportunity to work.

MEMBERS PART OF COMMUNITY

As Members, we are occasionally maligned for being perceived as voting our self-interests on issues such as this. The 137 Members who signed a letter in general support of this policy in my view represent proof that Members of this body recognize that they are an important part of this community and will vote in the interest of this area when, as here, it is the right thing to do.

I strongly urge you demonstrate your willingness to be a good Washington neighbor and vote no on this amendment.

Mr. WILSON. Mr. Chairman, I yield 5 minutes to the gentleman from New York (Mr. GREEN).

Mr. GREEN. I thank the gentleman for yielding.

Mr. Chairman, I rise in strong support of the gentleman's amendment. I have joined in sponsoring this amendment because I share his concern that the proposed Metropolitan Washington Airport's policy will have a substantial adverse effect on competition in the airline industry and on airline services and fares.

Let me start with a brief discussion with the environmental issue. I think the opponents of this amendment simply have to face up to the fact that supplemental environmental impact statement prepared to accompany the policy and prepared by DOT, which is proposing this policy, specifically admits that elimination of the ATC authority, that is, the authority to fly when the air controllers say they have some space, will produce, and I quote, "no significant change in contour areas or population impacted upon implementation."

So the suggestion that this policy is going to be some sort of panacea for people in the National Airport flight path, I think, has been knocked into a cocked hat by DOT's own admission.

I think the basic question we get to is whether we really believe in the deregulation policies that this Congress and this administration have enunciated as our basis policy for the air-

I would submit to the House that the proposed regulations are basically anticompetitive and in violation of the free competition policy and that they, therefore, fly in the face of what this Congress has chosen to do by way of regulation of the airline industry.

I would also point out that the Department of Transportation has proposed this policy without knowing the economic impact. So that the Department itself has to admit that it simply has not done the homework on what the competitive impacts of this policy would be.

Now, why do I say that the impacts are anticompetitive? That is because the policy, very plainly, favors one type of air service over other competitive types of air service. The fact of the matter is this policy says if you have a shuttle-type service and you run extra sections in order to take care of the additional crowds that show up at the gates, that extra section does not count against the number of slots you get under this policy. So a shuttletype operator-and we know there is basically one using this airport-is free to have all of the extra sections that the traffic will generate. And this "Go ahead and do it, policy says, create all of the noise you want with your extra sections, we are favoring that kind of operation."

But to someone who wants to compete with the shuttle-type of operation by offering a different type of service, a scheduled service, and wants to use the so-called ATC space that is available-and it generally can be used to run a scheduled type of service, a competitive service that operates a different way with advance regulationsthis policy says, "We are going to throw every roadblock we can in your way because we are not going to allow you to have those ATC slots, even though your opposition, your competitor, can have all of the space they need for the extra traffic, and we will not count that against them.'

I say that that is basically anticompetitive. It is no place for the Department of Transportation to be overriding what Congress has done and saying, "We are going to favor one type of service over a competitive type of service."

That is basically what we in Congress have to face today. The Department of Transportation has admitted in its environmental impact statement that this is not going to solve the noise problem at National. But it is going to have a major competitive impact. Many of the smaller airlines which have begun operating since we voted in favor of deregulation are going to be put out of business or badly throttled back if this policy is allowed to take effect.

I urge all of you to support the policy of competition in the air lanes. We voted for that. I think this administration, in general, has been dedicated to the competitive approach. Today we have a chance to put up or shut up on competition, and I urge you to support free competition and free enterprise by supporting the Wilson-Green amendment.

Mr. WILSON. Mr. Chairman, will the gentleman yield?

Mr. GREEN. I yield to my colleague. Mr. WILSON. Mr. Chairman, the gentleman is a frequent passenger, I

presume, on the air routes between New York and Washington.

Mr. GREEN. All too frequently.

Mr. WILSON. Has the gentleman found that the service on the Eastern shuttle has improved since New York Air has been in business?

Mr. GREEN. I would have to say that I think everyone has been a lot more friendly at Eastern since the competitive service began.

Mr. WILSON. Will the gentleman describe what has happened to the

fares?

Mr. GREEN. The fares have come down. We even had a GTR rate which allows those traveling on Government business a lower rate on both lines with the effect being to save the Government a great deal of money. I very much fear that the Government would lose those savings if we destroy the competition on this route.

The CHAIRMAN. The time of the gentleman from New York (Mr.

GREEN) has expired.

Mr. WILSON. I yield 2 additional minutes to the gentleman from New York.

The CHAIRMAN. Without objection, the gentleman from New York (Mr. Green) is allowed to proceed for 2 additional minutes.

There was no objection.

Mr. WILSON. The gentleman is aware that this same thing has occurred with the routes that Air Florida flies, with the routes that People Express flies, a decade ago with Pacific Airways, is the gentleman not?

Mr. GREEN. I am generally aware, although I am not as familar with these routes as the La Guardia-to-Na-

tional route.

Mr. WILSON. The gentleman is also aware that this good competitive service is being made available to Cleveland and Detroit now?

Mr. GREEN. I am very much aware of this new service.

Mr. WILSON. And soon to be made available to Chicago, in all probability.

Mr. GREEN. Yes. And I would again emphasize the enormous savings to the Government from having a Government travel rate on these flights as a result of the introduction of competition. It is an enormous savings for the Government.

Mr. WILSON. Is the gentleman further aware that if the amendment does not pass, almost half of the air traffic at National Airport will be one airline?

Mr. GREEN. I was not aware of the exact statistics, but it is plain that if one airline is allowed to have all of the extra sections and the others are not, the airline with extra sections could achieve an even more dominant position.

Mr. WILSON. Almost 45 percent. Mr. COUGHLIN. Mr. Chairman, will the gentleman yield? Mr. GREEN. I yield to my colleague, the gentleman from Pennsylvania.

Mr. COUGHLIN. Is the gentleman aware that, of course, New York Air can get slots just like any other airline can and can get extra sections just like any other airline can and it would not eliminate competition?

Mr. GREEN. I would point out to the gentleman that what the Department of Transportation is doing is saying, "You, New York Air, if you want to compete with the shuttle service, you have to operate a shuttle service."

Of course, they cannot compete head-to-head with the very well established service of a large competitor, a competitor which has pioneered the shuttle service and has larger airplanes and more equipment. But I do not think it is the place of the Department of Transportation and this Congress to say, "You have got to compete on Eastern's terms." That is exactly what I am objecting to. They are offering a different kind of service, lower fares, and pioneered the GTR rate. They are giving a scheduled service and they cannot get the extra slots for that service.

Mr. COUGHLIN. If the gentleman will yield, they would have the same veto right on the allocation committee that any other airline would have.

Mr. GREEN. The basic fact is this system that the Department of Transportation is proposing to implement says to the shuttle service, "You can have unlimited extra sections," and no one else, no other kind of service gets that privilege.

Mr. COUGHLIN. Mr. Chairman, I yield 4 minutes to the gentleman from Louisiana (Mr. Livingston).

Mr. LIVINGSTON. I thank the gentleman for yielding.

Mr. Chairman, it has been 10 or 11 years since the Federal Government began studying the various issues related to the safe and efficient operation of Washington's airports. Since that time, proposed plans for their operation has been postponed for various reasons. Today the gentleman from Texas asks us to again delay settling the issue.

Now, I rise in basic opposition to the gentleman's amendment. But in looking at it more carefully, I understand that it really only pertains to the slot issue; is that correct?

Mr. WILSON. That is correct.

Mr. LIVINGSTON. Might I inquire whether the gentleman's proposal or amendment would relate to the grandfathering clause involved in the overall plan, or whether it would relate to the attempt to include New Orleans, Kansas City, and Miami within the group of cities entitled to direct flights to Washington National?

Mr. WILSON. It does not relate in any way to do that. And I would be

the last to inconvenience the people in New Orleans.

Mr. LIVINGSTON. I appreciate the gentleman's comments, and I am sure he understands that my reason for rising in attempted opposition to his amendment is parochially motivated, since indeed New Orleans has been trying to get some kind of direct flight to Washington, D.C., for about the last 10 years, and rather unsuccessfully, I might add. But I also understand, from the gentleman from Virginia (Mr. Wolf), that he has spoken with the Secretary of Transportation and that he has an understanding that in fact, if this amendment is passed, there may be an adverse consequence to New Orleans' ambition.

Mr. WOLF. If the gentleman will yield, I have spoken with the people of the Department of Transportation and FAA, and they have said that if the Wilson amendment is adopted, in essence there will be no way to enforce the policy, there will be no way to have a cap on passengers, and it would gut the whole policy. So for all practical purposes, it kills the policy; therefore, you will not be able to fly from Washington Airport, National Airport, to New Orleans; that is correct.

Mr. LIVINGSTON. Is the gentleman saying that the Secretary of Transportation has proposed a rather balanced plan, and that if one integral part of that plan fails, then the entire plan fails?

Mr. WOLF. That is correct, yes.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. LIVINGSTON. I yield to the gentleman from Kentucky.

Mr. SNYDER. I noticed that the gentleman from Virginia said that he spoke to some folks at the Department of Transportation. I do not know who the folks are.

But let me suggest to the gentleman that I spoke to the Secretary this morning, because I have published in the Record some amendments which would cause you problems on the perimeter, and I explained to him that I was not going to offer those, I was going to support the Wilson amendment which dealt only with the slot allocation.

While I did not know to ask him this question that the gentleman from Virginia has raised, he certainly did not say to me, "Well, now, if that passes, I am going to scuttle the whole program." And I think he would have logically said that. That was not some folks down there; that was the Secretary.

Let me just say to the gentleman that if you want service from National to New Orleans, you got a lot better chance with 640 air carrier slots a day than you have with 555, and that is the difference.

□ 1515

Mr. LIVINGSTON. I appreciate the gentleman's comments, but I did intend to make a statement in general opposition to the amendment. I hope the gentleman understands that my opposition is to some degree limited to my special issue.

I personally believe it is time to implement a plan. However, before doing so it is important to explain some of the issues that are frequently misunderstood, that form the basis of the

proposal.

The first is the slots issue. Many of my colleagues have been told that if the plan is implemented, service between their hometowns and Washington National will be discontinued because of the reallocation of slots.

But, airlines, historically, have never used all their available slots. For example, I studied FAA records on slot usage at National for the months May, June, and July this year and found that airlines failed to use an average of 68 slots per day. Extrapolated for the entire year, the figures mean over 23,000 slots would go unfilled. Moreover, under the proposed plan the perimeter for flights arriving nonstop at Washington National has been expanded from 650 to 1,000 miles, a change that gives access to a number of cities for the first time.

Second is the noise issue. In my opinion it is very difficult to argue against reducing aircraft noise in the metropolitan area. Anyone living here, particularly those in northern Virginia and parts of the District, are blasted aircraft takeoffs and landings almost every 40 seconds. The plan establishes a stricter timetable for the reduction of aircraft noise, thus requiring airlines using Washington National in 1986 to use the new generation of ultraquiet, fuel efficient aircraft. In this respect the plan actually acts as a financial incentive for airlines to convert to the fuel efficient models that will be so important for economical operations as jet fuel costs continue to rapidly escalate.

The plan is not perfect, but it is as close to workable as possible after 10 years of effort. It would be a tragic mistake to approve another delay in the implementation of the plan. In short, the plan does all the things everyone would like to see accomplished at our airports: reduce noise levels, improve safety, and economize airport operations.

Let us give the plan a chance.

I urge my colleagues to vote down the Wilson amendment.

Mr. WILSON. Mr. Chairman, I yield 5 minutes to the gentleman from Kentucky (Mr. SNYDER).

Mr. SNYDER. Mr. Chairman, I rise in support of the gentleman's amendment and urge my colleagues to do the same. As he indicated, it would preclude the Department of Transportation from using any funds in this bill to implement any rule to reduce the number of commercial flights at National Airport.

I want to state at the outset that the amendment will not preclude DOT from taking whatever actions are necessary in the interests of safety. As my colleagues are aware, DOT has been forced to curtail operations at National and other airports as a result of the PATCO strike and this amendment would continue to allow the Department to respond to this situation. However, once the air traffic control system could accommodate flights at National as it did before the strike, the Secretary would be precluded from reducing commercial operations below the prestrike level.

The proposed National Airport policy, issued by the DOT on July 8, 1981, would radically change the way in which this airport will be used in the future. As proposed, it would: First, reduce available air carriers slots by nearly 20 percent; second, impose unreasonable and restrictive noise regulations for future airport operations which would, by 1986, ban virtually all air carrier turbojet aircraft currently using the airport; third, set a ceiling of 16 million passengers per year; and fourth, extend the existing nonstop perimeter from 650 to 1,000 miles.

Among other things, the proposed rules would reduce the daily number of available air carrier slots from approximately 697 (640 hourly plus 42 additional flights based on air traffic conditions, plus 15 extra sections) to 570 (555 hourly plus 15 sections)—a net reduction of 127 or 18.2 pecent.

Such a change would mean that all cities currently receiving nonstop service to National would be in jeopardy of losing that service. While it is difficult to predict which of these cities will lose the most, it goes without saying that the reductions will be severe and widespread and that they will also extend to cities being served by commuter airlines. Therefore, if you represent a district which receives nonstop service out of National Airport today, both you and your constituents will be far worse off if this policy is adopted.

If you have been told that all of these flights will automatically be transferred to Dulles, I suggest that you not rely on this happening. Many airlines losing slots at National will merely move their airplanes to other markets where the profit potential is higher than for flights which will require passengers to suffer through a 45-minute to 1-hour drive between Dulles and the city.

In addition to the proposed slot reductions, the DOT plan would unfairly discriminate against certain carriers by eliminating the rule which permits additional operations, provided they can be safely accommodated by air

traffic control. Many airlines take advantage of this rule, including various commuters, New York Air, Northwest

Airlines, and Air Florida.

Unfortunately, the policy would eliminate this option while at the same time continue to allow extra sections to be operated without regard to the number of slots allocated. The effect of this proposal on Washington-New York flights, for example, is to preclude New York Air from conducting much of its service while allowing Eastern to continue operating extra sections as part of its shuttle. I suggest to my colleagues that this is a clear case of discrimination since all extra flights are not being treated in the same fashion.

I want to emphasize that this amendment deals only with reducing air carrier and commuter flights. It is totally silent on such issues as the 1986 noise regulations and the proposal to increase the nonstop perimeter to 1.000 miles. While I do not personally favor either of these other proposals, the amendment would in no way preclude DOT from taking action on these matters in accordance with its

proposed policy.

I would also suggest to my colleagues that DOT made up its mind on these proposals a long time ago and has repeatedly attempted to minimize public participation in the rulemaking process. As evidence of this, I offer the

following: First, the proposed policy would impose these changes on National's operations without the benefit of a regulatory flexibility analysis, which is generally required by 5 U.S.C. 603 and 604, to assess the policy's impact on small entities. DOT did not perform this analysis but merely stated in the NPRM that the impact on small entities would be insignificant without stating the reasons for its conclusion.

The law clearly requires that either a flexibility analysis should be prepared or reasons should be given why one was not necessary. Neither has

ever been done.

Second, DOT originally stated in the NPRM that it would prepare a regulatory impact analysis within a year after the final rules were issued. This analysis, which is required by Executive Order No. 12291 for major rules, requires a thorough evaluation of the potential advantages, disadvantages and viable alternatives to the proposed rules and should be subject to public comment. Obviously, DOT wanted to railroad these proposals through and was quite content to prepare the impact analysis after the rules were adopted-thus minimizing public participation. Needless to say, criticism of this action soon followed.

DOT's response to this criticism was to change its mind and conduct a preliminary regulatory impact analysis. They only released this analysis on

August 26, a mere 5 days before the closing of the public comment period on the entire policy. Moreover, this document was only placed in the public docket and did not receive general dissemination. I suggest to my colleagues that if this doesn't indicate the Department's disdain for the public's role in the rulemaking process, then I don't know what does.

I submit to you that a vote in opposition to this amendment would be tantamount to telling the DOT to do whatever is convenient for them-notwithstanding other legitimate factors which they do not want to consider.

I would urge my colleagues to send a message to DOT-that we in Congress have had enough of this type of rulemaking and that we expect the executive branch to follow the President's guidelines in proposing and implementing new rules.

Today it is National Airport, tomorrow it will be something else unless we require the type of thorough analysis and public comment that the public deserves on these issues.

For the foregoing reasons, Mr. Chairman, I urge my colleagues to

support the amendment.

The CHAIRMAN. The time of the gentleman from Kentucky (Mr. SNYDER) has expired.

Mr. WILSON. Mr. Chairman, I yield 5 additional minutes to the gentleman from Kentucky.

Mr. Chairman, will the gentleman vield?

Mr. SNYDER. I yield to the gentleman from Texas.

Mr. WILSON. First of all, I would like to commend the gentleman on his very scholarly presentation. He is certainly better prepared on the subject than I am.

Mr. SNYDER. I thank the gentle-

Mr. WILSON. I go back again to the competition question.

Is there any doubt in the gentleman's mind that if this amendment does not pass that it will give an overwhelming commercial advantage to Eastern Airlines?

Mr. SNYDER. They already have one. My best calculation would be that they would probably run somewhere between 45 and 48 percent of the business into National.

Mr. WILSON. The entire business?

Mr. SNYDER. Yes. Mr. WILSON. Does the gentleman also agree it would be impossible to compete with them on the Washington-New York shuttle run?

Mr. SNYDER, There is no question about that. We are doing away with air traffic control permissions in, and currently there are scheduled 42 of those, most of which are New York Air, Northwest, Air Florida commuter. Those would no longer be permitted.

Mr. WILSON. Does the gentleman also agree without the New YorkWashington business that probably that New York Air could not serve Boston and Detroit and Cleveland and the other cities?

Mr. SNYDER. That of course would be a management decision that New York Air would have to make, but I understand they also serve Louisville. I might say, which is not in my district, but in the district of the gentleman from Kentucky (Mr. Mazzoli), an airport I use most of the time.

My understanding is that the majority of their revenue currently is coming from this flight and that they would be financially constrained and probably would have to go out of business.

Mr. WILSON. I thank the gentle-

Mr. COUGHLIN. Mr. Chairman, I yield 5 minutes to the gentleman from Virginia (Mr. PARRIS).

Mr. PARRIS. Mr. Chairman, I have respect for the gentleman from Texas, even though he is showing exceptionally misguided judgment on this particular issue.

I have genuine affection for the gentleman from Kentucky.

I would like to just point out a couple of quick things in my limited time here this afternoon.

We have heard the suggestion on the floor today that this amendment is a compromise. It is not a compromise. It is not a retreat. This is a surrender. We are not talking about the question of the competition of New York Air versus Eastern Airlines. We are talking about the safety of an important airline aviation facility that is located a mile and a half from here.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. PARRIS. I will yield when I have finished my statement

Mr. SNYDER. I would like to tell the gentleman about safety.

Mr. PARRIS. I think this is a vote not on the question of airline competition, it is not a vote on consumer affairs, it is simply not accurate to suggest that the commuter airlines are not in favor of this policy.

Let me read to the Members in part a letter of July 29 from Mr. Henson, who says:

I am chairman of the group of commuter air carriers that operate at National Airport. Our group has testified that we support the Washington Metropolitan Airport policy. We feel that without implementa-tion of the policy, environmental and traffic congestion at National Airport will increase. We urge you not to support any amendment to reduce it . .

I could submit, Mr. Chairman, that we should amend the amendment of the gentleman from Texas (Mr. WILSON) to say, not the limit of flights proposed on July 13. Let us have the flights that were in existence on August 3, the day the air traffic controllers' strike started. That would

reduce the traffic at National Airport

to 50 percent.

That would go very well in my district. We could say let us reduce traffic to what it is today. That would reduce the number of flights 25 percent, which would go pretty well in my district.

Of course, that is not responsible, but I submit to the Members, Mr. Chairman, that the implementation of this policy will have little, if any, effect on the Members of Congress and it will certainly not, as some of the opponents of the policy have suggested, keep Members from flying out of National as they do now.

Let me make two points if I might. First, this is a 1-year policy; 1 year. With the airline traffic controllers' strike on, we will not even reach the degree of traffic that we are talking

about in the 1-year policy.

Second, to suggest that the Secretary of the Department of Transportation would take some kind of action that would bankrupt the airline industry of this Nation is absurd. The policy is not even yet final. It will be subject to continuing review, fine tuning, to meet some of the obligations that we have bandied around today.

Let me simply suggest that the level of commercial flights will remain exactly the same with some slight adjustment for major air carriers being offset by an increase in badly needed

commuter flights.

The noise limitation being proposed will not, as some people claim, cause undue hardship on the airlines or force them to abandon needed equipment. The equipment proposed by this policy is already being developed by the airlines. It will be in operation by 1986 whether or not this policy is implemented. All we are doing is assuring that that equipment will be used in the Nation's Capital.

Let me paraphrase an excellent "Dear Colleague" letter that was circulated this morning by the gentleman from Indiana, who is a recognized expert in this area, and the gentleman from Pennsylvania, both of whom have done yeoman work on this sub-

ject, and it says in part:

While portions of the policy may cause individual concerns, the regulatory process is the proper channel for such expression. The transportation appropriations bill is not the proper place in which to debate or amend the policy of the operation of National Airport

Second, what is done at National Airport about noise is being watched by communities everywhere. If Congress approves the efforts to gut this policy, we will be telling noise-affected communities around the Nation that Congress is not serious about reducing the airport noise, that given the opportunity, we will make a very bad problem considerably worse.

Let me just submit to my colleagues that in the interest of safety I would hope that my colleagues will permit this policy to be implemented before tragedy occurs.

I suggest to the Members that National Airport is crammed to the point of being unacceptable from the standpoint of passenger operations, airline convenience, traffic congestion, noise, you name it. It is over there.

□ 1530

Mr. WILSON. Mr. Chairman, will the gentleman yield?

Mr. PARRIS. I would be happy to yield to the gentleman.

The CHAIRMAN. The time of the gentleman from Virginia has expired.

Mr. WILSON. I yield 3 additional minutes to the gentleman.

The gentleman did not mean to infer to the House that my amendment in any way restricts noise abatement, did he?

Mr. PARRIS. I am not sure I understand the purport of the question.

Mr. WILSON. The gentleman did not mean to infer that my amendment would affect any sort of noise abatement restrictions that the Department of Transportation might decide to apply, or any new equipment or access to Dulles?

Mr. PARRIS. I am frank to submit to the gentleman that I think there is an intention on the part of the Department of Transportation here to implement in 1986, I might add, 5 years down the road, a new standard, if you will, for airline equipment in this Nation.

Mr. WILSON. But this amendment does not affect that?

Mr. PARRIS. The amendment of the gentleman does not affect it any more than the policy would; but the policy will implement it and require it; so to the extent that the gentleman's amendment eliminates the policy, which it will, it is reducing the possibility of quieter airplanes being utilized in the transportation network of this Nation.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. PARRIS. I would be glad to yield to the gentleman from Kentucky.

Mr. SNYDER. I appreciate the gentleman yielding.

Let me say that all they are doing is just violating the noise rules that we voted on a year ago last Christmas for the whole United States, which the committee report said was the final word and there would be no further legislation

Let me address the issue of safety, because I think if there is anything unsafe about National Airport, then I think we ought to close her down, without making any bones about it; but let me just finish now. National Airport has a better safety record than does Dulles. There has been one air carrier fatality at National Airport

in the year 1959. A Bolivian fighter took off from Bolling Air Force Base across the river, which no longer has the eastern end approach and let me suggest to the gentleman that when TWA went into the mountain, that was because that was where the airport was.

Mr. PARRIS. Let me reclaim my time. I have no interest in debating the question of a Bolivian aircraft.

Mr. SNYDER. I know the gentlemen does not, because the gentleman is wrong.

Mr. PARRIS. I have no interest in debating an aircraft incident that occurred when I was in law school at George Washington University 25 years ago.

Mr. SNYDER. The gentleman brought up the question of safety.

Mr. PARRIS. Let me simply suggest that I have been a pilot, I have been an Air Force pilot. I have flown airplanes all my life. I invite the gentleman to go into an instrument approach on a back ILS approach at National Airport and if you do not have sweat on your hands, you do not know what you are doing. That is the lousiest airport in the world.

There is some problem about going in with existing equipment and if we do not do something about National Airport, there is going to be a tragedy.

I sincerely hope that there is not a person in this Chamber or anybody listening in their office who is going to be on an airplane that is not going to make the end of that runway. That is what we are talking about.

This is not a consumer issue. We are talking about what are we going to do with that situation. We had better address it finally when we have got a Secretary of Transportation who has the guts to put a policy together that we are now debating. That is the question here.

Mr. WILSON. Mr. Chairman, I yield 5 minutes to the gentleman from Massachusetts (Mr. Frank).

Mr. FRANK. Mr. Chairman, I was pleased that the debate was clarified in these last few minutes. I am a supporter of a strong national uniform policy regulating and restricting noise. If legislation were to come back in that would impose uniform national standards in that regard, I would be supportive of it. I do not regard that as a significant issue in this particular debate.

I think what we are seeing piecemeal that worries me is a retreat from the notion that we ought to have free competition in the airline industry. We see this with regard unfortunately to what is happening with the controllers' strike and we see it here.

I do believe that it is important that we encourage as much as we can the recent trends in the airline industry which have taken advantage of deregulation to provide to air passengers both a broader range of choice and a more economical form of airline travel.

I believe that this kind of restriction and if we are talking about precedent, it seems to me it is the type of precedent that inevitably will be followed elsewhere, is going to lead to a kind of reregulation, except that it is not going to be public interest oriented reregulation to the extent that that exists. It is going to be kind of a private interest reregulation in which the airline consumers are going to be the sufferers.

Now, I am not a pilot and I cannot debate with the gentleman from Virginia about safety. As the gentleman from Texas noted during that discussion, the safety question is being raised by the controllers. We may reach a point if enough public issues are debated about airlines that we will have a reinvigorated Amtrak by scaring the hell out of the American people so that no one will ever want to get on a plane at all; but I have to say that it does seem to me when we talk about the kind of restrictions that are being proposed here, the major impact is going to be and I think a large part of the impetus is, in fact, anticompetitive and it is a reimposition of regulation that I do not think is correct.

So I would hope that we would adopt the amendment of the gentleman from Texas and not impose this specific set of restrictions here just for National Airport, which is already restricted in many ways in terms of night flights, and I do not quarrel with that. It is already clearly much more restrictive in terms of noise, in terms of regard for the people in the nearby area than any other major airport that I am familiar with. I do know that the Logan Airport in Boston, for instance, the nearby neighbors would love to trade tomorrow for the set of restrictions that are imposed on National Airport, with the kind of restrictions that exist they would be very happy to live with; so I do not feel as one who has supported the demands of people who live near airports with some environmental concerns, I do not feel the least inconsistent. I think we already have a very protective situation here.

I would hope that the amendment would be adopted and that we could continue our competitive efforts.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. FRANK. I would be happy to yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman from Massachusetts.

Let me just get it clear by asking a question. I thought I heard the gentleman say, but I want to make sure it is on the record properly, that the gentleman now supports deregulation in

such competitive markets and the free enterprise system; is that correct?

Mr. FRANK. Oh, I have been supporting competition and deregulation in the airline industry specifically and in general in a number of areas, yes. I am glad to clarify that for the gentleman from Louisiana.

Mr. ROEMER. It was that "in general" phrase that I wanted to make sure the gentleman was born again.

Mr. FRANK. No; I do not believe that I have been born again; but I think in this case I was simply feeling immaculate from the beginning. The fact is that deregulation and an increase in competition has always been a goal of mine and I think it ought to be applied here.

Mr. ROEMER. Very good. I appreciate the gentleman's statement.

Mr. WILSON. Mr. Chairman, would the gentleman yield?

Mr. FRANK. I would be glad to yield to the gentleman from Texas.

Mr. WILSON. Would the gentleman describe to the Chamber the effects of New York Air service between Boston and Washington with this competition?

Mr. FRANK. Clearly the imposition of that service has led to a reduction in fares.

Now, I have to say, I wish New York Air would show a little bit more compassion and a little bit more fairness toward its employees. I do not approve of the union relations that they have followed; but on the other hand, it is clear and the numbers make it very clear that the introduction of New York Air into the situation has led to lower fares, not only their own lower fares, but lower competitive fares. I do not doubt that if they were to disappear, that the fares would find their way back to the prior level.

Mr. WILSON. In other words, if New York Air is squeezed out of National, the gentleman feels fairly certain that the fares would return to their previous heights?

Mr. FRANK. I do not see any reason, I would say to the gentleman from Texas, why they would not. The fares were at a certain level. New York Air entered and reduced the fares. The fares were reduced. I would think it would be a fairly logical guess that the fares would then go back up if New York Air left. It may be that the other airlines would have decided this is a better thing to do; but I do not see any reason to expect that; so I think it is a fairly sure bet that the fares would resume their former heights if New York Air were to be removed from the scene.

Mr. WILSON. I thank the gentleman.

Mr. COUGHLIN. Mr. Chairman, I yield 5 minutes to the gentleman from Maryland (Mr. Barnes).

Mr. BARNES. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I rise in very strong opposition to the amendment offered by my friend, the gentleman from Texas. For over a decade, those of us here in the Washington area have worked to fashion a policy to plan for the future of our area's airports. We now have a carefully drawn policy, a fair and balanced proposal, pending at the Department of Transportation, and I urge all my colleagues to give this plan a chance. I urge our colleagues to give this plan their support and to oppose this amendment.

Earlier this week, Mr. Chairman, each Member of the House received a letter in the mail on the subject. The letter called upon Members of Congress to recognize the serious problems that exist with respect to congestion safety, and noise affecting our region's airports. The letter was signed by the Governors of Maryland and Virginia, the Mayor of the District of Columbia, area Congressmen, county executives, county council members, dozens of other local officials, and a host of businessmen and citizen representatives, and it was entitled, "A Letter From Your Washington Neighbors."

The purpose on this collective effort was to show the depth of the Washington community's concern over this issue, a concern that is felt by the 2 to 3 million of your "Washington Neighbors" and to ask that we here in Congress give this plan a change to work.

Now, I am sure that most Members of the House are familiar with the problems that we are talking about. National Airport is clearly being used far beyond its designed capacity, and the problems of congestion there simply have been growing worse every year. While the airport debate, as has been noted, does have an excellent safety record, more than a few observers, including a lot of pilots, like our colleague, the gentleman from Virginia, have noted that we cannot just keep on adding additional air traffic to what is already a terribly crowded facility, without eventually raising some extremely serious safety implications and without endangering passengers who fly in and out of that facility.

I would hope that each Member of his body would give very careful consideration to the wisdom of uncontrolled growth at National Airport in the light of these very serious safety considerations.

Very briefly, what this proposed policy that is now pending at the DOT will do is three things: First, it sets a ceiling on passenger traffic at 16 million passengers annually. Now, that allows for growth at National Airport, up from the 14.5 million passengers which were going in and out of National before the PATCO strike.

Second, it tells the airlines that by the year 1986, they have to begin using quieter aircraft. Third, it calls for a very modest reduction in flight slots at National.

The policy does not call for reduction in flights at National. What it does do is send a signal to the airlines which says, "For purposes of your furture growth in the Washington air traffic, once we reach the ceiling of 16 million passengers, which we are nowhere close to yet, let us start using our capacity out at Dulles and at BWI."

I want to emphasize the fact that this policy is carefully drawn. It is balanced. It is a compromise. Many of my constituents would have preferred a much stricter approach, one that would have cut back significantly on National's traffic. Instead, what we have is a policy which looks toward the future growth in air travel, directing that growth to our region's other airports without seriously affecting the status quo at National, which so many of our colleagues are concerned about.

It is important to note also that there is a provision in this policy calling for a careful review 1 year after its implementation. If serious problems arise during that first year, and I do not believe that those problems will occur, they can be addressed at that time.

Mr. Chairman, over 135 Members of this House have signed a letter to Secretary of Transportation Drew Lewis, stating that they are "encouraged by the direction" of this proposed policy. While each Member of the House may not agree in every detail with the proposal, it seems to me important to note that this is not simply a parochial Washington area concern. It is encouraging to see that so many Members of the House from all over the country have recognized that very serious problems do exist and that there is a need to address those problems in a responsible manner, as the Department of Transportation has done.

In summary, the proposal is a very modest one. It does not call for drastic cutbacks at National, as some of our colleagues have been misinformed, but instead it strikes a careful balance among all the affected interests. And, I might add, any changes occurring at National as a result of this policy would simply be a needle in the haystack compared to the effects of the PATCO strike.

The plan that has been drawn up provides for an efficient, rational, and, most importantly, a safe future for our area's airports. The plan is a good one. I hope all our colleagues will support it and I strongly urge your opposition to this amendment, which would gut a good proposal.

Mr. WILSON. Mr. Chairman, I yield the remaining time to the gentleman from Kentucky (Mr. SNYDER). Mr. SNYDER. Mr. Chairman, I thank the gentleman for yielding. I do not believe I need 3 minutes.

I want to read to the Members, those who are here and may be listening on TV, some excerpts from the FAA preliminary regulatory analysis on this policy. This is not what those of us who oppose the policy say. This is what they say:

National Airport air carrier delays may be described as average among major U.S. airports.—page 17.

Some of the passenger demand which cannot be met at National when they reduce the flights will be transferred to Dulles or BWI and some of the demands simply will not be met at all.—page 43 and page 44.

Next:

The average passenger is assumed to incur a total added cost of \$15 when using Dulles or BWI instead of National.—page 45.

Some cancelled operations may be expected to eliminate service to communities currently providing relatively low demand and receiving minimum service. Passengers losing this may find no alternative to the nation's capitol.—page 49.

□ 1545

In regard to the 16 million passenger cap, it involves a gradual decrease in the air carrier quota to about 30 operations per hour by 1990—Page 50.

Some communities must suffer a reduction in service at National—Page 54.

Passengers are expected to experience significant added costs, primarily because of increased airport access costs. Total costs per passenger may increase from about \$2.3 million cost the first year to \$48.1 million in 1990.

That is from page 63.

There are the economics on the situation, directly from FAA's preliminary regulatory analysis, which dictate and demand that on behalf of the consumer and the constituents of this country, regardless of whether they fly from or into National, that the Wilson amendment ought to be adopted.

Mr. Chairman, I yield back to the gentleman from Texas (Mr. Wilson) such time as I have not consumed.

The CHAIRMAN. The gentleman from Kentucky (Mr. SNYDER) yields back 1 minute.

Mr. COUGHLIN. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, let us be very clear about what this amendment does. It guts the administration's attempt to solve the problems of noise and congestion and safety at Washington National Airport. It guts it.

I have just gotten off the telephone with Secretary Drew Lewis, and as he correctly points out, if there is no change in the slot allocation, and no closing of the loophole for the ATC landings, there is no policy. No policy.

You know, this problem of National Airport is not a new problem. It is one that has been with us from administration through administration. At some point in the game this Congress

has got to come to grips with it. The administration has courageously and Secretary Lewis has courageously proposed an even and a balanced policy, a policy that is as fair as it can be, to all parties in the problem.

This is not a parochial problem that just involves Washington. It involves all parts of the country. And this is not an Appropriations Committee problem. If you are going to address how to handle National Airport, it should be done through the regulatory process or through the authorization process if that is necessary, as has been done by the administration. It should not be handled by a rider on an appropriations bill.

This amendment would not close the loopholes which allow flights to come into National Airport without slots. This amendment would then, if there were no policy, knock out the expansion of the perimeters. And let me say, my colleagues, that there are more red herrings flying around about this policy than there are herrings in the flords of Norway. Let me just cite a few of them.

It is said that this policy will reduce the number of passengers served by National. That is the claim. But the fact is that the proposed cap on passengers is 16 million persons per year, and National today serves only 15 million persons per year. We would get an additional 1 million people that could be served by National. It does not reduce the number of passengers.

There is a claim that the policy will eliminate some 127 air carrier flights a day, severely inconveniencing air travelers. The fact is that the slots that would be eliminated in most cases are late-at-night slots that are not even used. In reality, the policy basically maintains the status quo of regular landing slots, including those in peak hours.

It is said that the increase in the nonstop perimeter from 650 miles to 1,000 miles will effectively reduce service from cities presently served by National. But the fact is that new nonstop flights from the 1,000-mile cities would involve an estimated less than 10 of the 550 available daily slots, because they now come in on one-stop flights—there maybe would be 10 additional nonstop flights.

It is claimed that the policy would effectively reduce commuter access to National, and that is not true because the administration is presently negotiating additional commuter slots particularly for quiet aircraft such as the Dash-7.

It is claimed that the noise limits in this policy mean that no equipment presently serving National could land there in 1986. The fact is that even current aircraft, to say nothing of the new, quieter aircraft, could, with a load factor of 100 percent, fly the 1,000 miles if they simply adjust the fuel so they are not carrying a lot of extra fuel around that they do not need anyway, for matters of safety or

otherwise

This policy is not going to terminate service to other parts of the country where that service is economically feasible. This policy is not going to eliminate competition. New York Air would have the same right as everybody else to an allocation of slots, the same right as everybody else to additional portions, additional sections on their flights. There would be no change in the method of allocating slots. They still would be allocated by the industry themselves, with each certified carrier having a veto. They would be entitled to slots, and they veto everybody else if they do not get those slots. The last airline that came in, for example, asked for 24 slots and got 18. That is not too bad.

The policy is a rational, reasonable attempt to solve a problem that has been festering and festering and fes-

If we do not have the guts in this Congress that they have in the Department of Transportation to do something about the problem, get the monkey off our backs once and for all, then we are making a very foolish mistake. I hope the amendment will be defeated.

I reserve the balance of my time. Mr. PARRIS. Mr. Chairman, will the

gentleman yield?

Mr. COUGHLIN. I would be happy to yield to the gentleman from Virginia.

Mr. PARRIS, Mr. Chairman, I think the gentleman made a very important point. I would like to pursue it with him, if I might, just for a moment.

As it relates to the noise standards in the proposed policy, I understood you to say that should a commercial airliner take off with enough fuel to go the 1,000 miles on a one-way trip to its destination, that it could, in fact, today, with existing equipment, meet those noise standards, but that the problem that exists today is that that airliner carries enough fuel to go 1,000 miles to its destination, take off and return to Washington, and it therefore requires additional power for takeoff, which affects the noise decibels, that sort of thing, which violates the policy.

Mr. COUGHLIN. The gentleman is absolutely correct. In addition, it wastes energy by carrying all that excess fuel around.

Mr. PARRIS. I thank the gentleman

for yielding

Mr. COUGHLIN. I yield to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. I thank my colleague for yielding.

I rise in opposition to the amendment. I talked to the gentleman from Texas a little bit this morning. But it just strikes me that the Secretary's proposal is a reasonable reduction in flights. It is the only real way we are going to commence to get Dulles Airport, the finest, the safest, actually the best airport in the world, to be used. Granted, there may be a little inconvenience to some of us, but I think that it would be inappropriate to pass this amendment.

Mr. COUGHLIN. I yield to the gentlewoman from Louisiana, Mrs. Boggs. Mrs. BOGGS. I thank the gentle-

man for yielding.

Mr. Chairman, I rise in opposition to the amendment which disrupts the carefully balanced and constructed Washington Metropolitan airports policy.

A careful review of the entire DOT policy proposal shows clearly that a comprehensive and professional analysis was undertaken by the Department on this complex issue to provide a well-balanced solution to a host of complex interrelated issues. The key element of the proposal is its balance. However, this balance will most certainly be adversely affected if the cornerstone of the policy, the slot reduction program, is altered.

Department has succinctly The stated that it is essential that all elements of the policy be implemented together-that there will be no substantial investment in National's redevelopment with its future unresolved. The policy was developed as a package because it is the only way to overcome the continuing controversy over National's future. The environmental impact statement that was prepared under a court order addressed the policy as a whole, not in fragments.

With other members of the Louisiana delegation, I have worked long and diligently on behalf of the policy. We welcomed the announcement of the original approval of the airports policy in August 1980 as the culmination of many long years of effort to rectify inequities in regulations. The subsequent postponements were very disappointing, and an amendment which would damage the long-sought agreements would be costly unwise. Under the policy before us, the people of my State will be allowed. at last, the quality of air service to which they are entitled between the Nation's Capital and Louisiana.

This morning's editorial in the Washington Post calls for reason and rationality in our approach to this major airport policy. I hope that all here will consider carefully the impact of their vote. We cannot have a partial policy-it is all or nothing. I urge the adoption of the policy without amend-

Mr. COUGHLIN. I yield to the gentleman from Nebraska (Mr. BEREU-

Mr. BEREUTER. I thank the gentleman for yielding.

Mr. Chairman, I rise in opposition to the amendment and am very supportive of the statement that the gentleman from Pennsylvania had just made.

In regard to the four cities that are often cited as illustrations of being within the 1,000-mile perimeter but outside the 650-mile perimeter, my understanding is that these are illustrative only. It provides no assurance that there would be nonstop flights to these cities, nor should it be thought to be that this would be an exclusive list.

Is that your understanding?

Mr. COUGHLIN. The gentleman is absolutely correct. The list is illustrative only. Some of those might end up not having nonstop flights. Nonstop flights might come from other cities than the ones that are used for illustrative purposes.

Mr. BEREUTER. My understanding also is that this is likely to have no more than 10 slots assigned to it, as

the gentleman has indicated.

I commend him for the leadership he has provided on this issue and thank him for yielding.

Mr. COUGHLIN. I urge the defeat of the amendment and reserve the bal-

ance of my time.

• Mr. CONTE. Mr. Chairman, I rise in opposition to the amendment. The new policy proposed by the Secretary of Transportation, Drew Lewis, regarding Washington's National Airport is designed to assure the maximum safety of air operations in the Washington area, reduce noise and congestion at National Airport, and encourage the greater use of Dulles International Airport. We must not allow this long overdue plan to be sidetracked by a few special interest groups.

Mr. Chairman, this proposed policy was announced by the Secretary on July 8. It represents an important step toward safe, frequent, and more convenient air service to and from the Washington area. In developing the plan, safety, as always, was given the

highest priority.

This policy attempts to balance the competing interests of the airlines, their passengers, Congress, and the residents of the Washington area. It is a better, more equitable plan than any other one sent to the Congress since I have been here.

Secretary Lewis has spent countless hours developing this responsible, balanced, and comprehensive proposal for the future of Washington's two federally owned airports. The administration has ordered a regulatory review of the policy to occur during the first year of its operation.

For too long now, we have watched the skyways over National Airport become congested with bigger and bigger air carriers of travelers. Concurrent with that activity has been the

dramatic mushrooming of ground transportation. The hustle and bustle of passengers rushing to catch their flights is unnerving. Only the most agile of passengers are able to dodge the traffic and leap over luggage stacked up at the curbs.

This is not a necessary experience for air travelers; their safety in the air and on the ground need not be jeopardized. This is particularly true when we have available to this community a beautiful, safe, and shamefully underutilized airport at Dulles.

There is no earthly reason to subject the public, both the residents in the area and the passenger, to this unnecessary treatment.

I urge you to support the Secretary's well thought-out and balanced approach to our communities' airport needs and vote against this amendment

• Mr. KEMP. Mr. Chairman, I am in strong support of the amendment. It is a carefully drawn limitation on the ability of the Department of Transportation to implement a policy of unwarranted reduction in certain flights at National Airport.

The amendment is needed to redress some of the inequities in the proposed Washington National Airport policy.

Included as part of the proposed reduction in flights at National Airport is the elimination of the authority now utilized by several carriers, including Air Florida, Altair, Northwest, and New York Air to schedule operations in excess of their slot allocations pursuant to air traffic control approval. The scheduling flexibility provided by the ATC or conditional reservation provision has been essential to the ability of low-fare carriers to operate high frequency service at slot-con-strained airports like National, and to thereby introduce the first real measure of competition into many heavily traveled air markets.

Yet while the policy would eliminate ATC authority, it would continue the "extra section rule," whereby extra sections of scheduled flights are not counted against a carrier's slot allocation. Traditionally only one carrier, Eastern Airlines—which holds more slots at National than any other carrier serving that airport—has regularly and routinely conducted extra section operations. In 1980 alone, Eastern conducted in excess of 10,000 extra section operations.

It is inequitable and anticompetitive to deny to all carriers except one the scheduling flexibility that both the extra section rule and the ATC provision provide. And it is simply no answer to say that any carrier can fly extra sections the way Eastern does. In any event, business decisions about what kind of service to offer should be left to the carriers, and not dictated by the Federal Government.

In addition, if the proposed policy's reduction in flights is implemented, it will have an adverse effect on competition. The further restrictions on access to National Airport proposed in the policy, coupled with the elimination of the ATC authority, will make it impossible for new entrants like New York Air, Air Florida, and Altair to offer the competitive services to which the public has thus far responded so favorably. With the curtailment of these competitive services, fares will inevitably rise to or surpass their previous levels, and passengers will have fewer service options from which to choose. Although the policy ostensibly includes a commitment to the principles of the Deregulation Act, it is difficult to reconcile this commitment with the elimination of competition and higher fares that the policy will undoubtedly produce.

• Mr. BIAGGI. Mr. Chairman, I rise to lend my full support to the amendment offered by my colleague from Texas to prohibit any funds from the fiscal year 1982 Department of Transportation bill from being used to implement the administration's ill conceived and faulty National Airport plan.

A number of reasons for supporting this amendment, or more appropriately for opposing the administration's plan, have been articulated here today. Let us dwell on a couple. The first has to do with the impact of the administration's plan on air travel between Washington and New York.

The advent of New York Air's service between Washington and New York has improved air travel between these two important cities. New York Air has been able to offer regularly scheduled flights between National and LaGuardia Airports at a price anywhere between 15 and 50 percent cheaper than that provided by Eastern Air Lines and their air shuttle. The result has been cheaper service for the consumer and better competition in the airline industry. As one of my colleagues pointed out earlier in debate, New York Air's initiative has actually improved Eastern's service and has forced them to lower fares as

In 1978, Congress approved an airline deregulation plan. One of its foremost objectives was to foster greater competition in the largely noncompetitive airline industry. The airline traveler ofttimes was at the complete mercy of one airline to transport them between cities, no matter what the cost or quality of service. The practical realities of airline deregulation have varied from place to place in this Nation. The record is not without some blemishes. However, as it pertains to the heavily traveled New York-to-Washington air route, it has provided more service and lower prices as witnessed by New York Air.

What the administration is proposing with their National Airport plan is a backdoor and backhanded proposal to circumvent and thwart the most laudable objectives of airline deregulation, namely competition in the industry. If airline flights are reduced by as much as 15 and 20 percent as the administration proposes, when the time comes to divide up the available slots at National Airport an airline such as New York Air with newly granted space at National, would most likely be turned away, leaving Eastern with an unhealthy monopoly on the New York-to-Washington route.

As one who has commuted between New York and Washington steadily for the past 13 years, I feel very strongly that competition has been a good development for the airline industry and especially on the route between New York and Washington. We are a nation who believes in the free enterprise system-the "little guy" if you will, should get a fair shake. We have a classic "little guy," "big guy" case before us with this amendment. A vote for the Wilson amendment is a vote for the benefits of competition in the airline industry. It is a vote for convenience for thousands of air travelers on a daily basis. It is even a vote for productivity, for when one considers how much more time the average person would have to spend in the commuting process if they had to fly to Dulles, this would lead to more unproductive traveling time and less time actually working in the city of Washington. This would go for public and private sector employees.

Finally, let me observe a most relevant fact. National Airport has a better safety record than does Dulles Airport. In fact National Airport is one of the safest airports in the Nation. Why therefore must we tamper with something that is obviously working well for those it serves? The logic of the administration's National Airport plan escapes me and because of that I urge it be rejected by virtue of a vote in favor of the Wilson amendment.

The CHAIRMAN. The gentleman from Pennsylvania has 3 additional minutes.

Mr. WILSON. I have no further requests for time, Mr. Chairman.

Mr. COUGHLIN. I have no further requests for time. I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. WILSON).

The question was taken; and the chairman announced that the noes appeard to have it.

RECORDED VOTE

Mr. WILSON. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were-ayes 204, noes 188. answered "present" 1, not voting 40. as follows:

The Clerk announced the following

On this vote:

Mr. Richmond for, with Mr. Edwards of California against

Mr. Chappell for, with Mr. Young of Alaska against.

Mr. Dixon for, with Mr. Lewis against. Mr. Shamansky for, with Mr. Philip M. Crane against.

Mr. Florio for, with Mr. Daniel B. Crane

Mr. Erdahl for, with Mr. Latta against.

DREIER EMERSON Messrs. WHITTEN, and THOMAS changed their votes from "aye" to "no."

So the amendment was agreed to. The result of the vote was announced as above recorded.

PERSONAL EXPLANATION

Mr. JOHNSTON. I desire to state for the RECORD that on the last vote I

voted "present" because of a financial interest in the outcome of the vote.

AMENDMENT OFFERED BY MR. LEVITAS

Mr. LEVITAS, Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. Levitas: Page 38, after line 15, insert the following:

Sec. 326. None of the funds appropriated by this act shall be used to implement, administer, or enforce Order 81-5-27 of the Civil Aeronautics Board or any other order of the Civil Aeronautics Board which prohibits or has the effect of prohibiting any U.S. air carrier from participating in the International Air Transport Association's North Atlantic Traffic Conference under its existing articles and provisions.

Mr. LEVITAS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LEVITAS. Mr. Chairman, the purpose of this amendment is to postpone or to prohibit the implementation for the period of this appropriation of a show cause order which the CAB has issued that will become effec-tive on September 15 and would have the effect of precluding U.S.-flag carriers from participating in the North Atlantic Conference sponsored by the International Air Transport Association.

The International Air Transport Association is a conference of air carriers that convenes to have discussions and propose rates and other agreements with respect to air transportation over the North Atlantic. If the show cause order goes into effect, it will have the consequence of precluding American-flag carriers from participating in the conference and yet would let the foreign-flag carriers participate.

Mr. Chairman, the consequence would be to place American-flag carriers at a disadvantage. They are already at a disadvantage in competing with foreign carriers which are subsidized by their own governments against losses, whereas American-flag carriers are required to show a profit. This would now let the Europeans participate in the North Atlantic rate conference and yet preclude Americanflag carriers from doing so.

I believe in and have supported open competition and deregulation in this country, but when we are talking about international competition, we do not have control over what foreign carriers do and, therefore, we should not place our own carriers at a competitive disadvantage. Therefore, I think that this amendment is necessary in order to assure that Americanflag carriers which desire to participate in IATA's North Atlantic Conference be allowed to do so.

□ 1620

One last point. On August 20 of this year President Reagan wrote to the Chairman of the CAB and asked the CAB if they would extend or postpone the effective date of the show cause order beyond September 15 in order to give it as a gesture of cooperation with foreign governments who have cooperated with us during the air controllers' strike. There has been no formal response or acknowledgement up to this point by the CAB.

The effect of my amendment would accomplish what the President has asked the CAB to do, which is postpone the effective date of the particular show cause order. At the proper time, when we are in the House, I will ask unanimous consent to insert President Reagan's letter in the Record.

The letter follows:

PRESIDENT REAGAN'S LETTER TO CAB CHAIRMAN ON SHOW CAUSE DECISION

THE WHITE HOUSE, Washington August 20, 1981.

Hon. Marvin S. Cohen, Chairman, Civil Aeronautics Board, Washington, D.C.

Dear Mr. Chairman: As you know, the Administration has, in the aftermath of the recent illegal strike by the Professional Air Traffic Controllers Organization, undertaken a major effort to restore to full capacity the nation's domestic and international air transportation system. Your cooperation in increasing the regulatory flexibility available to the airline industry during this period has been greatly appreciated.

Foreign governments have played a significant role in assisting our efforts to maintain international air transportation, particularly with respect to unauthorized actions by foreign air traffic controllers apparently intended to express sympathy for the PATCO strike. Because unchecked actions by foreign controllers could seriously disrupt air commerce to and from the United States, the continued cooperation of our aviation partners abroad is essential. Therefore, it is especially important during this period that the United States demonstrate its continued support for an international aviation system founded on comity and reciprocity, and its sensitivity to foreign government concerns.

One source of foreign concern, as you are aware, is the Board's recent decision in the LATA Show Cause Proceeding, Presently scheduled to become effective September 15, 1981. I am not expressing any view on the merits of the important and complex issues involved in this proceeding, to which the Board has devoted considerable energy and attention. However, in light of the present situation, I consider it essential that the United States take every reasonable step to reassure the international aviation community of our willingness to address matters of common concern in a cooperative manner.

Accordingly, I have determined that it would be appropriate and in the best interest of our foreign policy that the Board extend the effective date of its decision in the IATA Show Cause Proceeding beyond September 15, so that our continuing efforts to maintain foreign government cooperation as we rebuild our air traffic control system

will not be adversely affected. I urge the Board to take this action promptly.

Sincerely, Ronald Reagan

Mr. BENJAMIN. Mr. Chairman, will the gentleman yield? Mr. LEVITAS. I am happy to yield

Mr. LEVITAS. I am happy to yield to my distinguished chairman.

Mr. BENJAMIN. We on this side have examined the amendment by the distinguished member of the Georgia delegation (Mr. Levitas). We find it is only fair and equitable to the American-flag carriers in international operations. We support the amendment and ask its acceptance.

Mr. LEVITAS. I thank the gentle-

Mr. COUGHLIN. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I will be happy to yield to the gentleman from Pennsylvania.

Mr. COUGHLIN. Mr. Chairman, to the extent that I understand the amendment, and I think I understand the amendment, I have no objection to it.

Mr. LEVITAS. I thank the gentleman from Pennsylvania and yield back the balance of my time.

the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. Levitas).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WALKER
Mr. WALKER. Mr. Chairman, I
offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: On page 38, after line 15, insert the following new section:

"Sec. 322. None of the funds provided in this Act shall be used to rehire Federal air traffic controllers engaged in a strike in violation of Federal law."

Mr. COUGHLIN. Mr. Chairman, I reserve a point of order against the amendment.

The CHAIRMAN. The gentleman reserves a point of order against the amendment.

Mr. WALKER. Mr. Chairman, I would ask the gentleman if he would care to speak to his point of order at the present time, before I make my presentation on the amendment. I would appreciate it if the gentleman would raise the point of order.

The CHAIRMAN. The gentleman from Pennsylvania (Mr. COUGHLIN) can reserve his point of order until after the gentleman's initial statement

Mr. WALKER. Mr. Chairman, this speaks to one of the issues that is most on the minds of the American people where the American people have made clear their opinion. By the overwhelming majority, the American people have endorsed the administration's position with regard to the air traffic controllers' strike that is presently underway in this country.

derway in this country.

The administration has made very clear its position with regard to this

kind of illegal action against the public trust. It has said that there will be no amnesty, and it has said that we go from here and rebuild the system.

Yet, Mr. Chairman, that vital rebuilding of the system is being frustrated by reports that negotiations might take place in the future, that something might happen in the future that would change the status of all of this. So we really cannot get down to the work of really getting that system rebuilt in as quick and orderly a fashion as possible.

So, therefore, Mr. Chairman, what this amendment does is makes clear the congressional intent that what we are saying, in a very blunt way, is that illegally striking controllers cannot be rehired. In other words, we are backing up the position that this administration has taken.

This does not prevent the Department from taking back those people who were kept away from their jobs by harassment, by illness, or some other administratively determinable problem. In those kinds of cases there is a procedure which does not require rehiring, as this amendment makes a clear distinction. The withdrawal of a notice of termination, which is involved in the case where people were harassed or something like that, is not a rehiring action and so, therefore, this would not affect those people in any way whatsoever.

Also, Mr. Chairman, it does not impact adversely on safety in any way. We have just completed hearings in the Government Operations Committee Subcommittee on Government Activities and Transportation in which we are being told that the curtailed system we are now operating under is safe. It may, indeed, be even safer than the system we had prior to August 3.

So there is no problem with regard to safety involved in this particular amendment.

What the amendment does is make absolutely plain that Congress will not countenance illegal strikes against the public interest. The operative language in this amendment regards a violation in Federal law. To support this amendment is to put this House on record in favor of violation of Federal law. I do not think we want to do that. We will not permit the funds that we appropriate in this House to go to those who have violated the public trust.

That is what this amendment says. That is what this amendment is all about.

The CHAIRMAN. Does the gentleman from Pennsylvania (Mr. Cough-LIN) insist on his point of order?

Mr. COUGHLIN. Mr. Chairman, I do.

Mr. Chairman, I make a point of order that the amendment offered by

the gentleman from Pennsylvania is legislation on an appropriation bill, contrary to clause 2 of rule XXI.

I make the further point of order that it places additional duties on officers of the Government or implicitly requires them to make investigations, compile data or otherwise make determinations not otherwise required by law.

Mr. Chairman, chapter 26 of the Deschler's procedure, section 11.2 states:

Where an amendment, in the guise of a limitation, imposes additional determinations and duties on an executive, it may be ruled out as legislation on a general appropriation bill.

Section 11.19 of chapter 26 states:

It is not in order on a general appropriation bill to condition the availability of funds to an executive agency upon the submission by that agency of reports not required by existing law.

It is clear, Mr. Chairman, that the amendment of the gentleman from Pennsylvania requires additional duties and, therefore, is subject to a point of order.

Mr. WALKER. Mr. Chairman, I would like to speak to the point of order if I could.

The CHAIRMAN. The gentleman from Pennsylvania is recognized to speak in opposition to the point of order.

Mr. WALKER. I thank the Chairman.

Mr. Chairman, this particular amendment is not in violation of the rules of the House. It is a mere limitation on the expediture of funds. It does not involve any additional duties on behalf of the Department of Transportation in any administrative fashion whatsoever and so, therefore, is in perfect compliance with the rules of this House regarding limitation amendments of this type.

The CHAIRMAN. Are there Members who wish to be heard on the point of order?

Mr. ECKART. Mr. Chairman, I would like to speak in support of the point of order.

I would like to draw to the Chair's attention that, in fact, other duties may be incumbent as a result of this point of order in the amendment raised by virtue of the fact that it would require a self-standing judicial determination to be made if, in fact, the strike was a violation of Federal laws, separate judicial determination that has not been made. Therefore, there is a contingency contained in this amendment which I believe would place it within the grounds of the point of order raised by the gentleman from Pennsylvania (Mr. Coughlin) and, therefore, the point of order should be well taken by the Chair.

Mr. HYDE. Mr. Chairman, I would like to be heard on the point of order.

The CHAIRMAN. The gentleman from Illinois (Mr. Hyde) will be recognized for that purpose.

Mr. HYDE. I would like to suggest that it does impose additional duties on the Federal Government to determine who is on strike and who is not and who has been harassed or intimidated or for whatever reason. It just is not readily apparent when someone is not appearing for work the reason therefor and, therefore, I submit it is legislating on appropriations.

The CHAIRMAN. If there are no further additional Members who wish to be heard, the Chair would opine that the determination required of the Federal Government by the amendment involves a set of facts that is within the knowledge of the Federal Government in that the Federal Government is under an obligation to know which of its employees have been engaged in a strike in violation of Federal laws.

The Chair would cite the precedent in Deschler's procedure, chapter 5, section 12.7, which states:

While an amendment under the guise of a limitation may not require affirmative action or additional duties on the part of federal officials, it is in order on a general appropriation bill to deny funds to a nonfederal recipient of a federal grant program unless he is in compliance with a provision of federal law; for such a requirement places no new duties on a federal official (who is already charged with responsibility for enforcing the law) but only on the non-federal grantee.

The Chair would also cite the related precedents appearing in Cannon's precedents, volume 7, sections 1661 and 1662.

For these reasons the Chair overrules the point of order.

□ 1630

Mr. LEVITAS. Mr. Chairman, I rise in opposition to the amendment because I think it will very damagingly tie the hands of the Secretary of Transportation in ways that the gentleman from Pennsylvania may not even envision at this point and will make it difficult for his fellow Pennsylvanian to carry on the outstanding work that he has done in managing this very bad situation that we find ourselves in today.

As chairman of the Subcommittee on Investigations and Oversight of the Committee on Public Works and Transportation, we have been very carefully monitoring the situation from its very inception earlier this year. I want it made very clear that I fully support the actions taken to this date by the Secretary of Transportation, Mr. Lewis. I think he has done an outstanding job.

There is no question in my mind that the controllers had some legitimate grievances that could have been addressed in the proper forum, but they were put on notice by everybody who had an opportunity to do so that they should not engage in this particular—what I consider to be—illegal strike. Therefore, I support the actions of the administration in what they have done so far.

But Mr. Lewis, at the time he took the initial action, and President Reagan at the time he made his announcement, made it very clear that there were certain individuals who might be able to prove that through harassment, through intimidation or other actions, were not voluntarily leaving their jobs or staying off the job, but really had no choice in the matter. And I can tell you, based on my own personal investigation and that of our staff up to this point. there are some real examples of harassment and intimidation and coercion. I would certainly not want to see Secretary Lewis hamstrung in the way that I think he would be under this amendment.

I would like to inquire of my friend, the gentleman from Pennsylvania, whether or not the Secretary and the administration support this amendment. I would like to be enlightened on that point.

Mr. WALKER. If the gentleman will yield, I would, first of all, ask the gentleman how he thinks that the Secretary would be in any way hamstrung by this particular amendment.

Mr. LEVITAS. The way I think he might be hamstrung is that I believe at the time new actions are going to be required to be taken, after PATCO is decertified, when they are going to have to consider the applications of the individuals who have been able to claim legitimately intimidation and harassment, that he may be precluded from acting in that fashion. And I do not think the gentleman from Pennsylvania would want that. I have read the amendment very carefully. There have been people who were in fact fired, that the administration would like, I believe, based on what they have said at this point, on a case-bycase basis, to examine. And I would not want to see Secretary Lewis hamstrung in that way.

Mr. WALKER. If the gentleman will yield further, I thank the gentleman for pointing that out. However, the people to whom he refers who were intimidated and harassed, and so on, I have carefully checked out the procedures with regard to those people. It is very clear that that involves the withdrawal of the notice of termination. It would not involve rehiring the people in that sense. That is why the word "rehire" is in the amendment.

Therefore, those people can be brought back on to the job, and there would be no problem under this amendment in bringing those persons back to work. So, therefore, that does not hamstring the Secretary.

Mr. LEVITAS. Let me say this again: I am satisfied that the administration's position is clear. They have taken the action, I think quite correctly. There is not going to be any general amnesty: I am convinced of that. I am not quarreling with that. That is why I asked the gentleman the question of whether or not he has discussed this amendment with the Secretary or the administration, because I do not think it is one that would be helpful to their efforts in dealing with this very sensitive situation.

Mr. WALKER. If the gentleman will yield, my discussions with the Department of Transportation on this amendment indicated that they have no objection to the amendment.

Mr. KEMP. Mr. Chairman, will the

gentleman yield?

Mr. LEVITAS. I yield to the gentle-

man from New York.

Mr. KEMP. I thank my friend, the gentleman from Georgia, for yielding. I am strongly opposed to this amendment. Without regard to any value judgment, I think it is unfortunate that we are attempting on an appropriation bill, as the gentleman has suggested, to very tightly hamstring the options not only of the Secretary and Department of Transportation, but of the President as well. These are very sensitive discussions and very sensitive times, and I personally do not think that an appropriation bill is the proper place for this restriction.

I do not support the controller's strike, which I believe is illegal, although I do recognize that the controllers have faced very difficult and demanding working conditions. What I am objecting to is legislating permanent punishment for all the controllers and their families, when many, I believe, have been the victims of the actions of a few. At some point I hope that we will be able to temper our justice with compassion, and bring this unfortunate episode to an end. Let us not eliminate any of the President's options—especially through the inappropriate vehicle of an appropriations bill.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. LEVITAS)

has expired.

(On request of Mr. Hyde and by unanimous consent, Mr. Levitas was allowed to proceed for 2 additional minutes.)

Mr. HYDE. Mr. Chairman, will the

gentleman yield?

Mr. LEVITAS. I yield to the gentle-

man from Illinois.

Mr. HYDE. Mr. Chairman, I want to associate myself with the remarks of the gentleman. I do not think the Secretary of Transportation needs our help in this matter. It is a matter of extreme delicacy, and he is doing a fine job. I really appreciate the remarks of the gentleman and I associate myself with his remarks.

Mr. LEVITAS. I thank the gentle-

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Chairman, I support the gentleman from Georgia in his remarks. I think there is one thing that has not been mentioned in this discussion so far, and that is that the airlines themselves have been losing a lot of money. A lot of people are being thrown off the job. We are having economic difficulties as a result.

The New York Times pointed out, in a sensitive editorial a week or so ago, that when the union is decertified, are we going to then continue the 2 or 3 years that may be required to get the airlines back into a 100-percent flying operation?

And it may well be that at that point the Secretary of Transportation would like to rehire some of the more competent, experienced individuals, with certain penalties, perhaps, reduced seniority, reduced pay, something of that kind.

It seems to me that the health of the American aviation industry is the basic question here, and I think the amendment of the gentleman from Pennsylvania would in fact undermine that and seriously threaten it.

Mr. LEVITAS. I thank the gentleman from New York for his observa-

tions.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, I commend the gentleman. I think if the Members vote for this amendment they are essentially voting against the actions of the administration.

Drew Lewis, I can guarantee, would never want this amendment. As the gentleman from Illinois (Mr. Hyde) said, this is very sensitive. He wants to have the right to look at all of the issues, safety related issues, hiring of harassed employees back, and I think a vote for this amendment is a vote of no confidence in the way the administration has handled the situation. So I urge a no vote.

Mr. LEVITAS. I thank the gentleman for his remarks.

Mr. DANIELSON. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from California.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. Levitas) has expired.

(On request of Mr. Danielson and by unanimous consent, Mr. Levitas was allowed to proceed for 2 additional minutes.)

Mr. DANIELSON. I thank the gentleman for yielding.

Mr. Chairman, I support and endorse and associate myself with the remarks of the gentleman in the well and those who have risen in support of him.

I think that this amendment is very, very improvident at this time. The administration is having a very delicate, a very difficult job resolving the airline crisis, and we should do nothing which would interfere with their efforts in that regard.

To adopt this amendment at this time would, in my opinion, be mischievous, because it would frustrate them and it would prevent them from taking whatever necessary actions may run down the line.

I think this illustrates perfectly the importance of our rule against legislation on an appropriation bill. Apparently the call on this particular point of order was very close. Unfortunately, the point of order apparently was not well taken. However, this illustrates the vice, the mischief of putting legislation on an appropriation bill. Even though, apparently, this does not fit into our rule as a violation, this is a very good amendment to turn down. I urge all of my friends to turn it down.

□ 1640

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

A number of statements I do not think are cognizant of the fact when the Secretary addressed our subcommittee yesterday he made very plain that there will be no amnesty—he said this under oath—there will be no amnesty now or in the future for any of the striking controllers.

This amendment was prepared with that in mind.

Therefore, the language in here, the functional language regards the violation of Federal law. We cannot ignore in any of the statements that are being made here that we are talking about endorsing a violation of Federal law if in fact we turn down this amendment and it goes right along the lines of what the Secretary said under oath yesterday.

Mr. LEVITAS. I would like to respond to this. I do not agree. I totally supported the Secretary of Transportation from the very beginning and I do again here today.

Mr. CHAIRMAN. The time of the gentleman from Georgia (Mr. Levitas) has expired.

(At the request of Mr. Walker and by unanimous consent, Mr. Levitas was allowed to proceed for 1 additional minute.)

Mr. LEVITAS. I think that this amendment will show a lack of confidence in the way the Secretary has

handled this entire matter. I think the worst thing we can do is to get Congress involved in the very delicate and expert way in which the Secretary has been handling this and I think if we adopt this amendment, indeed, if we even vote on this amendment, we are sending the wrong messages to any side.

I personally wrote a letter along with 17 other Members to each controller and put them on notice as to what would happen, and the Secretary has taken the appropriate action to this point. But to tie the hands of Secretary Lewis who has responded so well and so effectively up to this point, I think, would be a very serious mistake. I think we would be destabilizing the situation as it now exists without achieving anything, and I certainly hope that we will defeat this amendment.

I realize it is being offered with all good intention, but I think it would have a very counterproductive effect and I urge its defeat.

Mr. McGRATH. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to this particular amendment because I, too, was at those hearings yesterday. I want to associate myself with the comments of the gentleman from Georgia. I think the administration is doing the right thing as far as the strike is concerned.

However, when I was questioning Secretary Lewis and Administrator Helms. I asked them how many people were, at that time, on August 3, were either out sick, out on leave, or out on vacation and who were willing to come back but through harassment or some other form of harassment perhaps could not get back. What would happen in this particular case?

He said each case would be taken on an individual basis and then hiring or not hiring would be forthcoming based on their judgment.

I think by passing this amendment we would be hamstringing those opportunities for Administrator Helms and Secretary Lewis to bring back the people who genuinely wanted to come back to work. So, I oppose the amendment.

Mr. CONYERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment. We have heard now from those on the side of the Secretary and the President who think that they have done a great job in smashing a union, imprisoning the leaders of the union, firing those members who have gone along with the majority vote, even though they had no occasion to be heard or to have their position clarified, and now we are being asked to ratify the greatest union busting act in the 20th century coming from the White House.

In fact, the President's response to the air traffic controller's strike is without parallel in the history of our country. Never before has there been such a deliberate effort to eliminate a national union. The President's firing and jailing of union members, his impounding of union funds is without justification. The President and the Department of Transportation have ignored constructive avenues for resolving the conflict and are now asking this body to join them in their irrational actions.

Just how do the Members of this body, who happen to feel that if you have a collective bargaining agreement, that makes strikes illegal, and imposes an oath that requires workers to work regardless of the unilateral nature of the contract even though it violates condition after condition, vote on this proposal?

Will we join all of those who think the Secretary and the President are doing a fine job?

I would like to suggest to my colleagues that public employee strikes are on the increase and strikes in the private sector are on the decrease, and why? Because we removed the right to strike from the collective bargaining agreements of Federal employees. The cops strike, doctors strike hospitals are closed down and teachers are out in every State in the Union, but anybody that works for the Federal Government, whether he tosses a letter or answers a phone, is violating the law because the Congress happens to be the

The idea that Government employees are different from other types of workers is without foundation. Utility companies, A.T. & T., the railroads and others provide services that are no less essential than those of air traffic controllers, postal workers, and other governmental employees. Yet employees in the private sector have the right to strike under Federal law.

Court injunctions and criminal penalties have not proved a deterrent to such strikes by State and local or Federal employees. In fact, between 1978 and 1979 the number of strikes in the public sector rose by 23 percent, the number of workers on strike grew by 30 percent and the number of working days jumped by 75 percent. The size and duration of the average strike in the private sector diminished while it increased in the public sector. We, as the protector of the public interest, must give reasoned consideration to these facts and not react in a way simi-

lar to the President. Federal employees should be protected from arbitrary governmental intervention to the same extent as their counterparts in the private sector. There is no countervailing bargaining power if a union does not have

the right to strike. In providing Federal employees with such power, we can reverse the trend toward more public sector strikes, and in the process. remove the double standard that has become so embarrassing to the Nation.

This body should understand that the Federal Government as an employer should be no more sovereign than any other employer.

So I hope that this incredibly poor amendment fails and that all of the Members who know that the negotiations are terminated, all of the Members who know that there will not be any further compromise, all of the Members who are positive that there are no meetings going on anywhere about this strike will understand that the airlines are losing millions of dollars every week and are urging the administration to do something about it.

Mr. CLAY. Mr. Chairman, will the gentleman yield?

Mr. CONYERS. I yield to the gentleman from Missouri.

Mr. CLAY. I thank the gentleman for yielding.

I understand that the motivation behind this amendment supposedly is because the airline traffic controllers are engaged in an illegal strike against the Government.

Two days before this body went into recess we passed a resolution 414 to 3. If I am not mistaken that encouraged Government workers in the country of Poland to continue their illegal strikes against the Polish Government.

Now, can the gentleman explain to me how in one instance we will reprimand and we will want to treat harshly American citizens for exercising and extending the same rights that we are encouraging Communist citizens to involve themselves in?

Will the gentleman explain that to me.

Mr. CONYERS. I refer it to the administration and I would ask for a recorded vote on this amendment.

Mr. SAM B. HALL, JR. Mr. Chair-

man, will the gentleman yield? Mr. CONYERS. I yield to the gentle-

man from Texas. Mr. SAM B. HALL, JR. I thank the

gentleman for yielding. I would point out that a few weeks

ago I had a group of these fired people in my office in Texas. While they were there I called a gentleman in the Department of Transportation who told me at that time-I am saying this with reference to the import of what this amendment can do-I was told by the Department of Transportation people that there had been designated the tower chief in each city, in this instance in Shreveport, La., who had the power and the authority upon talking with these people, if he found it so that they had not participated in any marches after they had been discharged, and if he came to the conclusion that they should be rehired, that he had the power and the authority to rehire these people. All of these applications for rehirings would be examined personally by Mr. Lewis.

Now it looks to me like if this amendment carries, that the tower chiefs who have been given this authority would no longer have any au-

thority to do anything.

Mr. CONYERS. For all that are working under the illusion that the airlines are safer than ever, I refer the gentleman to a superintendent of the professional air traffic controllers in Michigan, who quit his job because he refused to be around to take responsibility for what may happen.

Mr. FORD of Michigan. Mr. Chairman, I move to strike the requisite

number of words.

Mr. Chairman, I rise in opposition to

the amendment.

While I certainly respect the concern expressed by the author of the amendment, as chairman of the Committee on Post Office and Civil Service, I am a little bit distressed that we are even having this discussion.

Now, we have been through this before with the same group of people, as a matter of fact. Some of the Members will remember that about 10 years ago we had what some people called the slowdown and other people called a sickout, and some people called a strike. Air traffic controllers are civil service employees the same as people who work on the repair of our airplanes at military air bases and guard our borders and guard the President, for that matter. We have procedures in the civil service law for dealing with people who do something which in the opinion of their agency is inimical to the Federal service. They can separate them.

As has been stated here by a number of people, this is still a live matter with the administration and everyone else concerned with getting this country back on its feet, doing the very best they can not to throw gasoline on a fire and take sides in what started out basically as a disagreement between labor and management.

□ 1650

Our committee, as it did 10 years ago, and I wish the gentleman from Illinois (Mr. Derwinski) was here to join with me, will, when it is opportune to do so and not complicate the problem, hold full and complete hearings and give everyone an opportunity who has an opinion to express it. We will see if we can assist the administration in its responsibility for keeping the Government operating, fulfill the civil service laws, and, at the same time, examine the possibilities of avoiding a recurrence of this situation.

The last time this happened President Nixon was our President. I suppose if I had not told you that, I could

walk around the floor all day and ask you to tell me, "Who was the President the last time we had a strike by air traffic controllers?"

I doubt that very many people would remember. I have asked that question several times in the last few days and they do not. Do you know why? Because before it was through, President Nixon and his Secretary of Labor had worked out an arrangement whereby we ended up with the final and full termination of some 90 air traffic controllers, not the people originally fired, but case by case, as Secretary Drew Lewis has indicated he is going to deal with this and his people are going to deal with it. The Nixon administration worked their through it and we ended up with the permanent firing of some 90 people.

Now, there is a possibility that folks of good will are going to resolve this problem, and that is what we really want—a solution to the problem, not an excuse to take sides. That is one reason why we should not be meddling at this point and either loading the dice for or against anybody in the game, or tying the hands of the administration, which in this case is in the position as management to do whatever they think in their wisdom is the best to solve the matter.

We also have something else. In 1978 we passed something we called the Civil Service Reform Act, which was heralded as an attempt to modernize, update, and clarify the civil service laws of the Federal Government.

The thousands of controllers who were fired are now in the process of appeals under that law.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

(By unanimous consent, Mr. FORD of Michigan was allowed to proceed for 3 additional minutes.)

Mr. FORD of Michigan. If, indeed, the Merit Systems Protection Board determines that some of these people did not participate in the strike, that they were trying to get to work and could not get there, as has been suggested, there will be a determination that they can go back to work.

Now in this amendment we are saying that we are going to step in between the administration, the due process that is afforded by the statute and the employee because we want to take sides.

I see the gentleman from Illinois. I mentioned him while he was gone.

I have just assured them, I say to the gentleman, that we are going to hold hearings when it is opportune for us to do so without causing more trouble.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield for just a brief observation?

Mr. FORD of Michigan. I yield to the gentleman from Illinois.

Mr. DERWINSKI. The gentleman is absolutely correct when he emphasizes that there is an appeals process. In the merits of many cases, these individuals will be rehired, we hope, and nothing should be done to interfere with that process, especially when they will be able to prove in certain instances that there was intimidation or pressure and they do deserve their jobs back.

I do not think anyone in fairness would want to interfere with that process that so many of them at that stage where some final maybe positive judgment will be rendered.

Mr. CONYERS. Mr. Chairman, will the gentleman yield briefly?

Mr. FORD of Michigan. I yield to the gentleman from Michigan.

Mr. CONYERS. Mr. Chairman, I hope that the author of this amendment, having heard the full scope of this debate, will withdraw this from the possibility of facing a record vote.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I ask unanimous consent that the amendment be withdrawn.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. BENJAMIN. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. GEPHARDT, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4209) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1982, and for other purposes, had directed him to report the bill back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill, as amended, do pass.

The SPEAKER. Without objection, the previous question is ordered.

There was no objection.

The SPEAKER. Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. PARRIS

Mr. PARRIS. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. PARRIS. I am in its present form, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. Parris moves to recommit the bill, H.R. 4209, to the Committee on Appropriations.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

PERMISSION TO HAVE UNTIL SEPTEM-MIDNIGHT FRIDAY, BER 11, 1981, TO FILE CONFER-ENCE REPORT ON H.R. 4034, HOUSING AND URBAN DEVEL-OPMENT-INDEPENDENT AGEN-APPROPRIATION CIES ACT.

Mr. BENJAMIN. Mr. Speaker, I ask unanimous consent that the managers may have until midnight Friday, September 11, to file a conference report on the bill-H.R. 4034-making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

MAKING IN ORDER ON TUES-DAY, SEPTEMBER 15, 1981, OR ANY DAY THEREAFTER, CON-SIDERATION OF CONFERENCE AND REPORT ANY AMEND-MENTS IN DISAGREEMENT ON HUD APPROPRIA-H.R. 4034. **TIONS, 1982**

Mr. BENJAMIN. Mr. Speaker, I ask unanimous consent that it may be in order at any time on Tuesday, September 15, 1981, or any day thereafter, to consider the conference report and any amendments in disagreement on the bill-H.R. 4034-making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

CONGRESSIONAL RECORD—HOUSE

There was no objection.

PERSONAL EXPLANATION

Mr. DANIELSON. Mr. Speaker, I was absent from the Chamber at the time of rollcall No. 195 at 10:36 a.m. today on the motion to go into the Committee of the Whole. If I had been present, I would have voted "yea." I was doing more important I was doing more important things and my failure to vote did not affect the outcome of the vote.

TWO NEW DEFERRALS AND RE-VISIONS TO THREE PREVIOUS-LY REPORTED DEFERRALS-MESSAGE FROM THE PRESI-DENT OF THE UNITED STATES (H. DOC. NO. 97-90)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report two new deferrals totaling \$6.7 million and revisions to three previously reported deferrals.

The deferrals affect programs in International Development Assistance, the Department of Health and Human Services, the Department of Transportation, the Pennsylvania Avenue Development Corporation, and the Motor Carrier Ratemaking Study Commis-

The details of each deferral are contained in the attached reports.

RONALD REAGAN THE WHITE HOUSE, September 10, 1981.

□ 1700

LEGISLATIVE PROGRAM

(Mr. KEMP asked and was given permission to address the House for 1 minute.)

Mr. KEMP. Mr. Speaker, I take this time for the purpose of inquiring as to the schedule for the balance of the week and for next week.

Mr. MURTHA. Mr. Speaker, will the gentleman yield?

Mr. KEMP. I would be happy to yield to the gentleman from Pennsyl-

Mr. MURTHA. As the gentleman knows, there will be a pro forma session tomorrow.

On Monday, the House will meet at noon for the purpose of considering House Concurrent Resolution 153, the Martin Luther King Statue under suspension of the rules. Following that the House will consider H.R. 3380, the

Armed Forces Pay Act of 1981, under an open rule with 2 hours of debate, general debate only. The rule has already been adopted. Any recorded votes will be postponed until Tuesday. September 15.

September 10, 1981

On Tuesday, September 15, the House will meet at noon. There are no bills scheduled on the Private Calendar or under suspension. Any recorded votes postponed from Monday, September 14, will be taken on Tuesday. Following that, the House will complete consideration of H.R. 3380, the Armed Forces Pay Act of 1981

On Wednesday and the balance of the week, September 16, 17, and 18, the House meets at 10 a.m. to consider H.R. 4241, military construction appropriations, fiscal year 1982, and H.R. 3518, State Department authorizations, under an open rule with 1 hour of debate.

The House will adjourn by 3 p.m. on Friday. Adjournment times on other days will be announced daily. Conference reports may be brought up at any time, and any further program will be announced later.

Mr. KEMP. Am I correct in understanding that there will be absolutely no votes on Friday of this week?

Mr. MURTHA. That is correct. Mr. SENSENBRENNER. Mr. Speak-

er, will the gentleman yield?

Mr. KEMP. I yield to my friend, the gentleman from Wisconsin (Mr. SEN-SENBRENNER).

Mr. SENSENBRENNER. Mr. Speaker, I thank the gentleman for yielding.

I rise to inquire of the gentleman from Pennsylvania what the possibilities are of a session on Friday of next week, since I notice we have only two bills for Wednesday, Thursday, and Friday.

The SPEAKER. The Chair will report that we are expecting a Friday session on next week. We would have scheduled votes for Monday of next week because we had thought that this bill would not be completed and we would bring it over to Monday. It is anticipated, unless the business of the House is finished on Thursday, that there will be a Friday session. We hope that the Members will anticipate voting on Friday.

Mr. SENSENBRENNER. I thank the gentleman from New York, the gentleman from Pennsylvania, and the SPEAKER.

Mr. KEMP. Mr. Speaker, I yield back the balance of my time.

ADJOURNMENT FROM FRIDAY, SEPTEMBER 11, 1981, TO MONDAY NEXT

Mr. MURTHA. Mr. Speaker, I ask unanimous consent that when the House adjourns tomorrow, it adjourn to meet at noon on Monday, Septem-

tion to the request of the gentleman from Pennsylvania?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. MURTHA. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER. Is there objection to the request of the gentleman from

Pennsylvania?

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agreed to the following resolution:

S. RES. 208

Resolved. That the Senate has heard with profound sorrow the announcement of the death of the Honorable William R. Cotter, late a Representative from the State of Connecticut.

Resolved, That a committee be appointed by the Presiding Officer to join the committee appointed on the part of the House of Representatives to attend the funeral of the deceased Representative.

Resolved, That the Secretary communicate these resolutions to the House of Representatives and transmit an enrolled copy thereof to the family of the deceased.

Resolved, That when the Senate recesses today, it recess as a further mark of respect to the memory of the deceased Representa-

INTEREST RATES

(Mr. DASCHLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DASCHLE. Mr. Speaker, on Tuesday the Republican leader in the House and the Senate majority leader visited President Reagan. The Republican leadership in Congress reported to the President that during the August recess they had learned from their constituents record high real interest rates are the Nation's No. 1 economic problem. Although the disasterous consequences of record interest rates should have been obvious to the Republican leadership any time during the year if they had reviewed the statistics on new housing starts, auto sales, or construction permits, I am glad the Republican leaders had the opportunity during the August recess to learn about the consequences of devastating interest rates and were able to make their report to President Reagan.

Also on Tuesday, the Republican leadership attempted to lay the blame for record interest rates at the doorstep of Wall Street, the bastion of the

The SPEAKER. Is there any objec- free marketplace. It is Wall Street, the American people are now being told, which is responsible for record interest rates and the obvious and growing failure of the administration's economic policy gamble. This latest repudiation of the behavior of the marketplace is a continuation of the sniping at the marketplace begun earlier by economic administration spokesmen.

The marketplace, once the holy grail of Republican economic policies, has not responded to administration political victories in Congress as administration soothsayers had predicted and in particular interest rates have not declined rapidly as predicted unabashedly last March by OMB Director Stockman. Perhaps, Vice President BUSH will best be remembered by future historians as being right from the start for his characterization of supply-side hocus-pocus as voodoo economics.

It is not the behavior of the marketplace, as the Republican leadership has suggested, but the policy to which the marketplace is responding which is at fault. The administration's much heralded economic program is based on continued deficit spending, restrictive monetary policy, and stimulative fiscal policy. The result is record high real interest rates.

Record interest rates are destroying basic American industries. The problems of these industries are well known and have been reported in detail. Record interest rates are also destroying thousands upon thousands of small businesses, the backbone of the Nation's economy, but because these businesses are small their plight and demise have not been reported in great detail. In recent weeks I have received many letters from South Dakotans which detail the consequences of record high real interest rates on their business and other businesses in their community. Each of these letters is painful testimony to the bankruptcy of administration economic policy. For the benefit of the other Members of the House, I want to read a portion of only one of the scores of such letters I have received. The writer is a banker in Brown County and knows of the conditions of which he speaks:

During the past few months I have worked with and watched many small business and farming customers struggle for survival and attempt to "wait out" this high interest rate environment. Most of these individuals felt something had to be done so they quietly supported the Presidents' programs hoping that the situation would improve. They are now at a point they cannot just sit by and remain silent for if they do they will be out of business.

In our town of 550 population we have lost a plumbing shop, a cafe and restaurant, a repair shop, a shoe shop and have had sev eral other business establishments under pressure. This does not include the stress from high interest rates that our farming customers have experienced.

The thing that concerns me most is the possibility of our farm machinery manfacturing plant not continuing in operation. This plant under full production has about 95 employees and now is down to 25. The value of this plant is very important to the total health of our small community. They have been hit hard on both the borrowing side and also on the sales side from this high interest rate.

If you are able to work with Mr. Volcker and Secretary Regan in reducing this interest rate problem it will be a giant step in our survival as a small rural community.

Thank you for listening.

THE SUCCESS AND POSSIBLE FAILURES OF THE REAGAN ECONOMIC LEGISLATION

(Mr. ST GERMAIN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. ST GERMAIN. Mr. Speaker, President Reagan, Budget Director Stockman and the Republican leadership have had perhaps the most successful first 200 days of any administration in recent history. This administration has been given every legislative tool it has asked for to date to fulfill its hoped-for economic recovery. There has been much debate about the damage this plan will do to the economy, and great concern that inflation and budget deficits will swell in the next few years. There is a danger of that, but a more likely outcome is that the administration's package will have virtually no effect on the economy; that we will continue to slide sideways for the next few years.

President Reagan and Stockman asked us to gamble that, by dismantling this Nation's social support system, we would make everyone better off. This House-the Congressvoted to take that bet, and give the Reagan administration a chance to succeed. Unless the economy begins to surge forward, and all sectors share in that surge, the program will have failed. In its failure it will have imposed deplorable costs on the most vulnerable sector of our economy and most of the people of this country: those people struggling the hardest against the highest odds to make their way toward economic self-sufficiency, and the good life they see a few individuals and a few corporations so conspicuously enjoying. Continued unemployment at 7 percent or above, interest rates in the midteens to low twenties, and underutilization of our factories and shops will not compensate these people. Far more than hoping the economy deteriorates no further, the American people now expect, and deserve, an economy that improves dramatically.

I want to document, for this House and for the American people, the Reagan administration's success in fulfilling its legislative agenda for the economic recovery program. I then want to concentrate on the many problems which stand in the way of successfully implementing these programs.

Shortly after last November's election, then-Congressman David Stockman and the gentleman from New York, (Mr. Kemp.) prepared a memorandum for President-elect Reagan outlining the steps necessary for economic recovery. There were seven specific actions set forth in the memo, and all of them have been put into place by legislative action or Executive order.

they urged President-elect Reagan to set the stage for a quick turn-a-round in inflationary expectation by announcing a firm policy of balanced budgets, decreased regulation of business, slow money growth, and so forth. It was said that by promising business a new era of less Government and lower taxes that rational expectations of better times would lower interest rates, spur investment, and get the economy moving quickly. There can be no doubt that the President and his administration have tried this course of action. They have overlooked no forum in spreading the word that big business and the upper income groups will find favor with the Reagan administration.

Second, the memo urged support of at least 2 years of the Kemp-Roth personal income tax cut, some form of the 10-5-3 accelerated depreciation plan for corporations, and a 50-percent cap on the taxation of unearned income. Barely a month ago, the administration pushed through a tax bill that included all of these provisions.

Third, they urged that it was time for substantial regulatory ventilation. True to the memorandum's recommendations, President Reagan appointed a task force headed by Vice President Bush, and sent it on a regulatory search-and-destroy mission. He ordered a temporary freeze on new regulations, and has sharply curtailed or eliminated the administration of many longstanding regulations.

To further this policy, the administration has taken, or is planning to take, a series of steps geared strictly to aid big business. For instance, the administration has let it be known that recalls of cars need not be announced publicly. But these announcements are a crucial element in protecting consumers by making it clear that some cars are unreliable or hazardous. These are facts the average citizen may have no other way of knowing. True, a massive recall may hurt the image of particular cars, as in the Pinto recall, but if an auto manufacturer makes cars with severe safety defects, should it be protected from paying to correct those mistakes? The American people deserve to have full and complete information about prod-

ucts in which they invest money, and on which they depend for reliable and safe transportation.

The Bush task force recently began contributing to lessened regulation by announcing 30 regulations for review. including those which lowered the maximum amount of lead in gasoline, and regulations protecting the job rights of women and minorities on Federal contracts, In addition, it has targeted, for reconsideration, existing rules and regulations requiring drug manufacturers to provide information on side effects to consumers, and those setting construction and safety standards for mobile homes. That this administration would challenge laws designed to protect the safety of American consumers, or those which seek to insure nondiscrimination in employment and promotion, goes beyond any reasonable concern for the economic efficiency of enterprises. It is a slap in the face of most Americans, and a warm handshake for big business.

The fourth suggestion made in the Stockman-Kemp memo called for monetary policy reform. They argued that the Federal Reserve Board must be protected from criticism and political interference-except, of course, from the Reagan administration as the evidence shows-while it went about a single-minded task of reducing the rate of money growth. To date, the Fed has pursued a brutally tight money policy, leading to real interest rates currently the highest in our history. The administration indicated complete support of the Federal Reserve in hearings held before the House Banking Committee in July. Once again, the administration has received what it wished for in the fall 1980 memorandum.

The fifth suggestion was for outyear and entitlement program reductions. This resulted in the Gramm-Latta II budget cuts which used the reconcilation process, in ways never intended, to enforce cuts for 3 years into the future, based on economic presumptions about interest rates and inflation that are unduly optimistic. In July, the Congress delivered a package of cuts totaling more than \$130 billion through 1984. Cuts were made, over Democratic objections, in social security, medicare, community development, disability assistance, heating assistance, school lunches, and a vast number of other crucial social support programs. These programs were specifically targeted for reduction in the Stockman-Kemp memo.

The sixth suggestion made was to remove the price and allocation controls on petroleum products by February 1, 1981. They wrote that, unless this was done, gasoline lines and market disorder would reappear in early spring, and that this would disrupt the legislative momentum of the administration's economic programs.

They wrote "In short, if gas lines are permitted to erupt due to equivocation on revocation of controls, debilitating legislative and political distractions will be created." Thus, the President, who had the sole authority to do so, lifted all price controls in the closing days of January; in the middle of the coldest months of the year, and with great added cost to consumers.

Finally, Stockman and Kemp suggested that all social and labor policy legislation, such as repealing Davis-Bacon and the minimum wage, be put off until after the economic package was completed by Congress. Working with key Republican Senators, the administration was successful in delaying these issues, and thus, avoiding the infighting such proposals would inevitably cause.

In view of the November 1980 memo, and the ambitious seven-point program outlined therein, the Reagan administration, and the Republican leadership in Congress have effected a minor miracle in pushing through all aspects of this plan. While the attention has focused on tax cuts and budget cuts, the other five Reagan tenets were in many respects just as crucial. In short, the Reagan economic recovery program is now in place. The American people have demanded that we give the President a chance to succeed with his plan, and that has been done.

The question is: Will the Reagan program work? Predicting what the American economy will do is a hazardous enterprise at best. Time after time the economy has surprised experts with its resiliency. I will not predict that the Reagan program will send the economy into a tailspin. Our economy is too complex for it to be destroyed by any one administration. But the pain and loss visited on the low- and moderate-income families, and the elderly, by administration budget cuts demand more than simply avoiding economic disaster. Will the Reagan program bring forth the sustained economic growth that will make this country a rewarding place to live for all of its citizens, and not just the 4 percent of families who earn more than \$50,000 a year? All indications are that it will not. The goals are good, but they are contradictory, and the heightened expectations established by administration pronouncements may quicken the failure of its policies, as one yardstick after another fails to measure up to original pronouncements.

Let us take a few of the basic economic goals of the administration, and look at the problems which stand in the way of a solution. The administration has made a balanced budget into the new Holy Grail, and has set the country in pursuit of it by 1984, although we have the lowest budget def-

icit, as a percent of GNP, of any major industrialized economy. A balanced budget has gained independent importance, and will be used as a measure of administration success. Can the Reagan program lead to a balanced budget by 1984, as he has promised?

All recently elected Presidents have entered office with brave predictions of balanced budgets toward the end of their first terms, and they have been wrong. President Reagan has shown unusual resolve in pushing through cuts in social programs that total more than \$130 billion in the next 3 years, but he has combined that with massive increases in defense spending, and a tax bill, which he fought hard for, that reduces revenues by \$750 billion over the next 5 years, saving money for big business and wealthy families. Somewhere \$620 billion more will have to be cut if we are to balance the budget. That is nearly the amount spent by the Federal Government this fiscal year. The administration has asserted that \$70 billion in new cuts for 1983 and 1984 are being formulated, but that still leaves almost 90 percent of the work yet to be done.

Does the administration have the political support for cuts of that size? President Reagan has recently indicated that small cuts in the defense budget will have to be made. But those alone will not be enough, and the only programs that can provide the necessary money to cut are social security and health care. I will certainly oppose any plan to go back on our word by cutting the little money available to this Nation's elderly, and it is criminal to propose robbing our deserving citizens of basic health provi-

sions.

This massive projected deficit may be pale in comparison to that which develops when the administration's rose-colored glasses are taken from them. Already, many previous esti-mates have been erased. In November, then President-elect Reagan promised to hold fiscal year 1981 outlays to \$620 billion. Then in March, he said outlays would amount to \$655.2 billion, and in July that became \$661.2 billion. In just 8 months \$40 billion was added to the estimates: \$7 billion of which is attributable solely to higher than predicted interest rates brought about by the Reagan-dictated Federal Reserve tight money policies. At this pace there would be a cumulative error of \$240 billion in the Federal deficit by the end of President Reagan's first term.

A few weeks ago word leaked out that the administration was concerned the fiscal year 1982 deficit may rise to \$60 billion, from its \$42 billion level predicted in July. The Congressional Budget Office also predicted such an outcome. President Reagan has since denied that and sent his aides back to recalculate the deficit. According to administration spokesmen, they would

make this recalculation by deciding to adopt more optimistic assumptions about the economy this year and next. Assumptions alone will not close that gap in 1982 or any other year. In fact, with the weak economic performance every month since Mr. Reagan's inauguration, the deficit is likely to grow for 1982 rather than to drop.

Recessions inevitably increase the deficits of Government by reducing revenues and spurring outlays from programs like food stamps and unemployment insurance. If unemployment and interest rates turn out to be only 1 percentage point higher than Administration predictions, while real GNP grows at a 1-percentage-point lower rate, it would cost the Treasury nearly \$30 billion a year, according to CBO guidelines.

On top of unpredicted recession expenditures, and large revenue cuts, efforts to balance the budget are complicated by cost overruns, and supplemental appropriations. Much attention has been focused on the increased spending dictated for defense by the Reagan administration, and its inflationary pressures have been well documented. Part of these pressures come from the susceptibility of defense spending to cost overruns, particularly when faced with sole-source suppliers. In fact, for the last 3 months of 1980, there were defense budget overruns totaling \$47.6 billion. The most wellintentioned planners cannot fully anticipate such pressures.

Unexpected defense-related expenditures are only one aspect of the cost pressure problem. It is now becoming clear that cuts made by the Reagan administration budget for 1982 and beyond will have unintended side effects, such as creating higher expenditures in some entitlement programs. The Agriculture Department has recently calculated that cuts in other welfare programs may cost it \$500 million more in food stamp allocations than was originally anticipated, and this assumes that the Reagan economic recovery program works. I suspect that as the various agencies and departments review the hastily scrawled Republican Budget Act they will find numerous cases of such conflict.

A further difficulty standing between President Reagan and his balanced budget are supplemental appropriations. According to a Congressional Budget Office report just released, "In every year of the 1970's, supplemental appropriations were the final phase of the budget process." The report goes on to say that Congress approved 95 percent of the supplemental appropriations brought to it, and that they averaged more than \$23 billion a year. The greatest need for supplemental appropriations comes in programs that will spend the most if the economy does not recover as quickly as Reagan predicts. One of the great dangers of passing budgets for 3 years in advance is that our crystal ball gets more cloudy as we look further into the future, and supplemental appropriations are more likely to occur in larger doses.

The Reagan administration has made a balanced budget into a guidepost for economic recovery. Even now, Wall Street analysts argue that interest rates will not come down as long as big deficits loom in the future. Although the rules of thumb I have mentioned are not ironclad laws, and in some sense those figures are interactive and not cumulative, rough addition of the possible unanticipated deficits add up to over \$1 trillion for the course of the Reagan administration's first term, and that is without anything going seriously wrong in the national or international economy. Any emergency or disaster would, naturally, increase the possible shortfall. A \$1 trillion error would be, as President Reagan has reminded us, a 67-milehigh mistake.

Although the Reagan administration has managed to make the 1984 balanced budget a guidepost, the substantive changes which are wrought in the economy through the administration's program are more important to the American people. Can the Reagan administration hit its goals for GNP growth, inflation slowdown, and interest rate reductions? If we look at the private forecasters versus the Reagan administration, it is clear that the administration is quite a bit more optimistic than are the forecasters. Where the President sees real GNP growth of 5.2 percent in 1982, an inflation rate of 6.2 percent, and a 91-day T-Bill rate of 10.5 percent, private forecasters see 3.1 percent real GNP growth, an inflation rate of 7.8 percent, and a 91-day T-Bill rate of 12.4 percent. That is nearly a 2percentage-point difference in all major indicators.

Although OMB Director Stockman has dismissed critics of his forecasts as cynical and destructive, while Vice President Bush has alluded to the unpatriotic nature of criticisms directed at the Reagan administration's economic plan, I will indicate some of the obvious problems facing the administration in its goal of economic recovery.

Since last year's third quarter, inflation has come down dramatically. This is not through the beneficient effect of the administration's economic program, since that has not yet taken effect. Oil prices are stable, and falling in real terms, bumper harvests have kept food prices from rising, and the near collapse of many industries have kept wage settlements from spurting ahead. But we are still faced with a nugget of core inflation running at about 8 or 9 percent. With a recent monthly spurt to a 15-percent rate,

there is a wage-price spiral embedded in the economy, and no amount of promises from the Government will bring that to a grinding halt.

The prospect of massive budget deficits, real income by workers in the past, and renewed defense spending at levels greater than during the Vietnam war all combine to make the inflation prospects over the next 4 years look anything but bright. We will spend over \$1 trillion in the next 4 years on defense. The Wall Street Journal has denounced excessive defense spending saying that, as it affects inflation, it is the worst kind of Government outlay since it eats up materials and other resources that otherwise could be used to produce consumer goods. By focusing all new spending in defense areas, the Reagan administration is simply fueling the most inflation-prone sector of the economy.

Second, because of the embedded wage-cost spiral, it is estimated that 9 percent unemployment would have to be endured for 2 years to compress the core inflation rate by 3 points. In that time, this country would have lost output and real income of more than \$400 billion. Squeezing inflation out of the economy by creating recessions is wasteful, cruel, and retards the capital formation necessary to forge a true economic recovery.

Perhaps the best clue to how financial analysts view the prospect of lower inflation is to look at the interest rates in various money markets. The analysts of these markets depend upon their predictions to provide their living, so they are not likely to make altruistic or consistently wrong decisions about the future. Interest rates, especially those for longer term Treasury notes, set new records nearly every day. If these markets expected a rapid downturn in inflation, there should be strong pressure to lower interest rates on these secure Government issues. Instead, 2-year Treasury notes have been recently selling for a record 16percent interest rate.

Last November, Messrs. Stockman and Kemp told President-elect Reagan there were hair trigger conditions in the interest sensitive markets, which would cause immediate response to early economic policy signals either favorably or unfavorably. To date, they have responded to the Reagan program unfavorably. Stockman and KEMP noted, with alarm, that by yearend-1980-bank-prime-rates are likely to hit the 15- to 16-percent range. Since the Reagan administration hit town, these rates have not been below 18 percent, and have been at or above 20 percent for the last few months.

The Reagan program and the good intentions of the administration have generated no confidence that a low inflationary future will be upon us.

When we turn to predictions for economic strength, it is once more clear that there is little confidence that the administration's plan for strong GNP growth over the next 3 years will be successful. The administration is faced with an economy that has shown little strength over the last few years, and it must turn around the falling productivity before it can expect to make great strides in GNP growth. The Congressional Budget Office, in a recently released study on declining productivity in the United States explicitly said. 'Although some policy measures could prove helpful, the Government's ability to increase efficiency growth is severely limited." This is particularly true because of the scatter-shot tax cut policy adopted by the administra-

The idea of using tax cuts to stimulate investment is a sound approach to production, but tax cuts are of greatly lessened utility when the economy is running at less than 80 percent capacity, as it now is, and many companies are losing money, as they now are. Only companies with large tax liabilities, which are making money, and which are operating at near peak capacity, will be stimulated to new investments by tax cuts. Why should a company expand its productive capacity if it cannot sell all that it is currently capable of producing? How can a company take advantage of tax breaks if it is losing money, and so has no tax liability?

This is one of the fundamental flaws of the Reagan economic program—it does not treat the American economy as what it is, a fragmented, sectorally weak economy. What do its provisions do for the auto firm in Detroit, the steel mill in Gary, or the textile mill in New England? Our economy is too complex and too diverse to be equally affected by untargeting tax breaks.

Walter Heller repeatedly urged the administration to use much of the existing tax-cut margin for sharply focused investment incentives and then follow through with bigger personal tax cuts as budget cuts and ebbing inflation allow. Instead, the Reagan administration pushed through a tax cut that has just about eliminated the corporate income tax, and has locked us into large tax cuts for the next 3 years. Business savings were already running at historically high rates before the Reagan tax cuts. They stood at 14.3 percent of gross domestic corporate profit during the 1975-79 period; up from the 13.5 percent of the 1970-74 period. Savings are not the problem; it is how this money is used that poses the great difficulty. With record real interest rates in secure money markets why should businesses invest in risky, long-term capital for-mation which anticipates a demand that does not appear to be developing. The Reagan tax policy does nothing to

make capital formation a more rewarding use of earnings than would be speculation on national or international money markets, or mergers and acquisition that offer no productivity or efficiency gains to the economy.

Further questions about the success of the Reagan tax cuts come from their dependence upon higher savings rates by individuals. Secretary of the Treasury Regan predicted that individuals would save two-thirds of their refunds. This is roughly 1,600 times the current rate of personal savings and is a highly unrealistic goal, especially with the relatively minor amounts received by most taxpayers.

The other reputed effect of the personal tax cuts, is to promote more labor by encouraging people to work harder and make more money. MIT economist Robert Solow has calculated that each 1-percent increase in after-tax return to effort generates at most one-half of 1 percent of net labor increase, and probably substantially less. With such a return tax cuts can never pay for themselves.

These, and many other doubts, contribute to the lack of impact the Reagan proposal has had on interest rates. Director Stockman and Mr. KEMP noted in their November 1980 memorandum that fiscal stabilization can only be achieved by sharp improvement in the economic indicators over the next 24 months. This improvement cannot, and will not, come on the basis of the tax- and budgetcutting bills forced through this Congress by the Reagan administration. Not only does every premise of the Reagan administration plan lack credibility, the package taken together is internally inconsistent.

When we look at the fiscal policy of the administration, through its tax cuts and defense spending plans, and compare it to the monetary policy it has convinced the Federal Reserve Board to accept, the contradictions become clear. If the administration were to get its wish, and real growth of GNP came up to its predicted levels, while growth in the money supply stayed as low as the administration wishes, the velocity of money-the number of times each dollar changes hands during the year-would have to rise by between 7 and 9 percent per year. Historically, this measure has never been above 5 percent, and generally averages 3 percent. This velocity prediction runs head-on into the administration's interest-rate predictions, for it wants interest rates, which are the cost of using money, to drop at the same time that the demand for money, as measured by velocity, is rising to record levels. Unfortunately, the universe is inconveniently arranged, and increased demand cannot help but cause upward pressure on the prices of reduced supplies. The administration may be able to achieve its real GNP growth, or it may be able to achieve its slow money policy and have low interest rates, but it cannot have all three at once.

administration's economic policy is riddled with over ambitious goals, such as the predictions of real GNP growth and a balanced budget by 1984. It is further damaged by ideologically pure, but ineffectual approaches to encouraging growth, such as its scatter-shot multiyear tax cuts.

Perhaps the supply-side magic wand will be correctly waved and all of these problems and contradictions will be resolved. I sincerely hope this country's economy does recover quickly. However, I am afraid that it will not. I am afraid that the Reagan administration's policy will largely cancel itself out, and we will continue to slide sideways as we have of late-unless a natural emergency or supply shock induces severe deterioration. Perhaps to those with this administration's view of the poor, the elderly, and the less fortunate, the pain caused by dismantling social programs is justified as an end in itself. But to me, and I think to most Americans, this dismantling will only be justified if it has its intended effect and produces a better life for all citizens, and not simply those corporate executives with whom this administration primarily identifies.

Budget Director Stockman told the Joint Economic Committee earlier this year that, "I think it is so important that when the redistribution argument is raised in this debate-that we dismiss the question, we reject the question as irrevelant." Well, I do not think the redistribution argument is irrelevant, especially when the administration is playing Robin Hood in reverse, by taking from the poor and giving to the rich. I have spoken up, doubting this economic program, not because I am a Democrat and the President is a Republican, and not because I think everything we have done in the last 20 years is good; that every social program is necessary and effec-

I have spoken because I do not think that the administration's program will substantially improve the lives of all Americans, and barring that, I do not think the \$11 billion cuts in social security, the \$4 billion cut from medicare, the \$3 billion cut from student loans, or the \$5 billion cut from school lunches for our Nation's children is morally defensible. If this program does work, I will congratulate this administration and credit them with being right, but if it does not work, I will expect them to stand responsible for the pain these cuts have caused millions of Americans who truly need our help.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. FIELDS) is recognized for 5 minutes.

• Mr. FIELDS. Mr. Speaker, yesterday due to air traffic scheduling problems. I was unable to be present for a number of rollcall votes. However, had I been here I would have voted the fol-

Rollcall Vote No. 191, "aye." Rollcall Vote No. 192, "aye."
Rollcall Vote No. 193, "aye."

FRED S. SKOWRONSKI HONORED IN ILLINOIS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is

recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, I rise to bring the attention of my colleagues to the resolution passed by the Illinois General Assembly in appreciation of the accomplishments of Fred S. Skowronski, treasurer of the National Department of the Polish Legion of American Veterans, U.S.A. Fred resides at 5229 West Melrose Avenue, in Chicago, in the 11th Congressional District which I am honored to repre-

Mr. Skowronski was honored by the Veterans Assistance Commission of Cook County, Ill., at the 14th Annual Honoree Award Night in recognition of his many years of humane service to his fellow veterans and their families, as well as to their communities,

State, and Nation.

Both the House of Representatives and the Senate of the Illinois General Assembly passed a resolution on June 30, 1981, to congratulate Mr. Skowronski and four other veterans "who served their state and nation in military service as well as community service during peacetime," and also to congratulate "the Veterans Assistance Commission of Cook County for sponsoring the Annual Honoree Award Night to recognize outstanding veterans of Illinois.'

I extend my own congratulations to Mr. Fred S. Skowronski on these splendid accomplishments, and extend my warmest best wishes for continued service to his fellow citizens in devotion to the highest principles.

EXPORT-IMPORT BANK FINANCING NOTIFICATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. NEAL) is recognized for 5 minutes.

· Mr. NEAL. Mr. Speaker, I am submitting to the House today the U.S. Export-Import Bank's proposal to provide financing to enable Transbrasil Airlines of Brazil to purchase in the United States three new Boeing 767-

200 jet aircraft valued at more than \$158 million.

The Eximbank is prepared to increase an existing direct credit to Transbrasil from \$14.3 million to \$49.2 million and to guarantee private financing of \$61.7 million to make possible the sale by the Boeing Co.

This notification from the Eximbank was referred to me as chairman of the Banking Committee's Subcommittee on International Trade, Investment and Monetary Policy. Section 2(b)(3)(i) of the Export-Import Bank Act of 1945, as amended, requires that the Eximbank notify Congress of proposed loans or financial guarantees, or combinations thereof, of \$100 million or more. Unless the Congress determines otherwise, the Eximbank may give final approval to the transaction after 25 days of continuous session of the Congress after notification.

I am submitting for the RECORD the Eximbank notification which gives the details and terms of the proposed transaction. I would welcome any comments or questions my colleagues may have on the proposed financing.

The Eximbank material follows:

EXPORT-IMPORT BANK OF THE UNITED STATES, Washington, D.C., August 25, 1981.

Hon. STEPHEN L. NEAL,

Chairman, Subcommittee on International Trade, Investment and Monetary Policy, House Banking Committee, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Eximbank has submitted a statement to the Speaker of the House of Representatives and the President of the Senate in accordance with the provisions of Section 2(b)(3)(i) of the Export-Import Bank Act of 1945. I am taking the liberty of providing you with a copy of this statement.

Sincerely.

NANCY S. PIGMAN. Congressional Relations Officer.

EXPORT-IMPORT BANK OF THE UNITED STATES Washington, D.C., August 24, 1981. Hon. Thomas P. O'Neill, Jr., Speaker of the House of Representatives, The Speaker's Room, U.S. Capitol, Wash-

ington, D.C.

DEAR MR. SPEAKER: Pursuant to Section 2(b)(3)(i) of the Export-Import Bank Act of 1945, as amended, Eximbank hereby submits a statement to the House of Representatives with respect to the following transaction involving U.S. exports to the Federative Republic of Brazil.

A. DESCRIPTION OF TRANSACTION

1. Purpose

Eximbank is prepared to increase the amount of an existing direct credit from \$14,322,500 to \$49,212,500 and to authorize a financial guarantee of private financing in the amount of \$61,679,400 to Transbrasil S.A. Linhas Aereas (Transbrasil) to facilitate the purchase in the United States of three new Boeing 767-200 jet aircraft, related equipment and spare parts. The total U.S. export value for this transaction is estimated to be \$158,417,000.

2. Identity of the Parties

Transbrasil is a privately owned Brazilian company. Founded in 1955, Transbrasil is one of Brazil's four scheduled airlines. It operates only in Brazil. Eximbank has previously authorized two direct credits to Transbrasil, each for the purpose of financing two Boeing 727 jet aircraft. The first direct credit, authorized in 1974, will be fully repaid in October 1981. All payments under this direct credit have been made on a timely basis. The second direct credit, authorized in August 1979, has not been utilized and is being amended by this transaction to permit the purchase of new generation aircraft.

Banco Nacional do Desenvolvimento Economico, as financial agent of and for and on behalf of the National Treasury of Brazil, will, as in numerous direct credits to other Brazilian borrowers, unconditionally guarantee repayment of the Eximbank direct credit and private financing guaranteed by Eximbank.

3. Nature and use of goods and services

The principal goods to be exported from the United States at this time are three Boeing 767-200 medium-range jet aircraft, two spare engines, airframe and engine spares and ground support equipment. The airframes and related spares will be manufactured by The Boeing Company of Seattle, Washington. The engines and related spares will be manufactured by the General Electric Company of New York. These two companies will subcontract with numerous U.S. companies for major portions of the airframe and engine manufacture.

This transaction represents the introduction of a fuel efficient new generation aircraft into Transbrasil's operations. The aircraft will not be operated on routes normally served by U.S. carriers. Delivery of the first aircraft is scheduled for May 1983 and delivery of the remaining two aircraft is scheduled for June 1983. Financing for the non-U.S. components of the aircraft will be through commercial banking sources and is not included in the financing plan set out

B. EXPLANATION OF EXIMBANK FINANCING 1. Reasons

The Eximbank direct credit and financial guarantee totalling \$110,891,900 will support U.S. exports with a total value of \$158,417,000 in the face of foreign competition from A300 and A310 aircraft manufactured by Airbus Industrie. Eximbank's financing support for the export of U.S. aircraft has assisted U.S. aircraft manufacturers in obtaining approximately 80 percent of the world market (which includes the United States) for commercial jet aircraft. Through 1990, aircraft purchases by foreign airlines are expected to account for approximately 40 percent of the total U.S. aircraft sales. Over the next few years several foreign airlines, such as Transbrasil, will be undertaking major re-equipment programs,

and most airlines choosing a particular aircraft type will continue with future purchases of the same models to maintain fleet continuity. During these next few years there will be intense competition from foreign aircraft and engine manufacturers and they will be supported by subsidized export credit from foreign government sources. Consequently, Eximbank has recognized the need to support the sale of new generation U.S. aircraft and engines in such a competitive environment by offering financing that will enable U.S. manufacturers to maintain their position.

Transbrasil's fleet expansion plans for the 1980s have gradually taken shape over the last two years. While formulating its plans, Transbrasil considered Airbus A300 and A310 aircraft as alternatives to new generation U.S.-manufactured aircraft. The Airbus aircraft is suitable for Transbrasil's route structure, and financing through the export credit agencies of France, Germany and the United Kingdom is available to support Airbus aircraft sales. There have been two Airbus aircraft sales to two Brazilian airlines, one of which, Servicas Aereas Cruzeiro de Sul S.A., previously had an all-Boeing fleet.

Primarily to improve fuel efficiency, Transbrasil decided to purchase new generation aircraft in lieu of additional Boeing 727 aircraft. Transbrasil's modernization program calls for the acquisition of the three Boeing 767 aircraft which is the subject of this transaction and nine Boeing 757 aircraft by 1985. As new generation aircraft enter service, most of the old Boeing 727 aircraft will be retired or sold. Transbrasil's plan would increase capacity by 200 percent by 1990 while increasing fuel consumption by only 30 percent to 40 percent over 1980.

In addition, although it now appears committed to Boeing aircraft, Transbrasil cannot purchase aircraft without Brazilian government approval and, due to Brazil's foreign debt burden and balance of payments problems, financing terms are a primary consideration of the government.

The Boeing Company estimates that the export of U.S. goods will provide 1,600 manyears of employment for Boeing and its approximately 3,500 subsuppliers. Additional benefits which will flow to the United States from this transaction include sizeable follow-on exports of spare parts, ground support and other related equipment.

2. The financing plan

The financing plan for the total U.S. procurement supported by the Eximbank direct credit and financial guarantee is as follows:

THE PARTY WHEN THE PARTY WAS	Percent of U.S. costs	Amount		
Cash payment. Eximbank direct credit. Eximbank financial guarantee of private financing	15.0 31.1 38.9	\$23,762,550 49,212,500 61,679,400		

ATTACHMENT B BRAZILIAN KEY ECONOMIC INDICATORS

[Exchange rate on Mar. 30, 1981; U.S. \$1=CR \$76.151

1	Percent of U.S. costs	Amount	
Private financing not guaranteed by Eximbank	15.0	23,762,550	
Total	100.0	158,417,000	

(a) Eximbank Charges

The Eximbank direct credit will bear interest at the rate of 9.25 percent per annum, payable semiannually. Eximbank charge a commitment fee of ½ of 1 percent per annum on the undisbursed amount of the Eximbank direct credit. Eximbank will charge a guarantee commitment fee of 1/8 of percent per annum on the undisbursed amount of the private financing guaranteed by Eximbank and a guarantee fee of % of 1 percent per annum on the disbursed amount of the private financing guaranteed by Eximbank. The estimated blended rate of the Eximbank financing package is 13.2 percent per annum, assuming the private financing guaranteed by Eximbank is provided by Private Export Funding Corporation at its current rate of 16 percent per annum and that the unguaranteed private financing is provided by a commercial bank at a rate of 21 percent per annum which is 2 percent above the current offered rate for U.S. dollars in the London interbank market.

(b) Repayment Terms

Aggregate disbursements under the unguaranteed private financing, the private financing guaranteed by Eximbank and the Eximbank direct credit will be repaid by Transbrasil in 20 equal semiannual installments beginning February 6, 1984. The unguaranteed private financing will be repaid from the first installments, the private financing guaranteed by Eximbank will be repaid from the middle installments and the Eximbank direct credit will be repaid from the last installments.

Attached is certain additional information on Eximbank activity in and economic data on the country involved in this transaction.

Sincerely,

WILLIAM H. DRAPER III.

VISIT OF VICE PRESIDENT OF NIGERIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. Conyers) is recognized for 60 minutes.

Mr. CONYERS. Mr. Speaker, I have asked for time to discuss the appropriateness of the President of the United States to refuse to meet with the Vice President of Nigeria during his recent visit to the United States, and the generally undiplomatic treatment given to the Nigerian delegation that was with the Vice President of that country.

Vice President Ekwueme's visit represented the continuation of bilateral economic talks between the United States and Nigeria that have been in progress since 1978 when they were initiated by the previous administration. We are in the sixth round of our discussions with the Nigerians on ways to improve educational, cultural, political, and economic relations between our two countries.

The talks have involved very highlevel visits between Nigeria and the United States, signaling the fact that there must be mutual appreciation by the respective nations of the economic and political significance for the continued good relationships and the extension of peace in the world, and on the African Continent in particular.

The former Vice President of the United States, Mr. Walter Mondale, did visit Nigeria in 1980 as part of the bilateral talks and was given the diplomatic courtesies appropriate to his position as the Vice President of the United States, and the personal representative of the United States.

Although the visit of Mr. Mondale was to be to the Vice President of Nigeria, he was allowed, indeed warmly invited, to meet and discuss matters at great length with the President of Nigeria, Mr. Shagari. There was a 19-gun salute. There were courtesies, a color guard, escort, complete protection. This was consistent with the kind of protocol that is generally afforded to the heads of state.

So it seems to me that the Vice President of Nigeria should have been given at least some appropriate level of treatment and protocol suitable to

As it has been revealed to me, the Vice President of the most populous country on the continent of Africa informally requested a meeting with our President and it was declined, giving the explanation that other competing obligations prevented such a meeting.

□ 1710

But, ladies and gentlemen of the Congress, what are those other competing obligations? What was so important that the President could not meet with the Vice President of Nigeria, a country that provides us with an important and significant percentage of our fuel resources? What was more important that the President could not meet with the Vice President of a nation that has a cultural significance to 30 millions of America's population? It seems to me that the President may have misplaced his priorities, or someone in the White House did it for him.

These actions by the State Department and the administration should not be supported by this Congress, because I believe they do not represent the way that this House would have wanted the United States to represent itself to a nation and a Vice President and his delegation as important as Nigeria. This administration, the Government, must appreciate the fact that Americans are very sensitive to the general way this administration has been relating to the interests of developing nations in general, the Third World in particular, and the African Continent most especially. We think that there needs to be a very sharp and focused reminder that a 19gun salute from Nigeria to our Vice President, visiting their Vice President, who immediately agreed to a meeting with the President of Nigeria. should not run into such shabby, undiplomatic treatment as to have the Vice President of Nigeria and an incredible delegation going around virtually unescorted, virtually unprotected, on a very minimal schedule.

Now, who else was in that delega-tion? I indicate these names not because they add to the problem that I present to the Members, but because I believe that the Vice President of Nigeria's visit, alone and by himself, would have warranted a brief ceremonial meeting with the President of the United States; but he happened to have with him the Minister of Agriculture, Mr. Alhaji Ibrahim Gusau; the Minister of Commerce, Mr. Alhaji Bello Maitama Yusef; the Minister of State in Ministry of External Affairs. Chief P. O. Bolokor; the Special Adviser to President on Economic Affairs, Dr. J. S. Odama; the Special Adviser to President on Political Affairs, Prof. G. A. Odenigwe; the special assistant to the President, Mr. Alhaji Tanko Yakasai; the special assistant to the Vice President, Dr. C. C. Mbadinuju; the Ambassador of Nigeria, Chief A. Eke; the Permanent Secretary, Ministry of Agriculture, Mr. Alhaji Liman; the Permanent Secretary, Ministry of National Planning, Mr. G. P. O. Chikelu; the Permanent Secretary, Ministry of Health, Mr. Alhaji Abubakar Alhaji; the Permanent Secretary, Ministry of Education, Mr. F. Adesanoye, and other senior Government officials and representatives of the Nigerian private sector.

I say that this is probably one of the largest governmental delegations to visit the President of the United States in recent years, and when those from the Congress met with them there were no police escorts to be seen; there was no protection that was visible. It was indeed, in the parlance, a

very undiplomatic union.

I object to this, and call upon the President of the United States to formally and publicly and privately apologize to the President of Nigeria, the Vice President of Nigeria, and the distinguished members of his Cabinet and other senior Government officials and members of the private sector that joined him in that visit; in addition, and most importantly, that the President of the United States formally apologize to the American people, because it seems to me that the environment and the attitudes and the reception of these great African leaders was denigrated and was demeaned for all parties involved. For the request to briefly and ceremonially meet with the President of the United States to be dismissed out of hand was inappropriate, and there should be redress. That does in no way reflect upon the meetings that the Vice President had with the Vice President of Nigeria, because they were cordial, they were appropriate, with the protocol that accompanies the meetings of the No. 2 men of these two great nations.

But the part that it seems to me must be placed in history as objectionable and reprehensible was the failure of our President to meet even briefly with the Vice President of the largest consitutional government on the face

of the African Continent.

FRANK J. BECKER: 1899-1981

The SPEAKER pro tempore (Mr. Weiss). Under a previous order of the House, the gentleman from New York (Mr. Addabbo) is recognized for 15 minutes.

• Mr. ADDABBO. Mr. Speaker, it is with deep sadness and great personal loss that I rise today to pay tribute to long-time friend and former colleague Frank J. Becker, who recently passed away at this home at the age of 82.

I had the privilege of serving with Frank Becker in this Chamber, I found him a man deeply committed to serving his people, a man who had the ability to grasp the most difficult of issues in a matter of minutes. He served in the House from 1953 to 1965 where he earned the reputation as being an honest, sincere, hard-working public servant. We worked together on a number of matters of interest to both of us and I found his expertise invaluable. He truly loved his constituents and did his best to tend to their needs, always making sure that as their public servant the needs of the general public should never take second fiddle to the desires of a special

A genuinely nice man, friendly and well liked, Frank Becker left many friends who will miss him very much. All grieve his passing as I do, and to his wife, his son, daughter, and grand-children I offer my sincere sympathy and share with them a feeling of irreplaceable loss.

METER IS RUNNING ON HIGH INTEREST RATES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. Alexander) is recognized for 30 minutes.

 Mr. ALEXANDER. Mr. Speaker, during the historic debate over the 1982 budget and tax measures, the President and his supporters contended that substantial cuts in nondefense programs, coupled with a massive. long-term program of tax reduction would permit radical increases in expenditures for defense while stimulating both economic growth and personal savings and investment. Implicit in that supplyside argument was the repeatedly stated notion that inflationary expectations would be dampened and financial markets would react favorably.

It now appears that the optimistic statements were based more on wishful thinking than upon a careful examination of available economic data. In retrospect, not even the most cautious optimism was warranted, because the administration studiously ignored the need to avoid a collision between its expansionary fiscal policy and an increasingly restrictive monetary policy as practiced by the Federal Reserve Board of Governors.

Despite all the ballyhoo over budget cuts, despite the glowing rhetoric about the stimulative effects of the tax cut and despite the creativity of the OMB assumptions used to justify passage of the program, the financial markets refused to believe that deficit spending is the best way to get a handle on inflation. Contrary to the

administration's rosy expectations, between August 9 and the present date. the stock market did not leap forward in a frenzy of confidence in Reaganomics. Instead, it dropped to its lowest level in nearly 2 years. The bond market, in a desperate attempt to merely survive, kept raising its yields, locking corporate America into a burdensome, long-term debt service situathat will stifle productivity growth. But there was a bright spot for a privileged few. Money market mutual funds, which just happen to be based largely on Federal debt, experienced a growth in deposits of about \$2.75 billion per week, reaching a present total of about \$145 billion. What we are witnessing is a massive and rapid redistribution of the wealth of the Nation from the lower- and middle-income classes to the upper-income class through the mechanism of decreased domestic spending and high interest rates. But high interest rates are even more unpalatable to American business than they are to the average citizen. The President fortunately, is quite responsive to American business and he has proposed a couple of remedies. If he cannot cut Government programs by at least an additional \$15 billion (and most projections would assert the necessity for cutting at least \$30 billion) in 1982, then he proposes that the Congress give him the discretionary authority to merely impound such funds as he deems necessary to meet his projected \$42.5 billion deficit.

Additional cuts are certainly possible if House Republicans and their conservative Democratic allies are willing to vote openly for reductions in appropriations for individual programs. But the distinguished minority leader has shied away from that approach because, he implied, the political consequences for certain members of his party would be disastrous if those members were forced to openly oppose programs that benefit their constituents.

Instead, the minority leader suggests, the President should be given discretionary authority to cut spending wherever he sees fit. Such a proposal not only runs counter to the letter, the spirit, and the intent of present law but flies in the face of the constitutionally prescribed requirement that the Nation's purse strings be kept firmly in the hands of the Congress.

But such is the dilemma facing the President. His choices, as he appears to see them, are to cut the budget even further or to do the unspeakable by raising taxes.

Like so many decisions and policies put forward by the President and his followers, his approach to the problem is simplistic. There are some choices beyond these two draconian alterna-

The first, and probably most desirable, solution would be to find ways to increase revenues by closing loopholes and increasing excise taxes and user fees. Or better yet, seek the deferral of the implementation of the tax program for the outyears of 1983 and 1984, making implementation contingent upon achievement of realistic economic objectives in inflation, interest rates, unemployment, revenues, and economic growth.

Barring a willingness on the President's part to abandon his catch-22 monetary policies, the fiscal and Nation is facing an economic disaster. When Dave Stockman exclaimed that the Nation is on the brink of "an economic Dunkirk" last winter, who would have thought he was referring to the effects of Reaganomics? But that is precisely the situation in which the Nation has found itself. Interest rates have been ratcheted upward by the Federal Reserve as each new part of the President's program has been

put in place.

Usurious interest rates are creating a condition in the housing industry that will be chronically depressed for many years to come. Small business failures are reaching epidemic scale. Farmers caught in a credit-cost-price squeeze which could drive hundreds of thousands of them from the land. The automobile industry is faced with the prospect of undergoing a severe contraction that will send shock waves through the whole economy. State and local governments, unable to sell their lower-yield tax-free bonds, are going to seed. Community banks and thrift institutions which provide the preponderance of consumer credit, could approach the threshold of insolvency if the trend is not reversed.

One way of reversing the trend is to make the Federal Reserve's policies more accommodative of the President's fiscal policies. Clearly, an easing of the Fed's monetarist policies would have an adverse impact on inflation. But I suggest that high interest rates themselves, create a measure of inflation by driving up capital costs for the productive sector-costs which are ultimately passed along to the consumer-and by adding to the size of Federal deficits through increased interest payments on the Federal debt.

There is a tradeoff between fiscal and monetary policy which must be calculated in a way that recognizes the direction of greatest benefit-or in the present case, the direction of least damage. In other words, an easier monetary policy will permit a tighter

fiscal policy.

Yesterday, I introduced House Joint Resolution 319 which will put the President on notice that the high interest rates resulting from his huge inflationary deficit and the Fed's incompatible policy of inhibiting the growth of the money supply to fight inflation are unacceptable to the Congress.

The resolution directs the President to undertake immediate consultations with the Fed in four principal areas:

First. Easing Reserve requirements on member institutions to make more funds available to capital hungry markets.

Second. Changing Open Market Committee practices which cause unwarranted reductions in the money supply, driving interest rates up.

Third. Modifying the criteria for set-

ting the discount rate.

Fourth. Prevention of the diversion substantial reservation of amounts of available credit and capital for financing corporate mergers and acquisitions to insure that borrowers from the productive sector have sufficient financing for needed expansion and productivity growth improvements.

Finally, the resolution calls for effecting substantial reductions in interest rates within 90 days and directs the President to report the results of consultations to the Congress

within 30 days after adoption.

I urge speedy committee and floor action on this needed measure and I solicit the support of those Members who believe, as I do, that the meter is running on high interest rates and that unless the President acts now to find a remedy-short term though it may be-the Congress will be compelled to take other remedial action which is sure to have unforetold and longer range effects.

LEGISLATION INTRODUCED TO REQUIRE INDEPENDENT ANAL-YSIS OF DEFENSE PROGRAMS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts FRANK) is recognized for 10 minutes.

• Mr. FRANK. Mr. Speaker, today I am introducing legislation to improve our Nation's defense planning by requiring the Department of Defense to incorporate independent analyses of new major weapons systems into Pentagon plans for weapons procurement. Current Department of Defense procedures leave open the possibility that scarce taxpayers' dollars be obligated for the procurement of poorly conceived and expensive weapons systems before the complete examination of critical factors is undertaken.

Mr. Speaker, in fiscal year 1982, the Department of Defense has been authorized to spend over \$36 billion for the procurement of military hardware, or \$9 billion more than during the last fiscal year. Yet, at the same time that unprecedented increases in defense spending are being enacted into law. the impact of the procurement of many weapons systems on inflation, on local communities, on the environment, and on the strategic balance have yet to be determined. Take the MX missile, for example; after years of congressionally approved spending on research, development, and initial procurement, no decision has been reached on the appropriate basing mode, and now doubts are being cast over the strategic implications of deploying such a system. Had our military planners been more attentive to the problems that we now know are associated with the MX, it is conceivable that the Pentagon could have considered other options, and the expected cost overruns on the MX could have been avoided.

The Department of Defense does not, however, need just another study. If our Nation's defense planners and the American people are to truly benefit from a coherent defense strategy, then input ought to be obtained from the broadest possible sources. Is it not conceivable that academics, environmental groups, business roundtables. economic analysts, and even the mechanics who must repair and maintain military equipment—as well as Pentagon officials and traditional defense contractors-could be consulted about major weapons systems under consideration by the Department of De-

At a time of increased defense spending and fiscal restraint, the American people must be doubly careful about waste. Weapons systems, like other Government expenditures, must be developed along the most cost-effective lines. No stone must be left unturned in the search for the least wasteful, least damaging to the environment, safest, surest alternatives to maintaining an adequate defense for the Nation. Our adversaries will not change their perceptions about American military resolve if the United States adopts a policy of throwing money at the Pentagon. Careful. thoughtful, and comprehensive planning for the future is a far more credible deterrent to a Soviet military threat than haphazard military spend-

The fact of the matter is that the Department of Defense has traditionally relied for its defense planning on those members of the defense community who have the most to gain from the acquisition of the weapons systems they are asked to study. Passage of this legislation would be a major step forward toward injecting public scrutiny of defense programs before it is too late.

Section 1 of the legislation requires the Secretary of Defense to provide for an independent analysis of each proposed defense system by a private contractor before a final decision is made to proceed with the acquisition of the weapons system. The independent analysis should include conclusions on such matters as the effect of the proposed defense system on the strategic balance, its inflationary impact, the likely displacement of civilian populations, the effect of the program on the Federal budget, and what possible alternatives might be capable of meeting defense needs.

Section 2 requires that the Secretary of Defense submit a copy of the report to the appropriate committees of Congress and make the unclassified portions of the reports available to the public.

Section 3 requires the Secretary of Defense to give preference in obtaining the report to contractors who are not involved in the research and development or production of defense systems. A seven-member panel shall be appointed by the Secretary of Defense, the Speaker of the House, and the President pro tempore of the Senate to review the suitability of each proposed contractor before the contract is awarded in consultation with the Comptroller General.

Section 4 limits the cost of the study to 1 percent of the total amount available for research, development, test, and evaluation of the proposed defense system.

Section 5 defines a major defense system of a proposed acquisition by the Department of Defense estimated to require a total cumulative financing for research, development, test, and evaluation in excess of \$75,000,000 or a cumulative production investment in excess of \$300,000,000.

Section 6 limits the effect of the legislation to proposed major defense systems for which funds for research, development, test, and evaluation are first appropriated after the date of the enactment of the bill.

I invite Members to comment on the legislation I have introduced today. The need for a dialog on ways to inject comprehensive and innovative planning into the Defense Department is an essential part of a credible national defense. The text of the legislation I am introducing today follows:

H.R. 4455

A bill to promote cost-savings and efficiency in government by providing for an independent contract study of certain proposed major expenditures before a final decision is made to proceed with the expenditures

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) before a final decision is made to proceed with procurement of a major new defense system, the Secretary of Defense shall provide for an independent analysis of the proposed defense system by a private contractor. Consideration of the results of the study shall be incorporated into the process for making a decision on whether or not to proceed with acquisition of the system, and such study shall be reviewed by the Secretary of Defense before a final decision on such acquisition is made.

(b) Each contract under subsection (a) shall require that the contractor submit to the Secretary of Defense as expeditiously as possible a report containing the results of the contractor's study of the proposed defense system. Such report shall include the contractor's conclusions regarding—

(1) the effect of the proposed defense system, if deployed, on the strategic bal-

(2) the inflationary impact, if any, of the proposed defense system;

(3) the environmental impact, if any, of the proposed defense system;

(4) the effect of the proposed defense system on industry and employment in the United States and on the defense industrial base of the United States;

(5) the effect of the proposed defense system on the civilian population, including any population displacement or risk of population displacement caused by the system;

(6) the effect of the proposed defense system on other defense programs and on the total level of Federal expenditures;

(7) the effect of the proposed defense system on defense personnel requirements; and

(8) lifetime maintenance requirements and costs of the proposed defense system.

SEC. 2. Before a final decision on acquisition of a major new defense system is made, the Secretary of Defense shall submit a copy of the report received under this Act with respect to such system to the appropriate committees of Congress and shall make the unclassified portions of such report available to the public.

SEC. 3. (a) In selecting contractors for contracts under this section, the Secretary of Defense shall give preference to contractors (1) who are not (or whose employees do not include significant numbers of) retired or former members of the Armed Forces or retired civilian employees of the Department of Defense, and (2) who are not involved in research and development or production of defense systems.

(b)(1) Each proposed contract under this Act shall be reviewed for the purpose of determining the suitability of the proposed contractor before the contract is awarded. Such review shall be conducted by a seven member panel appointed as follows:

(A) Three members appointed by the Secretary of Defense.

(B) Two members appointed by the Speaker of the House of Representatives.

(C) Two members appointed by the President pro tempore of the Senate.

(2) A contract may not be awarded under this section to a contractor not approved for such purpose by the panel.

(3) The Comptroller General of the United States shall provide such assistance to the panel as it may request in evaluating the suitability of a proposed contractor.

(4) Members of the panel appointed under subparagraphs (B) and (C) shall be appointed from persons not employed by the United States and shall serve for terms of two years. Vacancies in the panel shall be filled in the same manner as the original appointment.

SEC. 4. The cost of a study under this section may not exceed one percent of the total amount available for research, development, test, and evaluation of the proposed defense system.

SEC. 5. For the purposes of this Act, the term "major defense system" means a defense system with respect to which reports are required to be submitted to Congress under section 811 of the Department of De-

fense Appropriation Authorization Act, 1976 (Public Law 94-106; 10 U.S.C. 139 note).

SEC. 6. This Act shall apply only to proposed major defense systems for which funds for research, development, test, and evaluation are first appropriated after the date of the enactment of this Act.

TUNA PROTECTION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. Howard) is recognized for 5 minutes.

 Mr. HOWARD. Mr. Speaker, I am pleased to introduce today along with my colleagues, the Tuna Protection Act. This legislation provides a solution to a serious economic and environmental threat to our marine resources due to foreign fishing activities along our coast.

Many of us have heard horror stories from fishermen in our districts regarding overfishing of tuna. With the advent of extended fisheries jurisdiction, most people felt that the problem of foreign fleets capturing valuable species off the U.S. coast had been resolved. However, when the legislation creating the U.S. Fisheries Conservation Zone was enacted, many of us in Congress believed that international management regions would afford the best means of managing and preserving highly migratory species of tunas. Time has show that this approach has simply not worked to the benefit of either the resource or the vast majority of American fishermen.

Both the United States and Japan are signatories to an agreement developed in 1974 by the International Commission for the Conservation of Atlantic Tuna (ICCAT) which states that all member nations will "limit fishing mortality to recent levels." This agreement was developed in response to scientific concern that the Atlantic bluefin tuna was in precipitous decline. At the time, Japan had an active bluefin fishery in the Mediterranean and the United States had an active handgear and small purse seine fishery in the western Atlantic within 200 miles of our shore. The Japanese since then have been politically pressured out of the Mediterranean and the eastern Atlantic and have moved their fishing effort herethe vast majority of it within 200 miles of our shore.

U.S. fishermen have complained that this is contrary to the spirit of the agreement. The Japanese contend there is one single stock of fish throughout the Atlantic and the Mediterranean and that, therefore, their shift in fishing effort is consistent with the agreement. Scientific evidence contradicts this. Records of over 15,000 bluefin tagged in the western Atlantic show that 3,000 were recovered from the western Atlantic and

only 24 recovered for the eastern At- the United States change its present lantic.

This indicated that while there is some slight degree of interchange between the eastern and western Atlantic the United States has the opportunity to effectively manage the tuna resource within the 200-mile limit. The western Atlantic stock apparently spawns within the 200 miles of our coast and spends the majority of its migratory life history in waters between Maine and Texas, primarily within 200 miles of our shoreline.

The Atlantic bluefin tuna is not the only issue here and the Japanese are not the sole villians. The same fate awaits other species of tunas. The present loophole will allow other nations to become active in our waters. It is our responsibility to correct inad-equacies in our legislation when they are discovered.

Another matter of equal importance is the incidental catch of other species such as swordfish, marlins, and sharks. Japanese vessels employ longline gear which consists of a "main" line extending 60 to 70 miles upon which are attached several thousand smaller branch lines, each containing baited hooks

These longlines capture all fish indiscriminately and while species other than tunas are technically protected and may not be retained, thousands are nevertheless caught and killed. The National Marine Fisheries Service estimates that 60 to 70 percent of all fish released are dead. Every fish so removed is one less available for U.S. harvest. Additionally, the presence of the foreign longline vessels makes many traditional fishing grounds inaccessible to U.S. vessels. During the past year, gear conflicts have in-creased steadily as frustrations have

I would like to take the opportunity to critique some of the arguments which have been set forth to support the existing system.

First, the State Department maintains that inclusion of tunas within the fisheries conservation zone [FCZ] will hamper our country's efforts to enter into fishery agreements with other nations. It escapes me how we consider ourselves in a position to negotiate any agreements involving tunas when we have abrogated the option of management within our own waters

Foreign countries do not now need any agreement to enter our FCZ in their quest for tunas. The big, distantwater tuna interests in the United States who, by the way, have historically stood by the State Department in opposition to such legislation as this, maintain that countries in Latin America and on the west coast of Africa will reciprocally shut off access to their waters for U.S. vessels should posture.

Well, the reality is that these countries have already gone to extended jurisdiction for tunas. And, this segment of our fishing industry is protected under the auspices of the American Fishermen's Protection Act. This provides compensation to U.S. vessels for fines, seized gear and vessels, and lost fishing time if they are arrested for breaking the fishing laws of foreign countries (if we do not reciprocally recognize their regulations).

Another common argument is that the Japanese will remove themselves from any international fishing agreement and simply fish a few miles outside our 200-mile limit without any conservation considerations. It seems to me that if the Japanese, being capable and proficient fishermen, were able to shift their efforts a few miles to the east and maintain a productive harvest while avoiding political problems, they would certainly have done

The third major objection raised is that we have been involved in negotiations dealing with voluntary fishing reductions by the Japanese. It has become increasingly clear that these voluntary reductions are in fact simply geographic shifts in fishing effort. As example, when the Japanese agreed to reduce by a couple of thoussand fish their bluefin catch in the Gulf of Mexico, they simply shifted into the Atlantic. Then they took the same tonnage in smaller fish, thereby causing an even greater impact upon the resource. In January 1981 alone, operating off the mid-Atlantic coast, the Japanese captured 11,000 medium size bluefin.

Today, we are being vastly outfished for Atlantic tunas, including yellowfin, big eye, and albacore, as well as bluefin. The conservation efforts of U.S. fishermen for bluefin have been negated. The foreign fish for other species has greatly expanded. The legislation I am proposing today is consistent with the draft Law of the Sea Convention and represents the hopes not only of my constituents from New Jersey but those of all Americans with an abiding interest in the perpetuation of our marine resources.

INTRODUCTION OF LEGISLA-TION PROVIDING FOR INTER-IM APPOINTMENTS OF U.S. AT-TORNEYS AND U.S. MARSHALS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. Rodino) is recognized for 5 minutes.

. Mr. RODINO. Mr. Speaker, today I am introducing legislation at the request of the Attorney General to provide for interim appointments of U.S. attorneys and U.S. marshals by the Attorney General.

Presently, interim appointments to fill vacancies occurring in a U.S. attorney's or marshal's position are made by the cognizant U.S. district court pursuant to 28 U.S.C. 546 and 565 until the President, with the advice and consent of the Senate, appoints a permanent U.S. attorney or marshal. Although U.S. attorneys and marshals are directly accountable to and act under the supervision and control of the Attorney General, the court is not obligated to consult with or even consider the views of the Attorney General in making an appointment. The proposed amendments are more consistent with the fundamental concept of separation of powers between the judicial and executive branches of Government.

Serious disruptions and delays of the business of the Federal courts which may result from a vacancy could be greatly alleviated. In the recent past some courts have appointed attorneys to fill vacancies from outside the U.S. attorney's office. These individuals have not been subjected to a Federal Bureau of Investigation background investigation prior to their appointments which poses serious problems for the Department because of the possible presence of classified and other extremely sensitive information within the U.S. attorney's and marshal's offices

The proposed legislation would not change or limit the present requirement that all presidential appointments be submitted to the U.S. Senate for confirmation.

The bill follows:

H.R. 4462

A bill to provide for interim designation of United States attorneys and United States marshals by the Attorney General

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 546 of title 28, United States Code, is amended to read as follows:

"SEC. 546. VACANCIES.

(a) In the case of a vacancy in the office of United States attorney, the Attorney General may designate a United States attorney to serve until the end of the next session of the Senate of the United States, or until the person nominated by the President as United States attorney, or appointed by the President as United States attorney under a recess appointment under article II, section 2, paragraph 3 of the Constitution of the United States, qualifies, whichever period is shorter.

(b) The Attorney General may not designate as United States attorney a person whose nomination by the President to that office was rejected by the Senate. If the Senate rejects the nomination of a person designated by the Attorney General to serve as United States attorney, the person shall cease to serve as United States attorney upon such rejection.'

SEC. 2. Section 565 of title 28, United States Code, is amended to read as follows: "SEC. 565. VACANCIES.

(a) In the case of a vacancy in the office of United States marshal, the Attorney General may designate a United States marshal to serve until the end of the next session of the Senate of the United States, or until the person nominated by the President as United States marshal, or appointed by the President as United States marshal under a recess appointment under article II, section 2, paragraph 3 of the Constitution of the United States, qualifies, whichever period is shorter.

(b) The Attorney General may not designate as United States marshal a person whose nomination by the President to that office was rejected by the Senate. If the Senate rejects the nomination of a person designated by the Attorney General to serve as United States marshal, the person shall cease to serve as United States marshal upon such rejection.".

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Tennessee (Mr. Jones) is recognized for 5 minutes.

• Mr. JONES of Tennessee. Mr. Speaker, I rise today to explain my absence from this Chamber on Wednesday, September 9. A longstanding senior member of my staff had a death in his immediate family and I returned to Tennessee to attend the funeral. I understand that I missed four record votes on that day and wish to state my position and how I would have voted had I attended Wednesday's session.

On the question of the amendment by my colleague Mr. Mottl, rollcall vote No. 191, I would have voted "aye." On the question of the amendment by my colleague Mr. Walker, rollcall No. 192, I would have voted "aye." On the amendment by my colleague Mr. Sensenbrenner, I would have voted "aye." On passage of the bill, H.R. 4169, I would have voted "yea."

Thank you.

IN OPPOSITION OF WEAPONS SALE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Colorado (Mr. Wirth) is recognized for 5 minutes.

• Mr. WIRTH. Mr. Speaker, I again rise to voice my opposition to the Reagan adminstration's proposal for the largest weapons sale in U.S. history—the transfer of AWACS aircraft and F-15 enhancements to Saudi Arabia.

In 1978, I spoke on the floor against the sale of F-15's to Saudi Arabia because I believed that sale would have seriously jeopardized the delicate military balance in the Mideast, and would have undermined our commitment to a peaceful settlement of the hostilities there. The proposal to sell 60 of our most advanced fighter/bombers to Saudi Arabia as part of a package deal of sophisticated armaments touched

off a long and intense debate in Congress.

In order to mitigate concern that the F-15's would be used to threaten Israel, the Secretary of Defense and the State Department assured Congress that these aircraft were for defensive purposes only and would not constitute a threat to Israel. Furthermore, we were assured that these planes would not be fitted with the sophisticated add-on equipment the F-15 is designed to carry.

Now, however, the Reagan administration is proposing to sell the Government of Saudi Arabia the same equipment that in 1978 we were assured would not be provided. In addition, the administration is pushing for the sale of AWACS, which would give the Saudis the ominous capability to monitor Israeli activity from airspace over Saudi Arabia.

Mr. Speaker, the AWACS sale endangers American interests in the Mideast by ignoring the instability of the Saudi regime and by risking the secrecy of the weapons technology on which AWACS is based. Further, it sends the wrong political signals by rewarding Saudi Arabia's outright rejection of the Camp David accords.

Congress has the power and the right to stop this dangerous weapons transfer. I have joined many of my colleagues in cosponsoring the concurrent resolution of disapproval introduced by Messrs. Long and Lent. I urge my fellow Members to add their names to the list of those opposing the AWACS sale.

Rather than providing a credible deterrent in the Mideast, the supply of additional armaments to Saudi Arabia threatens only Israel. During this critical period in the Camp David peace process, it cannot be in our best interests to escalate regional tensions by arming the Saudi regime. As it is our responsibility to insure peaceful solutions in the Mideast, I call on my colleagues to stand firm in opposition to the administration's proposal.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. Chappell (at the request of Mr. Bennett) for today, to attend a funeral.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. Wortley) to revise and extend their remarks and include extraneous material:)

Mr. Dannemeyer, for 30 minutes, on September 10.

Mr. FIELDS, for 5 minutes, today.

(The following Members (at the request of Mr. Roemer) to revise and extend their remarks and include extraneous material:)

Mr. Annunzio, for 5 minutes, today.

Mr. Gonzalez, for 15 minutes, today.

Mr. NEAL, for 5 minutes, today. Mr. Conyers, for 60 minutes, today.

Mr. Addabbo, for 15 minutes, today. Mr. Alexander, for 30 minutes, today.

Mr. Frank, for 10 minutes, today.

Mr. Howard, for 5 minutes, today. Mr. Rodino, for 5 minutes, today.

Mr. Jones of Tennessee, for 5 minutes, today.

Mr. Wirth, for 5 minutes, today.

Mrs. Collins of Illinois, for 60 minutes, on September 18.

Mr. Skelton, for 60 minutes, on October 1.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Ms. Ferraro, during general debate on H.R. 4209 in the Committee of the Whole today.

Mr. BIAGGI, immediately prior to the vote on the Wilson amendment to H.R. 4209 in the Committee of the Whole today.

Mr. ST GERMAIN, to revise and extend his remarks in the RECORD and to include therein extraneous material, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost \$1.440.

(The following Members (at the request of Mr. Wortley and to include extraneous matter:)

Mrs. Snowe in three instances.

Mr. ERLENBORN.

Mr. DANNEMEYER.

Mr. MITCHELL of New York.

Mr. Ashbrook in two instances.

Mrs. HECKLER.

Mr. CONABLE.

Mr. Sensenbrenner.

Mr. CONTE.

Mr. WHITEHURST.

Mr. DANIEL B. CRANE.

Mr. LENT.

Mr. Frenzel in five instances.

Mr. Lowery of California.

Mr. BROOMFIELD.

Mr. GINGRICH.

Mr. MICHEL.

Mr. PARRIS.

(The following Members (at the request of Mr. ROEMER) and to include extraneous matter:)

Mr. PEASE.

Mr. CLAY.

Mr. Aspin.

Mr. GARCIA. Mr. SWIFT. Mr. PEYSER.

Mr. FRANK.

Mr. Simon in two instances.

Mr. DE LA GARZA in 10 instances.

Mr. O'NEILL.

Mr. Hawkins in three instances.

Mr. YATRON in three instances.

Mr. MURTHA.

Mr. Vento in two instances.

Mr. ALBOSTA.

Mr. EDWARDS of California.

Mr. RICHMOND.

Mr. SHELBY.

Mr. WILLIAMS of Montana.

Mr. BRODHEAD.

Mr. Markey.

Mrs. Chisholm.

Mr. MATSUI.

Mr. RANGEL.

Mr. BEDELL.

Mr. HOLLAND in two instances.

Mr. SAVAGE.

ADJOURNMENT

Mr. CONYERS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 18 minutes p.m.) the House adjourned until tomorrow, Friday, September 11, 1981, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 or rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

[Omitted from the Record of Sept. 9, 1981]

1955. A letter from the Secretary of Agriculture, transmitting notice of a further delay until September 30 in the submission of a report on the study of the potential for expansion of U.S. agricultural exports and the use of agricultural exports in obtaining natural resources or other commodities and products needed by the United States, required by section 210(a) of Public Law 96-494; to the Committee on Agriculture.

1956. A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a cumulative report on rescissions and deferrals of budget authority as of August 1, 1981, pursuant to section 1014(e) of Public Law 93-344 (H. Doc. No. 97-85); to the Committee on Appropriations and ordered to be printed.

1957. A letter from the Acting Comptroller General of the United States, transmitting his review of the proposed rescission of budget authority, 10 new deferrals, and revisions to 4 previously reported deferrals contained in the message from the President dated July 16, 1981 (H. Doc. No. 97-64), pursuant to section 1014 (b) and (c) of Public Law 93-344 (H. Doc. No. 97-86); to the Committee on Appropriations and ordered to be

1958. A letter from the Acting General Counsel, U.S. General Accounting Office, transmitting report on the status of budget authority that was proposed, but rejected, for rescission, contained in the message from the President dated June 8, 1981; to the Committee on Appropriations.

1959. A letter from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting notice of various transfers of funds appropriated to the Department of Defense, pursuant to section 734 of Public Law 96-527; to the Committee on Appropriations.

1960. A letter from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to repeal section 5(b) of the Subversive Activities Control Act of 1950, as amended (50 U.S.C. 784(b)); to the Committee on Armed Services.

1961. A letter from the Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting a draft of proposed legislation to amend section 4308(a)(5) of title 10, United States Code, to eliminate the requirement that an individual must be a member of the National Rifle Association in order to be eligible to purchase arms, ammunition, targets, and other supplies and appliances necessary for target practice sold pursuant to that section; to the Committee on Armed Services.

1962. A letter from the Assistant Secretary of the Army (Manpower and Reserve Affairs), transmitting a draft of proposed legislation to amend title 10, United States Code, to facilitate the transfer of members of the Armed Forces to and from the temporary disability retired list, and for other purposes; to the Committee on Armed Services

1963. A letter from the Assistant Secretary of the Army (Manpower and Reserve Affairs), transmitting a draft of proposed legislation to amend title 32, United States Code, to extend the period of time during which all elements of a National Guard unit must complete a training assembly; to the Committee on Armed Services.

1964. A letter from the Acting Assistant Secretary of Defense (Comptroller), transmitting various selected acquisition reports and SAR summary tables for the quarter ended June 30, 1981, pursuant to section 811(a) of Public Law 94-106; to the Committee on Armed Services.

1965. A letter from the Deputy Assistant Secretary of Defense (Administration); transmitting a report on negotiated contracts for experimental, developmental, test, or research work, or for industrial mobilization in the interest of the national defense, covering the period October 1980 through March 1981, pursuant to 10 U.S.C. 2304(e); to the Committee on Armed Services.

1966. A letter from the Deputy Chief of Naval Material (Contracts and Business Management); transmitting a report covering the 8 months ended May 31, 1981, on Navy research and development contracts of \$50,000 and over, pursuant to 10 U.S.C. 2357; to the Committee on Armed Services.

1967. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing); transmitting notice of the location, nature, and estimated cost of various construction projects proposed to be undertaken by the Air National Guard, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

1968. A letter from the Deputy Assistant Secretary of Defense (Facilities, Environment, and Economic Adjustment), transmitting notice of the location, nature, and estimated cost of various construction projects proposed to be undertaken by the Air National Guard, pursuant 10 U.S.C. 2233a(1); to the Committee on Armed Services.

1969. A letter from the Assistant Secretary of the Navy (Manpower, Reserve Affairs and Logistics), transmitting summaries of revenues derived from recovered materi-

als for fiscal year 1980, pursuant to section 612 of Public Law 93-552; to the Committee on Armed Services.

1970. A letter from the Assistant Secretary of the Air Force (Research, Development and Logistics), transmitting notice of the proposed conversion to contractor performance of the commissary shelf-stocking and custodial services function at Dyess Air Force Base, Tex., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1971. A letter from the Acting Assistant Secretary of the Air Force (Research, Development and Logistics), transmitting notice of the proposed conversion to contractor performance of the Dare County bomb range operations function at Seymour Johnson Air Force Base, N.C., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1972. A letter from the Assistant Secretary of the Air Force (Research, Development and Logistics), transmitting notice of the proposed conversion to contractor performance of the family housing maintenance function at Vandenberg Air Force Base, Calif., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

1973. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense equipment to Norway (Transmittal No. 81-82), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

1974. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Force's proposed sale of certain defense equipment and services to Australia (Transmittal No. 81-86), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

1975. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Force's proposed sale of certain defense equipment and services to the Republic of Germany (Transmittal No. 81-88), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

1976. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Navy's proposed sales of certain defense equipment and services to Belgium, Denmark, Germany, Norway, and the Netherlands (Transmittal No. 81-95), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

1977. A letter from the Director, Federal Emergency Management Agency, transmitting a report that the agency made no property acquisitions of emergency supplies and equipment during the quarter ended June 30, 1981, pursuant to section 201(h) of the Federal Civil Defense Act of 1950; to the Committee on Armed Services.

1978. A letter from the Chairman, National Advisory Council on International Monetary and Financial Policies, transmitting the annual report of the Council for fiscal year 1980; to the Committee on Banking, Finance and Urban Affairs.

1979. A letter from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to amend section 79 of the Defense Production Act of 1950, as amended, to authorize the grant of exemptions to the cost accounting standards by the Director of the Office of Man-

agement and Budget; to the Committee on Banking, Finance and Urban Affairs.

1980. A letter from the Deputy Secretary of the Treasury, transmitting a draft of proposed legislation to authorize the back side of U.S. paper money of the denomination of \$1 to be printed by a method other than the intaglio process; to the Committee on Banking, Finance and Urban Affairs.

1981. A letter from the Assistant Secretary of the Treasury for Legislative Affairs, transmitting the annual report on progress in promoting the development and use of capital saving technologies in the activities of certain international financial institutions, pursuant to section 801(b) of Public Law 95-118; to the Committee on Banking, Finance and Urban Affairs.

1982. A letter from the Assistant Secretary of the Treasury for Legislative Affairs, and the Acting Deputy Director of the International Development Cooperation Agency, transmitting a report on the role of the multilateral development banks in increasing food production and improving nutrition in developing countries, pursuant to section 901(b) of Public Law 95-118; to the Committee on Banking, Finance and Urban Affairs.

1983. A letter from the Secretary of Agriculture, transmitting a report on the study of the problems of remote claims, pursuant to section 509 of Public Law 95-557; to the Committee on Banking, Finance and Urban Affairs.

1984. A letter from the Secretary of Housing and Urban Development, transmitting the second annual report on the rehabilitation loan program authorized by section 312 of the Housing Act of 1964, pursuant to section 312(k) of the act, as amended; to the Committee on Banking, Finance and Urban Affairs.

1985. A letter from the Secretary of Housing and Urban Development, transmitting a copy of "Rental Housing: Condition and Outlook," pursuant to the 1980 housing and community development conference report; to the Committee on Banking, Finance and Urban Affairs.

1986. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a statement describing a proposed transaction with Transbrasil S.A. Linhas Aereas (Brazil) exceeding \$100 million, pursuant to section 2(b)(3(i) of the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Finance and Urban Affairs.

1987. A letter from the President and

1987. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a statement describing a proposed transaction with Air Canada exceeding \$100 million, pursuant to section 2(b)(3)(i) of the Export-Import Bank Act of 1945, as amended; to the Committee on Banking, Finance and Urban Affairs.

1988. A letter from the President and Chairman, Export-Import Bank of the United States, transmitting a statement describing a proposed additional transaction involving nuclear facilities with Fuerzas Electricas de Cataluna, S.A., Empresa Nacional Hidroelectrica del Ribagorzana, S.A., Hidroelectrica de Cataluna, S.A., and Hidroelectrica del Segre, S.A. SENATE—Thursday, September 10, 1981

(Legislative day of Wednesday, September 9, 1981)

The Senate met at 9:45 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray a prayer of praise and gratitude in the words of the psalmist: "Praise the Lord!

Praise the Lord, O my soul!

I will praise the Lord as long as I live: I will sing praises to my God while I have being.

"Put not your trust in princes, in a son of man, in whom there is no help. When his breath departs he returns to his Earth; on that very day his

plans perish.

"Happy is he whose help is the God of Jacob, whose hope is in the Lord his God.

Who made Heaven and Earth, the sea, and all that is in them;

Who keeps faith forever; who executes justice for the oppressed; who gives food to the hungry.

"The Lord sets the prisoners free; the Lord opens the eyes of the blind.

The Lord lifts up those who are bowed down; the Lord loves the right-

The Lord watches over the sojourners, He upholds the widow and the fatherless; but the way of the wicked He brings to ruin.

"The Lord will reign forever, thy God,

O Zion, to all generations.

Praise the Lord!"—Psalms 146 (RSV).

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

THE JOURNAL

Mr. STEVENS. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate to date be approved.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR THE TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that, following the time allocated to the two leaders under the standing order, there be a period for the transaction of routine morning business not to extend beyond the hour of 10:30 this morning, during which time and combine it with the 15-minute order.

Senators may speak therein for not to exceed 3 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXODUS OF SENIOR LEVEL EXECU-TIVES FROM FEDERAL EMPLOY-MENT

NOTICE OF HEARING

Mr. STEVENS. Mr. President, I have announced this morning that the Senate Governmental Affairs Subcommittee on Civil Service, Post Office and General Services, of which I am chairman, will hold a hearing on Monday morning at 9:30 a.m. concerning the exodus of senior level executives from the Federal Government's employment.

The reason I am holding this hearing is that it seems obvious to me that we have experienced a very massive exodus of the most experienced and senior Government managers in recent years. In my opinion, the pay cap on senior executives has been the major cause of this exodus, and this will be the focus of much of the testimony.

The so-called Government brain drain has brought about a loss of expertise at the senior management level that now reaches a crisis situation.

I have asked many Federal agencies to detail the experiences of their own agencies in the area of the exodus of senior civil servants. Every agency that has responded has indicated that it was having a serious problem recruiting and retaining senior executives.

We expect to have testimony from the Departments of Treasury and Defense, the FBI, and the Office of Personnel Management. I have also requested Congressman Vic Fazio of the Federal Service Task Force, Congressman Edward DERWINSKI of the House of Representatives Committee on Post Office and Civil Service, and representatives of the Senior Executive Association, and of the AFL-CIO government employees organizations to appear at this hearing.

It is to me a most important hearing. I mention it here because I hope the Members of the Senate will be aware that we are going to document the impact of the pay cap on the management of our Federal Government, and I will be bringing that issue to the floor sometime during this Congress.

Mr. President, I reserve the remainder of our time.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER (Mr. MUR-KOWSKI). The Senator from West Virginia is recognized.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I may reserve my time under the standing order The PRESIDING OFFICER. Without

objection, it is so ordered. Mr. STEVENS. Mr. President, I ask unanimous consent that the remainder of the leadership time on this side be reserved until following the special orders that have been entered today.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a period for morning business.

COMMODORE JOHN BARRY

Mr. MATHIAS. Mr. President, Senate Joint Resolution 87, recently enacted by Congress, designates September 13, 1981, as "Commodore John Barry Day." John Barry was born on September 13, 1745, and this is a fitting tribute to the father of the U.S. Navy whose exploits during the Revolutionary War and thereafter made him a national hero.

As we honor Commodore Barry, his nautical adventures and his bravery will be the subject of countless speeches. His contributions to the U.S. Navy will be reviewed as well and well they should be. But there is a less-well-known aspect of Commodore Barry's life that also deserves attention and that is his "devotion to the purpose of enabling America to live her own life."

Those words were used by President Woodrow Wilson in a speech delivered on May 16, 1914, at the unveiling in Lafayette Square of the statue to the memory of John Barry, commissioned by the Congress in 1906. On that memorable occasion, Woodrow Wilson examined the nature of the patriot, as exemplified by Commodore Barry, and, in the process, he illuminated the subject of patriotism for Americans in all times and all circumstances.

I can think of no more appropriate, timely, or fitting tribute to Commodore Barry this day than to submit the text of President Wilson's tribute for the RECORD. I ask unanimous consent that his address, entitled "Men Who Think First of Themselves Not True Americans," be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

"MEN WHO THINK FIRST OF THEMSELVES NOT TRUE AMERICANS"

(By Woodrow Wilson)

(Address delivered at the unveiling of the statue to the memory of Commodore John Barry, Washington, May 16, 1914. From the White House files.)

I esteem it a privilege to be present on this interesting occasion, and I am very much tempted to anticipate some part of

what the orators of the day will say about the character of the great man whose memory we celebrate. If I were to attempt to make an historical address, I might, however, be led too far afield. I am going to take the liberty, therefore, of drawing a few inferences from the significance of this occasion.

I think that we can never be present at ceremony of this kind, which carries our thought back to the great Revolution, by means of which our Government was set up, without feeling that it is an occasion of reminder, of renewal, of refreshment, when we turn our thoughts again to the great issues which were presented to the little Nation which then asserted its independence to the world; to which it spoke both in eloquent representations of its cause and in the sound of arms, and ask ourselves what it was that these men fought for. No one can turn to the career of Commodore Barry without feeling a touch of the enthusiasm with which he devoted an originating mind to the great cause which he intended to serve, and it behooves us, living in this age when no man can question the power of the Na-tion, when no man would dare to doubt its right and its determination to act for itself, to ask what it was that filled the hearts of these men when they set the Nation up.

For patriotism, ladies and gentlemen, is in my mind not merely a sentiment. There is a certain effervescence, I suppose, which ought to be permitted to those who allow their hearts to speak in the celebration of the glory and majesty of their country, but the country can have no glory and no majesty unless there be a deep principle and convic-tion back of the enthusiasm. Patriotism is a principle, not a mere sentiment. No man can be a true patriot who does not feel himself shot through and through with a deep ardor for what his country stands for, what its existence means, what its purpose is declared to be in its history and in its policy. I recall those solemn lines of the poet Tennyson in which he tries to give voice to his conception of what it is that stirs within a nation: 'Some sense of duty, something of a faith, some reverence for the laws ourselves have made, some patient force to change them when we will, some civic manhood firm against the crowd"; steadfastness, clear-ness of purpose, courage, persistency, and that uprightness which comes from the clear thinking of men who wish to serve not themselves but their fellow men

What does the United States stand for, then, that our hearts should be stirred by the memory of the men who set her Constitution up? John Barry fought, like every other man in the Revolution, in order that America might be free to make her own life without interruption or disturbance from any other quarter. You can sum the whole thing up in that, that America had a right to her own self-determined life; and what are our corollaries from that? You do not have to go back to stir your thoughts again with the issues of the Revolution. Some of the issues of the Revolution were not the cause of it, but merely the occasion for it. There are just as vital things stirring now that concern the existence of the Nation as were stirring then. and every man who worthily stands in this presence should examine himself and see whether he has the full conception of what it means that America should live her own life. Washington saw it when he wrote his farewell address. It was not merely because of passing and transient circumstances that Washington said that we must keep free from entangling alliances. It was because he saw that no country had yet set its face in the same direction in which America had set her face. We can not form alliances with those who are not going our way; and in our might and majesty and in the confidence and definiteness of our own purpose we need not and we should not form alliances with any nation

in the world. Those who are right, those who study their consciences in determining their policies, those who hold their honor higher than their advantage, do not need alliances. You need alliances when you are not strong, and you are weak only when you are not true to yourself. You are weak only when you are the wrong; you are weak only when you are afraid to do the right; you are weak only when you doubt your cause and the majesty of a nation's might asserted.

There is another corollary. John Barry was an Irishman, but his heart crossed the Atlantic with him. He did not leave it in Ireland. And the test of all of us-for all of us had our origins on the other side of the sea—is whether we will assist in enabling America to live her separate and independent life, retaining our ancient affections, indeed, but determining everything that we do by the interests that exist on this side of the sea. Some Americans need hyphens in their names, because only part of them has come over; but when the whole man has come over, heart and thought and all, the hyphen drops of its own weight out of his name. This man was not an Irish-American: he was an Irishman who became an American. I venture to say if he voted he voted with regard to the questions as they looked on this side of the water and not as they affected the other side; and that is my infallible test of a genuine American, that when he votes or when he acts or when he fights his heart and his thought are centered nowhere but in the emotions and the purposes and the policies of the United States.

This man illustrates for me all the splendid strength which we brought into this country by the magnet of freedom. Men have been drawn to this country by the same thing that has made us love this countryby the opportunity to live their own lives and to think their own thoughts and to let their whole natures expand with the expansion of a free and mighty Nation. We have brought out of the stocks of all the world all the best impulses and have appropriated them and Americanized them and translated them into the glory and majesty of a great country.

So, ladies and gentlemen, when we go out from this presence we ought to take this idea with us that we, too, are devoted to the purpose of enabling America to live her own life, to be the justest, the most progressive, the most honorable, the most enlightened Nation in the world. Any man that touches our honor is our enemy. Any man who stands in the way of the kind of progress which makes for human freedom can not call himself our friend. Any man who does not feel behind him the whole push and rush and compulsion that filled men's hearts in the time of the Revolution is no American. No man who thinks first of himself and afterwards of his country can call himself an American. America must be enriched by us. We must not live upon her; she must live by means of us.

I, for one, come to this shrine to renew the impulses of American democracy. I would be ashamed of myself if I went away from this place without realizing again that every bit of selfishness must be purged from our policy, that every bit of self-seeking must be purged from our individual consciences, and that we must be great, if we would be great at all, in the light and illumination of the example of men who gave everything that they were and everything that they had to the glory and honor of America.

PETE DOMENICI

Mr. DOLE. Mr. President, once again we will be looking at the Federal budget for fiscal year 1982 and the years to follow. At times it may seem as though the budget problem will never go away, but this is no time to shy away from difficulties. We should not forget that more progress has been made in getting the budget under control this year than in any year since the budget process was instituted.

That we have come so far is, of course, largely due to the conviction of the President of the United States that Federal spending must be restrained. But our success in dealing with the budget could not possibly have been achieved without the diligent, evenhanded, and persistent efforts of the distinguished chairman of the Budget Committee, Senator Pete Domenici of New Mexico.

Mr. President, Pete Domenici has proved to be an outstanding chairman of the Budget Committee and a most persuasive advocate for the budget reforms set forth by the President. His achievements are no accident: He has prepared for them by years of hard work and by extraordinary concentration on the tasks at hand. Those of us who knew and admired Pete Domenici when our party was in the minority are not surprised at his success in a leadership role. I believe the Members on both sides of the aisle appreciate the fair but firm manner in which Chairman Domenici guided the budget debate this year. It is a task he will have to assume again this fall, and I look forward to working with him to finish work on the 1982 budget.

It is apparent that admiration for PETE DOMENICI is not confined to his colleagues in the Senate. In the Washington Post for Wednesday, September 9, Helen Dewar reported on Chairman Domenici's rise to prominence, and I believe her report makes clear why Senator DOMENICI has so many friends in and out of the Senate. I ask unanimous consent that Ms. Dewar's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WITH BUDGET VICTORIES, IMMIGRANTS' SON BECOMES A SENATE STAR

(By Helen Dewar)

ALBUQUERQUE, N.M.—A sandy-haired Italian from a state where ethnic politics is spoken with a Hispanic accent, a Sun Belt conservative with a penchant for rumpled attire, bland oratory and conciliatory politics, he did such strange things as saying good morning to elevator operators when he arrived in Washington nine years ago.

Back then, Pete V. Domenici's main claim to fame was that he was the first Republican elected to the Senate from New Mexico in 42 years. He came with a solid record as a progressive, activist mayor of Albuquerque. But he was basically a dim flicker in the galaxy of Senate "stars," an ordinary human being among those who tend to consider themselves extraordinary.
Domenici (pronounced Doe-MEN-a-chee)

still finds his name regularly mispronounced (Doe-men-EE-chee), and his mother was so moved by his less-than-elegant appearance on television earlier this year that she ar-ranged for him to get a new suit. But, by virtue of once-underestimated or perhaps late-blooming talents, the 49-year-

old New Mexican has emerged as one of the most prominent and influential members of the 97th Congress.

"I've never seen a man grow as much as Domenici has," Senate Majority Leader Howard H. Baker, Jr. (R-Tenn.) volunteered to a reporter last month after Baker, teamed with Domenici in his role as chairman of the Senate Budget Committee, pushed President Reagan's nuge package of spending cuts over its final legislative hurdle.

By the end of the five-month budget-cutting ordeal, Domenici knew so much about the government and its financing that "if you touched him, he'd drip," said Baker. Praising Domenici's "extraordinary restraint, skill and understanding," Baker added, "I cannot tell you how much I admire that

Domenici's leap to prominence stemmed from the GOP's unexpected capture of the Senate in the 1980 elections, which, with the retirement of Henry Bellmon of Oklahoma as ranking minority member, catapulted Domenici to the chairmanship of the Budget Committee. With the House still in Democratic hands. Domenici's position made him point man for President Reagan's budget-cutting crusade.

Domenici was among the first-perhaps the first—to suggest that Congress use the legislative shortcut of "reconciliation" for packaging and expediting Reagan's spending cuts. Jumping the gun on the House, his committee acted within days of Reagan's budget proposal in mid-March to produce a set of spending-cut instructions that was almost tailor-made for Reagan's own program.

Democrats complained of the "forcedmarch" nature of the committee's deliberations and some committee Republicans, led by Sen. William L. Armstrong (Colo.), staged a brief revolt in an attempt to extract firmer guarantees of cuts sufficient to produce a balanced budget by 1984. But, while most public attention focused on Reagan's series of coups in the nominally Democratic House, the final product of \$130.6 billion in cuts over the next three years bore a strong resemblance to what Domenici, reflecting Reagan's priorities, initially recommended.

"If it bears the imprint of anyone up here, it's Pete's," said Sen. Ernest F. Hollings (S.C.), ranking Democrat on the Budget Committee, who worked closely, although often in disagreement, with Domenici during the whole wrenching process.

True-believers among supply-side economists suspected Domenici of less than total commitment to their theories, and he crossed swords on more than one occasion with Budget Director David A. Stockman, including the time that Stockman tried unsuccessfully to get the Senate to swallow the House version of Reagan's budget cuts out of fear that the whole thing could unravel in a House-Senate conference.

But Domenici comes across as basically a Republican loyalist, and those who fault him generally do so on grounds that he doesn't stick his neck out far enough—a complaint heard from both right and left as they shoot at the administration from opposite ideological perspectives.

"He's a nice guy, and that's one of his problems," said a conservative critic, who confesses, however, to liking him.

A 49-year-old second-generation American, father of eight, who works hard and is proud of it. Domenici is a solid if unpretentious achiever who inspires rather more affection and confidence than reverence and awe.

He was born Pietro Vichi Domenici, one of five children of immigrants from impoverished farming country in northern Italy. Nicknamed "Bocci" because he reminded his father of an Italian bowling ball, he and his four sisters grew up in a close family, the ties of which still bind although both parents

His father, who had come to Albuquerque as a 14-year-old with an uncle who had already established a grocery store there, gradually built up a flourishing wholesale grocery business that extended 100 miles around Albuquerque. The younger Domenici grew up among working-class Hispanic families, helping his father with deliveries and other chores, and winding up with a degree from the University of New Mexico that produced a job teaching math in a local high school. He was hired because "I was a super baseball player, and they wanted a free baseball coach," he recalls.

A friend talked him into the University of Denver law school and then, after eight years of practice in Albuquerque, friends talked him into running for the city commission, which led to the job of chairman,

tantamount to mayor.

"I was a real complainer about govern-ment, not much different than I am now," says Domenici. "They told me to run or quit bitching. I was an easy push, even though I had six of my eight children by then and should have known better."

As mayor in the late 1960s, he spearheaded revival of the city's downtown core and, as he puts it, "took the government to the barrios," by setting up shop periodically in churches and storefronts in Hispanic neighborhoods. "We even invented CETA," he notes with irony, referring to the Comprehensive Education and Training Act program that was a major target of this year's budget cuts. The Albuquerque program, Domenici says, was a prototype of the national effort.

His administration was reformist, marked Domenici and his friends claim, by tenacious efforts to find common ground among com-munity and business leaders. "He's always had an ability to look at a problem and solve it better than anyone "'ve ever known," said Harry Kinney, a former commission chairman who is running for mayor this year.

Again pushed by friends, he tried for the governorship in 1970. His father had been a Republican, his mother a Democrat, and he a registered Republican although his political career had been based in nonpar-tisan politics. Although he lost, he activated a coterie of friends, many from the state's small Italian-American community, into a loyal Domenici boosters club that crisscrosses old party lines in some cases.

In 1972, Domenici again tried for state-wide office and, riding both President Nixon's coattails and his own popularity as mayor a few years before, won the Senate seat that was opened through the retirement of Clinton P. Anderson. He won reelection over a popular challenger in 1978.

As a onetime local government activist, as the child of immigrants who prospered in their new home by way of hard work and an entrepreneurial spirit, Domenici is less ideological than some of his New Right col-leagues from the Western mountains and deserts. He would continue some social welfare programs at the local level, for instance. and wants to see private industry move more aggressively into creating jobs for the poor and minorities.

Domenici's brand of pragmatic conserva-tism even allows for a few doubts now and then, coupled with an occasional celebration

of the wonders of the federal purse.

One such celebration came as Domenici, returning home for the August congressional recess after his budget-cutting triumph, flew up to the mountain town of Raton in northeastern New Mexico. As the plane bearing Domenici, a couple of aides and a reporter touched down on the landing strip, a dozen of the town's leading citizens turned out to welcome him. "Senator, you're a real hero; you're super-duper," exclaimed Bob Gurule,

Raton's city manager, with admiring nods from everyone else.

But the folks of Raton had not turned out the tarmac to toast austerity. Instead, with a symbolic glass of water, as precious as fine wine in these parched parts, they had come to thank their senior senator for haul-ing home a \$6 million loan from the Farmers Home Administration to help bring a new source of water to the thirsty town.

Later, as the plane headed back toward Albuquerque, Domenici brushed lightly, and uncomfortably, over the irony. "Sure, but I never said the federal government should get out of everything. It's just got to be a lot more selective, and if there's only so much money to go around New Mexico, this is where it should go," said Domenici, noting that the whole project would have fallen apart without a timely federal loan.

At a backyard barbeque in the Hispanic community, where he gets a friendly reception if not always a lot of votes, Domenici extolled the virtues of the budget cuts but fretted over whether business and state and local government would pick up the slack.

"Local government said it could do it better, and now we'll see whether they will," he told the somewhat skeptical crowd. Moreover. a way has to be found to assure that an expected surge of new private-sector jobs in the Albuquerque area gets channeled into lower-income Hispanic neighborhoods. "We haven't found a way yet, but we'll be trying," he added. "It just has to be done," he commented later, wearing a worried frown.

The crowd at the barbeque, arranged for Domenici by an His-anic friend who noted with a grin that most of the people there were Democrats, included officials of many of the agencies whose budgets are being cut. Most spoke well of Domenici, if not of everything he's been doing.

"He's been very helpful to us, very supportive," said Eugene Schiess, executive director the Albuquerque area's anti-poverty agency, noting that Domenici helped get a one-year funding reprieve for the community action program. "And if he doesn't agree with you, he's the first to tell you."

On another occasion, as Domenici was driving through downtown Albuquerque, an aide told him that her son was all for Reagan but worried about whether the president's budget cuts would hurt the poor.

So, conceded Domenici were some of his children. "But they believe their father that this won't happen," he said, adding with a faint smile, "I think he's right; I hope he's right."

HIGH INTEREST RATES

Mr. BOREN. Mr. President, the August recess has been a most revealing one to the Members of the Congress in general and to me in particular. As many of my colleagues did, I spent a good deal of the recess talking to the people of my State. Those discussions included a cross section of the people of Oklahoma and it reaffirmed my belief that the most pressing problem facing this country today is high interest rates.

The August recess reinforced my belief that the economic condition created by continuing high interest rates are every bit as bad as I said they were prior to the recess. I have found on my return to Washington, however, that the President and his advisers and a good many of my colleagues have at long last recognized the damage being done to the economic recovery program by these high interest rates.

One only has to look at the morning paper and listen to this morning's newscast to hear the cries of alarm. The House minority leader, ROBERT MICHEL, saying that something has to be done soon, or the Congress may start moving toward credit controls, greater regulation of financial institutions and a reorganization of the Federal Reserve System.

The distinguished majority leader said yesterday that something must be done to relieve the high interest rate burden not months from now, or even weeks from now, but in days from now.

Mr. President, I wholeheartedly agree and I renew now the call I made before the August recess began, that the President and his advisers should sit down with the Federal Reserve Board, and other financial leaders around the country and impress upon them the need for voluntary restraint and the need to bring interest rates down.

If the President does not receive voluntary cooperation and immediate action, the results of which should be seen by the general public immediately, then he should prepare an emergency plan to reduce interest rates and submit that plan to Congress for approval.

Mr. President, during my daily speeches on this subject prior to the recess, I said again and again that all of the budget cutting and all of the tax cutting that we were doing, was no good and would have no effect as long as interest rates remain at record high levels. I said that the greatest danger to the Reagan economic program was high interest rates and that those interest rates would sink the program before it ever began.

Time has proven those statements to be correct and this same alarm is now being sounded throughout the administration to the point that one television newscast this morning labeled high interest rates as public enemy No. 1.

It is being said that Wall Street has no confidence that the President can reduce the deficit and meet his target of a balanced budget by 1984. This lack of confidence is cited as the main reason for the continuation of high interest rates.

Mr. President, I believe that additional spending cuts will be made and must be made, and I will support them. The deficit must be reduced and a balanced budget must be achieved.

Reducing deficits and balancing the budget are long-term solutions that can and will be pursued, but as I have said many times before, a long-term solution is no good if the patient dies in the emergency room—and the U.S. economy is now in the emergency room. We must have immediate action, we must have a reduction in interest rates now—as the majority leader said, in a matter of days, not weeks or months or years.

AMERICA'S NEW FOREIGN POLICY

Mr. PELL. Mr. President, Frank Church, our former colleague and chairman of the Foreign Relations Committee, recently expressed his views about the Reagan administration's approach to foreign policy in the New York Times magazine of August 23, 1981. He argues that the administration's rigid anti-Soviet ideology puts it on a collision course with political reality. He points out that the administration's failure to distinguish between idealistic Soviet goals and actual capabilities causes a rift between the United States and other nations, including our allies in Europe.

He clearly delineates the spiraling difficulties facing the United States if we once again seek to become the gendarme of the world, protecting nations that do not feel the need for protection. He notes that the administration is ready to protect vital American interests anywhere in the world. Yet, in his view, the administration has no clear idea of what those vital interests are. Frank Church has written a succinct and thoughful piece, and I recommend it to my colleagues. Mr. President, I ask unanimous consent that full text of Senator Church's article be printed in the Record.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AMERICA'S NEW FOREIGN POLICY

(By Frank Church)

At his first White House press conference, Ronald Reagan lambasted the Soviet Union. He said the Russian leadership reserved "the right to commit any crime, to lie, to cheat," in order to attain their goal of a one-world Communist state. His words, in one sense, were right on target. He understood that most Americans would welcome his indictment as reassurance that their tough-talking new President had no intention of letting the Russians push him around.

Like every other down-home American, I also distrust the Soviet Union. I too am convinced that members of the Politburo, meeting at the Kremlin, dream of a Communist world held firmly in their grasp. But a sensible American policy cannot rest upon Russian dreams; it must rest, instead, upon the real world in which we live. The first six months of the Reagan Administration have been marked by a collision between this real world and the single-minded anti-Soviet ideology of the President and his principal advisers.

The Administration's view of the Soviet Union falls to distinguish between the Russian leaders' more fanciful aspirations and their actual capabilities. The attempt to translate this flawed analysis into foreign policy puts the United States at odds with a diverse collection of stubbornly independent nations, including our principal European allies, that are far les mesmerized by the Kremlin than our present White House team.

In El Salvador, for example, the conflict between armed guerrillas and Government forces is portrayed by the Reaganites as a "textbook case" of Soviet-inspired insurgency, but Mexico, Venezuela and Western Europe disagree, viewing the conflict as rooted in the intolerable condition of life in that beleaguered land.

In the Middle East, the heralded journey by the Secretary of State, Alexander M. Haig, Jr., failed to elicit from Egypt, Israel, Jordan and Saudi Arabia a "consensus of strategic concerns" directed at the Soviet Union. The Saudis said they regarded Israel, not Russia, as their principal enemy; they were happy that the Reagan Administration had agreed to supply them with airborne radar planes (Awacas), but they reserved the right to use the aircraft against Israel. In two aerial attacks—against a reactor near

Baghdad potentially capable of supplying Iraq with nuclear weapons, and against a Palestinian guerrilla headquarters in the center of Beirut—Israel showed it had different ideas from Washington as to what constituted the greatest danger to its security.

In South Asia, we seem determined to repeat the mistake of 20 years ago, when we armed the Pakistanis against the Soviet Union, only to see them turn the weapons against India. Each of the combatants in the Indian-Pakistani war blamed the United States for arming the other, while the Russians benefited in the role of peacemaker. Now, because of the presence of Soviet forces in Afghanistan, Mr. Reagan has approved a new \$2-billion military aid package for Pakistan, although there is every likelihood that most of the weapons will be deployed by the Pakistanis, not along their Afghan, but along their Indian border.

In Africa, the Organization of African Unity has condemned the Reagan Administration's view of the independence movement in Namibia as an insurgency of Soviet origin. Black African governments regard the movement as a legitimate indigenous force, and they see South Africa, not the Soviet Union, as their real foe.

In Europe, leaders of the Western alliance had to caution Mr. Reagan against adhering to the position that he would not negotiate with Mozow on nuclear arms limitations until the United States had rearmed. They warned that an American failure to open talks with the Russians on curbing deployment of intermediate-range missiles in Europe would undermine such public support as remains for accepting these missiles at all. Reluctantly, the President had to agree to commence the negotiations by the end of the year.

This experience illustrates President Reagan's fundamental foreign-policy dilemma: How can the perceptions of so many other countries, including our closest allies, be reconciled with his own preconceptions?

For example, if the Japanese believed that the Russians were pounding at their gates, would it be necessary for us to arm-twist them into making token additions to their military budget? Or take venerable Great Britain, now governed by Prime Minister Margaret Thatcher, Mr. Reagan's ideological twin. If these two see the Russian threat in the same light, the actions of the Tory Government belie its words. The United States Navy is being expanded on a crash basis; the Royal Navy is retiring about a third of its largest ships. Ironically, within the Western alliance, the United States alone has embarked upon a massive rearmament program.

Faced with such inertia, it is small wonder that Mr. Haig carried with him to Peking the keys to the American arsenal. He must have feit much relieved to confer, at last, with leaders of an important government, albeit Communist, who shared his apocalyptic view of the Soviet menace. Doubtlessly, Foreign Minister Huang Hua relished hearing him use Chinese terminology when speaking of Soviet "hegemonism" as the source of the world's woes. And when Mr. Haig played the "China card," offering to sell China lethal weapons, his hosts were pleased to accept a status the United States has conferred on few Communist governments.

But the game played out in Peking was one of symbolism, not substance. Despite its fierce talk, the People's Republic is not fixing to fight the U.S.S.R. Over the past two years, Peking's military budget has been cut a full 20 percent. Chinese rhetoric is one thing; China's intentions, another. The notion that China can be enlisted in the ranks of our Pacific allies, forming part of a glant phalanx thrust up against the Soviet Union.

is a dream wrapped in a dogma that bears

no relation to reality.

There is the same lack of realism in the Reagan Administration's alignment with right-wing regimes, no matter how brutish, with the alm of bolstering them as bastions of anti-Communism. The courtship of the Argentine military dictatorship is taking place at the very time the Government there stands discredited with its own people, driven by economic distress either to seek a political exit or revert to a bloodletting, savage even by Argentine standards.

Mr. Reagan has sought to justify his embrace of right-wing governments by drawing a strange distinction between abuse of human rights by totalitarian regimes, such as the Soviet one, and similar violations by merely authoritarian rules, such as those in Argentina. What this amounts to, in plain English, is a deliberate downgrading of human rights. Yet ethical considerations have always played a part in American foreign policy. As Vietnam and Chile demonstrated, a policy that runs against the grain of American ideals will not be supported indefinitely

Admittedly, there is a certain appeal in dealing with regimes like those in Argentina, Chile or Guatemala—as there was in dealing with Somoza's Nicaragua or the Shah's Iran. Authority is concentrated in one man or a small group: It is unnecessary to put up with the messiness of democratic government; agreements are easily arrived at, and the bilateral business relations are usually cordial. But the appearance of stability is often illusory. The harsh reality is that people in poorer countries are not satisfied or resigned to their lot. A people ripe for revolution will rise to the call without Leonid Brezhnev or Fidel Castro—though neither, when an opportunity presents it-self, is above lending a hand. And, as we should have learned from our bitter experience in Iran, the danger to us, when an American-supported dictatorship falls, is that the United States becomes the scapegoat, equated in the eyes of the people with the hated regime they have overthrown.

It is to President Carter's credit that he tried to portray the United States as a country with sufficient self-respect to avoid courting the worst of the rightwing police states. The Reagan Administration, on the other hand, bids fair to confirming the darkest suspicions of foreign peoples striving to achieve some improvement in their lives—that we prefer the apparent tranquility of "friendly" authoritarian governments. If each of the upheavals that are certain to continue occurring in the poorer countries is interpreted as an externally inspired subversion of an otherwise acceptable social and economic system, the new Administration will be tempted into virtually unlimited interventions in civil conflicts abroad.

A swarm of such temptations may soon confront us in Central America and the Caribbean. If we panic, by treating them as so many battlefields on which the Soviet Union has chosen to wage war against us in our very own neighborhood, then we are sure to revert to the discredited "gunboat diplomacy" of the past, hustling in the Marines to suppress each local uprising. In the end, such aggressive use of American power will rekindle throughout Latin America the smoldering hatred of "Yankee imperialism" so largely assuaged by the Panama Canal Treaties. How much better off we would be to adopt the attitude of our democratic neighbors Mexico and Venezuela, whose policy is to influence the direction of the inevitable changes in Central America rather than engage in a futile, self-defeating attempt to stamp them out.

There is something schizophrenic about the Reagan Administration's obsession with

the Soviet Union. On the one hand, we are led to believe that the Russians are out to dominate the world. On the other hand, in an American version of historical inevitability, Mr. Reagan assures us that we are seeing not only in Poland but in "the reports that are beginning to come out of Russia Itself... an indication that Communism is an aberration... the beginning of the end." In short, the Russian Empire is cracking up. Mr. Haig endorses the President's verdict: "I think we are witnessing a historic unraveling of Marxist-Leninism on the Soviet model."

If this is the case, then why all the anxiety? I suggest it has less to do with an overblown fear that the Soviet Union will ever dominate the world than with a gnawing worry that the Russians, desperate to hold their crumbling empire together, will lash out with their immense military machine.

For 30 years, we and the Russians have confronted each other across a nuclear no man's land; each nation has squandered over a trillion dollars perfecting and enlarging its stockpile of nuclear weapons. Both nations acted out of fear that one might somehow gain an advantage with which it could wipe the other off the map. But once the stockpiles reached a level of overkill so large as to guarantee the obliteration of both sides, no matter who possessed the greater number of weapons, these dragon's teeth of doomsday became an irrational compulsion. In their fernzied search for "national security," the two nations managed to make themselves not the safest but the most endangered in the world.

Our predicament is even worse than that "two tarantulas locked in a bottle," for we are not alike, and the great differences between the two societies antedate the 1917 Russian Revolution. Alexis de Tocqueville, in his classic work, "Democracy in America," foretold the 20th-century conflict between an open and democratic America and an autocratic, brooding, brutal Russia. This real and continuing difference will not end soon. Nor is Russia likely to give up its historic national ambitions for warm-water outlets, strategic depth on its western frontiers and resistance to China's claims for territorial adjustments. Neither can an aging Kremlin leadership of doctrinaire Communists abandon its commitment to the "historic inevitability" of revolutions elsewhere without losing its reason for being. And, given the internal strife in the poorer countries of the world, there is plentiful opportunity for meddling.

To state the above is merely to acknowledge a condition with which we have been living for many years. Suddenly, however, without any major reversal or precipitous shift in the balance of power between East and West, Mr. Reagan proposes the largest peacetime arms buildup in American history. Military outlays are projected to double over the next five years, rising from \$159 billion to \$343 billion. Budgetary estimates show that, between fiscal 1982 and 1986, defense expenditures will rise an average of 11.1 percent per year (after adjustment for inflaoutstripping both the 6 percent realgrowth rate proposed by President Carter and the 10 percent annual increase that took place during the Vietnam War.

These big spending figures make clear that the object of the Reagan Administration is not necessarily to reduce the size of government. Rather, it is to shift resources from the civilian budget—aid to handicapped children, food stamps, loans to students of finance their education, legal services for the poor, and a variety of other civilian programs—to military expenditures. Indeed, the rearmament program seems certain to defeat Reagan's pledge to balance the budget,

and it may, when combined with the tax cuts he proposes, eliminate any chance for significantly reducing inflation.

What is the rationale for this huge arms buildup? What events in the world have occurred to impart such a sense of urgency to the rearmament program? What impels us to bring antique battleships out of mothballs to perform missions even the Navy can't convincingly define? What leads us to reconsider building an obsolescent B-1 bomber, each one of which will cost a stag-gering \$200 million and still lack the punch to penetrate new Russian radar defenses? Why must we construct still more multibillion-dollar aircraft carriers, whose six-acre decks can't be missed by Russian missiles, when we already have 13 of these behemoths, compared with only two in the Soviet Navy? Admittedly, Moscow's continuing large military expenditures make it necessary for the United States to pru-dently increase its own procurement of advanced conventional weapons. But why this cornucopia for the munition makers, this heedless spending?

President Reagan has given us no clue. He has made no foreign-policy speech delineating his thinking on the major issues of the day. And, aside from such bromides as "Moscow is the greatest source of international insecurity," his Secretary of State is equally unenlightening. Perhaps, in an Administration so oriented toward the military, we must look to the Secretary of Defense for an explanation—and that explanation, to say the least, is mind-boggling.

During the 1950's and early 1950's our Government based its defense planning on a "two and a half wars" policy: The United States might have to fight the Soviet Union, China and some smaller country (the "half war") simultaneously. As we slowly came to accept the reality of the Sino-Soviet split, this doctrine was acknowledged implausible. American strategic thinking changed to a "one and a half wars" doctrine: The United States might have to fight, at the same time, the Soviet Union in Europe and a lesser adversary elsewhere.

In a recent speech, the Secretary of Defense, Caspar Weinberger, seems to be returning to the two-and-a-half wars doctrineand more. The Soviet invasion of Afghanistan, according to the Secretary, shows that the United States must be prepared to fight protracted conventional wars in many places "We have to be prepared," simultaneously. says Mr. Weinberger, "to launch counteroffensives in other regions and to exploit the aggressor's weaknesses wherever we might find them. . . . We must be prepared for waging a conventional war that may extend to many parts of the globe." In other words, 40 years after the fact, the Reagan Administration is getting the country ready for the Second World War.

But Afghanistan is a dubious example from which to draw such sweeping conclusions. Afghanistan borders on the Soviet Union. It has a Moslem population that has proved susceptible to the fundamentalist ferment sweeping the Moslem world. The Soviet puppet government in Kabul appeared incapable of dealing with the religious forces that toppled the Shah in Iran, and for many of the same reasons.

It may be that the Russian invasion of Afghanistan is the first move in a long-range Soviet plan to invade the oil-producing states of the Persian Gulf. It is far more likely, though, that what the Soviet invasion of Afghanistan proves is that the U.S.R. is still prepared to crush any force on its border it considers a danger to its own security. That President Reagan himself sees Afghanistan in less than cataclysmic terms is evidenced by his lifting of the grain embargo imposed by his predecessor in the aftermath of the Russian invasion.

Afghanistan alone cannot explain the new strategic doctrine. The doctrine seems rather to be based on the belief, reached independently of Afghanistan, that the United States must be prepared to intervene anywhere and everywhere to protect its "vital interests." What those interests are is left vague. Are they American business investments abroad? Are they the oilfields along the Persian Gulf? There is no evidence that the Reagan people have worked out a set of priorities, so that we would have enough military power to defend our truly vital interests around the world but would not be drawn into repeated interventions in situations in which our security is not really threatened.

The conclusion seems inescapable that the Reagan Administration has no rationale for resurrecting the two-and-one-half-war doctrine. What is more, the doctrine is inherently incredible. In order to take it seriously, one has to assume (1) that in a non-nuclear land war in Europe, the United States and our European allies would contain the Russian onslaught; (2) that the Russian, American and Western European leaders, along with their military staffs, would be content to slug it out in conventional fashion, without resorting to tactical nuclear weapons: (3) that even if the war turned nuclear, it could be kept "limited," so that there would be victor and vanquished at the end, and (4) that if nuclear war could not be so limited, there would still be something worth having afterward. To state these assumptions is to reveal their absurdity.

According to current projections of the strategic forces of both sides, the Soviet Union by 1985 will outnumber us in land-based intercontinental ballistic missiles by 1,398 to 1,054, and their warheads on these missiles will outnumber ours by 6,654 to 2,154. The United States, however, will be vastly ahead of the Soviet Union in submarine-launched missile warheads (6,560 to 1,500), and, with land-based launchers becoming more vulnerable, our undersea force should be wholly offsetting. (American and Soviet strategic bombers would be roughly equal in number if the medium-range Soviet bomber Backfire is included in the strategic balance.)

After presiding over the Senate Foreign

After presiding over the Senate Foreign Relations Committee's hearings on the strategic-arms-limitation treaty signed in 1979, I concluded that imbalances in strategic weapons in individual categories were acceptable, so long as the overall strategic balance was maintained. Other Senators differed with this assessment, believing it was necessary to maintain a balance in each category of strategic weapons. The important point is that there was a consensus in the committee—reflecting a consensus in Congress and the nation—that the objective of our nuclear-arms-limitation strategy was equivalence or balance with the Soivet Union, and that the issue for debate was how that balance could best be maintained.

Mr. Weinberger, however, complains that we have allowed our "strategic superiority to be eroded." If the Secretary's words are to be taken at face value, the national consensus is to be scraped; the objective is no longer equivalence but superiority. Yet there has been no exposition of the Administration's thinking on this critical issue. How is superiority to be achieved? What weapons systems will assure superiority for what period of time? What, indeed, is the meaning of "superiority," when the Soviet Union will retain the power to strike back with sufficient force to devastate the United States? Does it really matter how many times the rubble bounces? Besides, what reason is there to think that the Russians will not catch up with us, as they always have before?

We in the United States have been fortunate in the past to be protected by distance and ocean waters from invasion, strategic bombing and the ravages of war. In the era of strategic nuclear weapons, there is no such protection. There is no place to hide. Official estimates are that between '0 million and 160 million Americans would die in a full-scale nuclear exchange—and 20 million to 30 million more if the Soviet Union's targeters really tried to kill people per se. Thus, 30 percent to 70 percent of us would die promptly. Tens of millions more would die from fallout sickness, unchecked disease, freezing temperatures and starvation induced by the collapse of agriculture and food distribution.

Meanwhile, perhaps because they cannot contemplate their own irrelevance, the wargame players on both sides, that peculiar priesthood engaged in refining nuclear strategems, continue to pursue their exotic mental exercise in self-contained plastic bubbles. McGeorge Bundy said it best: "Think-tank analysts can set levels of 'acceptable damage' well up in the hundreds of millions of lives. . . They are in an unreal world. In the real world of real political leaders—whether here or in the Soviet Union—a decision that would bring even one hydrogen bomb on one city of one's own country would be recognized in advance as a catastrophic blunder; 10 bombs on 10 cities would be a disaster beyond history; and 100 bombs on 100 cities are unthinkable."

Could it be that we now have a political leadership that is thinking the unthinkable but does not have the political courage to level with the American people? A national consensus arrived at more than 15 years ago as to the deterrence value of nuclear weapons should not be reversed by stealth. It is not enough for Mr. Reagan to resort to euphemisms like "margin of safety" if what he really means is nuclear "superiority." The President should say what he means and put his case, if there is one, on the table for public debate.

In fairness, President Reagan has also said that he wishes to achieve real reductions in nuclear arms by negotiations with the Russians. Although he has criticized both strategic-arms-limitation treaties, he voluntarily observes their terms. The first treaty, signed in 1972, has expired; the second was never ratified; still, the President says he will abide by the provisions of each so long as the Soviet Union does likewise, thus invoking the treaties in all but name.

Let us hope—and pray—that the Administration's rigidly anti-Soviet ideology, including its futile quest for an unobtainable nuclear "superiority," gives way to the urgent need for mutual strategic-arms reductions. In the thermonuclear age, there is really only one reality: There can be no "winner" in a nuclear war. In George Kennan's passionate words, "For the love of God, of your children and of the civilization to which you belong, cease this madness."

ARTS AND HUMANITIES FUNDING

Mr. PELL. Mr. President. during the August recess, an especially perceptive column by Martin E. Segal appeared in Newsweek magazine detailing in the clearest and most persuasive manner why the budgets for the National Endowments for the Arts and Humanities should not be reduced. It is an important article, which in fact makes a most cogent argument for increasing the amounts that are appropriated to our National Endowments.

The writer, currently chairman of Lincoln Center for the Performing Arts in New York City, knows from many years of leadership of and personal involvement with cultural institutions just how critical the rederal dollar is in maintaining the vitality of the arts and humanities.

I strongly urge my colleagues to carefully consider this column which was thoughtfully written by one of the most committed and articulate leaders in the arts in our country today. It appeared in Newsweek during the week of August 10, 1981, and I ask unanimous consent that it be printed in the Record.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DON'T CUT THE ARTS (By Martin E. Segal)

Most Americans favor the stated purposes of the President's domestic program—lower taxes, a balanced Federal budget, reduced inflation, a stronger economy with fuller employment and more savings—all of which will, it is hoped, result in a generally better life for all.

The Administration is entitled to the fullest opportunity to demonstrate that its recommended legislation and appropriations will indeed achieve these goals. However, the proposal for cutting appropriations for the arts and humanities via the National Endowments (NEA and NEH) may not meet the Administration's intentions:

Lower taxes for individuals and estates indirectly hurt the arts and humanities, as well as other nonprofit organizations, and will be a disincentive to individuals to increase contributions. Ticket income from concerts, ballet, opera and other nonprofit arts covers, on the average, 65 per cent of the cost. Admission contributions at museums cover close to 40 per cent of the cost. To enable ticket prices to remain at reasonable levels, the difference is made up by voluntary contributions from individuals, corporations and foundations; from government appropriations—Federal, state and city—and from endowment income and bequests.

Most of the money contributed to arts and humanities organizations comes from individuals; the cost of a \$1,000 contribution to a person in a 50 per cent tax bracket is only \$500 net, and the cost of that same contribution to a person in a 70 per cent tax bracket is \$300 net. When tax rates are reduced, there will be little incentive to pass on some of the savings to nonprofit arts and other organizations.

At present, an estate may be taxable if it amounts to more than \$175,000. Charitable contributions are deductible from the taxable estate. If the first \$600,000 of an estate is exempt from taxes, any charitable/arts contribution from estates less than \$600,000—and 99 per cent of estates are in this category—would give the individual no estate-tax advantage.

Business cannot make up what the Federal government cuts. It is true that many businesses do not now contribute anything to the arts and should be encouraged to do so. What isn't generally known is that contributions from business have grown most impressively during the past decade. This is due not only to the recognition of the ueful role of the arts in our society, but also because inflation has hit the arts particularly hard and government support has not been nearly enough. Business has often taken the lead from government, matching government grants in the arts and humanities either on one-to-one basis or, in the case of the successful Challenge Grant program, on a three-to-one basis. But business support is should be voluntary. After all, business already pays taxes to help support government activities.

The healthy state of the arts in this country is due largely to a partnership of business, individuals and government. It isn't wise for one partner—government—to declare unilaterally to the others, "You should do more, so as to relieve me—even though I know that will not really help me achieve the other things I want to do."

The proposed cuts will have a meaningless effect on the balancing of the budget. The gross Federal budget in 1981 is \$661 billion. The appropriation for the NEA is \$157.6 million, or 24/1,000 of 1 per cent of the total budget. The appropriation for the NEH is \$154 million, or 23/1,000 of 1 per cent. Thus, the combined budgets for NEA and NEH are 47/1,000 of 1 per cent. So, cuts here are not significant. Say some, if everybody is being cut, so should the arts and humanities. But everybody isn't being cut. The Administration is even proposing increases in appropriations where it believes these necessary or desirable.

Cuts for the arts and humanities will increase unemployment and will adversely affect the economy of many important sections of the nation. Reductions in Federal support will be of grave concern to millions of Americans for whom music, theater, dance and museums are vital ingredients of a better and happier life. The arts and humanities are labor-intensive. Cuts in government support will result in unemployment. Active and interesting cultural activities are prime attractions for tourists to many cities, and tourism is directly related to hotels, restau-

rants, department stores and other busnesses vital to a thriving economy.

Many cities mention cultural activities in their promotional literature to encourage tourists to visit or businesses to come and settle there. Impairing or eliminating cultural activities will have an adverse effect on the entire economy.

If cuts in the appropriations for the National Endowments for the Arts and Hu-manities can have no real effect on the balancing of the Federal budget; if the proposed tax cuts are disincentives for contributions by individuals; if it's unreasonable to expect business to make up for government cuts; if the arts are economically beneficial, both in and of themselves and in promoting tourism and other industries-returning as they do an estimated \$7 for each dollar spent; if the American people want the arts, as demonstrated by ever-increasing attendance theaters, museums, concerts, opera and ballet; if business and individuals have in fact been increasing their direct contributions to meet inflationary costs that have not been met by government-if all of these, what should be done? I have two direct and, believe, constructive recommendations. First, the Federal Government should increase its appropriations for the arts and humanities. Second, when the proposed tax cuts are enacted, amendments to the tax laws should be introduced and passed that would treat charitable contributions in such a way so as not to diminish the present net results for the deductibility of such contributions.

Our nation will be all the more healthy and vigorous, economically and otherwise, if support for the arts and humanities is increased rather than diminished.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If there is no further morning business, morning business is closed.

RECOGNITION OF SENATOR PRYOR

The PRESIDING OFFICER. Under the previous order, the Senator from Arkansas is recognized for not to exceed 15 minutes.

DOLLARS AND DEFENSE-II

Mr. PRYOR. Mr. President, on July 31, I expressed concern over what I considered to be one of the major issues facing the taxpayer and the Congress, and that is the wise versus the wasteful expenditure of dollars on critical areas of national defense for this country. Today, Mr. President, I rise to continue voicing that same concern.

National defense is usually perceived by the average taxpayer in this country as an alien landscape of strange and exotic dimensions. But this is only half the truth. The fact is that contractors, who control so much of our defense posture, know exactly what is going on. They know because they are involved not only in producing weapons but also in policy, planning, and programing of those weapons and the procurement of those weapons.

Procurement dollars in defense have grown over the last 20 years so that single contracts today might be worth hundreds of millions of dollars. During this time, defense contractors have come to realize the importance of their Washington offices. Over 500 defense-related corporations now have Washington bureaus, representing a fivefold increase

in just 10 years.

The purpose of the Washington offices has also undergone dramatic changes. While 20 years ago their major function was to provide information and monitor procurement developments and legislative activity, today's office centers upon one activity and one alone: pressure. It may be defined as "Government relations," or "public affairs," but this activity is the key to a contractor's success. Unfortunately, Mr. President, in too many instances, these offices and bureaus and the expenses thereof are charged to the taxpayer.

Pressure is aimed at both the Congress and the executive branch of the Government. Designed to follow issues of importance to the contractor, it seeks to shape legislation, procurement, and appropriations decisions. Pressure also involves political "strategy" ranging from grassroots efforts and campaign contributions to direct contact with the key figures in the Nation's Capital.

In 1976 and 1977, the Defense Contract Audit Agency (DCAA), which reviews contractor claims for costs incurred on defense contract work, undertook a series of special audits of 10 defense contractors in Washington. Among those audited for 1974 and 1975 were Boeing, General Dynamics, Grumman, Lockheed, and Rockwell International.

In both the preliminary and final audits, DCAA found that a substantial part of the expenditures was for "lobbying activities." Much of this expense was charged against existing Government contracts and was subsidized by Federal dollars. DCAA does not assert that the contractors had no right to lobby. It simply questioned whether such expenses ought to be charged to Government contracts and agreements.

For the 2 years involved in these audits—1974 and 1975—the questioned expenditures amounted to over \$11 million for five of the contractors' Washington offices. In plain English, what is happening is that taxpayers are footing the bill for defense contractors to exert their influence to benefit themselves.

The blame must be placed on both the contractors, the Department of Defense, and yes, the Congress. At the time of the audits, DOD had no specific regulation prohibiting contractors from charging lobbying expenses against contracts. DCAA questioned such contract expenditures on the basis of "reasonableness" and "appropriateness" and must be commended for the stand they took.

DOD reacted in what I consider to be common fashion. To address the lobbying costs, the Pentagon spent several years trying to define "lobbying" expenses so that such costs would not be charged to the Government. But in 1980—just a year ago—the effort was abandoned because officials claimed that it was impossible to define what the term "lobbying" means. Once again, the taxpayer took it on the chin—or, I should say, took it in the pocketbook.

The interdependence between defense contractors, Congress, and the executive branch brings contractors so close to Government that they both implement military policy and often create it. Once molded, this relationship is set with an iron rigidity that keeps them isolated and protected from outside points of view. In time, they become unwitting victims of their own isolation.

The Department of Defense is not an island unto itself, but instead is a part of the entire Government. It, too, must play by the rules. When a constituent urges our support on legislative matters, the expense of that effort is important to both of us. And the fact that defense contractors attempt to use similar influence—but at Government rather than private expense—is also significant. This unfairness must be addressed.

As the Pentagon has indicated, there is a problem in defining what "lobbying" means. The only solution I can see is legislation that would put the issue to rest. I expect to introduce shortly a measure that will both define the term and more important, restrict defense contractors from charging their lobbying expenses to the American taxpayer. The Department of Defense must be examined and the examination cannot wait. It must be very thorough. Too many of our taxpayers' dollars are at stake. I plan, further, to continue pressing into DOD spending, procurement, and related areas-and, where possible, to offer solutions.

Dr. Gordon Adams recently outlined

the configurations of the relationship between contractors, Congress, and the executive branch in his book, "The Iron Triangle." And my distinguished colleague from Wisconsin, Senator Prox-MIRE, has been pointing to its effect since at least 1977, when he raised pertinent questions concerning the Condor missile program.

Mr. President, I want to call attention this morning to an article in the August issue of Common Cause entitled "The High and the Mighty." Written by Florence Graves, editor of the magazine, the article outlines the full dimensions of lobbying by defense contractors and the further wrong of charging these expenses to the taxpayer. Ms. Graves writes:

There is enough favoritism and behindthe-scenes influence on large defense contracts without the added insult of having the taxpayer pay for the bill.

I agree entirely and ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD. as follows:

THE HIGH AND THE MIGHTY (By Florence Graves)

Can you imagine the U.S. government picking up the costs incurred by political activist Jane Fonda and her husband Tom Hayden for trips to Washington to lobby against the B-1 bomber, the MX missile or the F-14?

Can you imagine the U.S. government pickall or part of the tab for you member of your family to travel to Washington to encourage your congressman to vote against or even for selling AWACS to Saudia

Now try to figure out why the government was expected to pick up the salary of the Martin Marietta Co's director of Washington relations whose job functions, according to audits released recently to Common Cause. "relate to liaison with congressman and their staff aides. He builds rapport with Congressmen-from 35 states in which Martin Marietta has divisions and solicits Martin Marietta employees for campaign contributions."

Try to figure out why the government was expected to shoulder the retainer fees paid to Gen. W. W. Quinn, USA (Ret.), also a lobbyist for Martin Marietta.

Or the salary of Sperry Univac's public relations and sales promotion manager who,

in effect, was a lobbyist?

The government has footed untold millions of dollars of defense contractors' lobbying expenses because the Defense Department has no definition of "lobbying" therefore no regulation that specifically pre-vents lobbying costs from being charged against government contracts.

Sen. William Proxmire (D-Wis.) is incredulous. "Every citizen has the right to communicate with his elected representatives. However, no citizen has the right to ask the government to reimburse the costs of these communications and, to my knowledge. no segment of society other than government contractors has had the temerity to make such a request."

A fascinating but incomplete picture of the millions of dollars in lobbying expenses charged against government contracts by defense contractors emerges in the audits of 10 major defense contractors' Washington offices released to Common Cause four years after the Air Force denied a Freedom of Information Act (FOIA) request.

After CC's FOIA request was refused. Common Cause went to court to win the release of the audits which were conducted in 1976 and 1977 and cover the years 1974 and 1975.

The audits include those of the Washington offices of the Boeing Company, Rockwell International, Lockheed Aircraft, Raytheon, Hughes Aircraft, General Dynamics, Martin Marietta, Collins Radio Group, Sperry

Univac and Sperry Rand Corp.

The exact extent to which the taxpayers footing contractors' lobbying costs is not known. But these audits reveal a total of more than \$2 million in lobbying-related costs questioned by auditors during 1974 and 1975 for these ten contractors. There are hundreds of defense contractors. Of the ton 100, 67 have Washington offices. So simple mathematical calculations indicate the grand total could be many millions.

Despite the fact that Defense Department auditors strongly oppose contractors' charging of lobbying costs to taxpayers, it is unlikely the practice will be discontinued because the powerful defense contractors have vigorously opposed any attempts to prohibit this practice.

The audits were kicked off by the highly publicized revelations in 1975 that some defense contractors, Rockwell and Northrop Corp., in particular, had entertained military congressional personnel with parties at hunting lodges on the Maryland shore, goose hunts, rides on corporate jets and yachts, and football tickets.

During hearings held in 1976 by Proxmire's aggressive Committee on Joint Defense Production, the Defense Department announced it was auditing the Washington offices of several contractors to determine if the costs of any of this lavish entertainment being charged to the taxpayers. And that's the last the public heard of the audits until their release to Common Cause.

CLASSIC WASTE

If the Marx Brothers, themselves, had decided to make a film about defense contractors, they probably wouldn't have come up with more classic examples of waste than

those found by the contract auditors.

Raytheon claimed the costs of lodging, meals, and guides for goosehunts in the Maryland area for company employees and unidentified guests.

General Dynamics wanted the taxpayers to foot the bill for F-16 tie tacs.

Hughes Aircraft claimed some costs for a condominium in the Shoreham (an exclu-Washington apartment house). The costs represented depreciation, garage maintenance, maid service and other expenses related to the condominium purchased in 1972. Also claimed were entertainment supplies and services which included silverware, linens, bartender, reception and limousine services as well as decorations and furnish-ings for a "sky suite" at the Capital Center (a sports arena).

Lockheed Aircraft charged off travel ex penses to the Farnborough and Paris Air shows, including first class air fare and wives' travel costs.

Rockwell Corp. claimed the bill for 100 prints of the film, "The Threat, What Can One Do?" The auditors felt the film "furthers the image of the B-1 bomber programs. It appears the films are being shown to the public and Members of Congress. We question the costs because they represent effort designed to influence legislation. The contractor does not concur. It maintains this is public relations effort."

("Public relations" costs, it should be noted, are considered legitimate expenses to cl.arge to government contracts.)

The Defense Contract Audit Agency, which plays an advisory role in negotiating contracts, allocating costs, and seeing that terms of contracts have been met, questioned the legitimacy of not only more than \$2 million in lobbying-related costs but more than \$2.5 million in entertainment expenses as well.

These totals do not include the more than \$2 million which the contractors originally charged, but voluntarily deleted, during the audit negotiations. Furthermore, all of totals are probably much higher, but auditors repeatedly said that most of the contractors refused to let them see the proper records to verify costs.

A Pentagon official, John Kendig, deputy director for cost, pricing and finance, says "it is reasonable to assume" that not all of these costs were eventually paid by the government. As part of the overhead, he says, some of these costs may have been eventually allocated to a company's commercial divisions as well.

However, Christopher Paine, a staff assistant for arms control at the Federation of American Scientists, maintains that defense contractors try to put as many of their total expenses as they can into government over-head. "They all do it. They think, if you can get the government to pay for it, why not?

While the government explicitly forbids federal employees from using taxpayers' money to engage in lobbying, there is no specific regulation prohibiting contractors from charging lobbying expenses against contracts. (There are, however, specific regulations pro-hibiting contractors from charging entertainment and some advertising expenses.1)

However, in lieu of a specific lobbying cost principle, the auditors could question the costs on such bases as "reasonableness" or appropriateness and aggressively did so, touching off a several-year debate in the defense community about the validity of contractors charging such expenses to their overhead.

In response to these audits, the Pentagon tightened its conflict of interest standards and most observers agree the lavish entertainment has been kept to a minimum. To address the lobbying costs, the Pentagon spent several years trying to come up with a definition of lobbying which would outlaw such costs being charged to the government.

The effort was abandoned, however, in June 1980 because officials say it was too hard to define lobbying.

The audits, which give an exclusive, inside glimpse of the kinds of costs contractors expected the government to bear, also give an indication of the magnitude of the lobbying effort being made in the Washington offices, the nerve center of contractors' selling efforts. The audits also reveal:

Defense contractors are spending large sums of money to lobby for their weapons and are reporting only a fraction of these costs under the loophole-ridden 1946 Federal Regulation of Lobbying Act. In 1974-75, for example, the DCAA questioned more than \$2 million as possible lobbying expenses.

This total does not include those amounts which the contractors voluntarily did not charge to the government, so the actual amounts spent on lobbying are not known. In those same years, only three of those 10 companies had registered lobbyists and they reported spending only \$89,251.20.

The auditors' inquiries met a consistent pattern of stonewalling. In audit after audit, the auditors noted, as in the case of Martin Marietta, "The scope of our review was severely restricted. . . . This prevented the full application of generally-accepted auditing standards and tests of accounting records which would ordinarily be done."

In the audit of Hughes Aircraft, the auditor wrote: "The contractor imposed rigid conditions under which we were allowed to interview its personnel. It required the corporate marketing vice president to be present at each interview and a contractor stenographer to record the entire interview. The

¹ An official says that when contractors were questioned about expenses they charged which were clearly related to entertainment, they would just say they'd made a "mistake."

contractor refused to answer any questions on details or activities relating to unclaimed

"It also would not permit questions relating to an apartment which the contractor owns and maintains in the Washington area. We advised the vice president that the cost of this apartment had been claimed by the contractor in its 1972, 1973, and 1974 overhead claims

'Nevertheless, the contractor requested that the auditor not ask any further questions about it since most of the employees were not even aware of its existence. Moreover, "the lack of time or activity records, denial of access to documentation, and restrictions imposed by the contractor during our review prevented us from reaching an unqualified opinion on the allowability of costs not otherwise specifically questioned.

While theoretically, the auditors should have access to all necessary records, audit officials say the contractors vehemently dispute what records are really "necessary. intransigent contractor can keep such dis-

putes in the courts for years.

The interdependent relationship between defense contractors, Congress and the executive branch brings contractors "so close to government that they not only carry cut military policy, but often create it," Gordon Adams of the Council on Economic Priorities (a public interest group based in New York City) who just released an investigation of the politics of defense contracting, The Iron Triangle.

This "triangle" is formed, Adams says, "by the powerful flow of people and money" mov-"between the defense contractors; the

executive branch and Congress."

Explains Adams, "Once molded, triangle sets with the rigidity of iron. The three participants exert strenuous efforts to keep isolated and protected from outside points of view. In time, they become unwitting victims of their own isolation, convinced that they are acting not only in their own but in the public interest."

Contributing to this is a practice frequently called the "revolving door."

For example, Dale Babione, former director of contracts and system acquisition at the Department of Defense, joined the Boeing Company as the director of government business relations in 1979 during the attempt to define a lobbying principle.

The flow of personnel among the points on the triangle "creates a community of shared assumptions about policy issues and developments," Gordon Adams concludes.

THE WASHINGTON OFFICES

For a number of defense contractors, the U.S. government is one of their largest clients. It's the job of their Washington offices to grease the connections and ease the way for the multibillion dollar sales.

"Our business base is sustained in Washington," Richard Cook, a deputy assistant for congressional relations to Richard Nixon who heads the Washington office of Lockheed Aircraft Corp. told the National Jour-nal. (In the early 70s, Lockheed, the Chrysler of the defense industry, got a federal loan

guarantee to keep it afloat.)

To sustain the business base, contractors "must succeed in the influence business." says

Contractors do not consider the efforts of most of those in their Washington offices "lobbying," although most would probably agree that some of what they do is "lobby-ing," which is perfectly legal. Some of the remaining activities they consider to be "legislative liaison" which means providing information to Congress and to the executive rather than exerting pressure. Most apparently consider both of these activities legiti-

mate overhead expenses which are routinely passed onto government contracts.

But during these audits, the Defense Contract Audit Agency made a distinction between the two. They felt many of the Washington office employees were engaged in "lob-bying" ("influencing legislation"), activities they felt should not be charged against government contracts. They therefore questioned whether more than \$2 million charged against government contracts should be allowed, emphasizing the totals could be much higher but the contractors refused to give them the documentation they needed to make the determination.

In questioning lobbying-related costs, the auditors usually included this notation, "We found no recognizable benefit to government contracts since the Department of Defense and other executive agencies make determinations of policy and program needs, and justify their own requirements for appropriation:

'Attempts by contractors to influence legislation favoring procurement of their products can be inimical to DOD policies as well as requirement determinations.'

One company, Martin Marietta (one of only two contractors who would answer any questions for this story) maintains that the company does not lobby and therefore does not

have any lobbying expenses.

But the DCAA did not concur: it questioned a total of approximately \$300,000 in lobbying expenses for Martin Marietta, in-cluding salaries of several staff members. For example, the DCAA found that K. K. Bigelow, the director of Washington Relations, maintains contacts with government personnel to solve problems and makes appointments for company officials to meet with government representatives.
"Mr. Bigelow follows issues in Congress

that affect the company in the areas of tax reform, energy, and pollution control. He builds rapport with congressmen from the 35 states in which Martin has divisions and solicits Martin Marietta employees for campaign contributions. In our cpinion, these activities are concerned with influencing leg-

islation and are unallowable . . ."

Moreover, "a review of Mr. Bigelow's travel expense reports indicate extensive entertainment at home, the Congressional Country Club, Kennedy Center, and numerous Washington restaurants. In most cases there is no record of who participated in this entertainment. We have questioned Mr. Bigelow's salary, his secretary's salary, the cost of the chauffeur's support, fringe benefits, travel and re'ated expenses."

It is clear from reading the audits that the DCAA does not believe the taxpayers should be picking up lobbying costs. Fred Newman, then head of the DCAA, now with a private firm, says he does not think such costs are legitimate expenses; the current head, Charles Starrett, agrees. But the DCAA has only an advisory role; the contracting officers make the final decisions. (A contracting officer is the person at the Pentagon who has overall responsibility for an individual contract. This person monitors the defense contractor's performance and makes final determinations about costs.)
So in this case, what the DCAA thinks does

No one has come right out and said it, but the Defense Contract Audit Agency must have really put the Pentagon brass on the spot by boldly questioning what appeared to the auditors to be lobbying expenses.

After the audits were completed, the Pentagon, apparently displeased with the first audits, handed the DCAA a set of guidelines to follow in questioning which costs were valid and told them to do the audits over again.

Not surprisingly, the amounts of costs

questioned were significantly reduced. (As part of the documents released to Common Cause, the Air Force sent several but not all final audits which showed significant reductions in "costs questioned." However, an exact analysis is not possible because sig-nificant portions of the final audits are

whited out.)
In fact, it seems clear from a memo, obtained by Common Cause, which Charles Starrett, then deputy director of the DCAA (now director) wrote to the deputy assistant secretary of defense (acquisition), that the Pentagon knew full well that some glaring costs would not be questioned as a result of their "guidance."

Starrett used examples from the audits of Rockwell's Washington office as well as an audit of Rockwell's B-1 division (which was

not provided to CC).

These are some of the expenses charged by Rockwell to its overhead account which Starrett said the auditors probably would not be able to question as a result of the Pentagon's new instructions about which costs the auditors could question:

\$10,000 paid a subcontractor for a study on the impact of the B-1 program on the U.S. economy. The study was used in preparing white papers designed to influence B-1 legis-

The total costs of a military relations function in which the director provided material to editors, publishers and reporters in several states to elicit articles favorable to the B-1 and made presentations to government and contractor personnel throughout the coun-

The development of a speakers' bureau on behalf of the B-1.

Several films prepared to develop positive support for the B-1 and other defense programs.

TRYING TO DEFINE "LOBBYING"

While the contractors' Washington office audits were never publicly released, Proxmire and his staff apparently got a peek and he took to the Senate floor in 1977, demanding that lobbying costs not be charged against government contracts.

Said Proxmire, "The current practice sets up a vicious circle. Contractors get generous allotments from the government to produce weapons systems. But rather than using all of it for production of these weapons systems, they siphon some of it off to lobby for even more money . .

"There is enough favoritism and behindthe-scenes influence on large defense contracts without the added insult of having the taxpayer pay for the bill."

In an apparent attempt to pacify Proxmire, the procurement officials asked the DAR (Defense Acquisition Regulations) Council, which writes the regulations used in defense contracting, to try to come up with a lobbying cost principle. They did so, defining lob-bying this way: "Lobbying is defined as any activity or communication which is intended or designed to directly influence members, their staffs or committee staffs of any federal, state, local or foreign government legislative body to favor or oppose pending, proposed or existing legislation. Lobbying activity includes but is not limited to personal discussions or conferences, advertisements, telegrams, telephone communications, letters and the like, and the directly associated costs related thereto."

"Legislative liaison" activities such as attendance at committee hearings or meetings with congressional representatives at their invitation and gathering information regarding pending legislation were not included in the definition.

The definition was circulated for comment throughout the industry and other government agencies (the government does not

have a lobbying principle for other agencies' contractors either and was proposing to use the one the Defense Department wrote).

An inch-thick stack of paperwork was generated. Common Cause obtained this correspondence too, under a Freedom of Information Act request. Most government agencies which responded enthusiastically supported a lobbying cost principle, agreeing that it was inappropriate for the government to foot such costs. Several emphasized that the contractors should be required to maintain the documentation to prove the validity of their claims.

A number of industry representatives, however, vehemently opposed the principle. None of the contractors directly involved in the audits responded but another contractor, United Technologies, said the principle would, among other things, impose burdensome paperwork.

The chairman of the American Bar Association's section of Public Contract Law, contended the "lobbying principle would inhibit commercial organizations from exercising their First Amendment constitutional rights," an argument frequently made by the defense community.

Counters Proxmire, "They're perfectly free to speak all they want. They can lobby to their heart's content. But to charge the cost of all that to the taxpayer is really adding insult to injury. It's a real loser for the taxpayer; there's no way the taxpayer can

But after Proxmire's spotlight had faded and three and a half years had passed, Dale Church, then deputy undersecretary of defense for acquisition policy, made the decision in June 1980 to reject the proposed lobbying principle.

John Kendig, now deputy director for cost, pricing and finance at the Pentagon, says the Pentagon dropped the proposed lobbying principle because "we really couldn't get a consensus on what constituted lobbying . . . very difficult. What is lobbying? Is contractor lobbying if he goes over and speaks to a congressman? He may or may not be."

But Proxmire scoffs at that explanation. "That's absurd. It's easy to find a definition for lobbying. It would be hard to find any definition that's acceptable to everyone. You can't find a definition of 'cat' that's acceptable to everyone."

Kendig, who had a say, although not the final say, in the attempt to develop a lobbying cost principle, personally thinks lobbying should be considered a normal business expense that the government should absorb although he concedes that the government has declared other "normal business expenses" such as entertainment and advertising unallowable.

The DAC council disagreed with Kendig According to a memorandum obtained by Common Cause, the council concluded that "most defense contract dollars are on tracts under which contractors are able to recover costs. Expenditures for lobbying would therefore be passed through to the government.

"By contrast firms in the private sector are usually operating in a competitive market. In this situation, any expenditure for lobbying would reduce profit. We believe de-fense companies should be put on the same

Gordon Adams says even if lobbying were a routine business expense reflected in cost of products such as shoes or cars, lobbying expenses spent to sell weapons should not be included in the costs of those weapons. "The taxpayer, who is the ultimate consumer, is not really in a position to vote with his wallet the way he can on an automobile. It's very hard for the taxpayer not to buy and very hard for the taxpayer to make the argument that counters the impact of the lobbying in Washington that leads to the decision to buy . .

Fred Newman, the former head of the DCAA, says the proposed principle was dropped because the "procurement people felt the keeping of records was too onerous and too costly for the contractor." But Newman says if the contractors think such a principle would be "too administratively costly, then maybe they shouldn't pass on any of the costs."

Newman says "undoubtedly" there was considerable pressure" placed on Pentagon officials by the contractors.

Proxmire attributes the failure to the "revolving door." "The difficulty is that both the Congress and especially the executive are very, very heavily lobbied. There are people in the executive who are dealing with the military and the contractors who, in many cases, are going back to work for the same contractors they dealt with.

'And then they may come down and work in the Defense Department as a civilian procurement official. Therefore, you have an atmosphere in which these people serve their continuing conflict of interest. That's why I think the regulation has not been promulgated .

When it became clear the Defense Department was not going to establish a lobbying cost principle, Proxmire turned to the Office of Federal Procurement Policy [OFPP] in the White House Office of Management and Budget. He suggested such a cost principle be incorporated into governmentwide procurement regulations. Again a stone Karen Hastie Williams, administrator of OFPP under Carter, wrote that she was "inclined to agree with the Department of De-fense's view that its present cost principles and audit guidelines are adequate to preclude the reimbursement of costs specifically identifiable with lobbying activities."

But some DCAA officials say that without a specific principle, it is very unlikely that many of the lobbying costs they question will be upheld in negotiations when contractors and Pentagon contracting officers discuss the bills.

Williams suggested that if Proxmire wanted a principle so badly, he should legislate

"Why doesn't he (Proxmire) pass legisla-n?" asks Dale Babione, the former director of contracts and systems acquisition at the Department of Defense, who is now director of government business relations for the Boeing Company. Babione, by the way, was involved in the discussion over developing a lobbying cost principle.

Concludes Babione, "Because he can't get anyone to agree with him. The fact that somebody feels strongly about something doesn't make it so. It just means he feels strongly about it. This is a democratic coun-try, and if everyone feels the law should be changed, then why don't they change it?

THE LOOPHOLE-RIDDEN LAW

While there may have been no attempt to pass legislation outlawing lobbying costs charged to government contracts, there have been a number of unsuccessful attempts to strengthen the 1946 lobby disclosure law

Both contractors and government officials have said that they base their definition of lobbying on the 1946 law which they interpret as saying a person or company does not have to register unless their "principal purpose" is to lobby.

Apparently applying that rule of thumb in 1974-75, only three of the companies had any registered lobbyists or expenditures: Boeing (\$33,840.85), Lockheed (\$53,785); Rockwell (\$1.745.25). Yet DCAA auditors questioned many times more than those amounts as probable lobbying costs. (A spot check of 1980 disclosure forms by these com-

panies show no significant improvement in reporting.)

During the Boeing audit, the DCAA questioned the salaries and benefits of five corporate employees whom the auditors felt were involved in lobbying. In fact, the auditors said two of the employees told them "100 percent of their work is spent on lobbying, either talking directly to congressmen or their staffs or obtaining information to support company positions.

Boeing, however, vigorously disagreed. Peter Bush, a spokesman for Boeing, says the two employees say they couldn't possibly have told the auditors they spent most of

their time lobbying.

As evidence, Bush says, the lobbying reports these employees filed with Congress under the 1946 loboying law "show only 5 to 10 percent of their time" was spent lobbying.

Look at their lobbying reports?" says Gordon Adams in astonisment. "answer? You've got to be kidding. "That's an

Sure, given a statute that is riddled like swiss cheese, it's very easy to some waltz down there and say that they spent waltz down there are say that they spent waltz down there are says to some some says that they spent waltz down the says to some says that they spent waltz down the says to some says that they spent waltz down the says the swiss cheese, it's very easy for someone to five percent of their time lobbying. Who's going to follow that up? Who audits that claim? Nobody.

The defense industry, of course, is not the only one which interprets the lobby disclosure law narrowly. Because there are numerous loopholes, and no enforcement of the law, thousands of lobbyists are not registered and hundreds of millions of dollars spent on lobbying are not reported.

In his analysis of the politics of defense contracting, Adams not surprisingly concludes that one of the steps that needs to be taken to "pry open the iron triangle of defense policy and weapons procurement" reforming the loophole-ridden lobby disclosure act. Common Cause has worked for years for a more comprehensive law.

Why is a stronger law needed? What difference does it make to the public whether the defense or any other industry spends \$5 or \$5 million lobbying? After all, lobbying perfectly legal. What difference does it make whether an individual spends all of his time or part of his time lobbying?

Says Adams, "I think the most convincing argument for revision is that the public has no idea of the magnitude of the activities of special interests in Washington. And current disclosure and reporting requirements give them no way to even begin to guess at the magnitude of the effort. The closest we can get are those DCAA audits.

"My hunch is that corporations and trade associations related to industry have massive resources that they can bring to bear (on the political process) which far outweigh those of smaller special interests or those of the public at large to present their cases. Until we have that data, what do we do? Throw up our hands and say it doesn't make a difference? It obviously makes a difference."

AUDIT FOLLOW UP

Were any of the millions of dollars of lobbying, entertainment and other costs questioned by the Defense Contract Audit Agency [DCAA] eventually paid by the contractors?

We don't know. The DCAA acts only as a financial advisor to Defense Department contracting officers who sit down with the contractors to determine which of the questioned costs will be allowed. The DCAA's audit findings are in no way binding. And, of course, the results of the negotiations between the contractors and the contracting officers are not made public.

But a study of the DCAA by the General

Accounting Office [GAO], the government's watchdog, gives a clue as to what may have happened. The GAO pointed out that the

contracting officers do not always use the findings of the DCAA and that disagreements between DCAA and contracting officers are rarely reported to higher officials. The con-

tracting officer has the final say.

Moreover, contracting officers rarely report
the rules of their negotiations to the auditors, GAO found. Eimer Staats, former comptroller general of the U.S., told a House committee hearing that "morale is low at DCAA.
They need assurance their findings will have
an impact."

The failure of agencies throughout government to follow up and resolve audit findings is, in the words of one GAO official, "a na-

tional scandal."

After much pressure, the Defense Department came up with a process for tracking the results of audits, but did not include DCAA audit findings in that process. After pressure from Rep. Jack Brooks (D-Tex.), the Department of Defense (DOD) came up with a proposed plan to follow up findings at DCAA. Deputy Secretary of Defense Frank C. Carlucci told a subcommittee of the House Committee on Government Operations in July that the Defense Department had drafted a process for monitoring follow-up action on contract audit reports, including a provision for resolving significant differences between auditors and contracting officers. Carlucds a final directive should be issued by the end of August.

Critics say there should be some check on the enormous power of the contracting officers who make final decisions, because some feel contracting officers can become advocates of the weapons they are responsible for and, therefore, not as objective as they might be when negotiating contract cost differences.

John Kendig, deputy director for cost, pricing and finance at the Pentagon, says such a generalization is wrong and makes him "sick."

Other critics feel the effectiveness of the DOAA could be strengthened if the DOD had an Inspector General (IG) as most other agencies do.

DOD was left out of the Inspector General Act of 1978 because of their strong objections to being included. One Capitol Hill aide says DOD was not included because the sponsors of the bill feared DOD's anticipated heavy lobbying against the act would have killed the entire act.

But Rep. Brooks does not give up easily. His bill to institute an IG at Defense (and four other agencies not covered by the 1978 act) has passed the House and is pending in the Senate.

The Defense Department opposed the House bill because, DOD General Counsel William H. Taft IV testified, an autonomous Inspector General "is completely inconsistent with the hierarchical commander/subordinate relationship that is at the heart of any military organization and embodied in the chain of command. These provisions do not encourage the individual to work with the secretary on his team."

Asked how strenuously the Defense Department had lobbled against the House bill, a Capitol Hill aide replied, "They have been spending only slightly more time on this than they are on the Russians. If they are as aggressive about the Russians as they are about this, then I guess we can sleep nights."

In Senate hearings. Taft said the Department of Defense really wants an Inspector General, but they want the secretary of defense to have the power to veto "any review process or investigation that the Inspector General may initiate which could feopardize national security." The secretary would have to report the reasons for any veto to Congress. The House bill does not provide such "veto power."

The Defense Department also opposes including the DCAA under the aegis of an IG because, Taft says, DCAA's "principal mission

is an advisory role in the acquisition process, not oversight of DOD operations."

On this point the GAO agrees with Defense. But the bill which passed the House includes the DCAA within the purview of the IG because some sponsors felt it would give the DCAA more clout.

To deflect some of the heavy criticism about the potential for finding waste in DOD, the Defense Department recently created the position of assistant to the secretary of defense for review and oversight. This office is supposed to advise the secretary of ways to combat waste, fraud and abuse, but unlike the IG proposed by the House, this position is not independent of the secretary.

CC WINS DOCUMENTS AFTER COURT BATTLE

The audits of the 10 defense contractors' Washington offices which form the basis of this story, were obtained by Common Cause under the Freedom of Information Act (FOIA). After the Air Force refused Common Cause's 1977 request for the audits, CC went to court. The audits were awarded to CC in January of this year.

In court, the Air Force maintained that release of the audits would cause competitive injury to the companies—in other words, rival contractors would be able to learn about the staffing and funding of the companies' Washington offices and somehow use this information to their own advantage. But testimony revealed most of the companies already knew about the workings of their rivais' Washington offices.

Another claim made was that the alleged "mislabeling" of certain contractor expenses as lobbying and entertainment costs by the Defense Contract Auditing Agency (DCAA) would harm the companies in the public's eye and would thus diminish their overall sales, because adverse public opinion would cause Congress to refuse to appropriate funds for defense contracts awarded to these companies.

To support their claims, the Air Force submitted affidavits from high-level officials from each of the 10 companies. "Since these officials were based all around the country, it would have proven difficult and very costly for our staff attorneys to cross examine them," says Ellen Block, Common Cause associate general counsel.

associate general counsel.

"Instead," says Block, "we drew upon the services of volunteer lawyers in California, St Louis, Seattle and Minneapolis to take the depositions of the companies' witnesses. These depositions were key to winning the case because the testimony brought out on cross examination clearly contradicted the claims made by the Air Force."

In making the case, the Air Force relied on a provision of the Freedom of Information Act which allows the government to withhold business data only if its release would be likely to cause substantial competitive injury to the business which supplied the data.

During recent hearings on a proposed revision of the FOIA, this section was attacked by the business community. Opponents want to revise the law to prohibit the government from releasing any document that a company would not be willing to release.

Mr. PRYOR. Mr. President, I yield back the remainder of my time.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR PROXMIRE

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin is recognized for not to exceed 5 minutes.

S. 1604—COST OVERRUN REQUIRE-MENTS IN NONDEFENSE PRO-GRAMS

Mr. PROXMIRE. Mr. President, today I introduce a biil to stop cost overruns on Government projects. This bill provides that each project that incurs a cost overrun of 25 percent automatically would be cut off from further funding unless and until Congress held hearings and passed a special bill allowing it to go ahead.

Getting a handle on Government cost overrun is one of the toughest jobs in Washington. There are many process in trouble. Each has its political and economic special interest support.

At the present time there are 854 non-DOD projects funded by the Federal Government either in development or under construction. These projects were expected to cost \$133.4 billion when first estimated to Congress. After initial refiguring, the new baseline costs rose to \$165 billion. At the present time the costs are estimated at \$340.5 billion, an increase overall of \$175.5 billion or 106 percent over the baseline estimate.

Seventy-seven programs have a cost overrun of 100 percent or larger. Only 54 percent of this can be attributable to inflation.

Mr. President, let me repeat that. Only about half of this can be attributable to inflation.

The Environmental Protection Agency has the greatest number of projects with overruns at 300, while the Federal Highway Administration ranks highest on the cost scale with a \$100 billion overrun on the Federal highway program.

My bill would force the Congress to come to grips with the awesome epidemic of overruns. It would do so by automatically stopping the expenditures on any project that experiences a cost growth, exclusive of inflation, of 25 percent or more.

Mr. President, I am talking about constant dollars, a genuine cost overrun, not a cost overrun caused, of course, by the increased cost of inflation which nobody can prevent or predict. This would have to be in excess of the inflation cost, 25 percent or more.

The Comptroller General would be responsible for accumulating the statistics, as he does now on each project, and for spot checking them for accuracy. When any project runs over the 25 percent limit the Comptroller General would be empowered to notify Congress and the agency responsible. From that point on, no further funds could be spent unless the Congress passed a special law allowing it to go forward.

This will have the effect of keeping the pressure on the Government agencles responsible for the overrups as well as on the Congress which so often does not do a good job of oversight. Since a provision dealing with cost overruns in the Defense Department has been made a part of the Department of Defense authorization bill, my bill deals only with nondefense programs.

There is no guarantee that any bill will absolutely stop cost overruns. There are loopholes in any legislation. But this proposal is simple in design and drastic in its required action. Its purpose is to restore discipline to Federal spending.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S 1804

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That as used in this Act—

(1) The term "major civil acquisition" means any construction, acquisition, or procurement financed in whole or in part with Federal funds (not including any funds allocated to a State under a revenue sharing program), the estimated cost of which, including research, development, testing, and evaluation costs, in terms of Federal funds, exceeds \$200.000,000, or any such construction, acquisition, or procurement with respect to which the research, development, testing and evaluation costs are estimated to be in excess of \$50,000,000.

to be in excess of \$50,000,000.

(2) The term "baseline cost" means a planning or development cost as established by the Comptroller General of the United

States.

(3) The term "Comptroller General" means the Comptroller General of the United States.

SEC. 2. (a) The Comptroller General shall be responsible for determining the cost growth statistics on all major civil acquisitions. Such statistics shall be determined on the basis of data furnished to him by the appropriate departments and agencies of the Government and on the basis of independent audits and reviews conducted by him under authority of law. All departments and agencies of the government are hereby required to furnish the Comptroller General with any data or information he might determine to be required for compiling cost growth statistics.

(b) Whenever the Comptroller General determines in the case of any major civil acquisition that the actual cost or estimated projected cost of such acquisition has resulted or will result in a cost growth of 25 percent or more compared to an established baseline cost he shall promptly notify the Congress and the head of the department or agency concerned of his finding. In determining the cost growth with respect to any major civil acquisition the Comptroller General shall exclude any amount from such cost growth attributable to inflation.

(c) After the date on which the head of a department or agency receives a notice from the Comptroller General described in subsection (b) relating to any major civil acquisition, no additional funds may be obligated or expended with respect to such acquisition unless authorizing legislation as described in subsection (d) is enacted by the Congress after date of such notice.

(d) Legislation referred to in subsection (c) means a bill or joint resolution which (1) pertains only to the continuation of the authority to obligate and expend funds for a major civil acquisition with respect to which the authority to obligate and expend funds has been terminated as the result of a notice issued by the Comptroller General under subsection (b), and (2) continues for a period of not more than one year from the date

of enactment of such bill or joint resolution the authority to obligate and expand funds for such acquisition.

SEC. 3. The provisions of this Act shall not apply to any major civil acquisition for which funds have been appropriated prior to the date of enactment of this Act.

SHAKY RECOVERY FOR CAMBODIA

Mr. PROXMIRE. Mr. President, I would like to call my colleagues' attention to the first of a series of articles by William Branigin on Cambodia which began Sunday, August 9, 1981, in the Washington Post. The focus of Mr. Branigin's series is what he calls Cambodia's "fragile convalescence from years of war and destruction."

After reading the first article entitled "Nation Ravished by War Struggles as Client State," I would like to share some thoughts with you. Perhaps with greater magnitude than any other country in this decade, Cambodia has suffered the loss of hundreds of thousands of its people.

From 1971 to 1975, the Khmer Rouge conducted merciless campaigns of forced relocation and mass murder. As William Branigin describes in his article, the Cambodians under a Vietnamese-installed government, are struggling to rebuild their lives and their economy.

Whether or not the brutal killings under the Khmer Rouge regime in Cambodia constituted genocide, the loss of human lives is real enough. The pain and devastation, the hunger, and the problems which accompany the atrocities committed in Cambodia persist long after the fall of Pol Pot's brutal Khmer Rouge rule.

Mr. Branigin's article reminds us of the serious never-ending ramifications of the Khmer Rouge rule. Some Cambodians, including high-ranking officials and educated residents, are fleeing the country. They want to leave because they fear a Khmer Rouge return, yearn for a better life, or lack confidence in the newly established government. Mr. Branigin points out that even now the Khmer Rouge is leading a guerrilla war against the government.

According to Mr. Branigin, the government still holds between 3,000 to 10,000 political prisoners in prisons which they refuse to let the International Committee of the Red Cross inspect. Cambodians must attend what are called the government's "political education courses." Flagrant violations of human rights occur everywhere.

Reminders of Cambodia renew the urgency to ratify the Genocide Treaty. After seeing the horrendous personal loss and destruction, the consequences of which can never be erased, we must make every effort to speak out against such heinous crimes as those which were committed in Cambodia.

What we, as Members of the U.S. Senate, can do is to ratify the Genocide Treaty without any further delay.

Mr. President, I yield back the remainder of my time and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without

objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR BOSCHWITZ

Mr. STEVENS. Mr. President, I ask unanimous consent that following the special order time of the distinguished Senator from West Virginia, the distinguished Senator from Minnesota (Mr. Boschwitz) be recognized for not to exceed 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Does the Senator wish the 10:30 deadline on the military pay bill to be extended?

Mr. STEVENS. If the time goes beyond the 10:30 deadline, Mr. President—I have discussed this with the majority leader—we are prepared to hold up the bill for such time as is necessary.

The PRESIDING OFFICER. Without

objection, it is so ordered.

RECOGNITION OF SENATOR ROBERT C. BYRD

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

SOVIET PROPAGANDA ON AFGHANISTAN

Mr. ROBERT C. BYRD. Mr. President, it has now been 21 months since the Soviets invaded Afghanistan. Yet, today, they are further away from victory than when the invasion was first launched. At least, that appears to be the case. As I stated in a speech before this body in July, the tenacity of the Afghan freedom fighters deserves the admiration of all the world's people. Some 85,000 Soviet troops and the most modern equipment in the Russian army and air force cannot subdue this fiercely proud people.

Apparently, Soviet military planners are coming to the same conclusion. Last month, the Atlanta Journal and Constitution carried a story from the London Daily Telegram entitled: "Soviets Frank-

ly Admit Afghans Tough."

As a result, the Soviet propaganda machinery is now preparing the Russian people for a long stay in Afghanistan. The propaganda twists in justifying the continued occupation of Afghanistan, however, must even stretch the imagination of the average Russian citizen.

As the article pointed out:

Recent reports (in the Soviet press) seem designed to underline the continuing need for Soviet military involvement and also to reassure people worried about their sons or relatives serving in Afghanistan.

Even the Soviet military paper, Red Star, has given up contending that Afghanistan is returning to normal. However, the Red Star characterizes the Afghan freedom fighters as bandits who continue to make furious attacks on villages, often killing villagers and local officials.

Unfortunately, the only bandits in Afghanistan are Soviet troops whose indiscriminate use of helicopter gunships and massive artillery barrages has taken an immense toll in civilian casualties.

The outrageous nature of official Soviet propaganda can be found in the description of a Tass report on the fighting in Afghanistan.

As the article stated:

A recent Tass report described an attack by 700 guerrillas on a government outpost held by only 43 Afghan frontier guards. The fighting lasted for four days until the rebels fied into Pakistan, Tass said, leaving behind quantities of American, Chinese and British weapons.

Reports coming out of Afghanistan prove the contrary. The bulk of the arms being used by the rebels in Afghanistan have been those captured either from the Soviets or fleeing Afghan army units.

In sum, for all the Soviet propaganda being used to prepare the Russian people for a long stay in Afghanistan, the Red Army still faces a massive insurrection in that small, Moslem country which will never be subdued. While attempting to fool the Russian people, Soviet leaders and military planners are only fooling themselves if they believe in the propaganda they are feeding their own people.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the Record, as follows:

[From the Atlanta Journal and Constitution, Aug. 16, 1981]

SOVIETS FRANKLY ADMIT AFGHANS TOUGH— HOME FRONT APPARENTLY BEING READIED FOR LONG STAY FOR ARMY

Moscow.—The Soviet press is being unusually frank about the level of activity and military strength of guerrillas fighting Soviet troops in Afghanistan.

Moscow may intend to make Soviets realize that the Soviet army, which entered Afghanistan in December 1979, will be engaged there for some time to come.

Recent reports seem designed to underline

Recent reports seem designed to underline the continuing need for Soviet military involvement and also to reassure people worried about their sons or relatives serving in Afghanistan.

Red Star, the Soviet army paper, has given up contending that Afghanistan is "returning to normal" after the Soviet intervention 20 months ago. Friday's issue described in some detail the threatening level of rebel operations.

"Bandits," as the paper calls the guerrillas, were making "furious" attacks on villages, often killing villagers and local officials.

One unit of Afghan government troops had recently had to carry out more than 100 anti-guerrilla operations near the Pakistan border, the paper said, Afghanistan could always rely on "the selfless assistance" of the Soviet bloc and the guerrillas were doomed to defeat.

A recent Tass report described an attack by 700 guerrillas on a government outpost held by only 43 Afghan frontier guards. The fighting lasted for four days until the rebels fled into Pakistan, Tass said, leaving behind quantities of American, Chinese and British weapons.

While Soviet casualties are hardly ever mentioned, some of the latest reports indicate that the Soviet Union is, after all, having to take domestic opinion into account

when considering its future role in Afghanistan.

Komsomolskaya Pravda, the paper for young Russians, carried a letter from the mother of a Soviet soldier serving in Afghanistan who wrote, "I am very worried about him. In his letters there is not one word about his duties. He only writes that everything is fine. But I can get no rest."

The paper's Kabul correspondent reported that she could be proud of her son, a recruit with only six months' military experience. "I understand your concern," the reporter

"I understand your concern," the reporter wrote, "but I would like to remind you that Sasha, having put on the uniform of a Soviet soldier, defends the most precious ideals both for himself and for us—world peace and happiness and the peace of our motherland." The Kabul correspondent acknowledged that "it is difficult to serve in Afghanistan" and concluded that it was only "our Soviet way of life" which "helps our 18-year-old boys to endure difficult burdens."

Their spirit was also sustained "by the understanding that their help is very much needed in Afghanistan."

"Soldiers mature very quickly in Afghanistan" the correspondent added. "The severe everyday life of a soldier demands that the young lads be responsible, well-composed and able to make quick decisions on which the lives of many other people may depend."

The correspondent described the heroism of a young Soviet tank driver escorting a convoy of Soviet trucks carrying bread. His tank fell into a 10-foot trap dug by rebels but the driver and his crew remained in the hole until the convoy had driven over them

to safety.

A U.S. State Department assessment issued last week said Soviet and Afghan government forces seamed to be losing ground to the rebels, who were "maintaining impressive momentum." But the State Department saw no sign that Moscow was ready to abandon its stand in Afghanistan.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from West Virginia has 16 minutes remaining.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. President, I ask unanimous consent that I may reserve the remainder of my time and that following the statement by Mr. Boschwitz, Mr. Bradley may utilize up to 5 minutes or more of my time if he needs it.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The Senator from Minnesota.

THE AGRICULTURE BILL

Mr. BOSCHWITZ. Mr. President, we appear to be getting near consideration of a bill which will affect the agriculture scene for 4 years, the 1981 agriculture bill.

In the Agriculture Committee, we held 24 or 25 sessions, of an average length of 4 hours each. Finally, together with the administration, we came up with an agricultural bill that was not particularly pleasing to any of us; but, on the whole, one we thought was fair. On the whole, it has been accepted by the agriculture community—not without some trepidation, not without some reserva-

tion-but nevertheless it has been accepted.

Now the administration comes to us and announces that, within a very few days, when the agriculture bill comes to the floor, we should work out our differences and proceed. What the administration proposes is markely different than what was passed in committee. What they propose in no way conforms to the reconciliation instructions that were issued earlier in the year.

Worst of all, Mr. President, even though we worked out a bill, went home with that bill, talked to our constituents about the bill, and had our constituents participate in the passage of the bill, changes simply cannot occur with only 3 or 4 days' notice.

Nevertheless, the administration now wishes to change the rules, to change entirely the agriculture bill that we will have before us. It is very unclear in my mind that the Senate will agree to that type of practice.

This administration and the last administration, through its use and continuation of embargoes, have upset the markets in this country drastically. That, combined with the loss of crops, is really the cause of a disastrous agricultural crisis.

I feel this particularly in my State of Minnesota. Our prices are perhaps among the lower ones in this country, because transportation costs are so high in bringing products to market.

We simply cannot exist with corn at \$2.31 or \$2.40, wheat somewhere between \$3.50 and \$3.60. The Government will have very large deficiency payments, particularly on wheat.

We cannot live with the dairy supports the administration now wishes to offer us.

During our consideration of the agriculture bill, we were told we had to conform to a budget reconciliation instruction of \$2.135 billion. That was the total amount of money. Through a great deal of deliberation, we worked out to virtually that amount, within a few million dollars. Now the Department of Agriculture reestimates what we did. It is no longer \$2.2 billion. It is now \$4.2 billion, and what the administration suggests is going to cost \$3.9 billion.

What has happened to the reconciliations instructions? Did the Budget Committee, on which I also serve, just go through an excise during the spring of this year?

Are the people on Wall Street, who have some qualms about what is happening in this body, correct when they say that we are not serious, that we are not going to abide by the budget targets, that we are not going to abide by the reconciliation instructions? I think they may be right, because what I see in the agriculture bill is that we are going to be spending not \$2.23 billion but \$3.9 billion. Not only that, but also, the figures that the administration gives us change with remarkable rapidity.

Last Friday, the dairy aspect of the bill was estimated at \$997 million. That is the administration plan. The Senate bill, S. 884, was thought to be \$1.167 billion. This week, there are different figures

again, the administration's plan being approximately \$1.058 billion and the Senate's plan \$1.228 billion. All the figures have changed. They have changed with great rapidity.

The Secretary wants discretion to establish a 70-percent parity base and then not give increases as inflation works its will upon the farm community of this Nation. I simply cannot agree to that. I simply will not agree to that.

The most disturbing aspect of the entire situation is that I thought we had worked out an arrangement, a deal—call it what you will—that we had worked out, between myself and a high member of the administration, an arrangement on which way dairy was going to go.

The same member of the administration now tells me that we did not work out a deal at all. There I was in my office, sitting and listening and talking and agreeing, and he agreed with me. Now he says he did not agree at all. Well, in that case, I am going to take the interests of the farmer and not take the interests of the administration.

I was a businessman before I came to the Senate, and by us, a deal is a deal. In the Halls of the Senate and Congress, very often businessmen are excoriated; very often businessmen are thought to operate on principles that are not very nice

I have made many deals in my life, and we stuck by them, as we do in business, as the Presiding Officer (Mr. Murkowski) knows from his background. Some deals do not work out very well, and you have to make adjustments, and sometimes you have to renegotiate them. But, by and large, a deal is a deal, and with me that is the way it operates. If this administration is not going to operate in this way, then they will not get the cooperation of the Senator from Minnesota as they have tried to pass this agriculture bill.

Mr. President, 70 percent of parity is a figure that has never existed in this country. Since the parity system has begun, 70 percent of parity is a figure we have never had to revert to in order to get a balance between production and consumption.

Production this year is going to be about 132 billion or 133 billion pounds, on a fluid basis. in the milk industry. Last year, it was 127 billion pounds. That is indeed a raise. I fully understand that in a commodity such as milk or any other commodity.

My business career had to do with commodities; and when production goes up approximately 4 or 5 percent and consumption does not go up, there is great pressure on the prices.

But nevertheless it should be a manageable situation.

For the last 10 years parity has not gone below 78 percent. As a matter of fact, in 1974 the average percentage of parity for that year was 78 percent.

The PRESIDING OFFICER. The time of the Senator from Minnesota has expired.

pired.
Mr. BOSCHWITZ. Mr. President, may
I yield myself an additional 3 or 4 minutes?

The PRESIDING OFFICER. It will take unanimous consent.

Mr. BRADLEY. Mr. President, how much time remains on the side of the minority?

The PRESIDING OFFICER. Sixteen minutes.

Mr. BRADLEY. Mr. President, I am pleased to yield 4 additional minutes to the Senator from Minnesota from the minority side.

Mr. BOSCHWITZ. Four minutes will be sufficient.

The PRESIDING OFFICER. The Senator from Minnesota is recognized for 4 additional minutes.

Mr. BOSCHWITZ. Mr. President, thank you very much.

Mr. President, in any case commodities indeed do move around in price a great deal when production goes up.

I might say that one of the great problems that we have not only in dairy but in the other commodities is a low price of the commodity, the fact that it is more profitable to feed a milk cow than it is to sell corn on the marketplace, and as a result we are getting more production.

But this administration, as the administration before it, bears some blame for the low prices of agricultural products and that, of course, is because of the embargo. This administration will not make clear to us what its position is going to be on the embargo provisions of S. 884, whether or not it will support the embargo provisions of S. 884. If it will not, the administration certainly will run into trouble from this Senator and from a number of other Senators as well.

Mr. President, when we take a customer as large as the Russians were out of the marketplace for a year and a half, and then we have additional continuing high production, there is no question that commodities are going to vacillate in price.

My experience is that when production goes down 2 percent, the price will probably go up 12, 14, 18 percent, and vice versa. When there is overproduction by a few percentage points it has a correspondingly far greater impact on the price. So that 2, 3, or 4 percent overproduction, at least in the commodities that I have been familiar with in my life, can reduce those prices by 20 percent.

I spoke to this administration before the embargo was lifted, that before it takes away all its leverage it should begin negotiations with the Russians. I am a businessman, as I mentioned. If someone comes to me and says, "You cannot buy my product, I am going to embargo it to you," and then a year and a half later comes to me and says, "Well, the embargo is off," I know exactly what my reaction would be, and I know exactly why we are having difficulty in making arrangements with the Russians and the fact that we did not exercise what leverage the embargo gave us but just lifted it unilaterally without making a new deal with the Russians is in my judgment not exactly the way, as I say, a businessman would have gone about it.

Mr. President, the farmers of this

country are having a difficult time indeed. People think that there are giveaway programs for the farmers. There are not giveaway programs for the farmers.

We are going to fight this farm bill if we have to in order to see that the farms of this country survive.

I see in the chamber my colleague from Iowa, who I know is so interested in soil conservation. As long as we have prices that are so low and as long as the farmers have to plant fence row to fence row there will not be such a thing as conservation.

Mr. President, I wish to go on record as being opposed to what I see coming down from the administration, and I wish to tell, in this public way, the members of the administration that I intend to vigorously oppose their positions as they develop them, if they develop them in the manner I have seen.

I yield the floor.

RECOGNITION OF SENATOR BRADLEY

The PRESIDING OFFICER. The Senator from New Jersey is recognized.

HIGH INTEREST RATES

Mr. BRADLEY. Mr. President, I rise today to make a few comments about the state of the economy and in particular to call to the attention of Senators an article in today's Wall Street Journal, since many of my colleagues are mentioned in the article.

Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GOP, UPSET BY HIGH INTEREST FEES, RETURNS TO CONGRESS WITH TALK OF CREDIT CON-TROLS

(By Albert R. Hunt and Dennis Farney)

Washington.—Congressional Republicans, who went home only a month ago euphoric over President Reagan's budget and tax victories, returned here in a state of political panic over high interest rates, with some even suggesting such radical solutions as controls.

On Wall Street, bond prices surged on talk of credit controls.

"I have not witnessed the sort of anger and indignation I'm seeing today in a long time," Senate Majority Leader Howard Baker said in an interview. "On the floor, people are talking about credit controls, reorganizing the Federal Reserve, a windfall profits tax on interest income, and wage and price controls," noted the Tennessee Republican, adding with some astonishment: "Some of this is coming from Republicans."

Similarly, House Republican Leader Robert Michel of Illinois suggested a jittery Congress might resort to credit controls or tougher regulations of financial institutions or might attack the Federal Reserve System unless "something gives" in the next 90 days. "We can't live with a 20 percent prime rete." Rep. Michell said. "I'm a political animal. And for our political fortunes, there's got to be some movement."

got to be some movement."

It still seems unlikely there's any serious prospect of such drastic legislative actions, although analysts attributed yesterday's bond market rally to the speculation of pos-

sible credit controls. Sen. Baker and Rep. Michel, for example, oppose all suggestions

of any controls.

But this political climate is apt to make it much tougher to enact a further round of spending cuts that the Reagan administration feels is necessary to calm the money markets. "This makes it very difficult to get a second round of budget cuts," acknowledged Sen. Baker. "Already Senators are saying to me, 'What the hell difference does it make. If we cut another \$10 billion to \$15 billion, they (the financial community) will just come back and ask for another \$15 billion cut."

The most likely vehicle for seeking further spending reductions for fiscal 1982—only a month after Congress approved a \$35 billion cutback in that budget--will be to give President Reagan unprecedented authority to impound, or withhold, congressionally appropriated funds. Sen. Baker said he is still attracted to that idea and believes that safeguards, including prescriptions on what can be impounded and allowing Congress to veto such actions, could be in-

Sen. Baker said that if he moves on this proposal it probably would be attached to the legislation to increase the debt ceiling. which must be approved by the end of this month. And yesterday President Reagan termed the impoundment proposal a "very interesting" idea that would be "very help-

ful" in curbing spending.

But an important part of the 1974 legislation creating the congressional budget process was to explicitly outlaw White Hovse impounding of funds. Democratic leaders. including House Speaker Thomas O'Neill of Massachusetts and Senate Minority Leader Robert Byrd of West Virginia, underscored that point yesterday. "This proposal sounds won't have to vote on any tough specific cuts," charged House Budget to me like a bailout for Republicans so they cuts," charged House Budget Committee Chairman James Jones (D., Okla.).

Even some conservative Democrats, such as Texas Rep. Charles Stenholm, who have provided the critical support for Ronald Reagan's economic victories this year, were negagan's economic victories this year, were negative to proposals allowing the President to impound funds. "I've got problems with that," Rep. Stenholm said. "I would much rather Congress maintain and exercise its prerogatives here."

Still, most lawmakers say President Reagan remains as popular as ever with most voters. Thus apart from the battle over impounding, they think he might be able to persuade Congress to approve some further budget cuts, though this may necessitate some presidential vetoes.

But, as even many Republicans emphasize, these cuts will have to include defense as well as domestic social programs. can't be 80 percent social programs and 20 percent defense." predicted Sen. Bob Pack-

wood (R., Oreg.).

Sen. Packwood spent much of August in his home state. When asked what were the three major concerns of voters, he replied: "Interest rates, interest rates and interest rates." Yet so far he noted records Yet so far, he noted, people aren't blaming Ronald Reagan. "There is almost a William Jennings Bryan feeling (among his constituents) that the Eastern bankers are doing us in. We're being manipulated by the Federal Reserve and the Wall Street boys, and it's not Reagan's fault."

Likewise, Rep. Delbert Latta (R., Obio) said, "No matter who you talked to back home, Republican or Democrat, that's all you heard: Interest rates." And yesterday Sen. John Stennis (D., Miss.), one of the most senior members of the Senate, intro-duced a bill that would establish a commission to find a way to lower interest rates, while calling for Senate hearings for "tem-

porary emergency actions" to lower interest

All of this is very frustrating to some of the architects of the President's budget and tax cut initiatives on Capitol Hill. "I find it incredible that people up here already are asking why the Reagan economic plan isn't said Rep. Barber Conable working," N.Y.), the top Republican on the House Ways and Means Committee, "For God's sake, it doesn't even take effect until Oct. 1.

Rep. Jack Kemp (R., N.Y.), the political odfather of the President's "supply side" godfather of the President's "supply side" economics, said, "I think a lot of us (Republicans) want to focus attention on monetary reform now. The No. 1 objective has to be to get the central bank of the U.S. back to the conduct of a credible monetary policy." That is Rep. Kemp's shorthand way of advocating a return to the gold standard, which, following the negative market reaction to the huge tax cut, is what many supply-siders now say is all that's needed.

House Speaker O'Neill said that the administration's supply side economics was a "house of cards" and that, during August, "the wind blew it down." As a result, suggested House Democratic whip Thomas Foley (D., Wash.), Congress will be more s'reptical of subsequent White House economic pro-

posals.

Whatever the case, it now is clear that the economic issue, which dominated this congressional session before the August reces will continue to do so for the foreseeable future. But there are several other important issues on the congressional platter during the rest of this year. And many of them are divisive, too, including extensions of the Clean Air and Voting Rights Acts, a farm bill, a bitter partisan battle over Social Security, a big communications bill and a revision of federal regulatory practices.

But one of the toughest battles, in the Senate, will be over the administration's proposal to sell sophisticated radar planes to Saudi Arabia. Although Presidents rarely lose major foreign policy initiatives, especially early in their terms, this one has generated strong opposition from Israel and on Capitol

Hill

Mr. BRADLEY. Mr. President, the headline of this article says:

GOP, upset by high interest fees, returns to Congress with talk of credit controls.

The article goes on to say that a number of Senators and Congressmen have said that because of the high interest rates we will need credit control. There is also talk of reorganizing the Federal Reserve, talk of a windfall profit tax on interest income, and talk of wage and price controls.

Mr. President, I must say that I would read the news of such proposals with a certain degree of amusement if the high interest rates were not so painfully damaging the expectations of Americans

about our economic future.

This article, I think, reflects what Members of Congress, Senators and Congressmen, heard over the August recess as they traveled across their States sounding out the public's reaction to the Reagan economic program and its assessment of the economic prospects for individual citizens in each State.

Mr. President, the Reagan program was enacted during the first week in August. He got everything he wanted. He got his tax cuts. He got budget cuts. But since that time there have been a few ominous developments. Within a month of the enactment of the Reagan economic program, the stock market dropped 100 points as soon as its implications had sunk in. The fact is that

there is no bond market at the present moment.

Yesterday, I had a conversation with one of the leading financiers in my State who said that if a municipality wanted to get money in today's climate, it would have to offer a tax-free interest rate of close to 12 to 15 percent. Incredible.

Mr. President, evidently someone is not buying the rosy future that this administration put forth to the American public. They are not buying the rosy future that it was said would inevitably result from the President's economic program.

In fact, if this morning's Wall Street Journal article is any gage, I would say that panic has set in. One month after Congress has enacted this economic miracle program, people, including Republicans mind you, are scurrying around and talking about a windfall

profit tax on interest income.

Mr. President, I cannot believe my eyes when I read this. Last year, through hours of debate on a windfall profit tax on oil, Senators on the other side of the aisle endlessly extolled free markets. They said, "Do not impede the marketplace." Now, by imposing a burdensome windfall profit tax income, are they talking about a windfall profit tax on interest or about wage and price controls? Now I realize that the last wage and price controls were applied by a Republican administration in 1971. I realize that. And I realize that when a program looks doomed and inflation is running at a 15.2 percent annualized rate as it was in July, there is a tendency to say, "Well, let us have some controls; the Government has to step in."

Is this what the supply-side economic miracle will bring us? A new panicdriven round of economic controls?

It is astonishing to hear that Senators and Congressmen, returning to the Congress after hearing the horrors of high interest rates, say they want a windfall profit tax on interest income, wages and price controls, a reorganization of the Federal Reserve? Mr. President, the reaction of financial markets are sending people into panic, for if I have ever heard panic, this is it.

I would call attention to what one Senator said that he felt when he talked to people in his State. It was a Western State. "There is almost a William Jennings Bryan feeling-among his constituents-that the Eastern bankers are doing us in. We are being manipulated by the Federal Reserve and by the Wall Street boys, and it is not Reagan's fault." Not Reagan's fault, but the fault of Eastern bankers?

Well, Mr. President, I know in past years there has been a lot of snake oil sold in a lot of carnivals across this country, but if you believe that this economic situation is caused by some financial conspiracy instead of by the underlying weaknesses of the economic program anticipated by the market, you will believe in fairy tales. But this perhaps is what the administration and his supporters want us to believe?

I see that the Senator from Nebraska (Mr. Exon), who has spoken often and long about the dangers of this economic program, is on the floor now.

Well, Mr. President, it is very clear the reaction of Wall Street to the President's program is not a mystery. If you are in the business of making money by selling money, it is the same as if you are in the business of making money by selling cars or selling oil. And those in the business of selling money clearly see that the President's program is designed to drive up the price of their product. People on Wall Street may have voted one way at the ballot, but they are voting quite a different way with their dollars. This is not because they are rash or evil, but because they are prudent. They have projected the economic future that will result from this economic policy.

The reason interest rates are 20 percent today, with little prospect that they are going to come down in the next couple of months, is that there is no sound fiscal policy in place. As we said on this floor at least 15 times through the debate in the last part of July, there are two major ways to create a budget deficit. One way is to spend ourselves into a frenzy, and the other way is to enact excessive tax cuts that will totally unbalance the budget. The latter is precisely what the financial markets know will

happen.
Since the President introduced his economic policy it has been this side of the aisle, including the Senator from Nebraska and me along with many others, who have said, "You cannot increase defense spending to the level the administration has proposed, and cut axes to the level that they have achieved, and offer the budget cuts they have offered, and still not expect something close to an economic crisis, because the resulting imbalance of fiscal stimulus over reduced spending over the next 3 years is more than \$100 billion."

So, Mr. President, I rise today certainly not with any glee about our economic circumstance, but with some degree of ironic amusement that supporters of the President's program may now be panicked at its consequence, to the extent of suggesting a windfall profit tax on interest income, or wage and price controls, or credit controls, or reorganization of the Federal Reserve. And some of them believe that it is all necessary because of some kind of banker conspiracy. Instead. Eastern they should simply get out their budget books, as the Senator from Nebraska has done and is doing, look at what the budget cuts are, look at the size of the tax cuts and the increases in defense, and then tell me whether interest rates are at 20 percent because of a conspiracy or because of irresponsible fiscal policy? The answer is that it is irresponsible fiscal policy.

There are many Senators in this body who had a tough vote on budget cuts. I voted for the budget cuts in the final analysis, as did the Senator from Nebraska. That was not an easy vote, but we made that vote because we felt inflation was the major problem in this country, and that getting the budget under control was essential.

But what did this body do after we

went through all that pain and suffering and bit the bullet? We gave it all away. We gave it all away because of the belief in the miracle of supply-side economics.

Well, we are seeing what is happening now. The supply-side economists in this country, confronted with 20-percent interest rates, are saying what? Maybe we should reconsider? No, they are saying let us go to the gold standard, the gold standard is going to come in and save this economy from 20-percent interest rates.

These fairy tales are multiplying at such speed that I think we are going to have to write a book. Instead of "Grimm's Fairy Tales" it will be "Supply-Side Fairy Tales." But it will not be pleasant reading, because our economy is the victim.

So, Mr. President, I rise today simply to say that we cannot panic; we have to address the problem rationally, and that means taking some dramatic action to correct the fiscal imbalance.

The administration is talking about cutting proposed defense spending, which is probably a good idea; they also are talking about some additional cuts in nondefense areas. That would be very difficult, but it may be possible. But none of those things is going to solve the rising deficit and rising interest rate problem, and certainly not within the next 6 months to a year. One way we might consider if we were going to try to put this budget back into balance now is to defer some of the goodies that were passed out in the recent tax legislation. Why? For the best possible reason. To get our economy back into shape, to move the Federal budget toward balance into balance, so that those interest rates come down, and we can conduct some healthy debate here about the future economic growth potential of the economy.

So, Mr. President, I urge some prudence and careful think, I urge a rational approach to the problem, looking again at both the spending and the tax side. Then hopefully, we will be able to get the economy back on the stable path of growth.

The PRESIDING OFFICER. The time of the Senator from New Jersey has expired.

Mr. EXON addressed the Chair. The PRESIDING OFFICER. The Senator from Nebraska is recognized.

Mr. EXON. Mr. President, I would like to make inquiry of the Chair as to the time allocation, advising the Chair that I would seek 5 minutes to make remarks addressed to the comments that have just been made by my distinguished colleague from New Jersey. Is there time that could be allotted to me with what stands before the Senate at this moment?

The PRESIDING OFFICER. It would take unanimous consent to accommodate the Senator.

Mr. EXON. Mr. President, I ask unanimous consent to allow me to speak for up to 5 minutes.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? The Chair hears none, and it is so ordered.

Mr. EXON. I thank the Chair.

Mr. President, I want to congratulate my friend and colleague irom New Jersey for the remarks he just made.

As I came on the floor he was mentioning a very prominent Nebraskan by the name of William Jennings Bryan, who has been a favorite of mine for some time. Generally I have shared the thoughts of William Jennings Bryan regarding Wall Street. Maybe my friend from New Jersey does not, but I think basically William Jennings Bryan hit the nail on the head. So I stand here not to defend Wall Street but to compliment the Senator from New Jersey for the statements he has just made.

I think it is rather interesting, Mr. President, that there is nearly total agreement on the reasons for the difficulties this Nation currently faces between the Senator from New Jersey and this Senator from Nebraska. It need not be said, but I think it should be said at this juncture.

Generally speaking, from a philosophical standpoint and using the normal guidelines of the U.S. Senate. I think there would be little argument with the thought that the Senator from New Jersey may fall on the liberal side of general policy and the Senator from Nebraska on the conservative side. I think it is rather interesting, therefore, that we seem to almost totally agree on the very fundamental problem of what is causing the greatest difficulty with the economy of the United States today, and it is simply the unrealistic approach of the Reagan administration that many of us stood on this floor and stated time and time again. Although I have not discussed this with my friend from New Jersey, I hope that he will join with me once again in introducing once again the amendment that was unfortunately defeated on the floor of this Senate the last part of July, which was the only amendment that addressed the key problem facing our economy today, and that is the ruinous high interest rates. It was shunted aside. I said during that debate, Mr. President, that I suspected that those on the other side of the aisle would march like lemmings to the sea once again to oppose that amendment which was the only chance that we had to make the President's economic program work.

Why is it not working? The Senator from New Jersey explained it very well. Yes; we went through blood, sweat, and tears and we supported and voted for a \$34.4 billion cut in social programs for fiscal year 1982. And yet, while we were doing that, Mr. President, because of the unrealistic projections by the administration, saying back in March that the average cost of the borrowings of the Federal Government would be 8.9 percent for the rest of 1981 and all of 1982. They were wrong. They finally fessed up to it and faced reality in July. just before we left, and they said that increase would be not 8.9 but up to 10.5 That does not sound like very much. Mr. President, but that is the equivalent of a \$17.1 billion increase in cost to the taxpaver and to the budget of just carry-ing the cost of Federal borrowing. I think that is too low. If you will look at

the CBO estimates that were released yesterday and if you will look at the futures market you will see that rather than 10.5 percent the cost of the Federal borrowings are likely to be for the same period somewhere between 12 and 13 percent, if not higher.

So, Mr. President, if you will do simple arithmetic you will see that while we went through blood, sweat, and tears to knock \$34 billion to \$35 billion out of the social programs, we gave away \$17.1 billion in increased costs, and I suspect that the real cost will be much higher than that. So in the end you will see that we did the glorious thing here of cutting \$34 to \$35 billion out of social programs and at the same time give it away in increased interest costs.

There is no way that the President's economic program is going to work-and I hope it does work. It is not going to work with the high interest rate policies of this administration in tandem with the Federal Reserve System.

The PRESIDING OFFICER. The Senator's 5 minutes has expired.

Mr. EXON. I ask unanimous consent just for 1 additional minute.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. EXON. I suspect that the overall problems are not anyone's fault in particular but all of our faults by not being realistic on fiscal policy. Mr. President, 2 and 2 still make 4, and 2 and 2 do not make 3 regardless of who does the figuring or if we put it through computers.

I think if we are ever going to solve our problems, we are going to have to stop the wishful thinking, be honest with the American people and get with it. I thank the Chair.

UNIFORMED SERVICES PAY AND BENEFITS ACT OF 1981

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of S. 1181. which the clerk will state by title.

The assistant legislative clerk read as follows:

A bill (S. 1181) to amend titles 10 and 37, United States Code, to increase the pay and allowances and benefits of members of the uniformed services and certain dependents, and for other purposes.

"COMMISSIONED OFFICERS!

The Senate proceeded to consider the bill which had been reported from the Committee on Armed Services with an amendment to strike out all after the enacting clause, and insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Uniformed Services Pay and Benefits Act of 1981".

INCREASE IN BASIC PAY AND ALLOWANCES

SEC. 2. (a) In this section "uniformed services" has the same meaning given to that term by section 101(3) of title 37, United States Code.

- (b) Any adjustment required under the provisions of section 1009 of title 37, United States Code, relating to adjustments in the compensation of members of the uniformed services, that would otherwise first become effective beginning with any pay period in fiscal year 1982 shall not become effective. Effective with the first pay period beginning after September 30, 1981, the rates for each element of compensation specified in section 1009(a) of such title shall be as provided in subsection (c) of this section.
- (c) (1) The monthly basic pay authorized members of the uniformed services, based on years of service computed under section 205 of title 37, United States Code, shall be as follows:

"Pay grade	2 or less	Over 2	Over 3	Over 4	Over 6	Over 8	Over 10	Over 12	Over 14	Over 16	Over 18	Over 20	Over 22	Over 26	Over 30

Over 6	400".

YEARS OF SERVICE COMPUTATION FOR SUBMARINE DUTY INCENTIVE PAY

SEC. 6. Paragraphs (3) and (4) of section 301c(a) of title 37, United States Code, are amended by inserting ", not including, in the case of an officer, periods as an enlisted member prior to initial appointment as an officer" after "title", each place it appears.

SPECIAL PAY FOR DIVING DUTY

SEC. 7. Section 304 of title 37, United States Code, is amended to read as follows:

"§ 304. Special pay: diving duty

"(a) Under regulations prescribed by the Secretary concerned, a member of a uniformed service who is entitled to basic pay is entitled to special pay, in the amount set forth in subsection (b) of this section, for periods during which such member—

"(1) is assigned by orders to the duty of diving;

"(2) is required to maintain proficiency as a diver by frequent and regular dives; and

"(3) actually performs diving duty. "(b) Special pay payable under subsection (a) of this section shall be paid at the rate of not more than \$200 a month, in the case of an officer, and at the rate of not more than \$300 a month, in the case of an enlisted member.

"(c) A member may be paid special pay

under this section and incentive pay under section 301 of this title for the same period of service only if that member is assigned by orders to a hazardous duty described in section 301(a) of this title in addition to a duty described in subsection (a) of this section. However, if a member is paid special pay under this section, that member is not entitled to more than one payment of incentive pay under section 301 of this title.".

ENLISTMENT BONUSES

(a) Section 308a(a) of title 37,

United States Code, is amended—
(1) by striking out "\$5,000" and inserting in lieu thereof "\$7,500"; and

(2) by striking out the second sentence and inserting in lieu thereof the following: "The bonus shall be paid in periodic install-ments, as determined by the appropriate Secretary, except that the first installment may not exceed \$4,000 and the remainder shall be paid in equal periodic installments which may not be paid less frequently than once every 3 months.".

(b) (1) Chapter 5 of title 37, United States Code, is amended by inserting after section 308e the following new section:

"§ 308f. Special pay: bonus for enlistment in the Army

"(a) Under regulations prescribed by the Secretary of the Army, a person-

"(1) who is a high school graduate or has been awarded high school education equiv-

alency credentials;
"(2) whose score on the Armed Forces Qualification Test is at or above the fiftieth percentile; and

"(3) who enlists in the Army for a period of at least 3 years in a skill designated as critical.

may be paid a bonus in an amount prescribed by the Secretary of the Army, but not more

than \$3,000. The bonus may be paid in a lump sum or in equal periodic installments, as determined by the Secretary of the Army.

"(b) (1) Under regulations prescribed by the Secretary of the Army, a person who voluntarily, or because of his misconduct, does not complete the term of enlistment for which a bonus was paid to him under this section or a person who is not technically qualified in the skill for which a bonus was paid to him under this section (other than a person who is not qualified because of injury, illness, or other impairment not the result of his own misconduct) shall refund to the United States that percentage of the bonus that the unexpired part of his enlistment is of the total enlistment period for which the bonus was paid.

(2) An obligation to reimburse the United States imposed under paragraph (1) of this subsection is for all purposes a debt owed

to the United States.

"(3) A discharge in bankruptcy under title 11 that is entered less than 5 years after the termination of an agreement under this section does not discharge the member signing such agreement from a debt arising under such agreement or under paragraph (1) of this subsection. This paragraph applies to any case commenced under title 11 after September 30, 1981.

"(c) No bonus may be paid under this section with respect to any enlistment in the Army made after September 30, 1982.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 308e the following new item:

"308f. Special pay: bonus for enlistment in the Army.".

(c) The amendments made by this section shall apply to enlistments or reenlistments made after September 30, 1981.

ACTIVE-SERVICE AGREEMENTS FOR NUCLEAR QUALIFIED OFFICERS

Sec. 9. Notwithstanding subsections (a) and (b) of section 312 of title 37, United States Code, and under regulations pre-scribed by the Secretary of the Navy, the Secretary may permit an officer of the naval service who is performing obligated service as the result of an active service agreement executed under such section before January 1, 1981, to cancel that active-service agreement effective on the day before any anniversary of the day on which that agreement was executed and execute a new activeservice agreement under such section for one period of not more than four years. such cancellation of an existing agreement and execution of a new agreement may be effective on the day before an anniversary date occurring on or after January 1, 1981

TRAVEL AND TRANSPORTATION ALLOWANCES

SEC. 10. (a) (1) Section 404 of title 37, United States Code, is amended by striking out "Under regulations prescribed by the Secretaries concerned" in subsection (a) and inserting in lieu thereof "Except as provided in subsection (f) of this section and under regulations prescribed by the Secretaries concerned".

(2) Subsection (c) of such section is amended-

(A) by inserting "(1)" after "(c)";

(B) by redesignating clauses (1) and (2) as (A) and (B), respectively;

(C) by inserting "and as provided in paragraph (2)" before ", select his home"; and (D) by adding at the end thereof the fol-

lowing new paragraph: (2) A member described in paragraph (1)

of this subsection may select as his home-"(A) any place within the United States:

"(B) the place outside the United States from which such member was called or or-dered to active duty to his first duty station; "(C) any other place.

However, if a member selects as his home a place described in clause (C) of the preceding sentence, the travel and transportation allowances authorized by subsection (a) of this section may not exceed the allowances which would be payable if the place selected as his home were in the United States (other than Hawaii or Alaska).".

(3) Subsection (f) of such section is amended to read as follows:

'(f) (1) The travel and transportation allowances authorized under this section may be paid or provided to a member upon his separation from the service or release from active duty for travel which is actually performed and only if-

"(A) the member, on the date of his sepa-ration from the service or release from active duty, has served on active duty for a period of time equal to at least 90 percent of the period of time for which the member initially enlisted or otherwise initially agreed to serve; and

(B) the member's separation from the service or release from active duty is under honorable conditions, as determined by the

"(2) Clauses (A) and (B) of paragraph
(1) of this subsection shall not apply to any member-

(A) described in subsection (c)(1) of this section;

"(B) discharged under section 1173 of

title 10; or

"(C) separated from the service or re-leased from active duty under unusual circumstances, as determined by the Secretary concerned.".

(b) (1) Subsection (a) of section 406 of

(A) by inserting "(1)" after "(a)";
(B) by inserting "paragraph (2) of this subsection and" before "subsection (i) of this section"; and

(C) by adding at the end thereof the fol-

lowing new paragraphs:
"(2) The transportation and allowances authorized under paragraph (1) of this sub-section may be paid or provided to a member upon his separation from the service or

release from active duty only if—
"(A) the member, on the date of his separation from the service or release from active duty, has served on active duty for a period of time which is equal to at least 90 percent of the period of time for which the member initially enlisted or otherwise initially agreed to serve; and

"(B) the member's separation from the service or release from active duty is under honorable conditions, as determined by the

Secretary concerned.

The requirements of this paragraph shall not apply to any member (i) described in subsection (g)(1) of this section, (ii) discharged under section 1173 of title 10, or (iii) separated from the service or released from active duty under unusual circum-stances, as determined by the Secretary concerned

"(3) The allowances authorized under this subsection may be paid in advance.".

(2) Subsection (b) of such section is

amended-

(A) by inserting "(1)" after "(b)"; (B) by striking out "In" and inserting in

lieu thereof "Except as provided in paragraph (2) of this subsection, in";

(C) by adding at the end of paragraph (1), as designated by clause (A) of this paragraph, the following new sentences: "Temporary storage in excess of 180 days may be authorized. In those cases of permanent change of station in which the Secretary concerned has authorized transportation under section 2634 of title 10 of one motor vehicle owned by the member or his dependents and for the personal use of the member or his dependents, the member is

entitled to transportation of that motor vehicle to the point at which transportation authorized under section 2634 of title commences and from the point at which transportation authorized under such section terminates, or to reimbursement therefor."; and

(D) by adding at the end thereof the fol-

lowing new paragraph:
"(2)(A) The transportation and allowances authorized under paragraph (1) of this subsection may be paid or provided to a member upon his separation from the service or release from active duty only if-

"(i) the transportation (including the packing, crating, drayage, temporary storage, and unpacking) is commenced not later than 90 days after the date of such separation from the service or release from active duty:

"(ii) the member, on the date of his separation from the service or release from active duty, has served on active duty for a period of time which is equal to at least 90 percent the period of time for which the member initially enlisted or otherwise initially agreed to serve; and

(iii) the member's separation from the service or release from active duty is under honorable conditions, as determined by the

Secretary concerned.

The requirements of this paragraph shall not apply to any member (i) described in subsection (g) (1) of this section, (ii) discharged under section 1173 of title 10, or (iii) separated from the service or released from active duty under unusual circumstances, as determined by the Secretary concerned.

"(B) If nontemporary storage is authorized under subsection (d) of this section for a member to whom subparagraph (A) of this paragraph applies, the 90-day period provided for in clause (i) of such subparagraph shall not begin until such authorization for non-

temporary storage expires.".
(3) Subsection (g) of such section is

amended-

(A) by inserting "(1) after "(g)";

(B) by redesignating clauses (1) and (2) as (A) and (B), respectively; and

(C) by striking out all after the second sentence and inserting in lieu thereof the following new paragraphs:

"(2) If a shipment is made to a home described in section 404(c)(2)(C) of this title or to a location other than the home selected by the member and the cost of such shipment is in excess of that which would have been incurred if the shipment had been made to a location in the United States (other than Hawaii or Alaska), the member shall pay that excess cost.

- "(3) If a member authorized to select a home under section 404(c) of this title accrues that right or any entitlement under this subsection but dies before he exercises it, that right or entitlement accrues to and may be exercised by his surviving dependents, or his baggage and household effects may be shipped to the home of the person legally entitled thereto if there are no surviving dependents. However, if a shipment is made under circumstances described in paragraph (2) of this subsection in which the member would have been required to pay the excess cost of such shipment, the surviving dependents or the person legally en-titled to the baggage and household effects. as the case may be, shall pay that excess cost.
- "(4) Subsection (h) of such section is amended by striking out "and for this or his dependent's personal use" in clause (2) and inserting in lieu thereof "or his dependents and for the personal use of the member or his dependents.".
- (c)(1) Except as provided in paragraph (), (3), and (4) of this subsection, all amendments made by this section shall take effect on October 1, 1981, and shall apply to members who are separated from the service

or released from active duty on or after October 1, 1981.

The amendments made by subsection (b)(1)(C) which add a new paragraph (3) to section 406(a) of title 37, United States Code, shall take effect on the date of enact-

ment of this Act.

(3) The amendments made by subsection (a) (2) and subsection (b) (3) of this section shall take effect on October 1, 1981, and shall apply to members who are retired, placed on the temporary disability retired list, discharged, or involuntarily released on or after October 1, 1981, except that such amendments shall not apply to any member who before October 1, 1981, had completed eighteen years of active service.

(4) The amendments made by subsection (b) (2) (C) of this section shall take effect on the date of enactment of this Act.

TEMPORARY LODGING EXPENSES

SEC. 11. (a) (1) Chapter 7 of title 37, United States Code, is amended by inserting after section 404 the following new section:

"§ 404a. Travel and transportation allowances: temporary lodging expenses

"(a) Under regulations prescribed by the Secretaries concerned, a member of a uniformed service who is ordered to make a change of permanent station from any duty station to a duty station in the United States (other than Hawaii or Alaska) may be paid or reimbursed for subsistence expenses ac-tually incurred by the member and the member's dependents during a period not exceeding four days while occupying temporary quarters incident to that change of permanent station.

"(b) Regulations prescribed under subsection (a) of this section shall prescribe average daily subsistence rates for purposes of this section for the member and for each dependent. Such rates may not exceed the maximum per diem rates prescribed by or under section 404(d) of this title for the area where the temporary quarters are located. However, a member may not be paid or reimbursed more than \$110 a day under this section.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 404 the following new item:

"404a. Travel and transportation allowances: temporary lodging expenses."

(b) Section 411(a) of such title is amended by inserting "404a," after "(d)-(f),".

ADVANCE PAYMENT OF EVACUATION ALLOWANCES

SEC. 12. Section 405a(a) of title 37, United States Code, is amended by inserting after the second sentence the following new sentence: "Such allowances may be paid in advance.".

ADVANCE PAYMENT OF DISLOCATION ALLOWANCE

SEC. 13. Section 407(a) of title 37, United States Code, is amended by adding at the end thereof the following new sentence: "An allowance payable under this section may be paid in advance.".

TRAVEL AND TRANSPORTATION FOR MEMBERS SERVING CONSECUTIVE ASSIGNMENTS OVER-SEAS

SEC. 14. Section 411b(a) of title 37. United States Code, is amended—
(1) by inserting "(1)" after "(a)";
(2) by inserting "who is ordered to a con-

secutive tour of duty at the same duty station or" after "District of Columbia" the first time it appears; and

(3) by adding at the end thereof the fol-

lowing new paragraph:
"(2) If, because of military necessity, a
member authorized travel and transportation allowances under this subsection is de-

nied leave between the two tours of duty overseas, the member shall be authorized to use such travel and transportation allowances from his current duty station at the first time the member is granted leave.'

ENVIRONMENTAL AND EMERGENCY TRAVEL

SEC. 15. (a) Chapter 7 of title 37, United States Code, is amended by inserting after section 411b the following new sections:

"§ 411c. Travel and transportation allowances: travel performed in con-nection with leave from certain stations in foreign countries

"(a) Under uniform regulations prescribed by the Secretaries concerned, a member of a uniformed service, while serving at a duty station outside the United States in an area specifically designated for purposes of this section by the Secretary concerned, and each dependent of such member authorized to reside at his duty station, may be paid for or provided transportation-

(1) to another location outside the United States having different social, climatic, or environmental conditions than those at the duty station at which the member is serving;

"(2) to a location in the United States.

"(b) The transportation authorized by this section is limited to transportation of the member and each dependent of the member for one roundtrip during any continuous two-year tour and two roundtrips during any continuous three-year tour.

"§ 411d. Travel and transportation allowances: transportation incident to certain emergencies for members stationed abroad

"(o) Under uniform regulations pre-scribed by the Secretaries concerned, transportation for a member of a uniformed servstationed outside the United States (other than Hawaii and Alaska) may be provided from the area of the member's duty station to the United States, Puerto Rico, the Virgin Islands, or the possessions of the United States, incident to a personal emergency of the member.

"(b) Transportation under this section be authorized only upon a determination that Government transportation is not reasonably available, considering the nature of the personal emergency involved. The cost of transportation authorized under this section may not exceed the cost of Governmentprocured commercial air travel from the international airport nearest the location of the member at the time notification of the personal emergency is received or the international airport nearest the member's duty station-

"(1) to the international airport within United States (other than Hawaii and Alaska) closest to the international airport

from which the member departed; or "(2) to an airport in Alaska, Hawaii, Puerto Rico, the Virgin Islands, or the possessions of the United States, as determined by the Secretary concerned,

and return to either the international airport from which the member departed or to the international airport nearest the duty station of the member.

"(c) In this section, 'personal emergency of the member' means the death, serious injury, or serious illness of-

(1) the spouse of the member;

a child of the member (including a stepchild, an adopted child, or an illegiti-mate child whose alleged member-parent has been judicially decreed to be the parent of the child or judicially ordered to contribute to the child's support, or whose parent-age has been admitted in writing by the member):

"(3) a parent of the member (including a stepparent, parent by adoption, or any person, including a former stepparent, who has stood in loco parentis to the member at any

time for a continuous period of at least five years before the member became 21 years of age); or

(4) a brother or sister of the member (including a stepbrother or stepsister, a half brother or half sister, or a brother or sister through adoption).

"§ 411e. Travel and transportation allowances: transportation incident to certain emergencies for members performing temporary duty.

"(a) Under uniform regulations prescribed by the Secretaries concerned, a member of a uniformed service who is performing temporary duty away from his permanent duty station or is assigned to a ship or unit operating away from its home port may be provided transportation in kind imbursement therefore, or a monetary allow-ance at the rate prescribed in such regulafrom his place of temporary duty or his ship or unit to his permanent duty station, the home port of the ship or unit, or any other location, and return (if appli-cable), incident to a personal emergency of the member.

"(b) Transportation under this section may be authorized only upon a determination that Government transportation is not reasonably available, considering the nature of the personal emergency involved. The cost of transportation authorized under this section may not exceed the cost of Governmentprocured commercial air travel from the member's place of temporary duty or ship or unit to the member's permanent duty station or the home port of the ship or unit, and return (if applicable).

"(c) In this section, 'personal emergency of the member' means the death, serious injury, or serious illness of a dependent of the

member.

(b) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 411b the following new items:

"411c. Travel and transportation allowances: travel performed in connection with leave from certain stations in foreign countries.

"411d. Travel and transportation allow-ances: transportation incident to certain emergencies for members stationed abroad.

"411e. Travel and transportation allowances: transportation incident to certain emergencies for members performing temporary duty.".

UNIFORM ALLOWANCES AND ADVANCE PAY FOR MEMBERS OF THE ARMED FORCES HEALTH PROFESSIONS SCHOLARSHIP PROGRAM

SEC. 16. (a) Subsection (a) of section 415 of title 37, United States Code, is amended-(1) by striking out "or" at the end of

paragraph (2); (2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof ": or": and

(3) by adding at the end thereof the fol-

lowing new paragraph:

(4) upon reporting for the first period of active duty required by section 2121(c) of title 10 as a member of the Armed Forces Health Professions Scholarship program.'

(b) Section 1006 of such title is amended by adding at the end thereof the following new subsection:

"(i) Under regulations prescribed by the Secretary concerned, not more than one month's pay may be paid in advance to a member of the Armed Forces Health Professions Scholarship program upon reporting for a period of active duty required by section 2121(c) of title 10.".

MILITARY JUSTICE AMENDMENTS

SEC. 17. (a) Chapter 40 of title 10, United States Code, is amended-

(1) in section 701(a)-

(A) by striking out "and" at the end of clause (2);

(B) by striking out the period at the end of clause (3) and inserting in lieu thereof ; and"; and

(C) by adding after clause (3) the following new clause:

"(4) involuntary leave required to be taken under section 706 of this title.";
(2) by adding at the end thereof the fol-

lowing new sections:

"§ 706. Involuntary leave: appellate review of certain court-martial convictions

Under regulations prescribed by the Secretary concerned, a member of an armed force who has been sentenced by court-martial may be required to take leave pending completion of action under subchapter IX of chapter 47 of this title if the sentence, as approved by the officer exercising general court-martial jurisdiction under section 864 or 865 of this title, includes an unsuspended dismissal or dishonorable or bad-conduct discharge. The member may be required to begin such involuntary leave at any time on or after the date on which such sentence is approved by the officer exercising general court-martial jurisdiction. Such leave may be continued until any time on or before the date on which action is completed under subchapter IX of chapter 47 of this title.

(b) Any period of leave required to be taken under this section shall be charged first against any accrued leave to the member's credit on the day before the day such involuntary leave begins, unless the member elects to be paid for such accrued leave under subsection (c). If a member does not elect to be paid for such accrued leave under subsection (c) or does not have sufficient accrued leave to his credit to cover the total period of involuntary leave, the leave not covered by accrued leave shall be charged as excess leave. If a member elects to be paid for accrued leave under subsection (c), the total period of involuntary leave shall be charged

as excess leave.

(c) (1) A member who is required to take leave under this section and who has accrued leave to his credit on the day before the day such leave begins may elect to be paid for such accrued leave on the basis of the basic pay to which he was entitled on the day before the day such involuntary leave begins or, if he does not so elect, is entitled to pay and allowances during any period of such accrued leave required to be taken under this section.

'(2) Except as provided in paragraph (1) and in section 707 of this title, a member shall not accrue or receive any pay or allowances during any period of involuntary leave required to be taken under this section.

(d) No member required to take leave under this section shall become entitled to any right or benefit under section 2021 of title 38. United States Code, solely because of

any employment during such leave.
"(e) The provisions of section 974 of this ttile shall not apply to any member required to take involuntary leave under this section during any period of such involuntary leave. "§ 707. Payment for excess leave: disapproval

of certain court-martial sentences

"(a) A member-

"(1) who is required to take involuntary under section 706 of this title, any period of which is charged as excess leave;

"(2) whose sentence by court-martial to dismissal or dishonorable or bad-conduct discharge is set aside or disapproved by a Court of Military Review under section 866 of this title or by the United States Court of Military Appeals under section 867 of this title,

shall be paid, as provided in subsection (b). for the period of leave charged as excess leave, unless a rehearing or new trial is ordered and a dismissal or dishonorable or badconduct discharge is included in the result of the rehearing or new trial and such dismissal

or discharge is later executed.

"(b) A member entitled to be paid under this section shall be deemed, for purposes of this section, to have accrued pay and allowances on each day of involuntary leave charged as excess leave (except days of accrued leave for which the member has been paid under section 706(c)(1) of this title and which have been charged as excess leave). Such pay and allowances shall be deemed to have accrued in the lower of the pay grade held by the member on the day before the date his court-martial sentence was approved by the convening authority or any lower pay grade to which the member was reduced as a result of the court-martial sentence (including any reduction under section 858a of this title) if such reduction has not been set aside, disapproved, or otherwise vacated. Such a member shall be paid the amount of pay and allowance which he is deemed to have accrued, reduced by the total amount of his gross earnings from wages, salaries, tips, other personal service income, or unemployment or other public assistance benefits from any government agency during the period such member is deemed to have accrued pay and allowances under this subsection. Except as provided in the following sentence, when a member's sentence by court-martial to dismissal or dishonorable or bad-conduct discharge has been ordered set aside or disapproved-

"(1) payment shall be made within two months from the date of such order if no rehearing or new trial has been ordered;

"(2) payment shall be made within six months from the date of such order if a rehearing or new trial has been ordered but charges have not been referred to a rehearing or new trial within four months from date of such order;

"(3) if a rehearing or new trial has been ordered and a dismissal or dishonorable or bad-conduct discharge is not included in the result of such rehearing or new trial, payment shall be made within two months of the announcement of the result of such

rehearing or new trial; or

'(4) if a rehearing or new trial has been ordered and a dismissal or dishonorable or bad-conduct discharge is included in the result of such rehearing or new trial, but such dismissal or discharge is not later executed, payment shall be made within two months of the order which set aside, disapproved, or otherwise vacated such dismissal or discharge.

If a member is entitled to be paid under this section but fails to provide sufficient information in a timely manner regarding his gross earnings received from wages, salaries, tips, other personal service income, and unemployment or other public assistance benefits from any government agency when such information is requested under regulations prescribed under subsection (c) the periods of time established in the preceding sentence shall be extended until one month after the member provides such requested information.

This section shall be administered under uniform regulations prescribed by the Secretaries concerned. Such regulations may provide for the method of determining member's gross earnings during any period such member is deemed to have accrued pay and allowances, including a requirement that the member provide income tax returns and other documentation to verify the

amount of his earnings."; and

(3) by adding in the table of sections at the beginning of such chapter after the item relating to section 705 the following new "706. Involuntary leave: appellate review of certain court-martial convictions.

"707. Payment for excess leave: disapproval of certain court-martial tences.".

(b) Section 813 (article 13) of such title is amended-

(1) by striking out "Subject to section 857 of this title (article 57), no" and inserting in lieu theerof "No"; and

(2) by striking out "or the result of trial". (c) Section 832(b) (article 32(b)) of such title is amended by striking out the second sentence and inserting in lieu thereof "The accused has the right to be represented at that investigation as provided in section 838 of this title (article 38) and in regulations prescribed under that section.".

(d) Section 838(b) (article 38(b)) of such

title is amended to read as follows:
"(b) The accused has the right to be represented in his defense before a general or special court-martial or at an investigation under section 832 of this title (article 32) as follows:

(1) The accused may be represented by civilian counsel if provided by him.

"(2) Subject to paragraphs (3) through (6), the accused may be represented by-"(A) military counsel detailed under section 827 of this title (article 27); or

"(B) military counsel of his own selection if that military counsel is reasonably avail-

"(3) When the accused is represented by civilian counsel, military counsel detailed or selected under paragraph (2) shall act as associate counsel unless excused at the re-

quest of the accused.
"(4) When the accused is represented by military counsel of his own selection under paragraph (2) (B), any military counsel detailed under paragraph (2) (A) shall, subject to paragraph (5), be excused.

"(5) An accused is not entitled to be repre-

sented in his defense by more than one military counsel. However, a convening authority may, in his sole discretion—

(A) detail additional military counsel as assistant defense counsel; and

"(B) approve a request from the accused that military counsel detailed under paragraph (2)(A) act as associate defense counsel when the accused is represented by

military counsel of his own selection.

"(6) The Secretary concerned may, by regulations, define 'reasonably available' and may, under such regulations, establish procedures for determining whether military counsel selected by an accused under paragraph (2) (B) is reasonably available. Such regulations shall establish uniform policies to the fullest extent practicable, recogniz-ing the differences in the circumstances and needs of the armed forces and shall be reported to the Committees on Armed Services of both Houses of the Congress."

(e) Subsection (c) of section 867 (article 67(c)) of such title is amended to read as follows:

"(c) The accused may petition the Court of Military Appeals for review of a decision of a Court of Military Review within 60 days from the earlier of-

(1) the date on which the accused is notified of such decision of a Court of Military Review; or

"(2) the date on which a copy of such decision of a Court of Military Review, after being served on appellate counsel of record for the accused (if any), is deposited in the United States mails for delivery by first class certified mail to the accused at an address provided by the accused or, if no such address has been provided by the accused, at the latest address listed for the accused in the accused's official service record.

The Court of Military Appeals shall act upon

such a petition promptly in accordance with the rules of the court.'

(f) Section 869 (article 69) of such title is amended by adding at the end thereof the following new sentence: "When such a case is considered upon application of the accused, the application must be filed in the Office of the Judge Advocate General by the accused-

"(1) on or before October 1, 1983; or "(2) within two years after the date the sentence is approved by the convening authority or, in a special court-martial case which requires action under section 865(b) of this title (article 65(b)), the officer exercising general court-martial jurisdiction, whichever is later, unless the accused establishes good cause for failure to file within that time.

(g) (1) The amendments made by this section shall become effective 60 days after

the date of enactment of this Act.

(2) (A) The amendments made by subsection (a) shall apply to members whose sentences by court-martial are approved by the officer exercising general court-martial jurisdiction under section 864 or 865 (article 64 or 65) of title 10, United States Code, on or after the effective date of this section.

(B) The amendments made by subsection (b) shall apply to all persons held as the result of a court-martial sentence announced on or after the effective date of

this section.

(C) The amendments made by subsection (c) shall apply to investigations under section 832 (article 32) of title 10, United States Code, which commence on or after the effective date of this section.

(D) The amendments made by subsection (d) shall apply to trials by courts-martial which all charges are referred to trial on or after the effective date of this section.

- (E) The amendments made by subsection (e) shall apply to any accused with respect to a Court of Military Review decision which is dated on or after the effective date of this section.
- (F) The amendments made by subsection (f) shall apply to applications received in the Office of the Judge Advocate General on or after the effective date of this section.

MILITARY RECRUITING INFORMATION

SEC. 18. (a) The Congress finds and declares that in order for the Congress to carry out effectively its constitutional au-thority to raise and support armies, it is essential-

(1) that the Secretary of Defense obtain and compile directory information pertaining to students enrolled in secondary schools

throughout the United States; and

(2) that such directory information be used only for military recruiting purposes and be retained in the case of each person with respect to whom such information is obtained and compiled for a limited period of time.

(b) Section 503 of title 10, United States Code, relating to enlistments, is amended-(1) by inserting "(a)" before "The Sec-

retary ': and

(2) by adding at the end thereof the following new subsection:

"(b) (1) The Secretary of Defense is authorized to collect and compile directory information pertaining to each student who is seventeen years of age or older, or who is in the eleventh grade (or its equivalent) or higher regardless of age, and who is enrolled in a secondary school in the United States, its territories, possessions, or the Commonwealth of Puerto Rico.

"(2) Directory information collected and compiled by the Secretary of Defense under this subsection may be made available to the armed forces for military recruiting purposes

only.

"(3) Directory information pertaining to any person may not be maintained for more than three years after the date the information pertaining to such person is first col-lected and compiled by the Secretary of Defense under this subsection.

"(4) Directory information collected and compiled under this subsection shall be confidential and no person who has had access to such information may disclose such information except for the purposes described

in paragraph (2).

- "(5) The Secretary of Defense shall prescribe regulations necessary to carry out the provisions of this subsection and may authorize each Secretary concerned to issue further implementing regulations necessary to administer the program established under this subsection. Any regulations issued pursuant to this section shall be reported to the Committees on Armed Services of both Houses of the Congress. Any regulations issued by the Secretaries concerned shall be as uniform as practicable.
- "(6) In this subsection, 'directory information' means, with respect to a student, the student's name, address, telephone listing, date and place of birth, level of education, degrees received, academic grades and class standing, and the most recent previous educational agency or institution attended by the student.".
- (c) (1) The heading of section 503 of such title is amended to read as follows:
- "§ 503. Enlistments: recruiting campaigns: compilation of directory information'
- (2) The item in the table of sections at the beginning of chapter 31 of such title relating to section 503 is amended to read as follows:
- "503. Enlistments: recruiting campaigns; compilation of directory information.".
- (d)(1) Chapter 31 of title 10, United States Code, relating to enlistments, is amended by adding at the end thereof the following new section:
- "§ 520. Criminal history information for military recruiting purposes
- "(a) Each State and each unit of general local government of a State is requested to make available upon request, to the Secretary concerned any criminal history information maintained by or available to such State or unit of general local government which pertains to (1) any person who, within 90 days before the date on which such information was requested, has made application for enlistment in the armed forces, or any person who, within 90 days before the date on which such information was requested, has in connection with an application for enlistment also has made application for participation in a program of the armed forces which requires a determination of trustworthiness of persons who participate in such program.

"(b) In this section, 'criminal history information' means the following information with respect to any juvenile or adult arrest, charge, citation, or conviction of any person referred to in subsection (a): (1) offense; (2) date; (3) place; (4) age; (5) disposition;

and (6) court.

"(c) Criminal history information received under this section shall be confidential and no person who has had access to any infor-mation received under this section may disclose such information except to facilitate military recruiting.

"(d) The Secretaries concerned shall prescribe regulations necessary to carry out the provisions of this section, which shall be as uniform as practicable. Any regulations issued pursuant to this section shall be reported to the Committees on Armed Services of both Houses of the Congress.

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

'520. Criminal history information for military recruiting purposes.".

COMPUTING AUTHORIZED DAILY AVERAGE NUM-BER OF ENLISTED MEMBERS IN PAY GRADES E-8 AND E-9

SEC. 19. Section 517(a) of title 10, United States Code is amended—
(1) by inserting "the combined" before

"pay grades"; and

(2) by striking out "2 percent and 1 percent, respectively," and inserting in lieu thereof "3 percent, but not to exceed 1 percent in pay grade E-9,".

INCREASE IN RESERVE OFFICERS' TRAINING CORPS SCHOLARSHIPS

SEC. 20. Section 2107(h) of title 10, United States Code, is amended by striking out "6,000" and "6,500" and inserting in lieu thereof "8,000" and "9,500", respectively.

CLARIFICATION OF AUTHORITY TO TRANSPORT CERTAIN MOTOR VEHICLES

SEC. 21. Section 2634(a) of title 10, United States Code, is amended-

(1) by striking out "and for his personal use or the use of his dependents" in the first sentence and inserting in lieu thereof "or his dependents and for the personal use of the member or his dependents"; and

(2) by inserting "or his dependents" in the second sentence after "motor vehicle of

the member".

NOMINATIONS BY THE SUPERINTENDENTS OF THE SERVICE ACADEMIES

SEC. 22. (a) Section 4342 of title 10, United States Code, is amended by striking out subsection (d) and inserting in lieu thereof the following:

"(d)(1) Subject to paragraph (2), the Superintendent may nominate persons for appointment as cadets at the Academy. Nominations by the Superintendent may be made at any time, but not more than 50 such nominations may be made for appointment in any year.

"(2) Appointments of persons nominated under paragraph (1) may not displace any appointment authorized under clauses (2)-(7), (9), or (10) of subsection (a) and may not cause the total strength of the Corps of Cadets to exceed that authorized by subsections (a) and (b).".

(b) (1) Chapter 403 of such title, relating to the Military Academy, is amended by in-serting after section 4341 the following new

"§ 4341a. Cadets: appointment by the President

"Cadets at the Academy shall be appointed by the President alone. An appointment is conditional until the cadet is admitted.".

(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 4341 the following new item:

"4341a. Cadets: appointment by the President.".

- Section 6953 of title 10, United States Code, relating to appointment of midshipmen at the United States Naval Academy, is amended by adding at the end thereof the following new sentence: "An appointment is conditional until a midshipman is admitted.".
- (2) Section 6954 of title 10, United States Code, relating to appointment of midship-men at the United States Naval Academy, is amended-
- (A) by redesignating subsections (d) and (e) as subsections (e) and (f), respectively;

(B) by inserting after subsection (c) the following new subsection:

"(d)(1) Subject to paragraph (2), the Superintendent of the Naval Academy may nominate persons for appointment as midshipmen at the Naval Academy. Nominations by the Superintendent may be made at any time, but not more than 50 such nominations may be made for appointment in any year

"(2) Appointments of persons nominated under paragraph (1) may not displace any appointment authorized under clauses (2)-(7), (9), or (10) of subsection (a) and may not cause the total strength of midshipmen

at the Naval Academy to exceed that au-thorized by subsections (a) and (b)."; and (c) by striking out "Effective beginning with nominations for appointment to the Academy in the calendar year 1964, the" in subsection (f) (as redesignated by clause (1)) and by inserting in lieu thereof "The".
(d) Section 9342 of title 10, United States

Code, relating to the appointment of cadets at the United States Air Force Academy, is amended by striking out subsection (d) and inserting in lieu thereof the following:

"(d)(1) Subject to paragraph (2), the Superintendent may nominate persons for appointment as cadets at the Academy. Nominations by the Superintendent may be made at any time, but not more than 50 such nominations may be made for appointment

in any year.

"(2) Appointments of persons nominated under paragraph (1) may not displace any appointment authorized under clauses (2)-(7), (9), or (10) of subsection (a) and may not cause the total strength of the Air Force cadets to exceed that authorized by subsections (a) and (b)."

(e) (1) Chapter 403 of such title, relating to the Air Force Academy, is amended by in-serting after section 9341 the following new section:

"§ 9341a. Cadets: appointment by the President

"Cadets at the Academy shall be appointed by the President alone. An appointment is

conditional until the cadet is admitted.".
(2) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 9341 the following new item:

"9341a. Cadets: appointment by the President.".

(f) The amendments made by this section shall apply to nominations for appointment to the first class admitted to each Academy after the date of enactment of this Act.

COMPANY COMMANDERS AT THE UNITED STATES MILITARY ACADEMY

SEC. 23. Section 4349(a) of title 10, United States Code, is amended by inserting ", Navy, Air Force, or Marine Corps" after "Army".

AUTHORITY OF THE SECRETARY OF THE NAVY TO ISSUE REGULATIONS

SEC. 24. (a) (1) Section 5031 of title 10, United States Code, is amended by adding at the end thereof the following new subsection:

"(d) The Secretary of the Navy may pre-scribe regulations to carry out his functions, powers, and duties under this title. The authority of the Secretary under the preceding sentence is in addition to the authority the Secretary under section 6011 of this title"

(2) Section 6011 of such title is amended by striking out "with the approval of the President"

(b) United States Navy regulations issued under section 6011 of such title before the effective date of this section shall remain in effect in accordance with their terms until amended or revoked by the Secretary of the

PER DIEM FOR MEMBERS OF THE NAVAL RESEARCH ADVISORY COMMITTEE

SEC. 25. Section 5153 of title 10, United States Code, is amended by striking out subsection (c) and redesignating subsection (d) as subsection (c).

ELIMINATING DATE FOR NOMINATIONS TO THE NAVAL ACADEMY

SEC. 26. Section 6956 of title 10, United States Code, is amended by striking out sub-sections (b) and (c) and redesignating subsections (d), (e), and (f) as (b), (c), and (d), respectively.

REIMBURSEMENT FOR ACCOMMODATIONS IN PLACE OF QUARTERS FOR MEMBERS ON SEA DUTY

SEC. 27. (a) Section 3 of Public Law 96-357 (94 Stat. 1182; 10 U.S.C. 7572 note) is amended by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1982".

(b) Section 7572(b) of title 10, United States Code, as amended by section 3 of Public Law 96-357 (94 Stat. 1182; 10 U.S.C. 7572 note) is amended to read as follows:

"(b) Under such regulations as the Secretary prescribes, any member of a uniformed service on sea duty who is deprived of quarters on board ship because of repairs or because of other conditions that make the member's quarters uninhabitable and for whom it is impracticable to furnish accommodations under subsection (a), may be re-imbursed for expenses incurred in obtaining quarters in an amount not more than the total of-

"(1) the basic allowance for quarters of a member of the same pay grade without dependents; and

(2) a variable housing allowance which could be paid to a member of the same pay grade under section 403 of title 37 at the location where the member is deprived of quarters on board ship.

A member entitled to receipt of basic allowance for quarters may not be reimbursed for expenses under this subsection when de-prived of quarters on board ship at a loca-tion at which the member can reside with such member's dependents. The total amount of such reimbursement may not exceed \$9,-000,000 for the fiscal year ending September 30, 1981, and may not exceed \$6,300,000 for the fiscal year ending September 30, 1982.".

AMENDMENTS TO THE MILITARY SELECTIVE SERVICE ACT TO ASSIST ENFORCEMENT OF REGISTRATION REQUIREMENT

SEC. 28. (a) Section 3 of the Military Selective Service Act (50 U.S.C. App. 453) is amended by inserting after the first sentence the following new sentence: "Each person required to present himself for registration under this Act shall furnish at such time and in such manner as the Director shall prescribe the social security account num-ber of such person.".

(b) Section 10 of such Act (10 U.S.C. App. 460) is amended by adding at the end thereof the following new subsection:

"(1) The Director shall have access, in accordance with such access, in accordance with second and the such access are such access and the such acc

cordance with regulations prescribed by the President, to information contained in the records of any other department or agency of the Federal Government pertaining to the names, ages, and addresses of persons required to present themselves for registration under this Act. Such information may be used by the Director only for the purpose of insuring that all persons required to present themselves for registration under this Act comply with the registration requirements of this Act.".

LIMITATIONS ON AMOUNTS PAYABLE TO AVIATION CAREER OFFICERS

SEC. 29. (a) (1) An officer who receives special pay for any period under an agreement executed and accepted under section 301b of title 37, United States Code, shall not be entitled to aviation career incentive pay un-der section 301a of such title during such period at a rate which exceeds the rate in effect on the day before the effective date of the increase in the rate of aviation career incentive pay provided for by section 5 of

(2) From the date of enactment of this Act until September 30, 1982, only agreements executed by officers of the Navy or Marine Corps under such section 301b may be accepted.

(b) Section 301b of title 37, United States Code, is amended by adding at the end thereof the following new subsection:

"(e) Special pay may be paid under this section only for agreements accepted before October 1, 1982.".

(c) This section shall become effective on the date of enactment of this Act.

EFFECTIVE DATES

SEC. 30. (a) Except as provided in subsection (b) and otherwise in this Act, the amendments made by this Act shall take effect on October 1, 1981.

(b) (1) The amendments made by section

11 shall take effect on April 1, 1982.
(2) The amendments made by sections 6, 9, 12, 13, 14, 16, 19, 21, 22, 23, 24, and 28 shall take effect on the date of enactment

Mr. BAKER. Mr. President, is there a companion budget waiver? I call the Chair's attention to Calendar Order No. 205, Senate Resolution 168, in respect to this measure.

The PRESIDING OFFICER. That resolution is on the calendar.

WAIVING THE CONGRESSIONAL BUDGET ACT

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate turn to the immediate consideration of that measure.

The PRESIDING OFFICER. Without objection, the clerk will report.

The legislative clerk read as follows: A resolution (S. Res. 168) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1181.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, according to the calendar on this side, there is no objection to the immediate consideration of this item and to its passage.

Mr. ROBERT C. BYRD. There is no objection on this side.

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The gues-

tion is on agreeing to the resolution.

The resolution (S. Res. 168) was agreed to, as follows:

S. RES. 168

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 1181, a bill to amend titles 10 and 37, United States Code, to increase the pay and allowances and benefits of members of the uniformed services and certain dependents, and for other purposes.

Such a waiver is necessary because section 402(a) of the Congressional Budget Act of 1974 provides that it shall not be in order in either the House of Representatives or the Senate to consider any bill or resolution which, directly or indirectly, authorizes the enactment of new budget authority for a fiscal year, unless that bill or resolution is reported in the House or the Senate, as the case may be, on or before May 15 preceding the beginning of such fiscal year.

For the foregoing reasons, pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to S. 1181, as reported by the Committee on Armed

Mr. BAKER. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UNIFORMED SERVICES PAY AND BENEFITS ACT OF 1981

The Senate resumed consideration of the bill.

Mr. BAKER. Mr. President, is there a time agreement in respect to the consideration of the military pay bill?
The PRESIDING OFFICER. There is

not a limitation on the time agreement. Mr. BAKER. Is there a provision for

the control of time?

The PRESIDING OFFICER. There is 2 hours to be controlled by the Senator from Iowa (Mr. JEPSEN) and the Senator from Nebraska (Mr. Exon), with 30 minutes on the amendments. There is a provision for an amendment to be considered tomorrow which will have 3 hours, that being the Matsunaga-Hatfield amendment.

Mr. BAKER. I thank the Chair.

I might say, in view of the agreement the Chair has just recited, that it will not be possible to finish this bill today.

It will be necessary for it to go over until tomorrow.

I hope that Members will avail themselves, however, of the time today to dispose of every issue except that amendment and that we can proceed promptly to the disposition of the bill or third reading and final passage as early as possible on tomorrow.

It is possible, Mr. President, that some time today we may proceed to other matters that are available for disposition by unanimous consent, or perhaps to other matters that may be available on the calendar for general action.

I remind Members that at 2 o'clock today there will be a vote on cloture pursuant to the provisions of rule XXII in respect to the Johnston amendment to the Department of Justice authorization bill.

Mr. President, I yield the floor.

Mr. JEPSEN. Mr. President, during the past 8 months, the Senate Armed Services Manpower and Personnel Subcommittee has conducted a lengthy series of hearings on the most important element of our national defense-military manpower. We can spend billions of dollars on sophisticated weaponry, but in the final analysis, it will be the soldier, the sailor, and the pilot to whom our Nation will turn to win on the battlefield.

In 1980, Congress responded to the Armed Forces' alarming manpower problems by significantly improving compensation and various quality-of-life areas. Those initiatives have clearly revived recruiting and retention from the dangerously low levels to which they had sunk.

If Congress hopes to maintain the momentum that began to gather last year, it simply cannot afford not to be imaginative in its approach to military compensation. At a time when the American people and their Government are struggling to live within their means. Congress cannot justify spending billions of dollars on indiscriminate across-theboard pay raises that amount to little more than "throwing money at the prob-

Mr. President, the bill under consideration today, S. 1181, the Uniformed Services Pay and Benefits Act, offers Congress an innovative and cost-effective opportunity to ease our pressing manpower problems. S. 1181 substantially raises the pay of all military personnel but it targets the highest pay raises to those ranks and experience levels that are in desperate shortage-middle and senior enlisted personnel and mid-career officers. These are the skilled men and women who, on the one hand, are praised as the backbone of the Armed Forces but who, on the other hand, are taken for granted as sure to stay for at least 20 years. Mr. President, we can no longer afford to ignore these people. The Chief of Naval Operations, Adm. Thomas Hayward, has warned that "if we are concerned about the readiness of our forces worldwide today-and we surely arenothing is more essential than to stem the exodus of our trained professionals." It is the absence in the ranks of the sergeant major with 22 years of service, the master sergeant with 18 years, and the staff sergeant with 8 years that has prompted Gen. Edward Meyer, the Army Chief of Staff, to characterize his force as "hollow."

S. 1181 will begin to fill those empty ranks by giving middle and senior enlisted personnel higher raises than those given servicemen still in their first terms. The targeted pay raises will finally relieve the compression of pay that has discouraged enlisted personnel from striving for promotion. The pay tables in S. 1181 will also offer raises to senior enlisted servicemen with 24 and 28 years of service to encourage them to remain longer in the military. Previously, personnel with more than 20 years were eligible for additional pay raises only upon reaching 22 and 26 years of service. In addition, the bill will provide large pay raises to outstanding midcareer officers who are making the crucial decision on whether or not to make military service a career.

The Army Chief of Staff wholeheartedly supports the targeting of pay raises to middle and senior enlisted personnel because this approach addresses his top priority—the rebuilding of his "hollow" Army with a revitalized corps of noncommissioned officers. General Meyer has responded directly to criticism that 7 percent, 8 percent, and 9 percent raises in junior enlisted pay will hinder recruiting efforts. He has pointed out that the small difference in recruit pay between S. 1181 and the 14.3 percent across-theboard raise proposed by the House Armed Services Committee will simply not affect a young person's decision on whether or

not to join the Army.

The Congressional Budget Office and the recruiting Chiefs of the Army and Navy have carefully reviewed S. 1181 and reached the same conclusion as the Army Chief of Staff—the bill will not adversely affect recruiting. In fact, it will actually make recruiting easier by improving retention so much that the services will require fewer recruits. The close link between recruiting and retention was dramatically illustrated by the Chief of Naval Operations when he stated: "If I retained 4,000 more midgrade petty officers" each year, "that's 20,000 new recruits who would not have to be trained to take their place." Mr. President, S. 1181 will help the CNO and the other service chiefs to realize just that kind of rich yield of experience.

The targeted pay raises contained in S. 1181 are complimented by a package of 37 additional manpower initiatives. These items further enhance recruiting tools, improve travel reimbursement, and redress various special pay inequities. I would like to briefly highlight 10 of the

more important provisions:

First. Increases of a maximum of 14.3 percent in the basic allowances for quarters and subsistence:

Second. Increases in enlisted hazardous duty pay, enlisted aircrew flight pay, and special pay for diving duty;

Third. An increase in flight pay for officers not receiving aviation continuation bonuses and with more than 6 years of aviation service:

Fourth. An increase in flight pay for warrant officers to the same rate paid commissioned officers.

Fifth. An increase in the maximum enlistment bonus for recruits enlisting in critical skills for 4-year terms from \$5,000 to \$7,500;

Sixth. Authority for a 1-year Army test of an enlistment bonus of no more than \$3,000 for high-quality recruits enlisting in critical skills for 3-year terms;

Seventh. Increases in the reimbursement paid to military personnel for permanent change-of-station moves, including a temporary lodging allowance;

Eighth. Significant improvements in the military justice system that will promote discipline:

Ninth. Authority for the Defense Department to collect high school directory information and criminal history information for confidential use by military recruiters; and

Tenth. Increases in the number of Navy and Air Force senior ROTC scholarships.

Combined with targeted pay raises, these and the other manpower items in S. 1181 will begin to correct the Armed Forces' retention problems. Improving retention, in turn, will make recruiting easier. Congress can achieve both of these objectives, however, only if it replaces the unimaginative practice of "business as usual" with the innovative and costeffective approach offered by the bill under consideration today. Mr. President, I urge my colleagues to support S. 1181

as reported by the Armed Services Committee.

Mr. President, I now yield to the most distinguished ranking minority member of the Manpower Personnel Subcommittee of the Senate Armed Services Committee, Senator Exon, who has been a leader in developing this entire pay schedule and the total benefit program. I yield the floor to the distinguished Senator from Nebraska (Senator Exon).

(Mr. DURENBERGER assumed the

chair.)

Mr. EXON. Mr. President. I thank my friend from Iowa. I thank the Chair.

Mr. President, in its consideration of S. 1181, the Uniformed Services Pay and Benefits Act of 1981, the Senate is about to make an important decision on perhaps the most critical area of our defense capability. The military services are facing serious manpower problems, and this bill represents a consensus of the Armed Services Committee on how best to tackle some of those problems.

I have stated many times that all of the sophisticated weapons systems which even an unlimited amount of money could buy would be useless without adequate numbers of qualified and dedicated people to operate them. The greatest wartime commanders throughout world history all believed that the quality and morale of their fighting men—as well as the strategy and tactics they devise and use—were the keys to victory. Our own military leaders today believe in this principle, too, as well they should.

The chairman of the Subcommittee on Manpower and Personnel (Mr. Jepsen) has already provided a summary of

what this bill includes.

This bill includes a lot of work and time and effort. I think that he has done such an able job that it is not necessary for me to repeat what he has already said. But I would like to highlight what I consider to be the major features of this bill.

Last year, Congress provided an 11.7 percent across-the-board pay raise for all military personnel. This year, the Armed Services Committee has carefully designed a bill that allocates a sufficient portion of the pay raise to all military personnel to continue the current momentum in recruiting and then targets the remaining portion to our career officers and enlisted personnel. For the enlisted force, increases in basic pay range from 7 percent for a recruit to 14 percent for a sergeant at the point of his first reenlistment, to 22 percent for some senior NCO's. Officer basic pay will increase by 9 percent for first lieutenants and up to 17 percent for some career officers. The most senior officers, of course, receive little or no increase in basic pay because of the Governmentwide ceiling on executive salaries.

This bill will increase the basic allowance for quarters by 17 percent for the enlisted career force—E-5 to E-9—with officers and the remainder of the enlisted force receiving a 14.3 percent increase. The basic allowance for subsistence is increased by 14.3 for all military per-

sonnel.

Mr. President, the decision to target this pay raise was strongly supported within the Armed Services Committee.

The committee's perception of the severity of the manpower problems in the military services has had a large impact on the final shape of this bill which we are now recommending to the Senate. Careful deliberation has gone into the size of the pay raise for each grade and the corresponding years of service that a military member has served in that grade.

Last year, Congress became very concerned over the quality of people that the services were recruiting. As a result of that concern, we set limits in law on the numbers of nonhigh school graduates and category IV enlistees that the services could accept. The recruiting results so far this year are a big improvement over the last several years, but there is still concern for the future.

In addition to the recruiting problem facing the military. There is a critical need to increase the senior experience level of the enlisted ranks; that is, those persons with over 10 years of service. First-term retention is high, but it is among second- and third-term personnel where increased retention is sorely needed. These career NCO's are the backbone and muscle of our Armed Forces.

The most serious example of the retention problem is the Navy, where there is a shortage of 22,000 petty officers. Last year the Navy was forced to "tie up" a ship for lack of trained manpower. To avoid repeating this, the Navy is doing something that may be just as damaging to our readiness in the long run-"cannibalizing or cross-decking" some of its most experienced petty officers. When a ship returns from a long deployment, key petty officers are asked to walk across the deck to another ship ready to deploy, which could not sail without their level of training and experience. Obviously, back-to-back tours of sea duty are a disincentive for retention and, in the long run, can only worsen the problem.

The Army also has a shortage of career noncommissioned officers in many critical skill categories. The Air Force is experiencing losses in some officer categories and there are, for the first time in memory, unfavorable signs regarding future NCO retention in certain skills in that service. Only the Marine Corps is doing well in this area and that is a function of both its special calling and

small force size.

Mr. President, there is a broad consensus within the armed services that another military manpower management problem goes hand-in-hand with this problem of poor retention of NCO's, and that is the problem of so-called pay compression. The front-loading of first term pay over the past several years has resulted in severe pay compression in the enlisted ranks. Today, there is only \$20 per month difference in basic pay between an E-4 and an E-5, which is usually the dividing line between the first term and the career force. The ratio difference in pay between an E-9, the highest enlisted grade, and an E-1 recruit used to be approximately 7 to 1.

Today it is down to 3 to 1.

I recognized this "pay compression" problem early on. In addition to simply studying the pay tables and compensa-

tion trends of the past few years, I have spoken with many of our service men and women and discussed this matter with the senior enlisted person of each service. The recurring theme is that the rewards of military life are not what they used to be and that "pay compression" was a major factor.

For this reason, I introduced my own compensation initiative, S. 1129, in May of this year. The bill we are considering today retains the best features of my original legislation and is the product of careful consideration and compromise with the Manpower Subcommittee chairman and the rest of the Armed Services Committee.

It is absolutely essential that we restore some sense of proportion to the military pay scales. Today, as I mentioned, if someone decides to stay in the military service as a noncommissioned officer, he must do so without the substantial increases in pay which were once

provided.

It is clear from the retention problems that we are having among our career enlisted force that we cannot expect these dedicated and talented individuals to assume the additional responsibilities of higher grades without the significant pay and privileges that need to be asso-

ciated with the NCO ranks.

The proposal before the Senate in this bill is a clear sign to our NCO's and petty officers that Congress recognizes and appreciates the sacrifices which we ask them to make. This bill represents the first attempt by the Congress to address this problem of pay compression and with it the serious problem of retention, while, at the same time, providing an adequate raise for new recruits.

Last year, Congress took steps to alleviate some of these problems, highlighted by the 11.7 percent pay raise and the Nunn-Warner legislation. These were useful steps and, by all accounts, are showing the desired results. But more needs to be done in the way of making military life a rewarding way of life. Of course, military life cannot and should not be rewarding in a monetary sense

There are many other ingredients to the formula as well—such as pride, discipline, leadership, a good working environment, advanced yet maintainable equipment, and good men and women with whom to work. Congress can pass laws to improve some of these areas—others are matters of the head and the heart and the spirit.

The Jepsen-Exon bill being considered today gives Congress the opportunity to act and influence one area where we can help to make a difference.

Mr. President, most of my colleagues are aware that the Department of Defense supports the House Armed Services Committee version of the pay raise bill which has a 14.3 percent across-the-board pay raise, with authority to reallocate up to 25 percent of the raise among different grades. I am disappointed at the Defense Department's position, but I am not surprised.

The leadership in the Pentagon has consistently chosen the path of least resistance on the tough decisions regarding personnel issues. The retention and pay compression problems have been growing more serious over the past several years, but DOD still opts for large, across-the-board pay raises for all personnel, regardless of skill category or experience level. This type of attitude is not much better than a "lowest common denominator" solution to our problems. The Congress can certainly do better, even if the Pentagon cannot.

Last year, for example, Congress gave the Secretary of Defense authority to reallocate up to 25 percent of last year's 11.7 percent pay raise. However, not one dime was reallocated. Congress expected the Secretary of Defense to identify the specific pay problems, but he did not. The excuse given by the Pentagon for not targeting pay raises always seems to be that "it's a good idea, but let's do it in the future."

Mr. President, the problems of pay compression and retention of our NCO's are only getting worse. The future is now, and the Senate is tired of waiting.

I said earlier that the Pentagon opposes this bill. But let us take a minute to see what some of the leaders of the Services—both military and civilian say.

Senator Jepsen referred a few moments ago to the position of General Meyer. I believe it is so important that I would like to amplify it a little.

General Meyer, the Army Chief of Staff, says that he wholeheartedly supports this bill because it addresses his biggest personnel problems—the rebuilding of the NCO Corps and relief from pay compression. The House Armed Services Committee, and others who have voiced objections to this bill, cite the Army's perceived, future recruiting difficulties as their primary concern. General Meyer believes that the small difference in recruit pay between the House and the Senate Armed Services Committee bills can hardly make a difference in a young person's decision on whether or not to join the Army. In effect, the Army's Chief of Staff has said, "rest easy."

The Secretary of the Air Force, just days before he signed a letter supporting the Secretary of Defense's view, sat in my office and told me he had no problem with the pay tables in the bill we are considering.

Lieutenant General Iosue, the Air Force Deputy Chief of Staff for Manpower and Personnel, said in a recent interview that military pay lacks the increases necessary to motivate people to go from the first to the second to the third term of service. He said the current \$20 difference in pay between a sergeant and a staff sergeant was "ridiculous." As I said earlier, this bill begins to correct that problem.

With regard to the Navy, which has the most acute petty officer shortages, that service should be delighted with this legislation, and my inquiries show that to be the case.

The Congressional Budget Office, in a special study, predicts that the Army will have a good chance of meeting the 65-percent high school graduate target in fiscal year 1982 under our approach.

As a hedge against any unforeseen difficulty in achieving this goal, however, this bill also raises the maximum enlistment bonus for critical skills to \$7,500—up from the current \$5,000 and last year's figure of \$3,000. If there is a problem in 1983 or beyond, we will address it at that time. But for now, our most important military manpower difficulties should be addressed while we have the opportunity.

CBO also estimates that under this legislation, the type of NCO retention we so bady need will increase dramatically over the next 5 years—more so than

under any other proposal.

If history repeats itself, I suspect that there may be opposition to this bill on the grounds that it will be "pro-draft" or "anti-All-Volunteer Force" legislation—or that it is intended to undermine the AVF and help bring back the draft. A "Dear Colleague" letter to this effect has been circulated.

Mr. President, just the opposite is true. It is time that we in Congress and the leadership in the Pentagon wake up and realize that, whether the source of manpower for our Armed Forces is the voluntary approach or conscription, we need trained, highly qualified personnel for our Army, Navy, Air Force, and Marine Corps. For too long, some have insisted on meeting our manpower requirements with numbers alone.

But what we really need are experienced, motivated people to serve as a cadre for whatever original source of manpower this Nation chooses. This cadre is lacking today and is necessary whether we operate under an All Volunteer Force or conscription. In short, if the AVF will not work under S. 1181, it will not work at all.

We cannot continue to indiscriminately throw money at our personnel difficulties. If recent events in this body have taught us anything, it is that the American people do not support throwing money at problems either. By targeting the fiscal year 1982 pay raise to those areas which need and deserve it the most, the Senate bill will also achieve the additional objective of enhancing the pride of service and rank to which I referred earlier.

In closing Mr. President, I urge my colleagues to support this legislation. It is a balanced approach which addresses the recruiting and retention problems facing the services today. Our military people are the key to our national security. We must show them now that we understand that fact, and we have the opportunity today to do just that, by passage of this bill.

Mr. JEPSEN. Mr. President, I thank the distinguished Senator from Nebraska for that excellent commentary on the whole military career pay benefit program.

I now yield to the distinguished Senator from Mississippi (Mr. STENNIS).

Mr. STENNIS. I thank the Senator from Iowa for the 10 minutes he has yielded to me. I also thank the Senator from Texas for yielding to me. I am speaking out of order.

Mr. President, we have here what I consider a good, solid bill which, to a degree, meets the most serious problem

we have in the entire military structure—one, however, that I believe will not really be solved until we go back to a modified, greatly improved Selective Service Act that will give fairness and equality to all those who might be called. This act will give the services the chance they do not have now to select what they need in the way of talent and ability of special kinds from a larger force of men and women than they can obtain under present inducements. I believe this is necessary.

For years, I have been through a good deal of experience and concern on this subject. I am not blaming any President, and I certainly am not blaming President Reagan. However, I do not believe we will get a selective service bill until some President is convinced and stands up before the American people, including Congress, and says that we need legislation of this type. "Need" is the key word. When he says that, I believe that the people will understand it and will line up behind it, as will Congress.

And I would not be telling all the truth if I spoke on this bill without

bringing out that point.

So, moving on now to the realities as they are today, the two Senators on our Armed Services Committee, who have given special attention to this bill, are unusually well qualified in this field and other fields concerning the military, and they have already spoken and explained the bill. I lean greatly toward them in my conclusions and opinion. The Senate owes them a debt of gratitude for the real hard, effective work that they have done on this matter.

Mr. President, this bill is in lieu of an increase in pay that would automatically come into effect in October, I believe it is, for a considerably less amount. Because the bill is in lieu of that automatic increase is one reason why I can support

I think the contribution they have made in the distinction between the various groups that are serving has been a great improvement in the situation and time will prove it.

I note, though, Mr. President, that there is evidence of what a hard time Congress has in trying to use the All Volunteer Forces, and at the same time strike a balance that they think, as laymen, is necessary. We have to write into the hard law certain minimum requirements that must be met by these volunteers.

In all deference to everyone, it seems to me that these would be standards the military should prescribe themselves, and be so rigid in the application of those standards that there would be no question involved as to their need and worth. Congress would not have any hesitancy in letting them do all of that. Rather we must legislate on this quality question proving the efficacy of what I have advocated.

I wish to mention we have to spend a lot of money in the military program. We have to. It is expensive and becoming more so to purchase planes, ships, missiles, everything, including manpower.

I think we have to give more attention to our reserves and give them more tools of the trade, not just a few planes and big-ticket items, but the little things, the hand weapons, the radios for the field, other things that they need in their training. This equipment gives them pride and allows more effective training.

I would give the Reserve more duties. I find a great deal of talent scattered around through all communities in men who have had military training and have loved it to a degree. They do not make the military a career for various reasons. But we find some of the best military men we have scattered through those units.

I spoke in Jackson, Miss., 2 weeks ago to one of the finest audiences I have ever had, the National Guard Noncommissioned Officers Association, at their annual meeting. I visited with them before and after, and with their wives, and had just a delightful experience, with the talent that was portrayed there, the personal resources, the intense patriotismthey meant what they were saying and doing-and with the dedication to their units. It just cannot be surpassed. And I am not comparing them now at the expense of the regulars. We have a lot of that in the regular services. But I came away from those meetings with a more solid feeling and encouragement for anything of this kind that I have had in some time.

Giving the Reserves more duties, money, and responsibilities, is one way to avoid some of the enormous growing expense of our military program in its large scale.

Many of the personnel in the regular services are splendid. My remarks just must not be interpreted in any other way, but I do know where the soft spots are. Those who handled this bill have tried mighty hard to address those problems and have made such a contribution that I can support this bill with satisfaction, where at one time I frankly was quite doubtful as to whether or not I could actually support it, in view of the need for competing dollars, particularly in our budget affairs.

The warning flags are flying on our military manpower situation today. Nobody should believe that this bill will solve the underlying inadequacies of U.S. military preparedness that result from our reliance on an unreliable source of military manpower. Instead, this bill will be like a small stone dropped in the ocean—there will be a brief ripple of happiness among the people who get the additional money, amidst the waves and storms of larger problems.

I will support passage of this bill, but I do so with some hesitation and even reluctance. There are three basic reasons for voting for this bill:

First, that it substitutes for the annual, automatic across-the-board pay raises that would occur under the current law that would be suspended by the bill, and is not additive to those automatic pay raises.

Second, the bill will correct some of the distortions that have been caused by the volunteer force concept between a sergeant's pay and private's pay. It is important for good discipline and for the effectiveness of noncommissioned officers that their pay be noticeably higher than

that of privates. To quote George Washington—our first Commander in Chief—on pay:

A proper difference should be made between the Non-Commissione Officer (sergeants particularly) and Privates, to give them that pride and consequence which is necessary to Command.

Finally, I believe that the expectations of military personnel have been raised—perhaps too high by the statements and debates made on military pay during the last year. Nevertheless, because these expectations for pay have been raised, and there have been no practical steps to substitute a new type of selective service, it might be harmful to the military services to deny this raise at this time. I hope that the military and civilian leaders of the country will not repeat the promises and statements which lead to unrealistically high expectations for pay among military personnel.

My concern and reluctant support of this bill arises from several major facts:

First, this bill will not solve our military manpower problems, many of which stem from our reliance on an unreliable source of manpower—the volunteer force.

Second, the bill will cost \$4.5 billion in fiscal year 1982. Over a 5-year period, this one bill will add some \$26 billion to the Department of Defense budget. This is about two-thirds of the cost estimated for this entire MX system (some \$40 billion) for the 5-year period.

Third, there are no firm standards for setting military pay, despite last year's request by the Congress for such standards to be developed.

Finally, at a time where people throughout the country are being called upon to tighten their belts for the sake of the economy, I am concerned that a backlash and public outcry will develop against the military if military pay rises more rapidly than the rest of the economy.

WHAT THE BILL DOES

S. 1181 provides for a 14.55-percent average pay raise for all military personnel. It is targeted toward the more experienced sergeants who would get about an 18-percent raise. Officers would get 10 to 13 percent; junior enlisted personnel would get 8 to 10 percent; and generals would get 3 percent, largely due to the pay cap which applies to Government executives as a whole.

In addition, the bill would raise the enlistment bonus from the current \$5,000 to the \$7,500—I call this the new automobile money—the Pentagon says is needed to attract people into the military. The bill also provides needed updating of moving expenses when military personnel are ordered to new duty stations. Flight pay, hazardous duty pay, and various smaller items are also

increased. Finally, there is some needed reform in separation pay costs which will save the Government some money. Overall there are some 20 separate provisions of law affecting military compensation in the bill.

MILITARY PAY BACKGROUND

This pay raise must be seen against the background of military pay in the last 10 years. Since the beginning of the volunteer force concept 10 years ago, Congress has provided 12 general raises in military pay. These raises, which affect basic pay and allowances for quarters and subsistence, have cumulatively cost \$99 billion. These pay raises have increased military pay 166 percent since 1971, while general inflation has gone up 124 percent and civilian pay has increased 123 percent.

In addition to these general pay raises, 84 separate provisions of law have been enacted which have increased 33 different kinds of special pays, bonuses, allowances, and benefits. These special items cumulatively cost an additional \$5.7 billion. It would seem that there has been a great deal of money and effort spent on "making the volunteer force work" and yet the problems go on and on.

WHERE WILL MILITARY PAY STAND AFTER PASSAGE OF THIS BILL

The military pay and benefits system is not well understood, even by military people. Basic pay is only a small part of military compensation. In some cases, basic pay is only 50 percent or less of the direct compensation military personnel receive. If benefits such as health care, commissaries and exchange, and retirement are added, basic pay may represent as little as one-third of the total pay and benefits some military personnel receive. The complicated nature of military pay makes it hard for the public or even the military individualto express the amount of compensation military personnel receive or to compare it with civilian compensation.

Another factor affecting military pay is rapid promotion rates. Promotions now come early so that the average Army enlisted man now goes from E-1 recruit to E-5 sergeant in $3\frac{1}{2}$ years. Similarly, the average Army officer goes from O-1 second lieutenant to O-3 captain within $3\frac{1}{2}$ years. Excepting the Air Force, the other services are similar. This means military people get the pay of higher grades early in their career.

The following figures indicate the annual amounts of regular military compensation that would be received by ordinary "due course" enlisted and officer personnel after enactment of this bill. "Due course" means personnel without any special skill or circumstance entitling them to extra pay who are promoted along with their average contemporaries.

 In addition to the above mentioned regular military compensation (which includes only basic pay and the untaxed allowances for housing and food) military personnel are entitled to a wide variety of special pays and bonuses which add substantially to their income. These special pays and bonuses amount to about an additional 13 percent of overall military personnel compensation costs but are allocated by grade, skill, or duty assignment. The following illustrate the range of annual income and the percentage of personnel receiving it for some of the major special pays and bonuses:

Type of Bonus/Special Pay and Annual Additional Income Per Individual

Officer:

1,500-\$3,600
1,800-5,000
4,000-29,500
400-2,000
800-7,800
1,300
650
2,040
1,000-3,200
660
1,000-2,900

In addition to the above pays, military personnel and their dependents are entitled to a number of benefits such as medical care, commissary and exchange purchases, and other services difficult to put a value on but worth something to the individuals who receive them. These personnel support items have been estimated to average \$1,200-\$3,000 per individual.

Finally, military personnel receive the benefit of retirement at a young age—after 20 years of service. The typical enlisted man retires at age 41 and—after this pay raise—will receive an annual retired pay of \$10,800 for the rest of his life—increased each year for the rise in the cost-of-living index. The typical officer retires at age 45 and will receive an annual retired pay of \$22,800, also indexed against inflation.

In addition, military personnel are covered under social security and receive those benefits when they become eligible. Retired military personnel and their dependents are also entitled to military medical care, commissary and exchange purchases, and other fringe benefits.

PAY WILL NOT SOLVE THE MANPOWER PROBLEM

Despite the need to pay our military personnel adequately and to insure that military pay enhances the good order and discipline of the service, military pay is no answer to the fundamental flaws in our present manpower system.

No amount of pay is going to provide an adequate mobilization capacity. All of the testimony through 10 years of the All-Volunteer Force is that the United States cannot fight a war with an All-Volunteer Force. Nobody disputes that fact. Yet, the purpose of our military is to be prepared to deter and, if necessary, fight.

No amount of military pay is going to convince the Russians we have a strong military manpower preparedness. Nobody knows better than the Russians that this pay bill is not the answer to America's military problems.

No amount of military pay is going to convince our allies, many of whom already have selective service, to shoulder more of the burden of defense. Our allies know that our mobilization and reenforcement capacity to help them in time of emergency is inadequate as long as America has an All-Volunteer Force.

No amount of military pay is going to instill tough discipline, dedication to duty, and the old military values of sacrifice. Our people know that military service should not be just another job.

No amount of military pay is going to get adequate quality and representativeness in our military forces. The mothers and fathers of our middle and upper class boys feel that enlisting in the All-Volunteer Force is just not the thing to do in today's situation.

In summary, the flaws of the All-Volunteer Force are far beyond the scope of any military pay bill. We must return to some fair form of selective service to provide a sure and steady source for manpower for our country.

IMPROVING MILITARY PREPAREDNESS

President Reagan is to be commended for making a drive to improve our military preparedness. So far he has proposed substantial increases to the defense budget which I believe will be supported by Congress. But there can be no buildup in real military strength without a buildup in military manpower.

According to reports, the Army wants to add to its divisions; the Navy wants to add to its ships, the Air Force wants to add to its wings. It will take plenty of additional manpower for this. The recently reported possible budget reductions may make these steps less certain, but there will be requests for additional military manpower, and these requests will be substantial, if we are to have a substantial strengthening of military capacity.

In May, I spoke on how little increase in real military capacity the substantial budget increase for fiscal year 1982 seems to be buying. At that time, I urged more frugality, and I continue to urge that course. However, frugality alone will not meet this manpower situation. If we are going to add to our military forces, the additional manpower needs will force us to confront two major questions:

First, how is the additional manpower to be paid for?

Second, even with this pay raise, can additional manpower be recruited with adequate quality standards in time to man the additional forces?

I have serious doubt that a positive answer is possible for either of those questions. There may be a way, however, to strengthen America within the available budget. I believe we must look to the National Guard and Reserve components for the major part of any buildup in military forces. There are many fine Guard and Reserve units today—dedicated people who want to be associated with the military but not on active duty. Many of these units are not well equipped and this should be remedied. I believe many more good units could and

should be formed. Under the volunteer concept, Reserve strengths have dwindled down and that must be reversed. There are new missions which could be assigned to the Reserves and this must be vigorously pursued.

In short, we must make real our concept of relying on the Reserve forces. This is not a substitute for a new and fair form of Selective Service System, but I believe goes hand in hand with it. I intend to continue to speak on this subject another time, but for now, I will conclude by saying that without a new and fair form of selective service and without a far greater buildup and real reliance on our Reserve components, there may not be much chance to get the needed buildup in American military strength that the current world situation demands.

So I thank the Senator again for yielding me this time.

Mr. President, I yield the floor.
The PRESIDING OFFICER. Who yields time?

Mr. JEPSEN. I yield time for brief remarks to the chairman, Senator Tower from Texas.

Mr. TOWER. Mr. President, I rise in support of S. 1181, the Uniformed Services Pay and Benefits Act of 1981. Maintaining a viable All-Volunteer Force means not only attracting qualified young men and women into uniform, but more importantly, retaining them once they have become trained and experienced in critical skills.

Today, the services are seriously short of skilled personnel. The Navy must juggle crew members in order to send ships to sea. Some Army divisions have been rated "not combat ready" because of manpower shortfalls. The Air Force has grounded aircraft due to the shortage of technicians to repair them.

Evidence indicates that military pay has a far greater impact on the decision of skilled and experienced service members to make the military a career than on the decision of young people to enlist in the service. Therefore, given our limited resources, it makes sense to concentrate the largest pay increases for fiscal year 1982 on the middle and senior enlisted grades. In so doing we can begin to resolve some of our most pressing manpower problems—retaining the skilled and experienced petty officers and NCO's.

Under the military pay bill formulated by the Armed Services Committee, pay increases would range from 7 percent for the new recruit to 19 percent for the typical noncommissioned officer to a high of 22 percent for those NCO's who elect to remain on active duty beyond the 24- to 26-year points. These are very important people. There is a great deal of experience and background lodged in these people and some of them, of course, have experience in combat. I think that they are the backbone of our noncommissioned officer corps.

This will provide greater incentives for promotion, career advancement and retention, as well as greatly encourage longer service among senior enlisted personnel. Equally important, within the

institutional framework of the military pay structure, all personnel are compensated commensurate with the sacrifices endured through their years of service. Under the current pay tables there is little or no incentive to remain in the service or to strive for promotion. An NCO in pay grade E-6 with 10 years of service receives \$943 per month. A sergeant first class in pay grade E-7 with 20 years of service has a base pay of \$1,219 per month. Where is the motivation for the mid-career service member to remain with the service and endure its hardships if they will only realize \$276 more each month after an additional 10 years of military life?

In the past, the services have attempted to solve shortages of skilled enlisted personnel with selective reenlistment bonuses. These bonuses were designed to be targeted to critical skills and intended to solve short-term retention problems. Today, however, they are used to remedy deficiencies in the basic pay tables. In fiscal year 1982, reenlistment bonuses will cost \$620 million and will be paid to a large percentage of reenlistees. The Navy alone pays 80 percent of its reenlistees a bonus. The Air Force has jumped from 10 to 41 percent in 2 years. The number of Army reenlistees receiving a bonus has doubled since 1980.

We cannot allow this situation to grow unchecked. A short-term and cost-efficient fix has become a permanent and costly program. It is therefore essential that we provide a new pay table that will encourage career service and reduce our dependency on bonuses. S. 1181 begins this long overdue process.

In order to fund higher increases for this portion of the force, a limit on the amount of the annual adjustment of entry-level pay must be made. Entrylevel salary will still increase by 7 percent in base pay and by 9.1 percent when regular military compensation is included.

Additionally, significant increases in enlistment bonuses and other benefits have been proposed to assist the recruiting effort. The Congressional Budget Office, the Chief of Staff of the Army, and the recruiting chiefs of the Army and the Navy have all stated that S. 1181 will still allow the services to recruit virtually the same number of quality personnel over the next 5 years. Today, recruiting is better than ever with each of the services meeting their accession goals not only in terms of quantity but more importantly in quality.

Entry-level pay is simply not a factor

in a young person's decision on whether or not to enlist in the service. Educational and training opportunities, career advancement and challenge and patriotism play a much greater role in his decision.

S. 1181 will yield, however, 19,000 additional trained and experienced leaders in the career force.

For these reasons I urge my colleagues to support this bill and not push for support of any amendments that are designed to alter the thrust of this extremely enormously important piece of legislation

Mr. President, I spent the last month traveling around the military establishments. I have talked to a number of noncommissioned officers in all the services, and I know they universally view this bill as a big step toward answering a number of their problems.

It has the wholehearted support of the the noncommissioned officer corps of the three services. These are the men with experience, these are the men who know what is required to retain the skilled people whom we need.

I hope the Senate will act on this bill without any crippling amendments, without any amendments that change the thrust, and take us back into the old situation of pay compression which has been disadvantageous to us in terms of incentives and retention.

Mr. THURMOND. Mr. President, I rise in support of S. 1181, the Uniformed Services Pay and Benefits Act of 1981.

This legislation provides for targeted pay raises to take effect on October 1, and includes various special pay and benefits for service personnel in certain categories.

Mr. President, we must halt the serious loss in the military services of trained personnel whose skill is essential to the efficient operation of the various units which provide for our national defense.

An important step in this direction was taken in the 96th Congress when increases in compensation were approved for military personnel, including an 11.7percent across-the-board pay hike and other special pay improvements.

However, the Senate Armed Services Committee believes substantial further improvements are needed in fiscal year 1982. Therefore, the committee has provided a new pay table for military personnel with basic pay increases from 7 to 22 percent. These increases are targeted to meet our most serious attrition problems and to move the military

to a more comparable pay status with civilians.

Mr. President, I urge that the Senate approve this bill. In so doing we will take a major step toward ending the serious loss of highly qualified personnel from the military forces.

Mr. JEPSEN. Mr. President,

yield to the very distinguished Senator from Arizona (Mr. GOLDWATER).

Mr. GOLDWATER. I thank my friend from Iowa.

The PRESIDING OFFICER. The Senator from Arizona.

UP AMENDMENT NO. 347

Mr. GOLDWATER. Mr. President, I call up an amendment I submitted at the desk earlier today and ask unanimous consent that it not be read. I will try to explain it.

The PRESIDING OFFICER. The clerk will report the amendment for the REC-ORD, and without objection the reading of the amendment will be dispensed with.

The legislative clerk read as follows:

The Senator from Arizona (Mr. Goldwarer) proposes an unprinted amendment numbered 347.

The amendment is as follows:

- (1) On page 42, line 8 and line 10, redesignate clauses (1) and (2) of section 4(a) as clauses (2) and (3), respectively;
 (2) On page 42, after line 7, insert the following new clause:
- "(1) by inserting in clause (2) 'or clause
- (13) 'after 'clause (1)';";
 (3) On page 42, line 18, strike out "or";
 (4) On page 43, line 2, strike out "propellants."" and insert in lieu thereof "propellants; or"
- (5) On page 43 following line 2 insert the following:
- "(13) involving frequent and regular participation in aerial flight by an officer in pay grade O-1 through O-10 while serving as an air weapons controller crew member, as defined by the Secretary concerned, aboard airborne warning and control system aircraft, as designated by such Secretary, when such officer is not entitled to incentive pay under section 301a of this title.".
- (6) On page 43, strike out lines 5-9 and insert in lieu thereof the following:
- "(c) Section 301(c) of such title is amended-
- "(1) by striking out 'or (10),' and inserting in lieu thereof '(10), (11), or (12)';
 "(2) by striking out '\$55' and inserting in
- lieu thereof '\$83';
- "(3) by inserting '(1)' before 'For the performance'; and
- (4) by adding at the end thereof the following new paragraph:
- '(2) For the performance of the hazardous duty described in clause (13) of subsection (a) of this section, an officer in pay grade O-1 through O-10 is entitled to monthly incentive pay as follows:

	Yea	rs of servic	e as an off	icer as com	puted unde	r sec. 205-			Y	ears of se	ervice as	an office	r as comp	outed und	der sec. 2	05—
' Pay grade	2 or less	Over 2	Over 3	Over 4	Over 6	Over 8	Over 10	'Pay grade	Over 12	Over 14	Over 16	Over 18	Over 20	Over 22	Over 24	Over 25

Mr. GOLDWATER. Mr. President, I want to join with my other colleagues who have recognized the importance of this bill, and I want to add my con-

gratulations and thanks to the Senator from Iowa and the Senator from Nebraska for the long hours they have put on this piece of legislation which I

consider to be as important a piece of business as we will discuss in this Congress relative to the defense of our country.

Mr. President, I offer this amendment because it is more or less in the nature of an emergency. The Air Force was not aware of the criticality when this bill was considered in the Committee on Armed Services. The amendment applies to increased pay for members of the AWACS, the aircraft warning and control system, that we are hearing so much about.

There is a shortage of experienced AWACS controllers, which is now severe and which will worsen. We are 24 percent short of captain through lieutenant colonel supervisory personnel, and with the expected increase in AWACS mission requirements we find these truths, that duty is very demanding. These men average 150 days a year on temporary duty. and, mind you, this is not temporary duty of the sort where you are transferred to an overseas location where you might take your wife and family. These men depart Oklahoma City, where the AWACS are stationed, and travel all over the world. In fact, Mr. President, in the last 3 years AWACS have been deployed to Iceland, Japan, Korea, Egypt, Saudi Arabia, and West Germany.

This is a very important thing to remember: When a man is transferred overseas and his family is allowed to go with him it removes most of the morale problem. But when a man is called on for temporary duty and he is not allowed to see his family this makes for problems for the man, problems at home, and eventually results in the man or woman leaving the service.

There has been inadequate money incentive for controllers. They receive only hazardous duty incentive pay, and in 1955 that exceeded 25 percent of basic pay. Today hazardous duty pay is less than 6 percent of the pay.

I feel it is necessary to submit this amendment even though I apologize again for the lateness. I did not have time until just a few moments ago to inform the authors of the bill that I was going to submit this amendment.

We need to increase hazardous duty incentive pay rates for weapons controllers or AWACS personnel. For example, we are required to have about 379 supervisory personnel. That is down to 288. We are required to have about 32 field grade officers, we are down to 12; and we are going to need a total of 900 by 1985 if we can keep this up.

I might add for the information of my colleagues that we now have 25 AWACS aircraft, and for those who may not know what I am talking about, the AWACS is a Boeing 707 basically, the same type of aircraft that many of us fly in across the country weekend after weekend.

In the Air Force it is known as a KC-135; the C-135. The "K" is a tanker, the "C" is a carrier that has been used. We have over 600 tankers in service in the Air Force.

This aircraft is marked by a very large antenna located a little more than half-way past the center of the fuselage, rising above it about 20 feet. The dish itself is probably 30 to 35 feet in diameter.

There are three flight crew officers in the cockpit; six officers in the aft den, who are called controllers. On each aircraft there are eight enlisted personnel.

We have no way of knowing as yet the number of ground personnel who are required to travel with this airplane. They are all stationed at Tinker Air Force Base in Oklahoma, and they have not determined the ground personnel requirement that would be necessary to travel with this very highly sophisticated aircraft, but I would make a guess it would be at least 50.

We are talking about something, Mr. President, with which we have never been confronted before, an aircraft of such high sophistication that we find all through the services, no matter where we look, a great shortage of enlisted and officer personnel of people in these specific electronics fields, and they are getting more and more difficult to find because as the Air Force, the Navy, the Marines, and the Army train these personnel, the electronics people are waiting right outside the school building with their hands to grab them at one, two, and three times the pay they would have received if they stayed in the service. Thank God we get enough dedicated men so that we are now able to man these aircraft. But if we continue without this type of amendment, it may become a little more difcult.

Just a few more facts, Mr. President, then I will be finished. The shortage of experienced AWACS controllers is now severe and, as I said, it will get worse. We were 24 percent short in the O3-O5 supervisory personnel and mission commanders. I mentioned the figure before. and that we are short quite a bit in that field. The increasing AWACS mission requirements and decreasing volunteers will exacerbate the problem. Field grade volunteers are almost nonexistent despite aggressive leadership efforts. In fiscal 1980 there were 12 field grade volunteers for 32 positions; in fiscal year 1981 there are 5 volunteers for 46 positions.

Further, AWACS requirements are increasing: from 27 in 1976, to 412 today, to over 900 by 1985.

Let me remind my colleagues that AWACS duty is arduous, perceived by weapons controllers as having very few rewards. I mentioned the number of countries they have been to.

Mr. President, when the present pro-posal to sell these AWACS to the Arabian Government comes on this floor, I hope to offer a substitute that will, instead of selling the aircraft, allow the U.S. Air Force to station the aircraft on fields in Saudi Arabia that are available and which the Arabians would agree to our using, because, frankly, and with all respect to the Saudi Arabians, I think it would take too long to train the rear-end people, the controllers, in this highly, highly complicated field in electronics, in addition to having to check their pilots, copilots, and engineers out, which, in itself, would be a rather demanding job. But that is another subject that continues with this problem we are having There is an inadequate montary incentive. Existing HDIP is \$110 a month, fixed in 1955. Since then, the CPI has tripled basic pay up 240 percent.

In 1955, the HDIP for an O-3 exceeded 25 percent of basic pay. Today it is less than 6 percent of basic pay. And there is the flight pay disparity, rated and non-rated, caused by the Aviation Carrier Incentive Act in 1974. Prior to 1974, all fliers received the same flight pay, about \$100 to \$245 a month. With ACIA, rated officer flight pay is restructured at existing rates but nonrated fliers, such as weapons controllers, are relegated to an HDIP of \$110 a month, which was a pay cut for many. And many of us who flew in World War II can remember when this type of pay was 50 percent of your base pay, regardless of whether you were a second lieutenant, whether you were a sergeant, or whether you were a general. And it was added on to your total pay. Today it is set at a certain amount, which has also created a problem. I am not speaking to that today.

There are less desirable alternatives, but one which we may be forced to consider is to rate the 17XX's as observers and entitle them to continuous ACIP. The service Secretary has legal authority to rate. However, it is more costly: an additional \$4.9 million versus \$1.3 million, which assumes rating all of the 17XX's at existing manning level versus increasing HDIP to ACIP levels for only those who fiv.

Mr. President, this is pretty much the story that I have to tell about this amendment. Again, I repeat that I am sorry that the Air Force did not realize that this problem existed at the time my two friends from Iowa and Nebraska were conducting their lengthy and thorough hearings or it would have been offered at that time. I know it is an imposition to come on the floor at this late date and ask that the chairman and the ranking minority member of this committee consider this amendment, consider taking it to the conference to see if something might not be done in order to alleviate a problem which, frankly, did not exist to the extent it exists today and which will continue to grow. It is an unusual request, I know.

As I say, I apologize, because I want to support this bill. I will support this bill to the fullest, even if the amendment is not accepted. But I did want the authors of the bill to know that this little additional problem has come up. I would hope that they would find it within their generous hearts to accept the amendment and see what we might do with it in the conference.

Mr. President, that is all I have to say on the subject. I yield the floor.

Mr. JEPSEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. JEPSEN. Mr. President, does the Senator have an estimate of the cost of this?

Mr. GOLDWATER. Yes. I am sorry. It would cost about \$1.3 million.

Mr. JEPSEN. Each year

Mr. GOLDWATER. Each year, yes.

Mr. JEPSEN. And I understand that is based on about 400 of these slots at this time?

Mr. GOLDWATER. Well, it is based ultimately by 1985 on a total of about 900. Right now it is about 450.

Mr. JEPSEN. Is the \$1.3 million based on what it is ultimately going to be or is it based on the 400 we have now?

Mr. GOLDWATER. The \$1.3 million is based on what we have now and it would increase

Mr. JEPSEN. To about \$2.6 million, a

little more than double?

Mr. GOLDWATER. Well, that is a good guess. Two times \$1.3 million comes out exactly to \$2.6 million.

Mr. JEPSEN. Mr. President, the Senator from Nebraska has some questions. The PRESIDING OFFICER. The Sen-

ator from Nebraska.

Mr. EXON. Mr. President, I thank my friend and colleague from Arizona for bringing this up. It may well be that something has been overlooked here. It was not done intentionally, certainly, on the part of the Manpower Subcommittee. As the Senator from Arizona said, this just came up. It came up in the last couple of days, as I understand it.

Checking with staff, I understand that when the Air Force first brought this up they had suggested wording so broad that we would have covered military people other than just the officers in the back of the AWACS aircraft that I understood would be addressed by the amendment offered by the Senator. I would like to ask the Senator from Arizona whether or not the enlisted personnel sitting next to that officer in the back of the aircraft would be compensated under his amendment?

Mr. GOLDWATER. Yes. Under the amendment, the enlisted personnel would receive actually a little bigger percentage of increase than would the officers. Many of the cockpit officers are now receiving flight pay or hazardous duty pay, while those enlisted menthere is a total of 17 in each aircraft. Eight of them would be enlisted personnel. They are not receiving hazardous duty pay, as we think of it. But they would receive this additional benefit by being a member of the AWACS crew called on for almost constant temporary

If we are not successful in selling the aircraft to Saudi Arabia and end up having them stationed there with our personnel, at the rate of retention and repair we would probably have 20 of the 25 aircraft constantly someplace in the

I want to stand corrected. My assistant tells me that enlisted men are not included in this amendment. But the way I read it, they are.

Mr. EXON. If the Senator would yield, I am sure the Senator from Arizona has been through this on many, many occasions. It seems to me that he has brought up something that needs attention. Whether or not we have all the facts on this at the present time gives me some concern. It is the old situation that the reason we have committees and

subcommittees is to take the time to look into these matters in great detail.

I am wondering if the Senator from Arizona has any information from his sources as to whether or not this matter is being discussed on the House side and whether or not an amendment like this might be offered and be a part of the House bill and that if that would happen it might be addressed in conference.

Mr. GOLDWATER. I am told that the House is considering it and the House is inclined to act favorably on this amendment. With learning that the enlisted man is not specifically involved, I would insist that the enlisted man be involved and should be.

Mr. EXON. I was just thinking out loud in offering a possible compromise on this. Since we know very little about it here, and since the staff has not studied it out, I am wondering if the Senator from Arizona would consider a compromise. Rather than putting it into our bill, if we could assume that it will be included in the House bill that would give us a chance to look into it in more detail and work it out in the conference committee.

Mr. GOLDWATER. I think the Senator makes a very sensible suggestion. I have to admit that I did not know of the existence of this problem as a problem until about 2½ hours ago. I think it is another typical example of the Pentagon screwing around until it is too late. This is so important I felt it my duty to bring it on the floor because I feel a great responsibility to the men who fly, whether they handle the aircraft or whether they are in the back seat twirling dials. I would accept the Senator's suggestion.

I would hope that during the course of any meeting with the House my two friends would bring it up and say, "What about our friends in the AWACS?"

Mr. EXON. I certainly appreciate that the Senator brought this up. I think it is a very important matter. Once again it is one of those situations that I am not sure we know enough about. I would be concerned about the fact that if we put it in our bill and if they put it in the House bill we would be sort of hamstringing the conference from making changes.

Does the chairman of the Manpower Subcommittee have any feelings on this?

Mr. JEPSEN. It is my understanding that both the staff and the Senator from Arizona have also stated that the House has declined to accept this and that they will not include it in their bill. Is that correct?

Well, staff further advises me at this point that the House has said that only if it is in our bill. They will not put it in our bill. However, if it is not in our bill, the House has indicated that they will put it in their bill.

On that basis, it seems to me, with that knowledge, since we have not had any time-and the distinguished Senator from Arizona only 21/2 hours ago was advised of this-the logical thing to do would be to have the House go ahead and work it into their bill and then we

would have a lot more time with our staffs to go into this matter and everybody in the conference would know what we were doing.

Mr. GOLDWATER, I am in agreement with the Senator. I thank both of my friends for their suggestion. I thank both Senators for allowing me to have the privilege of the floor to discuss this. It is a matter of record now. The House can read the RECORD and get our feelings on it. I would pray that they would go ahead with it. I see this as a very serious problem down the road. Again, I thank both my colleagues.

Mr. JEPSEN. I thank the distinguished Senator from Arizona. Let the RECORD show that this Senator feels it is a very important and serious matter and is worthy of further study and research. On that basis, we will proceed.

Mr. THURMOND. Mr. President, rise in support of the pending amendment to enhance flying pay for aircrew duties aboard Air Force airborne warning and control system (AWACS) aircraft

Mr. President, I think it worthwhile to view the current problem from a historical perspective. Since the early 1900's our military aviators have received flight pay of some type to compensate them for the hazards of flying and the irregular duty schedule, but primarily, to keep them in uniform. In many cases, the training and skills of flying crewmembers are readily transferrable to civilian jobs. Then in about 1950 we went to a system in which the man's flying pay increased with his rank and experience-to about \$250 a month extra.

In 1974, Congress reevaluated the whole system of flying pay. We wanted to pay the most money to the pilots at the point in their career when they were deciding whether to stay or get out. We made a separate flight pay for them and pay for air weapons controllers performing aircrew duties aboard airborne warning and control system aircraft was reduced to \$110 per month.

Congress did not realize that we needed to pay aircrew members more than that to get them to fly. At that time we could not imagine the technologically complex systems of today and the increasing requirement for highly skilled and trained air weapons controllers. However, we know today that these people have learned skills that are as transferrable to civilian jobs as those of the pilot. Simply stated we are now losing these technicians. The \$110 a month is not enough to overcome the draw of civilian jobs coupled with the undesirable aspects of aircrew duty such as long periods of family separation and the inability to plan with certainty one's offduty time.

Mr. President, if we expect to attract and keep the weapons controllers in flying duty, we must increase their flying pay to levels comparable with other crewmembers. Therefore, I urge support of this amendment.

Mr. EXON. Mr. President, I am won-

dering if the Senator from Arizona is prepared to withdraw his amendment.

Mr. GOLDWATER. Mr. President, I ask unanimous consent to withdraw the amendment I have offered.

The PRESIDING OFFICER. The Senator has the right to withdraw his amendment. The amendment is withdrawn

Mr. EXON. Mr. President, I very much appreciate the fact that the Senator from Arizona brought up this matter. I think the discussion will lead to a resolution of this problem.

The PRESIDING OFFICER (Mr. KASTEN). The Senator from Iowa.

Mr. JEPSEN. Mr. President, I yield to the very distinguished Senator from Maine.

I thank the Senator for yielding.

Mr. COHEN. I thank the Senator for yielding.

Mr. President, the men and women serving in the Armed Forces of the United States badly need the military pay raise we are considering today.

pay raise we are considering today.

The pay of military personnel continues to trail that of their civilian counterparts. Despite the initiatives taken by Congress last year—ones which provided increases not only in pay, but in a range of other compensation items as well—many young men and women in uniform are forced to make real sacrifices in return for the honor of serving their Nation.

The young people who are serving in the Nation's defense can rightfully take pride in the contribution they are making. They are responsible for defending our democratic ideals, and we should all give them the recognition—and the compensation—they deserve for the sacrifices they make.

As a member of the Senate Armed Services Committee and its Manpower Subcommittee, I have been especially aware of the problems faced by our military personnel. Repeatedly over the past 3 years, we have heard of the deep personal hardships they live with daily.

The subcommittee developed, and the full committee endorsed, the approach embodied in the bill we are considering today. It provides a targeted, rather than an across-the-board, pay increase. The level of increase is greater at key decision points for those considering reenlisting, and the problem of pay compression is eased by the graduated approach taken in the bill.

I think that this bill responds to our manpower needs better than does the across-the-board plan proposed by the administration. An across-the-board raise does nothing to deal with the compression problem, it does nothing to encourage retention of qualified personnel, and, I believe, it does not do that

much to enhance recruiting.

Those joining the service deserve to be paid fairly. We do not want a repeat of the situation where entry-level pay rose only \$3—from \$75 to \$78 per month—from 1946 to 1964. Still, I do not believe that the pay a recruit receives while in basic training is a driving factor in his or her decision to enlist, nor should it be. The services should

emphasize what an individual could receive following completion of training if he or she is a good trainee and shows a positive aptitude for military service.

Today, the typical soldier or sailor has little to look forward to after years of dedicated, honorable service. An E-6 with 10 years of service—a typical soldier holding the rank of staff sergeant and having significant supervisory responsibility—receives only \$943.50 per month. This NCO, the heart of our defense forces, makes only about \$11,000 a year. That is unconscionable.

Under the Senate bill, that NCO would receive \$1,125.60 per month. That means an annual salary of \$13,507.20, still a pretty humble sum for a 30-year-old professional with a family who is probably working about 60 hours a week

on behalf of his Nation.

A letter I received recently from a constituent placed into clear relief just how serious the problems facing our military personnel are. I would like to read excerpts of that letter to my colleagues at this time. He eloquently outlines the challenges he faces, and I believe they are typical of so many thousands of others.

During my six-plus years in the Navy, I have watched various perks and benefits steadily disappear that have always been associated with the service...

I have watched my pay, which was set up to give service people rough equality with civilian jobs, be the political football to be kicked around and be the subject to pay raise "caps" in a token to cut spending. Meanwhile welfare and other social programs have mushroomed. The net result has been a 20 percent pay cut. I work 70 to 80 hours week for the Navy because of personnel shortages, yet several national magazines have suggested that I moonlight jobs. How can I? Why should I have to? I refuse to have my son effectively raised by babysitters so my wife can work (and pay the babysitter), but this is apparently what the government is telling me. The result of this policy was that last year the average Petty Officer Second Class (E-5) family of three was eligible for rent subsidies, fuel subsidies, a local nutritional program involving free dairy products for the needy, and food stamps. This is an E-5 with wife and child! An E-5 is in the middle of the enlisted pay structure and is used as a supervisor. I kn was one of them. Many of these families were too proud to apply for these programs until encouraged by the command.

When my submarine was ordered to Portsmouth Naval Shipyard in Maine for overhaul, everyone had to relocate in the area from Charleston, S.C. Taking myself as an example, I was given one month's quarters allowance and 7¢ a mile for my wife to defray moving expenses. My one-year-old son who needed baby food and formula on the road would not receive an allowance until he was three. At the time service members got 10¢ a mile to relocate. My shipmates and I were not allowed this dime per mile because "we were to ride the boat to the yards," implying that there was no cost in moving married sallors on the boat.

The end result of this was sailing the boat to the yards, flying home to pack up and collect our families, and then driving from Charleston, S.C. to Maine for a total reimbursement of \$285. It didn't even buy the airline ticket. Personally, it wiped out our savings account. For many others, it forced them further into debt. None of us have any hope of compensation.

When we arrived no government housing was available, as is always the case. A short waiting list is considered less than one year. We have to live "on the economy" with our quarters allowance coming to about one-half of what we had to pay in rent and utilities.

I wish to stress that this is not an !solated case, but that it happens constantly. Most servicemen and their families have borne these hardships and humiliations as a consequence of service life, hoping for the day it will once again be honorable to serve your country, and that the government will realize what it is doing and move to correct it.

That is the end of that particular letter which, I think, rather dramatically and eloquently states this individual's plight.

Finally, Mr. President, I commend the chairman of the Manpower Subcommittee, Mr. Jepsen, and the ranking Democrat. Mr. Exon, for all their efforts to bring this pay raise bill before the Senate. Their thoughtfulness and attention to detail are, I believe, reflected in the targeted approach that the committee has taken.

Senator Jepsen recently had an article in the Washington Star which reflects some of the concerns which he took into account in putting together this bill. The article, "Volunteer Military Can Work," touches on some of the criticisms made of the All-Volunteer Force and corrects some of the distortions of the manpower picture which have been made. It also makes an effective argument for the pay bill. I agree with his conclusion that "enhanced pay rates for middle and senior enlisted grades should provide a greater incentive for promotion, career advancement, and retention."

Mr. President, this bill is a good one. I hope it will receive the overwhelming endorsement of the Members of this body. I think it is important that we send a clear, positive signal to those in uniform. Their service to the Nation is invaluable. They deserve a fair living wage.

Mr. President, I wish to add just a few brief comments to some of the things I heard on the floor this morning—questions like, do we have enough national pride; is there a sense of real patriotism in our forces as they are currently structured?

During the August recess, I had an opportunity to take a brief trip out and spend some time on the U.S.S. Eisenhower. Frankly, I want to tell people who are here that I saw a unit—they had a light crew on that 2-day period, only 3,000 or 3,500 sailors aboard. I saw a great deal of patriotism, a great deal of pride, and I also saw a great deal of competence. That is the one thing we keep hearing over and over again, that this Nation has been unable for the past few years to attract sufficient numbers of qualified recruits. You read it, hear speeches about it, and those reports, I am suggesting to the Senate, that suggested the All-Volunteer Force is a failure, are a bit premature.

The All-Volunteer Force is having a robust year. As the New York Times reported in its Monday, September 7, edition, great strides have been made in

both recruiting and readiness. The Army, in particular, has made a dramatic improvement over last year's performance.

As of July, 69 percent of the Army's recruits were high school graduates, compared to 40 percent a year ago. Fully 72 percent of the Army's new volunteers were in the top three mental categories as shown by the enlistment test scores, as against 51 percent a year ago. Retention of critically needed career noncommissioned officers is also up.

The Times reports that the Army's state of readiness has been markedly upgraded. A year ago, the Army acknowledged that 6 of 10 divisions in the United States were unfit for combat, largely because of shortages of experienced sergeants. Today, Army officials say that 9 of the 10 are combat ready, though some deficiencies remain.

Army teams have done remarkably well in international competitions. Last month, Army helicopter pilots captured a competition which included precision flying, navigation, and similar skills. Army tank crews took third place in two competitions held in Europe this summer.

The bottom line is that the Army is doing very well. The pay increases and the other benefits in the measure passed by Congress last year have played a significant role in the strong reversal from the problems of the past few years. With continued congressional support and strong administration policies, the AVF can provide the capable, professional force we need for the Nation's defense.

Mr. President, I did want to add that because I think too often, we are too quick to criticize the quality, the sense of pride, and the competence of the members of our Armed Forces. We do them a great injustice when we make statements to that effect. So, contrary to the notion that has been advanced that we are somehow less patriotic today, I think it is a question of let us look back at the quality of life, let us look back at the constituent who wrote to me and saw the kind of conditions he and his family would have to endure before we start to point the finger of criticism at those individuals.

I have heard some rumors to the effect that the administration perhaps might give consideration to delaying or defering this particular pay raise in an effort to cut down on the budget deficit. Let me simply say that in my judgment, Mr. President, there could be no bigger mistake. We delayed a partial pay raise in July. If we delay it further, we are going to send exactly the wrong signal to the very people we want and we need.

Mr. President, I ask unanimous consent that the New York Times article of September 7, 1981, be printed at this point in the Record.

There being no objection, the article was ordered to be printed in the Record, as follows:

[From the New York Times, Sept. 7, 1981]
ARMY REPORTING KEY GAINS IN RECRUITING
AND READINESS

(By Richard Halloran)

Washington.—A year after being called "hollow," the Army is reporting significant gains in attracting recruits and in the readiness of its trained forces.

Recruiting of new soldiers is up, officials say, more high school graduates are enlisting, retention of skilled sergeants and specialists has increased, helicopter crews won an international competition that included Russian rivals, tank units have placed well in other international competitions, and combat divisions within the continental United States have become better prepared to fight.

Gen. Edward C. Meyer, the Army Chief of Staff, said in a recent interview that his first priority was "to fix the things that are broken." Senior officers here asserted that the various accomplishments over the summer had moved the Army in that direction, although no one was ready to proclaim victory

A little more than a year ago, General Meyer said in Congressional testimony that he commanded "a hollow army" that had been weakened by shortages of personnel, training, weapons and maintenance.

98 PERCENT OF RECRUITING GOAL

In the last few months, however, recruiting figures have shown that the Army had filled 98 percent of its quota for the first half of the fiscal year, bringing in 96,300 men and women, including 15,500 who had served before. The Army had poor recruiting years in 1978 and 1979 but the situation improved in 1980.

More important than the numbers, in the eyes of critics of the Army, better qualified young men and women have been signing up in enough numbers to meet standards set by the Congress. As of July, 69 percent of the Army's recruits were high school graduates, who, experience shows, usually make better soldiers than those who dropped out. A year ago, only 40 percent of the recruits were high school graduates.

Similarly, 72 percent of the Army's newest members were in the top three mental categories as shown by the enlistment test scores,

as against 51 percent a year ago.

A year ago, Army officers acknowledged that six of 10 divisions in the United States were unfit for combat, largely because of shortages of experienced sergeants. Today, Army officers say that nine of the 10 are combat ready, although they acknowledge that some deficiencies remain.

The officers said that the turnaround had come about as a result of General Meyer's order last year that 6,000 senior sergeants come home from Europe to serve with divisions here. The increased retention of other sergeants has also helped, the officers said.

A recent report on enlistments showed that the percentage of blacks joining the Army dropped from 28 percent of new recruits in the first half of the fiscal year 1980 to 25 percent in the same period this year. The other services have experienced a similar trend.

In its efforts to retain experienced sergeants and specialists, the Army has seen modest but noticeable achievements. Nearly 60 percent of those eligible this year to reenlist for the first time have done so, as against 55 percent last year.

Among "mid-termers," men and women who have re-enlisted once but served less than 10 years, the Army is close to achieving 100 percent of its objective.

REASONS FOR GAINS

Army officers and civilian manpower officials have attributed that to better pay and the promise of further increases in compensation, to high unemployment in the civilian economy and to General Meyer's efforts to bring more cohesion and stability to Army life.

A year ago, the Army was often criticized because soldiers did not score well on various proficiency tests or in international competitions.

Last month, helicopter pilots from the 101st Airborne Division, posted at Fort Campbell, Ky., came from behind in a fourday competition in Poland to beat the West Germans by two points, the Poles by 20 points and the Russians by 138 points. The competition included precision flying, navigation and similar skills.

In May, a tank unit from the 11th Armored Cavalry Regiment, stationed in West Germany, came in third in a competition of 20 teams from West Germany, the Netherlands, Canada, France, Britain, Belgium, and Italy. Two West German teams, often considered to have the world's best tank units, placed first and second. A second American team came in seventh.

In a simulated battle competition in June, another tank team posted in West Germany took third place behind German and Belgian crews but ahead of Canadian, British and Dutch teams that were vying for the 1981 Canadian Cup.

Mr. EXON. Mr. President, I thank my distinguished colleague from Maine for his thoughtful remarks, well said and well done. I think they add a great deal to the record.

If I may, at this time, I yield 3 minutes to the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I thank the Senator from Nebraska. I am delighted to have had a chance to hear the remarks of the Senator from Maine. I support his remarks. I think there is no question that any organization's strength depends primarily on the quality of the people who are in that organization. The Army, Navy, and Air Force are no exception to that. The kind of people we have does depend, of course, in large part on the kind of pay they get. You get what you pay for. So I am very happy that the committee has brought before the Senate this improvement in pay. I am certainly enthusiastic about it and will vote for it. I feel that we should continue to pay our people in the military much better than we have in the past.

STUDENT LOAN REPAYMENT AMENDMENT

Mr. President, I had expected to offer an amendment to this bill today which would have granted a 2-year extension to a test program the Department of Defense is conducting in which enlistees have their Federal student loans paid off in return for military service.

This program is a useful recruiting and retention incentive for the Pentagon—especially the Selected Reserves. It will help provide our military forces with the type of personnel so desperately needed—those with a college education.

I understand, however, Mr. President, that this same matter has been considered in the ongoing conference on the Department of Defense authorization bill. It was included in the House version of that bill but was not considered on the Senate side. I have heard that the conference have discussed this issue in conference and have decided to include a 2-year extension in the final conference report.

If that fact can be confirmed by the acting manager of the bill, the distinguished Senator from Iowa (Mr. Jepsen), I shall certainly withdraw this amendment and support the conference report when it comes back to the Senate. Is it possible for the distinguished manager of the bill to confirm or deny the report on this matter?

Mr. JEPSEN. Mr. President, it is my understanding, and I have been advised and have the same information the Senator does, that it was put on and accepted by both the House and the conference committee. So that is where it stands. It is in the bill.

Mr. PROXMIRE. Mr. President, thank my good friend from Iowa for his

confirmation.

Mr. President, the student loan repayment program is a 1-year program that was included in last year's defense authorization. It was supposed to begin on October 1, 1980, but because of delays in funding and implementation, the Defense Department did not get the program started until this past March.

The loan repayment program is scheduled to end on September 30 of this year, which does not give the Defense Department much test time to tell whether

worked.

Extending the program would give the services more time to determine the effectiveness of pinpointing enlistment incentives to people with some college training behind them.

It is hard to see how we can go wrong with this test program. Even if it fails and does not attract any applicants, it will cost DOD very little, since the Department would pay out few benefits.

Under this program, a person enlisting in critical military occupational specialties in the active forces can have up to one-third of his student loan paid off each year by the Defense Department. This is a student loan the person incurred before he or she enlisted.

A person enisting in the selected Reserve can have up to 15 percent of his student loan paid off each year. What is more, the Reserves are permitted to offer an additional benefit of paying off a soldier's student loan incurred during enlistment, if the soldier reenlists.

In each case, the soldier gets the repayment after each year of completed service in a DOD designated critical mili-

tary skill.

Only service members with a high school diploma who have attended a college or post-secondary institution and who obtained a loan under the guaranteed student loans, Federal insured student loans or national defense student loans can qualify for the repayment. The maximum amount that can be repaid is \$7,500, which is the maximum amount loaned under these Federal programs.

The active forces expect about 3,000 persons to sign up for the program before it presently is scheduled to end on September 30. The selected Reserves have no figures on how many people they expect to participate; however, the Reserves have identified more than 15,000 weekend warriors who would be

eligible for the program.

Indeed, the Reserves are particularly enthusiastic about the loan forgiveness program. They see it as just the right recruiting incentive for a student who is presently going to college on a student loan. That person could still attend college, while picking up extra cash at a weekend drill once a month and having his student loan repaid by the military in the process.

For both the Reserves and the active forces, the loan repayment program also offers a retention incentive. A person who enlists under the program-remember, this is a person with not only a high school diploma, but also college training—has an incentive to remain on active duty or in the Reserves until his entire student loan is paid off.

In other words, this is an incentive to stay in the service to receive educational benefits, rather than an incentive to get out in order to obtain an

education.

Mr. President, I ask unanimous consent that a copy of my amendment be printed in the RECORD at this point.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

On page , line , insert the following: At the appropriate place in the bill insert the following new section:

Section 902(g) of the Department of Defense Authorization Act, 1981 (Public Law 96-342; 94 Stat. 1115), is amended by striking out "October 1, 1981" and inserting in lieu thereof "October 1, 1983".

Mr. PROXMIRE. Mr. President, I yield the floor.

UP AMENDMENT NO. 348

(Purpose: To delete from the bill provisions pertaining to Selective Service System draft enforcement)

Mr. EXON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Nebraska (Mr. Exon). for himself and Mr. Jepsen, proposes an unprinted amendment numbered 348.

Mr. EXON. I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 85, beginning with line 7, strike out all down through line 3 on page 86.

On page 86, line 6, strike out "Sec. 29" and insert in lieu thereof "Sec. 28."

On page 87, line 2, strike out "Sec. 30" and insert in lieu thereof "Sec. 28."

On page 87, line 8, strike out the words and figures "24 and 28" and insert in lieu thereof "and 24."

Mr. EXON. Mr. President, Senator JEPSEN and I are jointly sponsoring this amendment to delete from S. 1181 a provision enhancing enforcement of selective service draft registration.

We are jointly taking this action because a similar provision to accomplish the same purpose will be included in the fiscal year 1982 defense authorization conference report and there is, therefore, no need to keep it as a provision of this bill.

Mr. JEPSEN. Mr. President, that is my understanding. If there is no objection to the Senator from Nebraska's proceeding to unanimous consent to have his amendment adopted, I am willing.

The PRESIDING OFFICER. Do Senators yield back their time on the amendment?

Mr. EXON. The time on this side is yielded back.

Mr. JEPSEN. The time on this side is vielded back.

The PRESIDING OFFICER. All time have been yielded back, the question is on agreeing to the amendment.

The amendment (UP No. 348) was

agreed to.

Mr. EXON. Mr. President, I move to reconsider the vote by which UP amendment No. 348 was agreed to.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ARMSTRONG addressed the Chair.

The PRESIDING OFFICER. Who yields time to the Senator from Colorado?

Mr. JEPSEN. I yield to the distinguished Senator from Colorado such time as he may desire.

Mr. ARMSTRONG. I thank the Senator.

Mr. President, I enthusiastically endorse S. 1181, the Uniformed Services Pay and Benefits Act of 1981. I join my colleagues in congratulating the distinguished chairman of the Manpower Subcommittee, my friend from Iowa. Senator Jepsen, for the leadership and foresight he has given to this issue, and I congratulate the distinguished minority manager of this bill and the Armed Services Committee itself.

While S. 1181 does not do everything that I believe should be done, it is, in my opinion, an extraordinarily good piece of legislation and undoubtedly is the best bill that could have been produced in the reasonable amount of time available to the committee. It makes the best use of the money we can afford to spend on military compensation. That is the criti-

cal issue.

It would be very easy for me or for other Senators to say that we should do more, that we should give more in certain areas, that we should give greater incentives. However, we have to keep our eye on the time we have available and the amount of money we can devote to this purpose.

I believe that the Armed Services Committee has done an extraordinarily thoughtful and responsible job.

The healthy raises provided to career personnel in S. 1181 should greatly alleviate the critical problem of retention. to the extent to which that problem can be attributed to inadequate compensation.

Furthermore, the differentiation among pay grades in the sizes of the raises provided should do much to relieve the problem of pay compression, which itself has become a major contributor to the retention problem.

A further virtue of S. 1181 is the extent to which it brings into harmony the views of those who, like myself, support our historic tradition of a volunteer military in peacetime, and the views of those who believe our military manpower problems ultimately cannot be resolved without a return to the draft.

But valuable as it will be, S. 1181, by itself, is not enough. It is only half a

solution to the military manpower problem. The other half is enactment of a new GI bill.

I have long believed. Mr. President, that the principal cause of our military manpower problems has been the 8 years of pay caps, pay redistributions, and neglect of the needs of our service men and women by previous Congresses and previous administrations. I think the belief I have long held is shared by most members of the committee and, I trust, by a majority of the Members of Congress. I feel vindicated in that belief by the increase in reenlistment rates we have seen since enactment of the 11.7-percent pay increase Congress voted last year, the first year in many years in which our service men received a full cost-of-living wage. S. 1181 is certain to bring forth even happier results in the area of retention.

Therefore, I should like to take a few minutes to discuss the other half of this problem, the increasingly serious issue of recruitment. We must not delude ourselves into thinking that higher pay and benefits would be an effective solution to this problem, because recruitment is more than a problem of numbers; it is a problem of policy. We have volunteers enough to man the All-Volunteer Force at peacetime strengths. The difficulty is that too many of those volunteering possess neither the aptitude nor the attitude required to successfully perform their military jobs.

Whereas the retention problem can be traced directly to inadequate pay and benefits for career military personnel, the recruitment problem stems more from a tragic mistake in philosophy that was made at the time the All-Volunteer

Force was created.

Many of the architects of the All-Volunteer Force were academicians and economists who meant well, but who understood little about soldiers, and less about soldiering. They assumed, incorrectly, that military service was a "job like any other job," and that the ranks could be filled by young men and women responding to "marketplace incentives"—chiefly, to cash payments.

But service in the Armed Forces is not a job like any other job. It is a job like no other job. "Marketplace incentives" are among the weakest of incentives for military service, and have their greatest appeal to those least qualified for military service.

Young men and women contemplating enlistment into the Armed Forces can be grouped into three categories:

First, there is that relative handful of youngsters who know at age 18 or 19 that they wish to make the military their career. Higher pay and benefits for the career force, of which they intend to become a part, will have as much or more appeal to them as "cash up front."

Second, there are those upwardly mobile young men and women who have no intention of making the military their career, but who out of a combination of motives—patriotism, a search for adventure. a desire to prove or improve themselves—will consent to serve in the Armed Forces for a single enlistment. There is, at present, no realistic incen-

tive for these young people to enter the Armed Forces. The Armed Forces desperately need a large infusion of this kind of upwardly mobile young men and women

Third, there are those young people who have no particular interest in either military service or in self-improvement, but cannot find a job anywhere else. I regret to say that it is to these young people that the so-called marketplace incentives have their greatest appeal.

The GI bill concept, which I favor, has been endorsed by a great many Members of this body. I am pleased to report that the measure I have introduced as the GI bill has been sponsored by more than twoscore Members of the Senate and is also under serious consideration by a large number of our colleagues in the other body. By contrast, that concept would appeal directly to the forgotten citizen-soldiers, the upward mobile young people I described a moment ago, the men and women we need so badly but are increasingly difficult to attract to the armed services.

S. 1181, coupled with enactment of a new GI bill of rights, will be a far more effective, and cost-effective solution to the military manpower problem than continued reliance on marketplace incentives alone.

S. 1181 will cost about \$400 million a year less than the administration's across-the-board pay proposal, but will do more to solve the problem of retention, since more of the money would be channeled into the pay grades where shortages are most acute.

A new GI bill will be much more effective in providing volunteers in the number and quality the Armed Forces require than the extra \$20 a month or so they would receive from an across-the-board pay raise, but will cost taxpayers nothing at all for at least 2 years—and I stress this—and will generate countervailing savings in the Department of Defense that will make the GI bill a moneymaking proposition for the taxpayer for at least 3, and for possibly as many as 5, fiscal years.

I am convinced that the targeted pay increase provided in S. 1181, aimed at retention, and enactment of a new GI bill, aimed at recruitment, will solve our military manpower problems without the need for conscription.

But while a new GI bill would, in my judgment, obviate the need for a draft, it is by no means inconsistent with the draft concept. In fact, the argument for a new GI bill becomes stronger if we must return to conscription. If GI bill education benefits are a just and proper reward for young people who voluntarily set aside their career plans for the 2, 3, or 4 years necessary to serve their country, it is an essential compensation for those we forcibly deflect from their career paths.

When we enact the Uniformed Services Pay and Benefits Act, we will have done half of what we need to do to solve our military manpower problem and to preserve the All-Volunteer Force. We can be proud of that accomplishment.

But I just wish to direct the attention of the Senate to what I think is the

equally important second half of our task, and that is the enactment as companion legislation to this bill of a new GI bill of rights.

Mr. President, on that note, I yield the floor, again expressing my admiration and compliments to those who have brought this very important and very worthy and meritorious legislation before the Senate.

Mr. JEPSEN. Mr. President, I thank the distinguished Senator from Colorado. He is recognized as the leader in this field, and we are all in debt to him for his leadership and his past service and all the things that he plans for the future. He has had my support and will continue to have my support in all these efforts.

Mr. President, I now yield time to the distinguished Senator from Texas for whatever time he needs for his proposed amendments.

Mr. TOWER. Mr. President, I thank my distinguished colleague from Iowa. I will seek recognition of my own time for the purpose of offering amendments. I understand there is controlled time on amendments. These amendments have been discussed with the managers of the bill, the distinguished Senators from Iowa and Nebraska. I believe at this point they are noncontroversial. I recognize that they are not in the House bill and may be subject to conference. But I think they are matters that should be given very serious consideration because they are addressed to a couple of rather pressing problems we have.

UP AMENDMENT NO. 349

(Purpose: To provide for an initial upfront \$3,000 accession bonus for officer volunteers for the Surface Naval Nuclear Program)

Mr. TOWER. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated. The assistant legislative clerk read as follows:

The Senator from Texas (Mr. Tower), proposes an unprinted amendment numbered 349.

Mr. TOWER. Mr. President. I ask unanimous consent reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 86, line 25, insert the following: \$3000 Accession Bonus for Surface Nuclear Power Applicants.

SEC. 30. Section 312b of title 37, United States Code, as amended by the Uniformed Services Pay and Allowances Benefits Act of 1930; is amended—

(a) by striking out "submarine" in paragraph (a) (1).

On page 87, line 2, strike out "SEC. 30" and insert in lieu thereof "SEC. 31".

On page 87, line 8, strike out "and 28" and insert in lieu thereof "28, and 30".

Mr. TOWER. Mr. President, the purpose of this amendment is to add funding to the fiscal year 1982 Defense Authorization Act for an initial up front \$3,000 accession bonus for officer volunteers for the surface naval nuclear power program. This bonus was authorized for volunteers for submarine officer nuclear

power training in the Military Pay and Allowances Benefits Act of 1980.

Legislation enacted prior to 1980 authorized a \$3,000 bonus to be paid to all junior officer graduates of naval nuclear power training. This bonus is payable to junior officers upon completion of training regardless of whether they were surface or submarine designated. This bonus remains in effect. The up front bonus authorized last year provides an additional \$3,000 to be paid to junior officer submarine volunteers for nuclear power training upon their acceptance into the program. This up front bonus provides a tremendous incentive for the 20-year-old midshipman to choose submarine instead of surface nuclear power

The effects of this incentive were very apparent in the Naval Academy and NROTC graduating class of 1981. Only 14 Naval Academy and 30 NROTC graduates chose surface nuclear power, while 205 Naval Academy and 162 NROTC graduates chose submarine nuclear power. The nuclear submarine community achieved 76 percent of its accession goal while the nuclear surface community achieved only 55 percent of its accession goal. Although the submarine force did not achieve their total accession goal, they did better than anytime in recent history. On the other hand, the 55 percent of the surface nuclear goal obtained in 1981 is the worst in history.

Many officers from the class of 1981, who declined to volunteer for nuclear power training, have indicated they would have reconsidered had the \$3,000 up front bonus been available for nuclear surface volunteers. As many as 25 additional qualified volunteers may have been obtained. It is reasonable to assume that at least this number could be obtained from the class of 1982 if this amendment is enacted.

The surface nuclear Navy expanded from 4 ships in 1970 to 13 ships in 1980. This congressionally directed expansion was accomplished at great expense to the surface nuclear trained officer community. Inability to fully predict the rapid expansion, coupled with low retention of nuclear trained officers in the 1970's, resulted in repetitive shipboard engineering tours for those officers who remained. These repetitive engineering tours deprived surface nuclear trained officers of opportunities to achieve other career goals normally expected to be accomplished in the career pattern for surface warfare officers. This fact, combined with family pressures caused by longer than expected sea duty assignments resulted in additional surface nuclear trained officers leaving the service.

Extensive use of lateral transfers of middle-grade officers into nuclear power training and increased recruiting of new accessions has nearly brought this small community of dedicated officers back to the point where they can look forward to a predictable career pattern and normal sea/shore rotation. Availability of the \$3,000 up front bonus will attract the additional officers to the surface nuclear power program necessary to maintain the officer strength at this acceptable level. Failure to enact this

bonus will lead to a repeat of the officer shortages of the past.

Mr. President, the Secretary of the Navy has testified before Congress that the Navy needs 15 battle groups to effectively carry out national policy and the defense of our Nation. There are now three nuclear powered aircraft carriers and nine nuclear powered cruisers operational with another nuclear powered aircraft carrier scheduled for delivery in early 1982. Congress has fully authorized funding for an additional nuclear powered aircraft carrier which will begin construction this year and must be manned in late 1984. There is high probability of two other nuclear aircraft carriers being funded for delivery in the late 1980's. There is little doubt that these nuclear powered aircraft carriers with their nuclear powered cruiser escorts will form a significant portion of the 15 battle groups. We must provide the incentive now so as to have sufficient middle grade nuclear trained officers available in the latter half of this decade to man these nuclear powered surface ships.

The rationale for this amendment is that there is strong incentive for those who seek a career in the Navy as nuclear officers to go into submarine service, and there is not a comparable incentive to become surface nuclear officers. As a result, we are suffering serious shortages and accession into the officer ranks for surface nuclear vessels for this nuclear specialty, and these officers are very much in demand, and we have to recognize in addition to nuclear submarines we have nuclear carriers and nuclear cruisers, all requiring men with these nuclear skills.

This amendment is designed to provide an added incentive for the nuclear officer surface force.

I have discussed the amendment with both Senators Jepsen and Exon, and it is my understanding they are prepared to accept the amendment.

Mr. EXON. Mr. President, I agree with the chairman of the Armed Services Committee, my friend, Senator Tower.

The matters that he has brought up here need discussion and will be discussed.

I am prepared to accept the amendment.

Mr. JEPSEN. Mr. President, I also agree with the remarks and the intent of this amendment by the Senator from Texas, the distinguished chairman of the Armed Services Committee.

Mr. TOWER. I thank my distinguished friend from Iowa.

Mr. President, I yield back the remainder of my time.

Mr. EXON. Mr. President, time is yielded back on this side.

The PRESIDING OFFICER. Does the Senator from Iowa yield back time on the amendment?

Mr. JEPSEN. Yes. I think the Senator is in control of all the time on his amendment. We will all yield back time and then we are ready to act on the amendment.

The PRESIDING OFFICER. All time having been yielded back, the question

is on agreeing to the amendment of the Senator from Texas.

The amendment (UP No. 349) was agreed to.

Mr. TOWER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JEPSEN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 350

(Purpose: Sea pay to members of two-crew vessels)

Mr. TOWER. Mr. President, I send to the desk an amendment on sea pay to members of two-crew SSBN vessels and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Texas (Mr. Tower) proposes an unprinted amendment numbered 350.

The Senator from Texas (Mr. Tower) proposes an unprinted amendment numbered 350.

Mr. TOWER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is as follows:

On page 86, line 25, insert the following: Sea Pay to Members of Two-Crew Vessels. Sec. 30. Section 305a of title 37, United States Code, relating to carear sea pay, as amended by the Military Pay and Allowances Benefits Act of 1980, is amended by inserting "such service to include periods as a member of the off crew of a two-crewed submarine" after "underway" "in paragraph (d) (1).

On page 87, line 2, strike out "SEC. 30" and insert in lieu thereof "SEC. 31".

On page 87, line 8, strike out "and 28" and insert in lieu thereof "28, and 30".

Mr. TOWER. Mr. President, the purpose of this amendment is to authorize payment of career sea pay to personnel on two-crewed vessels such as fleet ballistic missile submarines while they are in an off-crew status.

The Military Pay and Allowances Benefits Act of 1980 significantly increased sea pay entitlements and extended payment for the first time to officers. It did not, however, recognize the unique manning of our country's seagoing strategic deterrent forces. To take advantage of the ballistic missile submarines' ability to remain at sea longer than the people who man them, the Navy operates these ships with two crews.

As a consequence, the Navy is able to gain far more target coverage for the same capital investment. Maximizing the amount of time that our ballistic missile submarines are submerged on station, even with two crews, requires the officers and men who sail in them to be at sea about the same amount of time and deployed a greater amount of time than the crews of other Navy ships.

Because of the current wording in the sea pay law, however, they are paid sea pay only when they are embarked in the submarine. As a consequence, these men are paid only about half the amount of sea pay that their contemporaries in the rest of the Navy receive for the same amount of time at sea. To penalize these sailors, who spend over 50 percent of their time away from home manning the Nation's sea-based strategic deterrent force by denying them their total due sea

pay is a serious inequity.

An important part of the sea pay authorization is the \$100 per month premium paid to personnel with greater than 3 consecutive years at sea. Because the law requires members to be in sea going vessels to draw sea pay, Navy policy also allows accumulation of sea time and credit for the consecutive sea time premium only when attached to a ship. Thus the sea time "clock" goes to neutral during SSBN off-crew periods. This precludes eligibility for the sea pay premium for SSBN crew members in virtually all cases

Additionally, since officers must serve at sea 3 years in order to establish initial sea pay eligibility, junior officers cannot receive any sea pay until late in their second or, in some cases, their third sea tour. Eligibility for sea pay, before an officer completes his minimum obligated service will certainly be a positive factor in slowing the exodus of our junior officers and make sea pay the retention

incentive it was intended.

With over 8,800 personnel affected by the proposed amendment, the cost is estimated at \$7.2 million. This is, indeed, small in comparison with the expenditure for SSBN submarines we did not have to make due to the unique two-crew

concept. Mr. President, because the Navy is concerned with righting this inequity imposed on its personnel through no fault of their own, it is prepared to absorb the cost of the implementation year within its total obligational authority. Additionally, the Navy warfare specialty commanders in the aviation, submarine and surface communities agree that this unique situation merits singular consideration and assure me that this amendment is not a forerunner of other special case considerations. This unanimity reflects the concern the Navy attaches to this request.

This is to correct what we believe to be a deficiency and is designed to be an incentive and a compensation to these crews for our SSBN vessels that do have to remain on station for a prolonged

period of time.

I have discussed the issue with both the chairman of the subcommittee. Mr. JEPSEN, and the ranking minority member, Mr. Exon.

It is my understanding they are agreeable to this amendment, and I am prepared to yield back the remainder of my

Mr. EXON. Mr. President, I am prepared to accept this amendment offered by the chairman of the Armed Services Committee, and since there is no further request for time on this side, I am agreeable to yielding back our time.

Mr. JEPSEN. Mr. President. I agree and accept the amendment by the Sena-

tor from Texas and yield back our time.
The PRESIDING OFFICER. All time has been yielded back. The question is on

agreeing to the amendment of the Senator from Texas.

The amendment (UP No. 350) was agreed to.

Mr. TOWER. Mr. President. I move to reconsider the vote by which the amendment was agreed to.

Mr. EXON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 351

(Purpose: Technical amendment to section 5(a) pertaining to payment of aviation career incentive pay)

Mr. JEPSEN. Mr. President, I am proposing a technical amendment to section 5(a) of this bill, and I now send this amendment to the desk and ask for its immediate consideration.

PRESIDING OFFICER. The The amendment will be stated.

The assistant legislative clerk read as

The Senator from Iowa (Mr. Jepsen) proposes an unprinted amendment numbered

Mr. JEPSEN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 44, strike out lines 2-10 and insert

in lieu thereof the following:

"SEC. 5. (a) Paragraph 5 of section 301a(a) of title 37, United States Code, is amended by adding at the end thereof the following new sentence: 'All entitlement to continuous monthly incentive pay ceases for officers in pay grades O-1 through O-10 upon completion of 25 years of officer service, but officers in pay grades O-1 through O-6 remain entitled to monthly incentive pay in the amount set forth in subsection (b) (1) of this section for an officer with over 25 years of officer service for the performance of subsequent operational flying duty.'

Mr. JEPSEN. Mr. President, I am offering a technical amendment to section 5(a) of the bill, which deals with payment of aviation career incentive pay. The intent of section 5(a) of bill as reported was to permit the payment of aviation incentive pay to officers below the grade of O-7 in each month in which those officers actually perform operational flying duty after their entitlement of continuous monthly incentive pay expires at 25 years of officer service. However, section 5(a) of the bill will not achieve this result. My amendment will insure that the bill accomplishes the purpose intended by the Committee on Armed Services. I request unanimous consent that this purely technical amendment be accepted.

Mr. EXON. Mr. President, the technical amendment offered by the Senator from Iowa is certainly in order and I thank him for bringing this matter to the attention of the Senate.

I am prepared to accept the amendment and yield back any time on this side.

Mr. JEPSEN. Mr. President, I yield back the time and ask that the amendment be agreed to.

The PRESIDING OFFICER. All time having been yielded back, the question

is on agreeing to the amendment of the Senator from Iowa.

The amendment (UP No. 351) was agreed to.

Mr. EXON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JEPSEN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. JEPSEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. JEPSEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER, Without

objection, it is so ordered.

Mr. JEPSEN. Mr. President. I ask unanimous consent that the following be added as cosponsors to S. 1181: Senator DENNIS DECONCINI, Senator John Tower, and Senator ROBERT W. KASTEN.

The PRESIDING OFFICER. Without

objection, it is so ordered.

Mr. JEPSEN. Mr. President, I ask unanimous consent that I may be able to suggest the absence of a quorum without that time being charged to the time allotted to the bill.

The PRESIDING OFFICER. Without

objection, it is so ordered.

The clerk will call the roll. The assistant legislative clerk pro-

ceeded to call the roll.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.
The PRESIDING OFFICER, Without

objection, it is so ordered.

UP AMENDMENT NO. 352

(Purpose: To amend the Military Selective Service Act to permit persons over 65 years of age and retired military personnel to serve on local boards of the Selective Serv-

Mr. BOSCHWITZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows: The Senator from Minnesota (Mr. Boschproposes an unprinted amendment WITZ) numbered 352.

Mr. BOSCHWITZ, Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 86, after line 24, add the following new section: Amendments to the Military Selective Service Act to permit persons over 65 years of age and retired military personnel to serve on local draft boards.

SEC. 30. Section 10(b)(3) of the Military Selective Service Act (50 U.S.C. App. 460(b) (3)) is amended-

- (1) by striking out "who has attained the age of 65 or" in the sixth complete sentence thereof; and
- (2) by striking out "No member of any local board shall be a member of the Armed Forces of the United States, but each member of any local board shall be a civilian who is" in the tenth complete sentence and in-

serting in lieu thereof the following: "No member of the Armed Forces, other than a retired member, may serve as a member of a local board or appeal board. Each member of a local board shall be"

On page 87, line 2, strike out "Sec. 30" and insert in lieu thereof "Sec. 31".

On page 87, line 8, strike out "and 28" and insert in lieu thereof "28, and 30"

Mr. BOSCHWITZ. Mr. President, my amendment seeks to rectify a clear case of discrimination against two groups of American citizens. I'm speaking about the current prohibition against those over 65 years old and retired military personnel serving on local Selective Service Boards. These boards now exist on a stand-by basis, since we no longer have a draft. However, the boards stand ready to go in cases of an emergency

My amendment would amend the Military Selective Service Act to allow those people over 65 and retired military personnel to serve on the Board. It is my understanding that the committee is willing to accept the first portion of my amendment, but not the second. We will engage in a short colloquy about that in

a moment.

The prohibition against those over 65 serving on draft boards was enacted during the Vietnam era to remove the perception that "old men were sending young boys off to war." Mr. President, this provision was perhaps understandable at that moment, when a long and controversial war nearly ripped the social fabric of our country apart and pitted young against old in what some called the "generation gap." But I believe times have changed and we have all calmed down enough to realize that senior citizens are by no means insensitive to the needs of young people.

I am convinced that a person over 65 can and does understand the outlook of sincere conscientious objectors, for

example.

Further, since State Selective Service directors and Governors actually nominate board members, lifting the over 65 ban would not mean all the members

of a board would be over 65.

Retired military personnel have been prohibited from serving on draft boards because of the feeling that once a person is in the military, he is always in the military. Since retired military personnel receive pensions, it has been thought that they would have a "conflict of interest" if they serve on draft boards. But again, Mr. President, this logic rests on a false assumption; namely, that military retirees are somehow biased to-ward individuals who apply for exemptions. This is not the case: who better than a military man knows that a sincere conscientious objector does not belong in a combat unit? There is simply no reason to assume bias on the part of retired military people.

Mr. President, I firmly believe that we should not discriminate against these two groups of people. At this time, I would like to yield to the Senator from Iowa for his comments on this matter.

Mr. JEPSEN. Mr. President, we very much thank the distinguished Senator from Minnesota for the first half of his amendment and we recommend that it

be added to this bill. The fact that we have an awful lot of know-how and knowledge in this country has been rather obvious with our great technological advances, with the quality of life and the space shuttles we have had. We have a lot of knowledge without wisdom and I think the wisdom comes from the experience. And the experience of years certainly is welcomed and needed when we get into the Selective Service boards. I think the amendment to include or to make people eligible over 65 is just a stroke of genius, I say to the Senator. I thank him for it.

Mr. BOSCHWITZ. I understand that the chairman's subcommittee would like to delay the second part of the amendment, which would allow retired military personnel to also serve on these boards, inasmuch as retired military personnel could be recalled to active duty. Because of that he would not accept the second part but will hold hearings on this issue later on, probably in October.

Mr. JEPSEN. Mr. President, I assure the distinguished Senator that we will hold hearings and/or get additional information and research to the distinguished Senator and to the committee on the subject. There is a problem, as has been voiced to the Senator, with regard to members of the board staying on the board that in fact would be classifying and calling people into service when, in fact, they would have a service obligation and a retired status that would mandate them to go if called without selective service action. We want to check that more thoroughly.

Mr. BOSCHWITZ. Fine, I am willing to, therefore, delete the second part of my amendment, which is numbered (2) on the amendment that I submitted to the desk. I think that, inasmuch as hearings are going to be held quite shortly and there may be some ramifications to the matter that are not readily apparent, I would be very happy to withdraw that part of the amendment and I do so

at this time.

The PRESIDING OFFICER. The Senator has a right to modify the amendment. The amendment is modified. The amendment, as modified, is as

On page 86, after line 24, add the following new section: Amendments to the Military Selective Service Act to permit persons over 65 years of age to serve on local draft boards.

SEC. 31. Section 10(b)(3) of the Military Selective Service Act (50 U.S.C. App. 460(b) (3)) is amended—

(1) by striking out "who has attained the age of 65 or" in the sixth complete sentence

On page 87, line 2, strike out "Sec. 3" and insert in lieu thereof "Sec. 32".

On page 87, line 8, strike out "and 30" and insert in lieu thereof "30, and 31".

Mr. EXON. Mr. President, I think the amendment, as it now stands before the Senate, as offered by the Senator from Minnesota is a good one. I enthusiasti-cally accept it on this side. I yield back the remainder of our time.

The PRESIDING OFFICER. Does the Senator from Minnesota yield back the remainder of his time?

Mr. BOSCHWITZ. The Senator from Minnesota did not know he had any time, but I yield it back.

Mr. JEPSEN. Does the Senator from Minnesota yield back the time on his amendment?

Mr. BOSCHWITZ. Yes. Mr. JEPSEN. Mr. President, I yield back any time remaining on the manager's side. I ask that the amendment, as modified, be agreed to.

The PRESIDING OFFICER, All time having been yielded back, the question is agreeing to the amendment, as modified.

The amendment (UP amendment No. 352) was agreed to.

Mr. EXON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JEPSEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. JEPSEN. Mr. President, I yield to the distinguished Senator from South Carolina

Mr. HOLLINGS. Mr. President, I thank the distinguished Senator from Iowa, the manager of the bill, and the ranking member, the Senator from Nebraska. I believe the Armed Services Committee really reported out a splendid bill. They modulated the President's request with across-the-board 14.-some percent, the 7-percent range on up to 22 percent, targeting those areas of need. I think they have done an outstanding job and deserve full support of the Senate.

Mr. President, I fully support the military pay bill reported by the Armed Services Committee. The importance of this bill cannot be overstated since it recognizes and addresses two major flaws that exist in current pay and benefits procedures that have led to serious manpower problems for our military. These problems concern the level of adequate pay for those Americans performing military service and the inability to retain adequate numbers of enlisted and officer personnel possessing critical skills and leadership abilities.

The bill provides for pay increases of 7 percent for first-term enlistees to 22 percent for the top career enlisted levels. Officers, warrant officers, and other junior enlisted personnel would receive varying raises within the 7- to 22-percent range. In short, the raises are targeted to those personnel levels where the armed services are experiencing considerable difficulty in retaining muchneeded middle management career and skill capabilities.

In addition to the targeting aspect of the bill, it also provides increased special pay incentives for such skills as diving duty, submarine duty, hazardous duty, and aviation career duty. The services are hard-pressed to meet their manning requirements in these special skill areas and the proposed bonuses along with the targeted pay, should definitely alleviate the problems.

Mr. President, I think that the approach to the military pay problems contained in this bill, coupled with a return of the draft, is the right way to solve the manpower deficiencies the military services have been experiencing since the creation of the All-Volunteer Force. I believe the Congress should soon address the draft issue so we can close the loop on our military personnel problems.

Mr. BAKER addressed the Chair. The PRESIDING OFFICER (Mr. DAN-FORTH). The majority leader.

RECESS UNTIL 1:45 P.M.

Mr. BAKER. Mr. President, it does not appear that another amendment is to be offered at this time. Since we have controlled time, I do not see any particular purpose to be served by remaining in session for general debate at this moment. There are two lunches today, one about to begin and one already in progress, involving distinguished guests from abroad. Many Senators will wish to attend.

Mr. President, I ask unanimous consent that the Senate now stand in recess until the hour of 1:45 p.m.

There being no objection, the Senate, at 12:59 p.m., recessed until 1:45 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. Danforth)

The PRESIDING OFFICER. The Senator from Alaska is recognized.

ORDER OF BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that the vote scheduled to commence at 2 p.m. start at 2:10 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I with-

draw that request The PRESIDING OFFICER. The re-

quest is withdrawn. Mr. STEVENS. Mr. President, I suggest

the absence of a quorum. The PRESIDING OFFICER. The clerk will call the roll

The legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senator from New York (Mr. Moynihan) be recognized, as if in morning business, for not to exceed 7 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from New York.

Mr. MOYNIHAN. I thank the Chair and I thank the majority whip.

Mr. President, I have the honor to yield to my distinguished friend from Vermont, the senior Senator and chairman of the Committee on Environment and Public Works, and among the most diligent Members of this body in the affairs of the Interparliamentary Union, an organization which we hold in the highest regard, as we do our leader in that matter.

Mr. President, as the distinguished Senator from Vermont knows, we shall have an important vote in this body in approximately 20 minutes. It may be that we shall have the good fortune of having our guests from abroad, our friends, in the distinguished visitor's gallery, when that time comes, and they will see the body making an important choice.

VISIT TO THE SENATE OF DELE-GATES TO THE INTERPARLIAMEN-TARY UNION

Mr. STAFFORD. Mr. President, I deeply appreciate the words of the distinguished Senator from New York.

I simply want to call to the attention of the Chair and my colleagues on the floor that a few minutes ago the representatives of 18 nations, delegates to the next meeting of the Interparliamentary Union, did visit the floor of the Chamber. They continue to be in the building. I thank the Senator very much for yielding.

Mr. MOYNIHAN. I am happy to have vielded.

DEPARTMENT OF JUSTICE **AUTHORIZATIONS**, 1982

Mr. MOYNIHAN. Mr. President, we are approaching the vote at 2 o'clock or at 2:10 on cloture on the matter which has been before us for several months now, and I should simply like to restate my strong sense that the Senate should not agree to the amendment before us. This is one of the large issues that come before this body. It is a constitutional issue. It is an issue that goes to the structure of the American Government and not to the policy of one administration or the events of one

It is agreed, I believe, by scholars, by legal scholars, that Congress does under article III have the power to establish the jurisdictions of the U.S. courts. As to inferior courts, I would say this is a settled matter. As to the appellate jurisdiction of the Supreme Court, the case of ex parte McCardle, a Civil War decision or one settled during the aftermath of events that arose during the war, and having to do with the question of habeas corpus, would seem to control though there is still considerable scholarly dispute.

On the other hand, a century and a quarter has passed and no effort has successfully been made, none seriously undertaken, to assert this constitutional power, for any purpose other than organizing the judiciary, which I would argue was the most probable purpose of the language when it was inserted in the Constitution. I do not for a minute suppose the language was inserted for the purpose of impairing rights granted under the Constitution.

Mr. President, this is the first time that Congress has sought to use this power to impair those rights.

Mr. President, the present occupant of the chair, a distinguished former attorney general from the great State of Missouri, would be the first to agree that there is a common legal rubric that holds that there can be no right without a remedy and thus by passing a bill re-stricting the remedy that a court might issue to vindicate a right, the Congress

would be seeking to restrict and impair that right itself.

We have some judgment which rights are at issue today. We can have no notion of what might be at issue tomorrow in the next decade and the centuries after that, because ours is not a new body. We were Constitution-formed in the 18th century. We are not far from two centuries of endurance. Never have we taken from the courts, the Supreme Court, the lower courts the power to interpret rights given citizens, persons, under the Constitution. This opens that possibility.

It ought to offend the very constitutional sense of this body. It ought to be rejected as an alien intrusion into the separation of powers and the enshrinement of liberty which is the purpose of our Constitution and the duty and obligation of the U.S. Senate to defend and to advance.

Mr. President, I thank the Chair for his courteous attention. I express my deepest hope that we will not proceed to invoke cloture as some desire this afternoon, not with regard to the specifics in issue but to the general principle of the separation of powers and the inviolable responsibility of the courts to interpret the rights given individuals under the Constitution. I thank the Chair.

Mr. STEVENS. Mr. President, I ask unanimous consent that the time between now and the vote be equally divided between the Senator from Louisiana and the Senator from Connecticut.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE VOTE ON CLOTURE TO OCCUR AT 2:10 P.M. TODAY

Mr. STEVENS. Mr. President, I ask unanimous consent that the vote take place at 2:10 p.m. instead of 2 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, I will not debate the substance of this matter at any length, except to say that just yesterday I got a call from Mr. Ray Alberson, the superintendent of schools in East Baton Rouge Parish who reports that, in the few short weeks since busing has been ordered by the district court there, they have lost some 5,000 to 7,000 pupils out of a school population of some 57,000. He predicts-well, I will not say what he predicts for the future because I think it would be unfair to quote the superintendent on that kind of prediction with his own school system. But it is bad enough already, Mr. President, with 5,000 to 7,000 gone. This, on top of Rapides Parish, where children are bused 30 to 40 miles in one direction and in East Baton Rouge first- and secondgraders are bused an hour-and-a-half in one direction. In Natchitoches Parish, the busing order looms. It has not yet been ordered implemented but is expected soon. Why we continue to do this to ourselves in this country, Mr. President, I do not know.

No one defends, or almost no one defends, forced busing per se as working. No one contends that it promotes integration. Almost no one contends that it promotes sound education. But here we are caught on this treadmill, riding this tiger that we cannot get off, and searching for the solution.

Well. Mr. President, the solution is in this legislation. Let me say, Mr. President, that I do not expect to get cloture today. That is because at least seven of our committed votes on this matter are not present today. I hoped that after this long recess we would have good attendance today. We do not. I do not know how many votes on the other side are absent, but at least seven of ours are absent. And when you have to have 60 votes, to lose 7 of your votes makes it virtually impossible to win.

The Senate knows that on the last consideration of this cloture matter, 59 Senators voted "Yea." Two Senators who were committed to the yea position, Senators GOLDWATER and MELCHER, did not vote even though they were present in the Senate that day. Senator GOLDWATER was in the CIA hearings, the Casey CIA hearings; Senator Melcher had an attack of asthma and was unable to move,

as a matter of fact.

So, in effect, we had 61 votes when 60 were required last time. Since that time, at least three Senators have indicated that they voted no last time and they would vote yes this time. So we have, assuming we keep the votes we had last time, Mr. President, we have at least 64 Senators who are ready to vote yes. Unfortunately, they are not all here today and for that reason I do not expect to win. But we expect to bring the matter up for another cloture vote, I would hope, on Wednesday. I think a unani-mous-consent request is presently pending to have another cloture vote on Wednesday. I hope it is cleared. I see the majority leader in the Senate Chamber at this point. Has there been any clearance on that unanimous-consent request, I ask the majority leader?

Mr. BAKER. Mr. President, if the Senator would yield to me, I am told that a revision of the request that I put on yesterday, which was not granted, is in the clearance process today. We do not have the final word on that, but I expect to have an announcement to make prior to the vote which will now occur at

Mr. JOHNSTON. I thank the majority leader.

Mr. President. I yield the floor.

(Mr. ANDREWS assumed the Chair.) WEICKER. Mr. President, in a few minutes the Senate will vote on the matter of the Department of Justice authorization bill that has been before this body for several months now, more particularly on cloture on the Johnston-Helms amendment.

I think it important to reemphasize the issue before us. It is not a matter of busing. Indeed, I think my colleagues have read the newspaper accounts of the various actions taken by this ad-ministration over the past several months, and know that administration has made it abundantly clear that they do not intend to pursue, through the means available to them, busing as a remedy to end discrimination in our school systems.

So the policy is well established. Busing will not be a principal tool of this

administration to achieve desegregation in America's school systems. Therefore, it cannot be used as an excuse by any one of my colleagues in the sense of saying, "Well, because the executive branch of Government will not act, we are going to act, albeit with certain constitutional reservations."

That excuse is no longer available because, as a matter of policy, the administration has committed itself to what my colleague from Louisiana and my colleague from North Carolina are attempting to achieve through legislation.

So it brings us down to the real issue. and that is strictly a constitutional one: Whether or not the legislative branch of Government is going to violate the traditional concept of checks and balances insofar as dictating to the executive, for example, the Justice Department, or the judicial branch of Government what it is they can or cannot do.

There are very few of my colleagues on this floor who would not admit privately that this is the issue. But politically, any association at all with the word or the deed called busing is deemed to be a liability, and it is the fear of that association rather than a dedication to the Constitution that motivates the vote on this floor.

I would hope that the cloture motion would once again be rejected for all the reasons I have enumerated over the months past. Now my interpretation and evaluation of what is before us has been reaffirmed by the House of Delegates of the American Bar Association at their

annual convention.

Several months ago during the course of the debate, I read letters from the executive director of the American Bar Association, and those letters were questioned as not being representative of the feelings of the entire bar association. Now I stand before you on September 10. with a letter dated August 24, from the president of the bar association, in which he states that the House of Delegates of the American Bar Association overwhelmingly approved a resolution opposing congressional curtailment of the jurisdiction of the Supreme Court or the inferior Federal courts for the purpose of effecting changes in constitution-

So no longer is there any inference to be drawn in the body of the whole from the statements of its executive director. The body as a whole has spoken. The legal basis for my opposition, the constitutional basis for my opposition, has never been more valid than it is today.

Underlying all of this is that there must be one thing that cannot change in a political, in a governmental, structure that more so than any other represents the will of the people. There still has to be a cornerstone to which all can relate. Majorities may change, philosophies, whether left, right, middle of the road, parties, Republican, Democrat, all these change, but one aspect of our political and governmental life must remain constant, and that is the Constitution of the United States, so that it will be available to those who have effectuated change or those who are being oppressed by it.

In the final analysis, I do not think

there is anyone in this Chamber, or any citizen of this country, who wants a Senator of the United States looking over the shoulder of the judge when his or her time comes before that judge, before that court. That is the issue.

Are you going to philosophize justice? Are you going to make a partisan issue out of justice? Are you going to take away from the justice the independence which has been the final guarantee of all of our rights, of all our beliefs, of all our politics?

The PRESIDING OFFICER. The Senator's time has expired.

Mr. WEICKER. Mr. President, I ask that the cloture motion be rejected.

The PRESIDING OFFICER, The Senator from Louisiana has 1 minute and 47 seconds remaining.

Mr. BAKER. Mr. President, will the Senator yield 15 seconds to me?

Mr. JOHNSTON. I yield.

Mr. BAKER. I had hoped that I would have an announcement to make regarding the unanimous-consent request. I have not been able to reach Senators who are otherwise involved at this moment. During the rollcall vote I will continue to try to obtain agreement to that unanimous-consent request. I must say in all candor, however, that if I cannot get that unanimous-consent request, it is very likely that I will find it necessary to try to move to some other item of legislation.

Mr. JOHNSTON. Mr. President, in the remaining seconds, let me reply to one statement of my distinguished colleague from Connecticut. He said that this administration is no longer interested in pursuing busing, that it was no longer

making it a priority.

May I tell my distinguished colleagues that whether or not the administration does continue to pursue busing, and they have pursued it since the election in East Baton Rouge Parish, in Caddo Parish, in Nachitoches Parish, and in other places in Louisiana, the courts are continuing to order it.

The PRESIDING OFFICER. The Senator's time has expired.

CLOTURE MOTION

The PRESIDING OFFICER. The hour of 2:10 p.m. having arrived, under the previous order, the clerk will state the motion to invoke cloture.

The assistant legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of Rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on Amendment Number 96 (As Modified) to S. 951, the Department of Justice Authorization Bill.

Mr. Randolph, Mr. Bentsen, Mr. Johnston, Mr. Nickles, Mr. DeConcini, Mr. Stennis, Mr. Long, Mr. Boren, Mr. Chiles, Mr. Zorinsky, Mr. Symms, Mr. Exon, Mr. Kasten, Mr. Huddleston, Mr. Nunn, and Mr. Grassley.

VOTE

The PRESIDING OFFICER. The guestion is. Is it the sense of the Senate that debate should be brought to a close on amendment No. 96 (as modified). The yeas and nays are mandatory under the rule. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from South Dakota (Mr. Abdnor), the Senator from Wyoming (Mr. SIMPSON), and the Senator from Idaho (Mr. Symms) are necessarily absent.

I further announce that, if present and voting, the Senator from Idaho (Mr.

SYMMS) would vote yea.

Mr. ROBERT C. BYRD. I announce that the Senator from Texas (Mr. Bent-SEN), the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Connecticut (Mr. Dodd), the Senator from Missouri (Mr. Eagleton), the Senator from Tennessee (Mr. Sasser), and the Senator from Nebraska (Mr. Zorinsky) are necessarily absent.

On this vote, the Senator from Nevada (Mr. Cannon) is paired with the Senator from California (Mr. CRANSTON)

If present and voting, the Senator from Nevada would vote "yea" and the Senator from California would vote "nav."

I further announce that, if present and voting, the Senator from Tennessee (Mr. Sasser) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 57, nays 33, as follows:

[Rollcall Vote No. 252 Leg.]

VEAS-57

	NAIS-33	
Baucus	Hatfield	Packwood
Boschwitz	Heinz	Pressler
Bradley	Inouye	Riegle
Bumpers	Kennedy	Rudman
Burdick	Leahy	Sarbanes
Chafee	Levin	Specter
Cohen	Mathias	Stafford
Durenberger	Matsunaga	Stevens
Glenn Gorton Hart	Metzenbaum Mitchell	Tsongas Weicker
nare	Moynihan	Williams

NOT VOTING-10

Abdnor	Dodd	Symms
Bentsen	Eagleton	Zorinsky
Cannon	Sasser	ATTRE BUILD
Cranston	Simpson	

The PRESIDING OFFICER. On this vote, the yeas are 57, the nays are 33. Three-fifths of the Senators duly chosen and sworn not having voted in the affirmative, the motion is not agreed to.

Mr. BAKER. Mr. President, I hope that I can make an announcement in a very few moments on how we will proceed further with this measure.

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Tennessee.

Mr. BAKER. Mr. President, I hope to be able to make a further announcement on the proceedings of the Senate on the Department of Justice authorization bill and on the military pay matter.

Mr. RANDOLPH. Mr. President, let us have order in this Chamber. I have been earnest but I will never be angry.

The PRESIDING OFFICER. The Sen-

ator's point is well taken.

Mr. RANDOLPH. Here is the majority leader speaking. The majority leader and the minority leader are standing here. We need to give attention to the subject matter.

Mr. BAKER. Mr. President, I thank my friend from West Virginia who is so correct in saying that the Senate was not in order, and I will do my best to earn his confidence on the remainder of his statement about the importance of what I am about to utter.

Mr. President, I now have clearance to make a unanimous-consent request in respect to the further disposition of the Johnston amendment.

I may say, by the way, that the request I have now before me has gone through extensive and tedious clearance processes and I believe is the best manner in which to handle this subject.

Mr. President, I understand now that my optimistic statement or the preamble of my optimistic statement may have been premature so while there is a further consultation with Members on the other side of the aisle for the moment I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk

will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, in a few seconds I am going to ask unanimous consent for a period for the transaction of routine morning business, and the reason for it is we are still in negotiations on a method of disposition of the Department of Justice bill and the amendments to it. I think we are within shouting distance of getting that done. I believe it is worth the investment of time to continue to try.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent now that there be a brief period for the transaction of routine morning business to extend not past 3:15 p.m. in which Senators may speak for not more than 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTERNATIONAL AIR US CAR-RIERS—A CRITICAL JUNCTURE

Mr. PRESSLER. Mr. President, I wish to bring to the Senate's attention the plight of our country's international air transportation system. As chairman of the Business, Trade and Tourism Subcommittee, I am certainly aware of the importance of international tourism in our international trade balance.

I have most recently become acquainted with the particular financial difficulties of Pan Am Airlines and TWA. However, this is definitely an industrywide problem. All of the long haul U.S. international carriers suffered hardship in 1980, as indicated by the following Civil Aeronautics Board (CAB)

International operating profit (loss) [Calendar year 1980]

Carrier

Braniff	(\$63, 518, 000)
Continental	(14, 579, 000)
Delta	(6, 975, 000)
Flying Tigers	(3, 692, 000)
Northwest	(46, 130, 000)
Pan Am	(44, 641, 000)
TWA	5, 504, 000
Western	(12, 867, 000)
Total	(186, 868, 000)

The five major carriers alone suffered over \$150 million in operating losses on their international routes during the past year.

The seriousness of these problems stretch far beyond the individual air carriers. While the carriers employ tens of thousands of personnel, there are also aircraft manufacturers and other vendors of aviation-related supplies and services affected by this problem. Currently, U.S. carriers account for less than 10 percent of the total intercontinental wide-body aircraft on order.

We must also remind ourselves that the balance of trade is being adversely affected. Every percentage point of United States-Europe traffic, for example, is worth approximately \$47 million in revenue, and each percentage point of trans-Pacific market share is worth approximately \$24 million in revenue. However, in recent years the U.S. carriers' share of the international markets has been declining, with adverse consequences to the U.S. balance of payments.

While fuel costs and the state of the economy must be cited as part of the cause of these international aviation problems, the problem is really compounded by Government actions in past years. Perhaps we need to better understand the nature of international air transportation and recognize the differences between domestic and international marketplaces.

In understanding the critical differences between domestic and international markets, we must address the "open skies" policy initiated in the past 4 years. While the "open skies" policy is an attempt to certificate the maximum number of carriers and promote free competition, we must make sure that we are not overlooking the specific problems of our U.S. carriers. Foreign government support of their own carriers and denial of market access to U.S. carriers often make it difficult for the U.S. carriers to compete. The "pooling" agreements for the joint operation of services and allocation of revenue is also a competitive advantage for the foreign airlines.

Another issue of great concern to U.S.-flag international carriers is the exorbitant landing fees our carriers must endure at international airports. The landing fee for a 747 air carrier at the London Heathrow Airport is currently set at \$8,000 during a peak hour. In comparison, the average landing fee at a U.S. airport is currently \$400.

In addition, the international carriers are also faced with en route charges or navigation charges. Pan Am Airlines reports that such fees average \$35 million annually and have been increasing on an average of 25 percent per year.

Mr. President, I believe that the U.S.flag carriers are at a critical juncture. The Federal Government must be more responsive to the problems faced by these carriers. As the Senate debates the sunset of the Civil Aeronautics Board, the National Tourism Policy Act, the airport development aid program, and other legislation affecting the balance of trade and air transportation, I suggest that we recognize the problems of international carriers. While these carriers are not seeking a bailout, they do expect us to understand the complexity of the international environment, U.S. international carriers need our support in order that they may return to a position of competitive strength.

THE STATE OF PREPAREDNESS OF U.S. MILITARY FORCES IN EU-ROPE: OR IS IT UNPREPARED-NESS?

Mr. PRESSLER. Mr. President, as a former military man myself, I have been watching with considerable interest and concern for some time developments in U.S. military preparedness in general, and in particular the condition of U.S. military units in Europe.

In America today there is a consensus both in Congress and among the American people that we need to do more in the area of national defense, in fact, that we cannot afford not to. The national defense debate that preceded this consensus has, however, concentrated all too often on the material dimensions of the security challenges confronting the United States and NATO today, and to a lesser extent on the legitimate need for a significant, real qualitative increase in allied defense spending and readiness to match the unabated massive Soviet military buildup of the last 15 years. How many more missiles, ships, or divisions has been the major focus of attention.

The crucial issue of U.S. and allied military manpower capability, troop morale, competence, and readiness has been neglected in favor of a concentration on resources, which, although of vital importance, are not the only element in the equation. "It doesn't matter how good your equipment or technology is if your men cannot operate it" is a legitimate concern.

In the global context, here are some of the basic facts concerning the present Soviet-American balance of power that

we must keep in mind:
First, since the late 1960's Soviet military strength has increased dramatically in both nuclear and conventional terms. Since the early 1970's the Soviets at the strategic level have achieved virt

tual parity in central systems (ICBM's, et cetera). Soviet equipment in both their conventional and nuclear arsenals is for the most part newer than the equipment of the United States and its allies.

Second, the total Armed Forces of the United States amounts to approximately 2,050,000 military personnel (including 150,000 women), who serve on a voluntary basis. The total Armed Forces personnel figure for the Soviet Union amounts to some 3,658,000, excluding some 500,000 internal security troops, railroad and construction troops, who all serve on an obligatory conscript basis from 2 to 3 years at a time.

Third, U.S. forces overseas, as of September 1980, amounted to some 488,726 military personnel, with approximately 331,705 in Europe, 16,878 in the Western Hemisphere, 114,845 in the Pacific and Far East, and a much smaller number in other areas. The following table gives a further breakdown of these distributions:

U.S. FORCES OVERSEAS-AS OF SEPT. 30, 1980

Source: U.S. Department of Defense.

The Soviet Union maintains some 30 motor rifle and tank divisions in Eastern Europe, some 67 divisions in the European U.S.S.R. military districts, 6 divisions in the central U.S.S.R., 24 divisions in the southern U.S.S.R., some 46 divisions along the Sino-Soviet border, and 6 or so divisions in Afghanistan. The Soviet divisions in Eastern Europe are considered to be between three-quar-

ters and full strength with complete equipment, and about half of those in the European U.S.S.R. and the Far East are considered to be in that category or between half and three-quarters strength, complete with fighting vehicles.

Fourth, Soviet military personnel abroad consist of approximately 85,000 in Afghanistan, 7,500 in Cuba, 1,200 in Ethiopia, 1,000 in Iraq, 1,000 in Libya, 1,000 in Mali, 20 in Mauritania, 4,000 in Vietnam, 2,500 in Syria, and 1,500 in South Yemen.

The facts and figures of the immense Soviet buildup and comparative United States and allied deficiencies in defense preparedness vis-a-vis the Soviet Union are both illuminating and seriously alarming. At the end of my text I have attached a number of charts which graphically point out this imbalance.

Instead of pursuing them in detail here, I would like to point out a number of concerns I have with regard to the central topic I seek to address today—an examination of the present serious imbalance between NATO and the Warsaw Pact forces in Europe.

The combined ground forces of NATO in the NATO guidelines area total only 732,000, while those of the Warsaw Pact total some 935,000, that is, over 200,000 more. The Warsaw Pact presently maintains a numerical advantage of approximately 2 to 1 in theater-based tactical aircraft; 2.3 to 1 in divisions; 2.5 to 1 in theater deployed tanks; 3 to 1 in artillery pieces; better than 3 to 1 advantage in the maritime area in the Baltic, and is catching up with NATO's advantage in the Mediterranean.

The Soviet Union has committed for more than a decade 12 to 13 percent of their GNP to military expenditures geared toward the improvement of all categories of warfighting capability, especially the eradication of their inferiority in strategic nuclear and theater nuclear forces.

The Soviets have made impressive and alarming gains in the last decade, and now possess a high-technology military arsenal, which equals and in some cases exceeds the capabilities of the West. This arsenal includes the mobile, extremely accurate multiple nuclear warhead SS-20 ballistic missile; a new and more sophisticated generation of armored fighting vehicles; over 10,000 modern T-64/T-72 tanks (the even more advanced T-80 tanks will soon be operationally deployed); the first KIROV-class cruiser (which carries a high-speed, antiship cruise missile with a range of up to 250 miles); longer range attack aircraft which carry twice the payload of those replaced; three times as many heavily armed attack helicopters as NATO (from none in 1970); and the new ALFA-class submarine—to mention only a few new. enhanced, and technologically highquality weapon systems capabilities.

To meet its responsibilities, the United States (which has 16 Army ground divisions and three Marine divisions) stations on the central front in Europe (West Germany) the equivalent of five Army divisions. Another five presently in the United States are theoretically supposed to arrive there within 10 days

[.] New category for this report.

after mobilization. The Soviet Union alone, on the other side, has no fewer than 50 combat ready (although slightly smaller in size) divisions prepared to engage in a land battle in Europe.

The very real possibility that the Soviet Union could use the Warsaw Pact's military superiority to its political advantage in Europe should in itself be a cause of grave concern to NATO, and be an urgent impetus to rectify the growing and dangerous military imbalance.

Let us not forget that the Soviet Union has dramatically demonstrated both its capability and willingness to utilize its military muscle abroad for political purposes: East Berlin in 1953, Hungary in 1956, Czechoslovakia in 1968, Afghanistan in 1979, and the present massing of Soviet forces on Poland's borders. It is evident that NATO's unilateral restraint has not worked in the past.

Given a changed global strategic environment, with increasing threats to our vital collection and material interests outside of NATO's boundaries (Afghanistan and the Persian Gulf area), demonstrated political will and unity of purpose are essential for NATO to rebuild and enhance the credibility of its deterrent strategy of flexible response, which

has been seriously reduced. The present military imbalance between NATO and Warsaw Pact countries is virtually all-encompassing. Except for the airborne units of the Polish and Czech armies, Warsaw Pact forces are fully mechanized. NATO forces still consist of large formations of regular infantry. The Warsaw Pact countries are significantly ahead of NATO forces in infantry fighting vehicles and multiple rocket launchers (Pact equal 3,300 multiple rocket launchers; NATO equal 200). While many NATO aircraft have a dual air defense/ground support role, Pact air forces have over 2,000 pure interceptor aircraft.

The charts and figures at the end of my text give a picture of the dramatic imbalance between NATO forces and those of the Warsaw Pact countries. It must be remembered, however, that numbers do not tell the whole story. The state of readiness of United States and NATO ground forces in Europe, as well as maintenance of equipment and troop capabilities, is hardly a match for the Warsaw Pact countries in conventional terms.

Nearly 25 percent of NATO frontline forces in Europe are not considered combat ready. Nearly half of the 30 Air Force squadrons in Europe are not combat ready, and the U.S. Army in Europe has a backlog of over \$1 billion in needed repairs and maintenance. The United States/NATO naval situation is not much better.

While the United States and its NATO partners are making an attempt to catch up with the Soviet Union. the Soviets are plowing ahead. The United States and its NATO allies cannot afford an ill-prepared, ill-equipped and undermanned military establishment and still hope to keep the Soviets in check and let them know that it is in their interest to conduct themselves as a proper member of the international community, or face

reprisals for their expansionism and aggression in Europe or elsewhere. The future viability of NATO and Western democracy is on the line, and with it prospects for peace.

Obsolescence and the introduction of new Soviet systems, especially the SS-20's (175 of which are targeted on Europe, and which have a much greater accuracy and speed as well as warhead capability) have, at the TNF level, seriously reduced NATO's nuclear deterrence capability and the possibility of allied flexible response, and NATO's past advantage in battlefield weapons. This Soviet buildup was directly responsible for the NATO dual track decision of December 1979—modernization of our TNF and arms control. NATO's strategy of "flexible response" has also been seriously undermined by the massive Soviet buildup.

Although the European share in total NATO expenditure rose from 22.7 percent in 1969 to 41.6 percent in 1979, and this is commendable, given present conditions there is an urgent need for joint cooperation and equal participation on both sides. We must, however, at the same time remind the Europeans that to underestimate the Soviet threat—vividly evidenced in Afghanistan and now encircling Poland, as well as Soviet aggression and expansionism in other areas of the Third World—would be a most serious mistake.

One of the principal lessons to be learned from the past 10 years is that in order to deal with the Soviets in a meaningful way with regard to arms control, the United States and the West must have first and foremost a satisfactory and adequate security policy, and that the effectiveness of allied nuclear deterrence remains absolutely crucial for the maintenance of peace.

The basic question we are faced with in Europe is a fundamentally critical one: Are U.S. forces in Europe capable of competently and effectively engaging the enemy in case of an attack?

Unfortunately, it is my belief, having recently returned from an investigative factfinding trip to our frontline troops in West Germany, that the presently composed U.S. ground forces in Europe may not be as capable as they could or should be of competently and effectively

engaging the enemy.

While on a factfinding mission for the Senate Foreign Relations Committee in Germany, I visited our frontline units and met with a variety of individuals responsible for our defensive posture on the central front. These individuals included U.S. Ambassador to the Federal Republic of Germany, Arthur Burns; General Lynn, Chief of Staff, U.S. Army, Europe; Major General Benedict, past commander of the Berlin Brigade; Mr. David Anderson, U.S. Minister to Berlin; the U.S. consuls general in Munich and Hamburg; the Director and representatives of Radio Free Europe in Munich; and a number of combat unit commanders.

Although we have a number of fine U.S. military men in Germany and other parts of Europe, and I say this from first-hand experience, there are a number of

serious problems that NATO as a whole faces. These include critical shortages in military transport equipment; the difficulty involved in sustaining conventional combat operations; shortage of prepositioned war reserves; the difficulty of resupplying forces; and the lack of political will to increase real defense spending on the part of many NATO countries, because of economic conditions.

Let me first list a few of the reasons for this lack of preparedness in general, then focus on the European front in particular, and finally attempt an answer as to what needs to be done to correct the very serious situation we face today.

With the advent of the Volunteer Army, a change has taken place in the state of U.S. military preparedness. Some military men have expressed to me their concern that the concept of military service has been transformed from that of a patriotic profession for the defense of the Nation to a job training corps, with the fundamental purpose of a military establishment becoming more and more clouded. Defense Department statistics indicate that U.S. Army recruits today are coming largely from the unemployed and economically disadvantaged.

According to Defense Department figures, only 28 percent of those drafted into the Army in 1965 were high school dropouts; in the Army today, high school dropouts make up appreximately 46 percent of the Army. Personnel costs are going up significantly to compete with the private sector, and yet reenlistment rates remain extremely low; according to Defense Department statistics, approximately 35 out of every 100 recruits today leave the Army before the end of their 3-year enlistments. The energy and talent of middle-class America is largely absent from the armed services.

Military equipment modernization and maintenance is also a problem. In short, the readiness of U.S. Armed Forces in terms of discipline, education, morale, capabilities, and purpose has been to a significant degree eroded, along with our military reputation overseas.

Since Vietnam, the Army has found it much more difficult to retain skilled combat officers, and according to Army statistics the ratio of officers to total Army strength has dropped in the last few years from 17 percent to approxi-mately 11 percent. As George Wilson pointed out in his article in the Washington Star, one of every six Army colonels handpicked this year-1981-to command troops has turned down the honor. A U.S. Marine captain with whom I spoke explained that the rigors of command, the difficulty of instilling discipline and spirit, the turnover in manpower, and the lack of promotion possibilities in unit combat command positions had all led him to opt out of the military. This was a career officer with extensive frontline combat command experience and a profound dedication and sense of service to his country; but like the Army colonels, he refused to accept the honor of troop command.

Wilson went on to say that:

No number of \$2 million M-1 tanks, \$1.2 billion Trident submarines, or \$35 billion

MX missile systems will add up to military might unless the United States has people who know how to use them.

Simply spending more money is not going to solve this Nation's major defense problems. Unless we have a very thorough and extensive quality control and utility examination of our defense spending increases, and unless we see to it that we have a military that is truly a citizen's army, and restore the dignity of the warrior's ethic and sense of service to country, we will find ourselves less and less able to defend our democracy, with all that that implies.

The situation of U.S. forces in Europe, particularly in West Germany, has been partially described by what I have already said about the state of our troops in general. There are mounting problems in Europe with U.S. troop morale, competence, and readiness. The Europeans, especially the Germans, measure their defense contributions in terms of the skill of their armies and the size and readiness of their reserves. In both of these areas, the U.S. Army Corps stationed in Germany-some 215,000 soldiers-are often lacking in comparison

to their NATO partners.

The Pentagon's own "Human Readiness Report No. 5" vividly indicates that forces in Europe may be significantly unprepared in some areas for combat. The report points out severe manpower, morale, and management problems. For example, only 39 percent of junior enlisted men in Europe, according to the study, thought their units would do well in combat. The report also noted widespread concern by the officer corps over what they perceive as the declining competence of their corporals and younger sergeants. Unit cohesion, or the ability to stick together under fire, was also viewed as being seriously weak. With 35.2 percent of new soldiers now leaving the Army before their first 3year terms have ended, the problem of troop unity and discipline, as well as the command task of the officer corps, was viewed as becoming more and more difficult.

The intelligence and education levels of enlisted troops also raises problems as far as motivation, discipline, and morale are concerned, not to mention troop capability and performance. Defense Department figures indicate that only 58 percent of this year's enlistees have high school diplomas—a drop from 68 percent the year before—those with any college experience are down to 3.2 percent, and the dropout rate among nonhigh school graduates during their first enlistment term is twice as high as for diploma holders.

The No. 1 mission of U.S. troops in West Germany in conjunction with our allies is to stop a Soviet invasion across the German border and other land invasion routes. I do not mean to sound overly negative about the prospects of our forces stopping a land invasion, but I am concerned about their capabilities and preparedness levels as far as discipline, motivation, competence, spare parts, equipment, and so forth.

On the one hand, we have a large number of very motivated, capable and fine people in the U.S. Army and other branches of the service, in Germany and Europe; on the other hand, we also have some serious problems that I have already indicated.

In a number of competitions over the past few years designed to simulate armored warfare on the plains of Europe with our NATO partners, U.S. military performances for various reasons have been seen recently in the press as less than adequate.

The American 2d Armored Division, normally based in Texas, was flown over to West Germany as part of the annual American reinforcement exercise, and took part in the large NATO army exercise Crusader in September 1980. The division's performance was criticized on a number of counts in an article in Foreign Report, a newsletter published by the Economist of London. The NATO exercise invloved tank mobility and coordination, utilizability of prepositioned equipment, artillery coordination, maneuverability, counterattack capability and organization, which were judged by allied umpires. The Economist article and criticism from allied sources focused on the following areas:

American armor tended to advance without sufficient artillery preparation and failed to take enough cover against hostile air attack when not on the move.

Inadequate leadership by NCO's and junior officers; junior officers pay too little attention to personal leadership, and noncommissioned officers are often inexperienced in field operations.

Camouflage was often not used or misused, and American units lacked discipline in the positioning and organized mobility of their tank units, at times dis-

rupting the competitions.

The comments of Gen. Sir Peter Leng. commander of the British First Corps in West Germany, who participated with his unit in the exercises with the 2d Armored Division, pointed out that there were some difficulties; but he highly praised the operation of the American forces.

The handpicked 3,500-man Brigade in West Berlin-which is part of the regular U.S. Army, but whose expenses are paid by the West German Government-seems to have a very high performance level. One of the three U.S. battalions recently scored 22 hits out of 24 shots with the TOW antitank missile during annual live-fire training.

Bonn provides about twice as much money for operations, maintenance, and target practice for the U.S. unit than the United States provides for other American units. The West German Government pays the expenses for all three Allied installations, that is, the United States, British, and French garrisons who defend the city (the West German Government is not permitted to station its own troops in Berlin, under an agreement signed at the end of World War II). The U.S. Army pays the salaries of the troops and provides their major weapons. The total Allied force in West Berlin amounts to some 9,000 troops, which face approximately 350,000 Soviet and 150,000 East German troops in East Germany.

Outside of Berlin, many commanders have complained that they are not allocated enough practice munitions to enhance the combat skills of their troops. One problem of troop readiness seems to lie in the availability of such munitions and training. The tank battalion in West Berlin was allocated 24 shots for practice, when other vital infantry battalions are normally allotted only 18 of the \$4,000-a-copy wire guided missiles for use in training each year. Battalions in the United States receive only about four missiles a year for training purposes.

Another noteworthy NATO competition which occurred this year was the 1981 Canadian Army Trophy Competition. The competition has been conducted biennially since 1963 at a West German tank range. The United States finished last in initial participation in 1977 and next to last in 1979. In 1981, the United States hosted the competition at a newly constructed tank range in Grafenwoehr, West Germany, between June 15 and 19, 1981. Fifteen tanks (five platoons of three tanks each) represented each country. 1st Bn., 32d Armor, 3d AD, U.S. competing unit (M-60A3 with laser rangefinder). Participating countries were: Canada and Belgium (both with laser rangefinders Leopards), Germany and Netherlands (both with steroscopic rangefinders Leopards), and United Kingdom (Chieftain with laser rangefinder).

Four of the five platoons from each country were randomly drawn to compete for record. The fifth platoon fired, but not for record, and was used for equipment and personnel support, as required, for the other platoons. The high three scoring platoons per country de-

termined the final results.

Each platoon was issued 30 rounds of main gun and 750 rounds of MG ammunition. Each platoon, while negotiating several barriers over a 950-meter battle run, at a minimum 10-miles-perhour speed, engaged two targets. An additional 16 main-gun target—two to five exposed at a time-were fired while stationary. Each target was exposed for up to 40 seconds. Range to targets while moving was 1,200 meters or less. Range to stationary targets was 2,000 meters or more. The MG targets consisted of 60 infantry silhouettes. Maximum 500 points/main target, on a sliding scale, was based on target hit and time required. Bonus was given for hitting all 18 main-gun targets and for ammunition conservation. Twenty-five points were awarded for each infantry silhouette hit.

The scoring consisted of a possible 21,200 maximum points per platoon, broken down as follows:

First, 18 main-gun targets (500 point/ hit) equal 9,000 points;

Second, sliding time scale (1-40 seconds) equal 9,000 points (main gun hit second after target exposure was worth 500 points; 40 seconds after, worth zero points);

Third, bonus for hitting all 18 targets equal 500 points:

Fourth, ammo bonus equal 1,200 points (100 points/round for all rounds remaining after 18 targets hit);

Fifth, 60 infantry silhouette (25 points/hit) equal 1,500 points; for a to-

tal of 21,200 possible points.

The final standings were as follows: Federal Republic of Germany (41,770); Belgium (36,577); United States (35,187); Canada (34,990); United Kingdom (34,840); and Netherlands (30,724). The U.S. results were encouraging and represented a significant improvement over previous Canadian Cup competitions.

U.S. results in NATO competitions are dependent to a large extent upon equipment and training as well as unit cohesion and time spent working together. In a "shooting and maneuvering contest," the Leopard I used by Germany, Belgium, the Netherlands, and Canada might well have had the advantage over the U.S. M60-A3 in maneuverability and reliability. The U.S. crew did well to come in ahead of the British, Canadians, and Dutch.

The fact to be kept in mind is not that the United States performed poorly because it did not win the contest, but rather that our European allies also have some good equipment and excellent training and that working together we can successfully deter the Soviets.

The main question I would like to pose today is what can we do to increase the level of capability of our U.S. military forces, reduce friction between U.S forces in Germany and the German population, and shore up in a concrete fashion the defense of Western Europe.

Perhaps the answer may be in better training and equipping of our Armed Forces, which could be done to a significant degree here at home. An increase in the level of Reserve Forces could also be part of the answer. A qualitative and quantitative increase in Allied defense spending is also essential.

If our mission in West Germany is to make the Germans more of a bulwark against the Soviets, we may be failing if we maintain an inadequately prepared force in the area at its present level, with its present composition. We are and need to be as supportive as possible of our German allies in a steadfast defense of the West. In order to do this, we must realize that the future of the Armed especially the problems the United States faces with the All-Volunteer Army, need to be addressed as soon as possible, and that the decisions we make now-to further instill pride and patriotism in the U.S. military; to share responsible burdens with our NATO allies; and to shore up our own military ranks—will be critical to United States-European relations and the safety and defense of the West.

Although the United States and Europe presently face substantial economic difficulties in terms of inflation, unemployment, high energy cost, and so forth, we must move in a unified and coherent fashion to implement both tracks of the December 1979, NATO decision to modernize our tactical nuclear forces; and proceed with meaningful and realistic arms control talks with the Soviets. It must be emphasized that this latter track can be pursued successfully only from a position of Allied strength

and unity. Expectations concerning arms control talks should not be viewed over-optimistically when the Soviets view Allied strength as inferior to their own and feel they have nothing to gain.

and feel they have nothing to gain.

We cannot hesitate in taking the necessary steps in consultation with our allies for the formation of a more unified and capable defensive establishment and strategy, with an emphasis on preparedness and quality. The difficult decisions that confront us cannot be post-poned.

OLDER AMERICANS EMPLOYMENT OPPORTUNITY WEEK

Mr. HEINZ. Mr. President, last July the Senate approved a resolution designating this week as "Older Americans Employment Opportunity Week." In connection with this week, there are special activities taking place across the Nation which are designed to promote the hiring and retention of older workers. As we in Congress confront the complex issues involved in social security and other retirement programs, we must not neglect the laudable aspirations of older persons who wish to work beyond retirement age.

In this connection I would like to call the attention of my colleagues to a special report prepared by the staff of the Special Committee on Aging entitled "Toward a National Older Worker Policy." This report will be a valuable guide to both Congress and to private industry as the need for more affirmative policies to attract and retrain older, experienced, and skilled workers becomes more pronounced in the coming decade. The report explores present retirement policies which tend to push older workers out of the labor force, and it identifies personnel practices which tend to favor workers and discriminate vounger against older workers on the basis of their age-and not on the basis of their ability.

The report then goes on to make specific and wide-ranging recommendations to implement expanded employment opportunities for older workers. For example, the report urges the complete abolition of mandatory retirement. It also recommends that the current social security earnings limitation be raised from \$5.000 to \$12,000. It also urges an increase in the scheduled retirement deferment credit from 3 percent to 9 percent per year for each year worked beyond age 65—which would make the credit a true incentive for older workers to stay on the job.

Specific recommendations for private employers include in-house reviews of age-biased personnel practices, the development of retraining programs, the use of part-time and flexitime work schedules, and liberalizing pension and employee benefit programs to encourage older workers to continue a productive role beyond the traditional retirement age.

Labor unions are urged to reassess bargaining strategies to assure that benefits gained for workers are not at the expense of older workers. Provision for part-time work in collectively bargained contracts is also recommended.

I want to make clear that these recommendations do not necessarily represent, in whole or in part the views of any member of the committee. Individual members may agree or disagree with some or all of the proposals. Nonetheless we believe this report is of value in confronting what may prove to be one of the major challenges of the decade. No one argues that keeping older

workers on the job will, of itself, save the social security system or the economy. But I do believe that promoting employment choices for older, productive Americans benefits our overall economy. Older persons who choose to remain working contribute their skills and experience to the economy. They also pay taxes—including FICA. This policy study describes new ways in which employers can deal with older workers ways to retain their skills, and reward their contributions in an equitable manner. It also notes that the time for developing a thorough older worker policy is close at hand. Demographics and the changing profiles of the labor force simply do not allow us the luxury of delay. We will need older workers to help keep our economy running in a relatively short period of time. This comprehensive report offers a solid building block for a national older worker policy. I recommend it, without reservation, for consideration by all my distinguished colleagues in the Senate and for all employers and labor unions.

I ask unanimous consent to have printed in the Record the executive summary of the report for the benefit of my colleagues.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Toward a National Older Worker Policy executive summary

Age discrimination in employment continues to play a pernicious role in limiting employment opportunities for older workers, as manifested by the increasing number and scope of complaints reaching the Equal Employment Opportunity Commission (EEOC) and litigation pending in the Federal courts. The Age Discrimination in Employment Act (ADEA) provides basic civil rights protection for older workers and for older persons seeking to reenter the labor force. But recent developments and cases suggest that there are weaknesses in the law which should be corrected.

Older worker employment programs in the United States have varied greatly in design, funding levels, and emphasis over the past years.

Although the Comprehensive Employment and Training Act (CETA) represented the Nation's basic manpower policy, older workers participated minimally in this program. Title V of the Older Americans Act, as amended, provides part-time work for older persons who meet certain Office of Management and Budget (OMB) poverty criteria. The program serves more than 54,000 older individuals. The larger, more expensive training and employment programs, however, appear to be directed at disadvantaged youth. The smaller, part-time work program is directed at older workers. There are certain values and policy implications involved in this dichotomy which deserve careful scrutiny.

Current employment programs sponsored by the U.S. Government can be changed to provide more equitable services to older workers. And there are many new policy and program initiatives which can and must be explored over the coming decade if the Nation is to develop a policy recognizing the older workers as a valuable human resource.

For example, an affirmative action program for workers between the ages of 40 and 70 might assure that these individuals (including older women and minorities) gain ready access to jobs made available through Federal contracts to major employers in the United States.

Congress could design and legislate special unemployment insurance and job retraining programs for middle-aged and older workers to enable them to remain in—or reenter—the labor force when external economic pressures would otherwise force them into premature labor force withdrawal.

Congress should also explore alternative employment programs which would provide older workers with incentives to defer retirement; provide employers with motivation and incentives to develop retention programs for older employees; and promote part-time employment opportunities for retired individuals seeking limited work opportunity.

Further, officials from the Departments of

Further, officials from the Departments of Commerce and Labor, along with representatives from the Administration on Aging, could assess and develop economic impact programs which can lead to job opportunities for older workers along with the other age groups in the labor force.

Current retirement policies should also be reconsidered. Various experts and observers have pointed out that continuing our present level of retirement income support is largely dependent on a combination of economic and demographic factors. If, for example, double-digit inflation abates over the coming years and if the economy as a whole does not slide into serious recession and the U.S. labor force achieves reasonable levels of productivity, then we may be able to afford current benefit levels. And older persons most likely will continue to retire at the expected early or normal retirement age.

But if economic conditions are more severe, then the support of an additional 5 million older persons in "full' retirement at the end of the decade, and millions more in subsequent decades, raises many questions. Will the retirement income, from whatever combination of sources, be adequate? Will able, older retirees be forced to engage in some sort of employment activity to make ends meet? Much has been written about inflation has eroded the incomes of older persons who retired 10 or more years ago on what then seemed to be an adequate retirement income. Retirement policies should focus on removing the disincentives which tend to push, or lure, older workers into retirement. A policy objective is to provide options within the retirement system which would allow for continued, part-time work, periodic callback to the workplace, and provisions for hiring new older workers.

Employment as an alternative to retirement should be thoroughly examined as one means to alleviate financial stress on the public and private pension systems as the Nation's older population expands over the coming decades. But, once again, new knowledge and tools are needed if employment and retention options are to become practical realities for older workers and prospective employers.

If a national older worker policy is to take hold, a major effort at organizing and disseminating present research and knowledge on age, work, and retirement must be made. The employer community at large and, specifically, personnel administrators and human resource managers need to know how to utilize older workers; and they need the tools and methods to do so. Furthermore, new knowledge is needed about older workers in new and effective ways. The gradual aging of

our population makes this knowledge all the more necessary.

Schools of gerontology, business administration, and industrial relations need to collaborate and share their experience as it applies to the aging process and the adjustment of work and retirement systems to accommodate this process in the workpiace. Schools of medicine with established programs in geriatrics also need to cooperate in generating research and information which can help in the development of flexible employment-retirement systems. The specific recommendations made by the Federal Council on the Aging are contained in appendix A.

TRIBUTE TO ROY WILKINS

Mr. GLENN. Mr. President, I want to pay tribute to one of the most dedicated, capable, and effective civil rights leaders of our time, the late Roy Wilkins. Born at the turn of the century in St. Louis, Mo., Roy Wilkins' life was an inspiration to all Americans who truly believe in the American creed of liberty and justice for all. Although often persecuted—and sometimes prosecuted—for his ideals, Mr. Wilkins waged a tireless and a lifelong fight against the evils of bigotry, hatred, and racial discrimination. When he passed from among us at age 80 last Tuesday, he left the country he loved a distinguished legacy of solid progress and proud achievement. Indeed, by continually striving to make his country better, Roy Wilkins demonstrated himself to be a patriot in the truest and noblest sense.

Though perhaps not as visible or as media-oriented as some of his colleagues, Wilkins' behind-the-scenes efforts were indispensable in winning many of the major civil rights battles. One of the earliest of those battles—unbelievable as it now may seem-concerned the enactment of the antilynching laws—a task to which Mr. Wilkins devoted a decade of his life after joining the NAACP in 1931. In 1954, as the executive director of the NAACP—a position he held for 22 years—Roy Wilkins was an influential figure in the landmark Supreme Court case of Brown against Board of Education. By mandating an end to separate and unequal public education in this country, the Court sought to open the doors of opportunity to every American without regard to the color of their skin. Among Roy Wilkins' other achievements was his work in organizing the 1963 march on Washington—an event at which his friend Martin Luther King, Jr., so eloquently spoke of his majestic dream for America. Through his close association with former President Johnson, Mr. Wilkins played a key role in urging the President to press for passage of the 1964 Civil Rights Act, the Voting Rights Act of 1965 and other important civil rights legislation.

Mr. President, Roy Wilkins' contributions to the quality of American life are as legion as they are legendary. His life made a difference. Hopefully, his death will not. In 1968, Mr. Wilkins spoke about the tragic assassination of Dr. Martin Luther King. He put it this way:

It will not stay the civil rights movement; it will instead spur it to greater activity. It is to be hoped that this . . . will help move

the American people to prompt actions to expunge racism from our national life. If such action is taken forthwith, the sacrifice of this great and good man will not have been in vain.

Mr. President, because those words are equally and clearly applicable to the life and death of Roy Wilkins himself, let us in Congress resolve to do whatever is necessary to insure that the struggle is not lost—and that the many sacrifices of Roy Wilkins were likewise not made in vain.

DR. MICHAEL LEWIS MATTEO

Mr. GLENN. Mr. President, it is often said that a community can become nothing more than what people put into it. For all the benefits produced by government and other institutions, the health of a community and the welfare of its citizens ultimately depend upon individual initiative. Recently, the city of Wickliffe, Ohio, set aside a special day to honor a man who early in life embraced the philosophy of community service, and who has spent the intervening years devoting his skills, talents, and energies to making Wickliffe a better place to live. That man is Dr. Michael Lewis Matteo.

Dr. Matteo is a native son of Wickliffe, a product of its school system and a man who departed the city only long enough to obtain a medical education and to serve in the Armed Forces, where he rose to the rank of lieutenant colonel before being honorably discharged.

After the war, Dr. Matteo returned to Wickliffe with his bride, the former Jane French Pugh, and quickly established a pattern of freely and selflessly offering his time to church and secular organizations of widely varying persuasions. He served without pay as the sports physician for the Wicklife city schools, and tended to the medical needs of the local police and fire departments. And he worked tirelessly to build up the Blue Coats of Lake County Fund, which is used to assist the families of police officers and firefighters who are killed or injured in the line of duty.

Mr. President, the list of organizations Dr. Matteo has served and the number of awards he has received from his grateful community are too numerous to mention. After 70 years of service, the people of Wickliffe decided that nothing short of setting aside an entire day in his honor would suffice. And so it was done, with a parade, a testimonial dinner and a dance all being part of the celebration.

I bring this to the attention of the Senate because too often we forget that people, as individuals, are the building blocks of our communities. Too often we forget that voluntary, individual effort can do the job and do it well. Fortunately, people like Dr. Matteo are there to remind us, and I am confident that the entire Senate joins me in paying tribute to him today.

TRIBUTE TO MRS. MORROW COF-FEY GRAHAM OF CHARLOTTE, N.C.

Mr. THURMOND. Mr. President, I take this opportunity to pay tribute to

the late Mrs. Morrow Coffey Graham, mother of evangelist Dr. Billy Graham, who passed away on August 14, 1981, at the age of 89.

To her devoted children, family, and friends. I offer my deepest sympathy.

Mrs. Graham played a significant role in the lives of many people. Her relationship to God had a great effect on her son, and he, in turn, had a tremendous impact on the world. His accomplishments can, in part, be attributed to a fine upbringing by his mother and father. Indeed, it has been said that few people have influenced Dr. Graham's faith more than his mother.

Though I never met Mrs. Graham, I know that she was a woman of uncompromising character who was loved by all who knew her. Her godly life has been an inspiration to many persons, friends and family alike. Truly, her life is worthy of emulation, and the life of her son is testimony to that fact.

Appropriate words at a time like this are hard to come by, but I feel that remarks made by Dr. Graham at his mother's memorial service may best express the gentle greatness of this wonderful woman.

In addition to these words by Dr. Graham, an article which appeared in the August 15, 1981 edition of the Charlotte Observer provides information about the life of Mrs. Graham as a devoted wife, dedicated mother, and caring friend.

Mr. President, though these brief words cannot completely depict the lifeof this outstanding woman, I wish to share them with my colleagues, and I ask unanimous consent that these thoughts be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXCERPTS FROM MEMORIAL SERVICE FOR MORROW COFFEY GRAHAM (By Billy Graham)

It says here that "In Memory." I could take several hours in memory and each of my sisters and brother could even give more bethey have lived here closer in recent years, but I suppose, being the oldest, I have some memories too of her.

And one Scripture I would like to take in the beginning is Psalm 118:23 and 24. I was looking through her Bible which is so marked up, and I had given her that particular Bible about twenty-five years ago. And she had this "This is the Lord's doing; it is marvelous in our eyes. This is the day which the Lord hath made; we will rejoice and be glad in it.

And I like the emphasis that has already been made that this is a time of rejoicing. One of her great-grandchildren who is ten years of age said, when we visited Mother Graham a few days ago, "We looked down on her and she was so weak and so helpless. Now, she's looking down on us and we're so weak and so helpless." And that is exactly true. She's the one that is rejoicing and

I'm glad that she lingered as long as she did. She always hoped she wouldn't linger, but she did, because the statements she made in the last two or three months have beena book wouldn't contain all the things that she has said to pass on. In fact, she grabbed one of my sisters and said, "Pass it on." And that's what she wanted done.

But there are several things as I was com-

ing down on the plane yesterday, and I was trying to write down a few little things to pass on to you about her. As has already been mentioned, she was a women of the Word-Psalm 119:16: "I will delight myself in thy statutes: I will not forget thy word." So I was reading that Psalm to her and those of you that know the Bible know that it's the longest Psalm—it's as long as twenty other Psalms in the Bible, and I was reading it to her. This was about six weeks ago. And she started repeating it. She told me an interest-ing thing. She said, "You know I memorized that Psalm before I was twelve years old." I could hardly believe it.

I remember she made me memorize the Shorter Catechism and that was the hardest thing I ever did, and one of the reasons I wanted to leave home. She had memorized it.

I've often wondered how her faith came. I think part of it came from her father who was a soldier; wounded at Gettysburg, he had his leg shot off and while he was sitting there shrapnel came and took out his eye: and he came home and married, and had a mule and a little farm, but he taught the Word of God in the home. His three wonderful daughters were women of God.

And then she was a woman who worked with her hands. You know, the day I was born she picked beans all morning, and I was born about four o'clock in the after-noon. In Proverbs 31 it says, "She . . . worketh willingly with her hands." In those early years and during the depression years she worked out on the farm as well as keeping the books and answering the phone because my father and his brother, Clyde, had a little dairy. People would call up and say. "You forgot to leave us a quart of milk, whatever, and I remember when milk went down to five cents a quart how worried they were as to whether they could make it or not. She was right there, working hard from morning till night. Breakfast was ready every morning at five-thirty, and that was after we'd milked the cows.

And then she was a woman of love. She loved God supremely with all her heart and mind and soul. She loved her familythe children, the in-laws, the grandchildren, the great-grandchildren. She loved them all, and before she died she wrote every one of them a letter, sort of saying goodbye to them. Some of them were in her own hand, as it would shake along, and some she typed and some she had Rose to type for her.

And then she loved the church. When I was a boy we went to Chalmers Memorial Church on East Boulevard. She sang in the choir, taught a Sunday School class along with her sister, and her brother-inlaw was the one that kept the church going-Uncle Bo. I'll never forget because he'd there on Saturday cleaning it up and fixing it for the next morning. Then she was a charter member, I believe, of this church. My father certainly was a charter elder of this church.

And fourthly, she was a woman of gen-erosity. The Scripture says, "take heed that ye do not your alms before men to be seen Otherwise ye have no reward of them. your Father which is in heaven." I don't think anyone will ever know the little bits of money she sent to hundreds of peoplemissionaries on the foreign field, organizations she couldn't give very much to but she gave what she could, and she didn't want people to know about it. It was amazing. That story alone is something that is a thrilling thing for us to remember.

And fifthly, she had a ministry of letter writing. Paul said, "Ye see how large a letter I have written unto you with mine own hand." She wrote hundreds and thousands of letters to missionaries, to people who were suffering or persecuted or bereaved or were needing spiritual counsel, and last year, or

year before last (she was eighty-seven years of age) she wrote 537 letters in that year alone. She had a ministry of letter writing that most people never knew.

Rose Adams told us so many wonderful things. Rose called the family Saturday morning to say this: "I've been calling in my report on how Mother Graham is every morning. (She'd call the family every morning.) Today I want to give my final report. Your mother is alive and well, and walking in the streets of Glory. She had the best night she's ever had. And she's satisfied because she has awakened in the likeness of the Lord. She told me so many times, in the last few weeks, 'Rose, I'm not going to be satisfied here any more.'"

And so to our beloved mother we don't say goodbye. It won't be long till we'll see her

[From The Charlotte Observer, Aug. 15, 1981] MOTHER OF BILLY GRAHAM DIES AT 89

It happened pretty much as she would have chosen it, in the privacy of her home with her family around her-except that her oldest son, Billy, was away in Minneapolis.

Morrow Graham, mother of evangelist Billy Graham, died Friday evening after a summer of failing health. She was 89.

She was surrounded in her last days by members of her family-two daughters and a son who live in Charlotte.

Death came in the handsome brick house where she had raised her children. The house, which once stood on the edge of her husband's dairy farm, is nestled in a grove of trees a few blocks south of Charlotte's Park Road Shopping Center.

It is surrounded now by the flickering neon of nearby restaurants—the Great Wall of China, the Ole Smokehouse, a Steak 'n' Eggs. Next door is an IBM office building, with a plaque in front bearing this inscription:

"Birthplace of Dr. Billy Graham, worldrenowned evangelist, author, and educator and preacher of the gospel of Christ to more people than any other man in history. .

Few people influenced Graham's more than his mother. She was a woman of devout and old-fashioned piety, the demure and handsome daughter of a Confederate veteran of the Civil War, a quiet farmer named Benjamin Coffey who lost a leg and an eye in the battle of Gettysburg.

1910, she met her husband-to-be, In Franklin Graham, who died 19 years ago. They courted for six years, then knelt together on their wedding night and prayed that God would see fit to bless their marriage.

A year later, Mrs. Graham had a daughter, Helen Elizabeth, who died as an infant. On Nov. 7, 1918, Billy was born. He grew up happily as a favorite of his mother. His sister, Catherine McElroy, affirms without rancor:

"After we were all grown, I only lived a few blocks away. I was always there every day. Mother probably got tired of seeing me. But when Billy would come home, he was the light of her life."

During this summer, as Mrs. Graham's health began to decline—first from heart failure, then five weeks ago, a stroke—Billy traveled to Charlotte several times. He would drive down from his mountaintop home in Montreat, and he and his mother would often sit alone talking.

"I would just sit beside her and hold her hand, and talk with her when she would awaken," Graham said. "In the last two or three weeks, I would have to lean down so I could hear her whispering. Mostly it was Bible verses, or how much she looked forward to going to heaven, or how much we had meant to her. "And of course we told her the same how much we loved her, and how much her strength had meant to us. The last time I saw her was Saturday."

Graham was called away this week to a board meeting in Minneapolis, headquarters for his massive organization, the Billy

for his massive organization, the Billy Graham Evangelistic Association.

But Mrs. McElroy and Mrs. Graham's other two children—son, Melvin, and daughter, Jean Ford, wife of evangelist Leighton Ford—were almost constantly at her side.

Another frequent visitor was the Rev. Ross Rhoads, pastor of Charlotte's Calvary Church, where Mrs. Graham was a charter member.

"Watching her die was a lesson for me," said Rhoads. "She didn't give up. She had a will to do all she could until the end. She knew it was near, and yet there was not a shred of dread or panic.

"She did not want to die in the hospital," Rhoads added. "She was a very strong believer in the privacy of the home."

Mrs. McElroy recalls one of the first times she ever saw her mother cry was about 15 years ago, when the Graham children persuaded her to move into a Charlotte apartment complex.

She moved without complaint. But about six weeks later, when Mrs. McElroy asked her if she would like to move back to her house, Mrs. Graham began weeping softly. She moved back to her house and has lived there ever since.

Although it was uncharacteristic for Mrs. Graham to cry, her son-in-law Leighton Ford said, she began to let her feelings show more clearly—at least in the company of her family.

She would occasionally weep from nostalgia as she thought about the past. And, says Ford, "Her sense of humor, which was always there, became more apparent as well"

Friends from her later years describe her as gracious and impressive in her serenity and charm. But Ford says she also had a temper—particularly during her younger days, when the pressure of hard work was a major fact of her life.

She cooked breakfast every morning at 5:30, and served a midday meal for the hired hands on the farm. She kept the farm's financial records—sometimes an unpleasant task during the Depression.

But if hard times occasionally induced displays of anger, they seem never to have

created any bitterness or regret.
"She believed," said Rhoads, "that God had a plan for everything. She was not one to ask, 'What if. . . ?"

Mrs. Graham generally shunned the public spotlight. During the last days of her life, as she slipped in and out of a semicoma, she asked her family for reassurance: "The newspapers are not writing about me, are they?"

And yet for all her privacy, she was a prolific letter-writer and entertained a steady stream of visitors to her home, including reporters who asked about Billy. She would peer at her guests through thick bifocals, still a handsome woman with twinkling eyes and curling ringlets of soft white hair.

"This may surprise you," she told one reporter in 1979, "but I don't exactly feel proud of Billy. I don't think pride has any place in a Christian family. I would say I'm grateful—thankful that the Lord has blessed him as he has."

Told that quote Friday, Graham chuckled softly. "Yes," he said, "that sounds rather typical of her. In her Christian walk, she gave the credit to God."

The funeral will be at 3 p.m. Sunday at Calvary Church. Burial will be at the Steele Creek Presbyterian Church cemetery. Harry & Bryant is in charge.

TRIBUTE TO LOWELL THOMAS

Mr. THURMOND. Mr. President, Lowell Thomas, world renowned commentator, writer, and explorer, was an inspiration to millions of people during his lifetime. His death on August 30, at the age of 89, saddened people everywhere who not only knew him personally but knew him through the good works of his outstanding career of more than 50 years.

He was a historian and political analyst of keen insight who had attended Presidential nominating conventions since 1912. The richness of his voice and the depths of his thoughts about people, events and places captivated radio audiences for two generations.

Lowell Thomas was an eminent American who will be missed, and I want to add my own words of tribute to those being voiced around the world.

A United Press International dispatch, which appeared in the Columbia, S.C., State newspaper on August 30, underscores why we should remember him as a distinguished man of accomplishment.

Mr. President, in order to share this excellent news story with my colleagues, ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the Record, as follows:

"BROADCAST PIONEER LOWELL THOMAS DIES"

PAWLING, N.Y.—Lowell Thomas, the dean of the world's radio news broadcasters whose pioneer feats through more than five decades form one of the most extraordinary chapters in media history, died Saturday. He was 89.

His secretary, Electra Nix, said Thomas died of a heart attack in his sleep at his upstate New York home in Pawling.

He was the first man to broadcast from a ship, from an airplane, from a coal mine and from a submarine. His reporting work took him to both poles and almost everywhere in between.

As a noted columnist wrote in 1958, "The day will come when a compact man, with piercing blue eyes, wavy salt-and-pepper hair, a thin mustache and a voice like an organ will stride brisky toward the pearly gates. The guardian angel will recognize him at once. 'Here comes Lowell Thomas,' he will say. 'He's been everywhere else.'."

The longest continually operating voice in radio belonged to the indefatigable Ohioan, who first went behind the microphone in 1925 and began daily broadcasts on a Monday through Friday basis in 1930. His last daily broadcast for CBS radio was in May of 1976, at the age of 84. He continued intermittent broadcasts after that time.

"He had been well, and there was no indication of such a tragedy at all," Ms. Nix said.

"When I talked with him last night, we discussed working on correspondence," Ms. Nix said. "I worked with him yesterday until a few minutes past 5. He was in good spirits."

Thomas's second wife, Marianna, was with him at the time of his death. His first wife died in 1975.

Thomas had been working on a series of vignettes on what people accomplished in their later years—what he called "the best years." It was being used as a syndicated radio spot feature sponsored by Mutual of Omaha.

He once explained the secret of his success. "I try to make news somewhat entertaining." he said. "It seems to me that the day-by-day exploits and adventures are fan-

tastic, fabulous. Why shouldn't they be entertaining? And why shouldn't you tell them in a way that brings it out in that fashion? I've always tried to do that."

Thomas knew personally every president from William Howard Taft to Gerald Ford. He respected each of them and called them all "glants."

Vice President George Bush said he was "deeply saddened to learn of the death of my close friend and one of our nation's finest citizens."

"As one of our legendary journalists and goodwill ambassadors, he combined decency, integrity, and great professionalism with a true spirit of adventure," Bush said in a statement, adding that he and his wife were grateful to Thomas "for all of his kindnesses over many years."

The commentator was born in Woodington, Ohio on April 6, 1892, "around the corner from the world's most famous lady sharpshooter, Annie Oakley."

His father, a doctor, headed west shortly after his son's birth, and set up practice in the mining town of Cripple Creek, Colo. Thomas grew up peddling papers in salcons, packing a pistol and walking to Sunday School through the town's red-light district, hand in hand with a young woman who later became speakeasy queen Texas Guinan.

Thomas landed his first reporting job at the age of 18 with the Cripple Creek Times. Shortly afterward, he became editor of the Victor (Colo.) Daily Record. He saved enough money for college and earned his B.A. and M.A. degrees at the University of Denver. He then studied law at night at Kent College in Chicago, working in the daytime on the Chicago Journal.

Thomas studied constitutional law at Princeton University, supporting himself by instructing other students in public speaking.

He also gave illustrated talks before various civic groups, which were based on a film-making expedition he had made earlier in the Yukon.

He had been thinking of becoming a teacher, but found he could make more money in two or three days lecturing than he could earn as a college teacher in a month.

His reputation as a public speaker led President Woodrow Wilson to commission him in 1917 to tour the Allied war fronts and tell the American people what he saw. The purpose was to bolster morale on the home front.

Before taking off, he married Frances Ryan, whom he had met at the University of Denver. They journeyed to Europe together, he to the various war zones, including Palestine, and she to assignments with the Red Cross.

Thomas met Commander (later Field Marshal) Edmund Allenby in Palestine, and also got to know T. E. Lawrence

He witnessed Allenby's capture of Jerusalem from the Turks. And he was the only correspondent to cover Lawrence's Arabian campaign.

After the war, Thomas devised an illustrated lecture entitled "With Allenby in Palestine and Lawrence in Arabia." The show, as he preferred to call it, opened in New York and then went to England.

It was instantly successful, made Thomas rich and enabled him to buy a luxurious 500-acre estate in Dutchess County, 60 miles north of New York City. It was from his home that he made many of his CBS broadcasts.

Thomas's initial broadcast in 1925 was over Station KDKA in Pittsburgh. He became a regular broadcaster in 1930 at the behest of the man who was then president of CBS, William Paley.

Paley persuaded him to audition for a news program sponsored by the Literary Digest. Floyd Gibbons, who had been doing the program on NBC, had been fired. Paley hoped he could get the program for CBS if the sponsor liked Thomas. The rest is broadcast history.

DEATH OF MRS. RUTH D. THOMAS OF COLUMBIA, S.C.

Mr. THURMOND. Mr. President, I was deeply saddened to learn of the death of Mrs. Ruth D. Thomas in my home State of South Carolina. She was a fine, patriotic, public-spirited woman who made outstanding contributions in the field of education during her long and productive career. Her knowledge of South Carolina was immense, especially her knowledge of history of the Palmetto State which she taught to so many students.

Her daughter and son-in-law, Mr. and Mrs. William D. Workman, Jr., of Columbia, S.C., can be justifiably proud of Mrs. Thomas and her career. I express my regrets to them, as well as to the entire family. A recent editorial in the Columbia, S.C., State expresses my sentiments about the passing of this wonderful lady.

Mr. President, in order to share these comments with my colleagues, I ask unanimous consent that this editorial be printed in the Record.

There being no objection, the editorial was ordered to be printed in the Record, as follows:

[From The State, July 8, 1981] RUTH D. THOMAS

In these days of heightened awareness of equal rights and opportunities for women, Mrs. Ruth Dorrill Thomas may have seemed to the feminists an anachronism.

Mrs. Thomas, who died Sunday at the age of 90, spent her entire adult life as a teacher. She started teaching in the days when that was the career expected of many young women, and when it was also expected that they would become wives and mothers.

Mrs. Thomas was an outstanding teacher, and she set an example as an achiever for pupils and students for more than 40 years. Her career spanned a broad range—from a one-classroom school to the studios of S.C. Educational Television, where she taught statewide the subject she knew best, S.C. history.

history.

Mrs. Thomas reached her profession's heights, serving as president of the S.C. Education Association, and the Classroom Teachers Association of S.C. She was influential in the National Education Association.

Mrs. Thomas was proudest of having organized the first Future Teachers Club of America in Walterboro, where she has spent most of her working life. The organization is now nationwide.

A friendly and lovely lady, Mrs. Thomas relished her professional and personal life, and she lived her last years in a contentment to which many today should aspire.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President,, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. Helms). Without objection, it is so ordered.

DEPARTMENT OF JUSTICE AUTHORIZATIONS, 1982

UNANIMOUS CONSENT AGREEMENT

Mr. BAKER. Mr. President, I believe we are now in a position to present the unanimous-consent request with respect to another vote on the Johnston amendment to the Department of Justice authorization bill. I propound now the following request:

Mr. President, I ask unanimous consent that it may be in order for the Senator from Louisiana (Mr. Johnston) to file a cloture motion today with respect to amendment No. 96 to S. 951, the Department of Justice authorization bill, and that a vote on the motion be deferred until the hour of 2 p.m., on Wednesday, September 16.

Further, I ask unanimous consent that S. 951 not be made the pending business before the Senate unless and until cloture is invoked on amendment No. 96, on Wednesday, September 16; and, further, that if cloture is not invoked on Wednesday, September 16, S. 951 return to the calendar and, notwithstanding its status as the unfinished business, be brought

before the Senate again only on motion.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I shall not object. Will the majority leader include in that the request that someone may file a cloture motion on behalf of Mr. JOHNSTON?

Mr. BAKER. Yes, Mr. President. I ask unanimous consent that the distinguished minority leader, as well, may file a cloture motion on behalf of the Senator from Louisiana.

The PRESIDING OFFICER. Without objection, it is so ordered.

Is there objection to the unanimousconsent request? The Chair hears none. Without objection, it is so ordered.

CLOTURE MOTION

Mr. ROBERT C. BYRD. Mr. President, on behalf of Mr. Johnston, I send the cloture motion to the desk.

The PRESIDING OFFICER. The cloture motion having been presented under rule XXII, the Chair directs the clerk to read the motion.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on amendment number 96 (as modified) to S. 951, the Department of Justice authorization bill.

Mr. Johnston, Mr. Bentsen, Mr. Randolph, Mr. Stennis, Mr. Long, Mr. De-Concini, Mr. Exon, Mr. Chiles, Mr. Grassley, Mr. Huddleston, Mr. Nickles, Mr. Mattingly, Mr. Proxmire, Mr. Boren, Mr. Kasten, and Mr. Heflin.

RECESS UNTIL 3:45 P.M. TODAY

Mr. WEICKER assumed the chair.

Mr. BAKER. Mr. President, there is one item of business that we may be able to transact on the legislative calendar today. The clearance process is still continuing. I hope that it may be possible to turn to consideration of Calendar Order No. 225, S. 859. We are not prepared,

however, to proceed with that at this moment. In order to accommodate other requirements, Mr. President, I ask unanimous consent that the Senate now stand in recess until the hour of 3:45 p.m.

There being no objection, the Senate, at 3:17 p.m., recessed until 3:45 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. Stevens).

Mr. BAKER. Mr. President, there is one matter, as I indicated earlier, that we may be able to do on the legislative calendar. I understand that the distinguished minority leader is on his way to the floor, so while we await his arrival I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. Durenberger). Without objection, it is so ordered.

EXTENSION OF TIME FOR MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that the time for the transaction of routine morning business be extended until not later than 4:30, under the same terms and conditions of the previous order.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secre-

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations; which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

SPECIAL MESSAGE FROM THE PRES-IDENT REPORTING ON THE DE-FERRAL OF CERTAIN BUDGET AUTHORITY—PM 76

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying documents; which pursuant to the order of January 30, 1975, was referred jointly to the Committee on Appropriations, the Committee on the Budget, the Committee on Foreign Relations, the Committee on Finance, the Committee on Commerce, Science, and Transportation, and the Committee on Energy and Natural Resources:

To the Congress of the United States:
In accordance with the Impoundment
Control Act of 1974, I herewith report
two new deferrals totaling \$6.7 million
and revisions to three previously reported deferrals.

The deferrals affect programs in International Development Assistance, the Department of Health and Human Services, the Department of Transportation, the Pennsylvania Avenue Development Corporation, and the Motor Carrier Ratemaking Study Commission.

The details of each deferral are contained in the attached reports.

RONALD REAGAN.
THE WHITE HOUSE, September 10, 1981.

MESSAGE FROM THE HOUSE

At 10:48 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House disagrees to the amendments of the Senate to the bill (H.R. 4034) making appropriations for the Department of Housing and Urban Development, and for sundry independent agencies, boards, commissions, corporations, and offices for the fiscal year ending September 30, 1982, agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and has appointed Mr. BOLAND, Mr. TRAXLER, Mr. STOKES, Mrs. BOGGS, Mr. Sabo, Mr. WHITTEN, Mr. GREEN, Mr. COUGHLIN, Mr. Young of Florida, and Mr. CONTE as managers of the conference on the part of the House.

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 4416. An act to enable the Secretary of Agriculture to assist, on an emergency basis, in the eradication of plant pests and contagious or infectious animal and poultry diseases.

At 2 p.m. a message from the House of Representatives, delivered by Mr. Gregory, one of its clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 4169. An act making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

HOUSE BILL REFERRED

The following bill was read twice by unanimous consent, and referred as indicated:

H.R. 4169. An act making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1982, and for other purposes; to the Committee on Appropriations.

HOUSE BILL HELD AT THE DESK

The following bill was ordered held at the desk by unanimous consent:

H.R. 4416. An act to enable the Secretary of Agriculture to assist, on an emergency basis, in the eradication of plant pests and

contagious or infectious animal and poultry diseases.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-1878. A communication from the Acting Chairman of the Federal Trade Commission, transmitting, pursuant to law, a Trade Regulation Rule concerning the sale of used motor vehicles; to the Committee on Commerce, Science, and Transportation.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM-378. A resolution adopted by the House of Representatives of the State of South Carolina; to the Committee on Agriculture, Nutrition, and Forestry:

"A HOUSE RESOLUTION

"Whereas, there is now pending in the Congress legislation sponsored by Senator Mark Hatfield of Oregon and Congressman Thomas Petri of Wisconsin aimed at the destruction of the historically successful and cost effective tobacco loan and acreage allotment programs, coupled with a substantial retail tax on cigarettes and perhaps other tobacco products; and

"Whereas, the purpose of the loan program is to stabilize the tobacco economy which has worked extremely well for forty years to insure adequate prices to enable farmers to stay in business and provide an adequate supply of tobacco in bad crop years for domestic and foreign markets; and

"Whereas, the acreage allotment program has further contributed to this stability by avoiding overproduction and requiring a quality product from the tobacco farmer who wishes to compete successfully in the marketplace; and

"Whereas, the tobacco farmer and the tobacco industry rather than being subsidized return a substantial profit to government producing at least six billion dollars of revenue in return for the relatively modest costs of administering the above programs; and

"Whereas, tobacco is the nation's fifth leading money crop and first in South Carolina where sixty thousand people find employment on the farm and in the industry and the importance of maintaining such an industry in a stable condition is obvious; and

"Whereas, the well-intended comment of the sponsors of this destructive legislation which implies that the "deregulation" of tobacco would work an advantage to farmers was certainly not based on consultation with those farmers whose principal income is based on continued operation of the present system; and

"Whereas, the tobacco farmers, industry and various local and national groups associated with the industry have worked diligently and effectively to "keep their house in order" and have substantially reduced their reliance on federal regulation and assistance; and

"Whereas, it would indeed be tragic to destroy a program that has worked so well and so economically when such destruction would result in no benefit to and even possible chaos in the tobacco industry.

"Now, therefore, be it resolved by the House of Representatives of the State of South Carolina:

"That by this resolution the Congress of

the United States is memorialized to oppose pending legislation to destroy the federal tobacco loan and acreage allotment programs and the retail tax increase proposed as part of such legislation.

"Be it further resolved that copies of this resolution be forwarded to the President of the United States, the Vice-President, Speaker of the House of Representatives, the Chairman of the House and Senate Agriculture Committees, the Chairman of the Tobacco Advisory Commission and the members of the South Carolina Congressional Delegation, all in Washington, D.C."

POM-379. A petition from a citizen of Summerland Key, Fla., urging congressional cooperation with the President in strengthening U.S. Armed Forces; to the Committee on Armed Services.

POM-380. A petition from the citizens of Yelm, Wash., urging congressional cooperation with the President in strengthening U.S. Armed Forces; to the Committee on Armed Services.

POM-381. A petition from a citizen of Houston, Tex., urging congressional cooperation with the President in strengthening U.S. Armed Forces; to the Committee on Armed Services.

POM-382. A resolution adopted by the House of Representatives of the State of Texas; to the Committee on Banking, Housing, and Urban Affairs:

"RESOLUTION

"Whereas, The Securities Exchange Act of 1934 specifies margin requirements for the purpose of preventing the excessive use of credit for the purchase or carrying of securities: and

"Whereas, The purpose of such margins is to prevent speculation on credit from draining a disproportionate share of the nation's credit resources into the stock market; and

"Whereas, H.R. 4145 was introduced in Congress to amend the Securities Exchange Act of 1934 to provide uniform margin requirements in transactions involving the acquisition of securities of certain United States corporations by foreign persons where such acquisition is financed by a foreign lender; and

"Whereas, H.R. 4186 was introduced in Congress to impose a moratorium on foreign purchase of five percent or more interest in mineral interests in lands of the United States; now, therefore, be it

"Resolved, That the House of Representatives of the 67th Texas Legislature, 1st Called Session, hereby request the United States Congress to enact H.R. 4145, by Congressman Jim Collins, and H.R. 4186, by Congressmen Emerson and Santini; and, be it further

"Resolved, That official copies of this resolution be prepared for the President of the Senate and the Speaker of the House of Representatives of the United States Congress, and all members of the Texas delegation to the Congress with the request that this resolution be officially entered into the Congressional Record as a memorial to the Congress of the United States of America."

POM-383. A resolution from the Bay Area Center for Law and the Deaf, Oakland, Calif., supporting H.R. 375 and S. 604; to the Committee on Commerce, Science, and Transportation.

POM-384. A resolution adopted by the Trustees of the U.S. Travel Data Center making certain recommendations to the U.S. Bureau of the Census relative to the 1982 National Travel Survey; to the Committee on Commerce, Science, and Transportation.

POM-385. A petition from the city of Chisholm, Minn., opposing the bill S. 898; to the Committee on Commerce, Science, and Transportation.

POM_386 A resolution adopted by the Consumers Organization for the Hearing Impaired, Inc., Laurel, Md., favoring passage of bills H.R. 375 and S. 604; to the Committee on Commerce, Science, and Transportation.

OM-387. A petition from citizens of several towns and cities in the State of Georgia urging legislation establishing a fee for citizens' band radio licenses and recommendations for uses of such fees; to the Committee on Commerce, Science, and Transportation POM-388. A petition from certain citizens

of Brownwood, Tex., urging legislation estab-lishing a fee for citizens' band radio licenses, and recommending uses for such funds; to the Committee on Commerce, Science, and

Transportation.

POM-389. A resolution adopted by the board of directors of Operation Threshold, Black Hawk and Buchanan Counties, Iowa opposing the immediate decontrol of natural gas prices; to the Committee on Energy and Natural Resources.

POM-390. A resolution adopted by the board of trustees of City Public Services, San Antonio, Tex., opposing immediate de-control of natural gas prices; to the Com-mittee on Energy and Natural Resources.

POM-391. A petition signed by certain citizens of Troy, N.Y., opposing the raising of the debt ceiling to permit a trillion dollar debt; to the Committee on Finance.

POM-392. A resolution adopted by the Assembly of the State of California; to the Committee on Environment and Public

"House Resolution No. 32

"Whereas, Clean water is essential to the

public health and safety; and

"Whereas, It is of paramount importance that the limited water resources of the state and nation be protected from pollution, conserved, and reclaimed wherever possible to ensure continued economic and growth; and

"Whereas, The federal Clean Water Act sets standards for preserving water quality in our nation's rivers, streams, lakes and oceans, and provides for federal participation in construction of facilities to clean up water pollution; and

"Whereas, Rising costs of construction and technological changes have pushed the cost of constructing treatment facilities be-yond the reach of local and state agencies alone; and

"Whereas, For the last 10 years, the federal government has joined in partnership with state and local governments by providing 75 percent of funding for construction of treatment facilities so that municipal sewage discharges meet federal water quality standards: and

"Whereas, The State of California provides 121/2 percent of the funding, leaving 121/2

percent as the local share; and

Whereas, The President and Congress have expressed an intent to eliminate all funding for the clean water program in the 1981-82 fiscal year while changes to the federal Clean Water Act are worked out; and

Whereas, Because water knows no political boundaries, it is desirable for the federal government to continue contributing to construction of these facilities in order to meet its obligations to protect and promote the health, safety, and welfare of its people; now, therefore, be it

"Resolved by the Assembly of the State of California, That it is the Assembly's intent to protect California's waters from the rav-

ages of pollution; and be it further
"Resolved, That the Assembly of the State
of California respectfully memoralizes the
President and the Congress of the United States to restore funding for the clean water program in the coming fiscal year in order to save taxpayers \$114 million in inflationary costs which will be incurred in this state if the program is delayed; and be it further "Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House

of Representatives, and to each Senator and Representative from California in the Congress of the United States."

POM-393. A joint resolution adopted by the Legislature of the State of California; to the Committee on Foreign Relations:

"ASSEMBLY JOINT RESOLUTION NO. 40

"Whereas, The nation of Greece and its people have been long time and loyal allies of the United States: and

Whereas. The bonds between the Greek and American peoples have remained strong through their mutual struggle together in two World Wars and through their on-going alliance: and

Whereas, The Greek nation was the cradle of Western democracy and its people have continued to hold high the ideals of democracy; and

Whereas, Like the Greek people, Americans value their freedom and independence and support the hopes of those who yearn to be free; and

"Whereas, Many of the Greek people on the island of Cyprus have now lived for seven years under the illegal occupation of Turkish forces, an occupation which has been condemned by international bodies, including the United Nations, and many more have been made homeless by the Turkish invasion and occupation; and

"Whereas, The United States government through the lifting of its arms embargo against Turkey has relieved the pressures on that nation to end its occupation: Now,

therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California Legislature of the State of California strongly urges the President and the Con-gress of the United States to adopt a foreign policy which recognizes not only the strategic importance of Greece but also the need support a nation which has so loyally stood by our country and which values its democratic institutions; and be it further

Resolved, That the Legislature of the State of California urges the President and the Congress of the United States to bring pressure to bear on Turkey to end the occupa-tion of Cyprus so that Greek and Turkish Cypriots may live in peace and freedom; and

be it further "Resolved, That the Chief Clerk of the Assembly transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States.'

POM-394. A resolution adopted by the Political Action Committee of the Congress of Filipino American Citizens, Jersey City, N.J., urging the appointment of the National Chairman of the Congress of Filipino American Citizens as U.S. Ambassador to the Philippines; to the Committee on Foreign

POM-395. A petition from certain citizens of Washington, D.C., urging congressional disapproval of D.C. Act 4-69, D.C. Sexual Assault Reform Act of 1981; to the Committee on Governmental Affairs.

POM-396. A resolution adopted by Council of the city of Long Beach, Calif., urging remedies for those of Japanese ancestry interned in the United States during World War II; to the Committee on the Judiciary.

POM-397. A printed document of the Giles-Everingham VFW Post No. 9507, Madison Heights, Mich., transmitted by Herbert Stevens, relative to National POW-MIA Recognition Day, July 17, 1981; to the Committee on the Judiciary.

POM-398. A concurrent resolution adopted by the Legislature of the State of Louisiana; to the Committee on the Judiciary:

"A CONCURRENT RESOLUTION

"Whereas, the Voting Rights Act of 1965 has been hailed by many as the most effec-tive civil rights legislation ever passed; and

'Whereas, this statute is aimed at ensuring that all qualified electors can register and vote by providing swift administrative relief to any such citizen who is denied that right; and

Whereas, in 1975, the 94th Congress in its first session adopted a seven year exten-sion of the Voting Rights Act of 1965; and

Whereas, this landmark act is due to expire in August of next year unless Congress further extends it; and

Whereas, the Voting Rights Act stands as the embediment of the basic democratic principles of this nation: the equality of all of its citizens and the preservation of their right to vote.

Therejore, be it resolved by the House of Representatives of the Legislature of Louisiana, the Senate thereof concurring, that the Louisiana Legislature hereby memorializes the Congress of the United States and urges the Louisiana congressional delegation to approve an extension of the Voting Rights Act, if and only if the scope of the Voting Rights Act is expanded to include each and every state, district, and territory of the United States.

"Be it further resolved that a copy of this Resolution be transmitted to the clerk of the United States House of Representatives and the secretary of the United States Senate and to each member of the Louisiana Congressional delegation."

POM-399. A resolution adopted by the House of Delegates of the American Bar Association, urging the individual States to ensure adequate funding for legal assistance to the indigent; to the Committee on the Judiciary.

POM-400. A resolution adopted by the American Library Association Council, urging continued free public access to Federal information; to the Committee on the Judi-

ciary.
POM-401. A resolution adopted by the National Association of the Physically Handicapped, Inc., requesting an explanation from President and Congress as to how the elimination of programs for the disabled can affect the goals of the physically handicapped; to the Committee on Labor and Human Resources.

POM-402. A resolution adopted by the Senate of the Commonwealth of Massachusetts; ordered to lie on the table:

"RESOLUTIONS MEMORIALIZING CONGRESS TO ADOPT A NATIONAL STRATEGY OF PEACE THROUGH STRENGTH

"Whereas, the Soviet Union has exploited United States peace initiatives to build up its strategic and conventional warfare capabilities; and

Whereas, this has given the Soviet Union the means to support increasingly boider world-wide aggression; and

"Whereas, there is basis for concern that Soviets may next use these forces in Pakistan, Iran, and Yugoslavia; and

Whereas, the Soviet Union has demonstrated an unwillingness to live by international law; and

"Whereas, the United States is the one world power that can stop the Soviet expan-sionism; now therefore, be it

"Resolved, (A) That the Massachusetts Senate respectfully urges the Congress of the United States to adopt a national stratof peace through strength, the general principles of which would be:

(1) To inspire, focus and unite the national will and determination to achieve this goal of peace through freedom;

To achieve overall military and technological superiority over the Soviet Union;

(3) To create a strategic defense and a civil defense which would protect United States citizens against nuclear war at least as well as the Soviets defend their citizens;

(4) To accept no arms control agreement which in any way jeopardizes the security of the United States or its allies, or locks the United States into a position of military inferiority;

(5) To re-establish effective security and intelligence capabilities;

(6) To pursue positive non-military means to roll back the growth of Communism;

To help our allies and other non-Communist countries defend themselves against Communist aggression; and

(8) To maintain a strong economy and protect our overseas sources of energy and other vital raw materials.

That the Massachusetts Senate acknowledge that it will take the combined efforts of hundreds of organizations to achieve the adoption of a national strategy of peace through strength; and be it further

"Resolved, that copies of these resolutions be transmitted by the Clerk of the Senate the Presiding Officer of each branch of Congress and to the Members thereof from this commonwealth."

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. McCLURE, from the Committee on Energy and Natural Resources:

Robert A. G. Monks, of Maine, to be a Member of the Board of Directors of the U.S. Synthetic Fuels Corporation for a term

of 3 years;
Victor M. Thompson, Jr., of Oklahoma, to be a Member of the Board of Directors of the U.S. Synthetic Fuels Corporation for a term

C. Howard Wilkins, of Kansas, to be a Member of the Board of Directors of the U.S. Synthetic Fuels Corporation for a term of 5 years; and

Victor A. Schroeder, of Georgia, to be Member of the Board of Directors of the U.S. Synthetic Fuels Corporation for a term of 6 years.

The above nominations were reported from the Committee on Energy and Natural Resources with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. PROXMIRE:

S. 1604. A bill to require the enactment of special legislation to continue the ex-penditure or obligation funds on any major civil acquisition whenever the cost of such acquisition has increased or, on the basis of estimates, will increase by 25 percent or more; to the Committee on Governmental Affairs.

By Mr. JOHNSTON:

S. 1605. A bill to provide for the reinstatement and validation of U.S. oil and gas lease No. E.S. 20644; to the Committee on Energy and Natural Resources.

By Mr. HEINZ:

S. 1606. A bill to establish a supplemental insurance fund administered by the Secretary of Energy to pay the costs of necessary remedial action following damage to nuclear powerplants, including certain remedial action at the Three Mile Island facilities in Pennsylvania, to require participation in such fund by the licensees of nuclear powerplants as a condition for the licensing and continued operation of such powerplants, and for other purposes; to the Committee on Energy and Natural Resources and the on Environment and Public Committee pursuant to the order of Works, jointly, September 9, 1981

By Mr. D'AMATO (for himself, Mrs. Hawkins, Mr. Durenberger, Mr. Specter, Mr. Bradley, Mr. Mitchell, Mr. Cochran, Mr. Helms, and Mr.

S. 1607. A bill to amend the Internal Revenue Code of 1954 to provide a minimum interest and dividend exclusion of \$200 for each individual; to the Committee on Finance.

By Mr. INOUYE: S. 1608. A bill to authorize contracts for custodial care for mentally retarded or physically handicapped spouses and children members of the uniformed services; to the Committee on Armed Services.

By Mr. PRESSLER (for himself, Mr. Melcher, Mr. Andrews, and Mr. BAUCUS) :

S. 1609. A bill to amend the Federal Reserve Act to revise provisions relating to the Board of Governors of the Federal Reserve System, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. DANFORTH: S. 1610. A bill to increase the excise tax on cigarettes and to transfer the revenues from such tax to the Federal hospital insurance trust fund; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. PROXMIRE:

S. 1604. A bill to require the enactment of special legislation to continue the expenditure or obligation of funds on any major civil acquisition whenever the cost of such acquisition has increased or, on the basis of estimates, will increase by 25 percent or more; to the Committee on Governmental Affairs.

(The remarks of Mr. PROXMIRE on this legislation appear earlier in today's RECORD.)

By Mr. HEINZ:

S. 1606. A bill to establish a supplemental insurance fund administered by the Secretary of Energy to pay the costs of necessary remedial action following damage to nuclear powerplants, including certain remedial action at the Three Mile Island facilities in Pennsylvania, to require participation in such fund by the licensees of nuclear powerplants as a condition for the licensing and continued operation of such plants, and for other purposes; pursuant to the order of September 9, 1981, referred, jointly, to the Committee on Energy and Natural Resources and the Committee on Environment and Public Works.

NUCLEAR PROPERTY INSURANCE ACT OF 1981

Mr. HEINZ. Mr. President, I rise to introduce the Nuclear Property Insurance Act of 1981, which addresses the problem of inadequate insurance for nuclear powerplant property, including the funding available for cleanup at Three Mile Island (TMI), near Harrisburg, Pa.

Since the accident at Three Mile Island on March 29, 1979, there has been some progress in cleanup of the contaminated TMI-2 unit. Krypton has been vented from the containment building and some radioactively contaminated water has been removed from an auxiliary building and successfully treated. We have a completed environmental impact statement, and recently the owner of the plant, General Public Utilities, has installed a water treatment system to decontaminate the 700,000 gallons of radioactive water which remain at TMI-2.

But as this effort proceeds, we must face the fact that cleaning up the facility will require another 5 to 9 years, at an estimated total cost of between \$900 million and \$1.3 billion, and that the original \$300 million of insurance is likely to be exhausted next year. It is estimated that what remains of that insurance money, approximately \$90 million, will be sufficient for removal and cleanup of the radioactive water. However, there will not be sufficient funds to cover the next essential steps in this process: decontamination of the interior surfaces of the reactor containment building and removal and disposal of the damaged core force of the reactor vessel.

We cannot halt the cleanup progress we have made to date without endangering health and safety in the area. As the Nuclear Regulatory Commission's envi-ronmental impact statement pointed out

Until TMI-2 is largely decontaminated, there is a small probability (which increases with time) of uncontrolled releases of radioactivity to the environment. Decontaminathe plant and disposal of the wastes will eliminate this possibility for potential harm to the public and workers at TMI. The staff therefore concludes that the full cleanup of the facility must proceed as ex-peditiously as is reasonably feasible, consistent with ensuring public health and safety and protecting the environment.

And unless we deal now with the larger question of creating an adequate level of property insurance for all nuclear powerplants, we face this same financial problem again if there were to be another major nuclear accident. In addition, until we have such an insurance plan in place, we are not really in a position to decide among the various current options for generating electricity on a large scale-coal, oi!, gas, and nuclearsince we are not representing one of the true costs of using the nuclear option.

For all of those reasons—the need to protect the health and safety of the people in the Three Mile Island service area, the need to prevent a recurrence of this financial problem should a future accident occur, and the need to accurately reflect the true costs of all electricitygenerating options-we must proceed expeditiously with both the TMI cleanup and the creation of additional nuclear property insurance for future accidents.

It seems clear to me that both of these tasks will require a collective effort. No single party bears all the responsibility, or has, as a practical matter, the realistic chance of paying for either the cleanup or the insurance for future accidents.

The owner of the utility is in desperate financial shape. Since the accident, both the undamaged TMI unit and the damaged TMI unit 2 have been removed from GPU's rate base, so that the company has had to find another source to cover its fixed costs and interest costs on the \$1.1 billion invested in those two units. It has found that funding by suspending all common stock dividends, at a cost of \$200 million to its stockholders.

GPU has also had to seek additional funding to provide power to its customers previously served by TMI-1 and TMI-2. In order to get the necessary short-term loans to do so, it has mortgaged all of its assets to a consortium of banks. Financial experts have considered the possibility of bankruptcy as means of solving the problem, but their analysis has shown that bankruptcy would simply increase the litigation costs and financing costs of the cleanup; increase the cost of financing for all electric utilities by causing investors to demand a higher risk premium for utility stocks and bonds; and increase the public health and safety hazard by delaying the cleanup.

The ratepayers have also been stretched very thin in an effort to solve this problem. GPU's customers served by Three Mile Island have seen their electric bills increase by 50 percent to pay the costs of replacement power, at a time when they were already paying a larger percentage of their incomes for power than ratepayers in many other parts of the country.

During the 27 months which have passed since the accident, these and other difficulties have led to an impasse over funding the cleanup costs. Recently several significant steps have been taken which may aid in resolving that impasse:

First. The Edison Electric Institute, an association of utilities companies. has adopted a motion which recognizes that cleaning up TMI-2 is in the best interests of the EEI companies and their customers and that, therefore, the utilities should make some significant contribution toward that goal; and

Second. On July 9, Gov. Richard Thornburgh of Pennsylvania outlined a plan for a national sharing of the costs of the cleanup.

While both of these steps are helpful, neither provides the mechanism to finally resolve the cleanup impasse or to resolve the larger question of adequate nuclear property insurance for utilities. And every day of further delay in resolving these problems increases the risk to the health and safety of the people of Pennsylvania, increases the ultimate cost of cleanup, and continues the danger of inadequate coverage for all citizens served by nuclear utilities.

The bill I am introducing today will provide a mechanism to resolve both of these problems by providing for a nuclear property damage insurance fund to be administered by the Department

of Energy. The fund would be created through a system of insurance premiums to be paid by all electric utilities which own nuclear powerplants, and insurance coverage under this plan would be required as a condition of receiving and maintaining an operating license from the Nuclear Regulatory Commission.

The fund would only be used when cleanup and rehabilitation costs from a nuclear accident exceeded the amount of commercially available insurance by \$50 million, up to a maximum of \$2 billion. Given the \$300 million of commercial insurance coverage available today, that would mean that none of the new funding proposed in my bill would be expended until after the first \$350 million of accident costs had been covered by insurance and the affected utility. And because the cost of the insurance would become a part of the cost of generating electricity by nuclear energy, this bill would provide a further step toward assuring that the price set for nuclear energy more accurately reflects the true costs of using this option, an important consideration as we as a country continue to compare the relative advantages of different ways of generating electric power.

The bill I am introducing today would also provide funds for the cleanup of TMI-2 by providing 75 percent of the funding for the uninsured cleanup costs incurred after the date of the bill's enactment. GPU would have to repay onehalf of any moneys received from the fund, over a period of time to be determined by the DOE. Thus, based on one current cost estimate, the total cleanup at TMI-2 would require \$900 million. GPU had \$300 million of insurance on the unit, leaving a total of \$600 million in unfunded costs under this estimate. My bill would cover 75 percent of those unfunded costs, with the remaining \$150 million to be provided by GPU. In addition, subject to terms to be set by DOE. GPU would repay 50 percent of that estimated \$450 million to the insurance fund over an extended period.

In conclusion, Mr. President, there are a number of key facts which we must not forget in considering this situation:

First. Public health and safety continues to be jeopardized at TMI while we prolong the cleanup effort;

Second. Energy ratepayers in this Nation will suffer higher electric bills as a result of the reaction of capital markets in some external funding mechanism to provide for the rapid cleanup of TMI-2 is not found; and

Third. Every utility which owns a portion of a nuclear powerplant is exposed to serious financial problems, including bankruptcy, and every ratepayer of those utilities is exposed to the threat of skyrocketing electric power costs, as a result of today's grossly inadequate levels of property insurance and the failure of our society to cleanup the accident at Three Mile Island.

These problems are national problems, and we must deal with them on a national basis. We have an opportunity to provide assurance to the people of the United States that customers served by

utilities with nuclear powerplants will have adequate financial safeguards in case of a nuclear accident. I urge my colleagues to seize this opportunity and to join with me in supporting passage of this bill.

By Mr. D'AMATO (for himself, Mrs. Hawkins, Mr. Duren-BERGER, Mr. SPECTER, Mr. BRAD-LEY, Mr. MITCHELL, Mr. COCH-RAN, Mr. HELMS, and Mr. HEINZ):

S. 1607. A bill to amend the Internal Revenue Code of 1954 to provide a minimum interest and dividend exclusion of \$200 for each individual; to the Committee on Finance.

INTEREST AND DIVIDEND EXCLUSION

• Mr. D'AMATO. Mr. President, the recent enactment of the Economic Recovery Tax Act of 1981 will long be remembered as a remarkable congressional achievement. Among the numerous tax reductions included in this landmark legislation were cuts in individual income taxes, corporate taxes, small business taxes, estate and gift taxes, and capital gains taxes.

This legislation, however, contains one glaring exception to its own basic philosophy. Taxes on savings are increased by this act. Section 302(b) repeals the current \$200 (\$400 in the case of a joint return) exclusion of dividends and interest from taxable income. This deduction is replaced with a much less generous provision allowing only a \$100 (\$200 in the case of a joint return) exclusion applied solely to dividend income. Beginning in 1982 there will be no generalized exclusion of interest earned on savings from taxable income.

Not only will section 302(b) discourage savings at a time when increased capital formation is so necessary to America's economic recovery, but it will also result in a tax increase on every American saver. Moreover, the small saver will be hit proportionately harder than the wealthy investor.

This unwarranted tax increase will fall most heavily upon the elderly living on fixed, retirement incomes supplemented only by the interest they earn on their life savings. This tax increase will also have a severe and adverse impact on lower and middle income working families struggling to make ends meet in spite of inflation. It was simply wrong to eliminate this exclusion which provides a needed incentive for the average American taxpayer to save. We should encourage, rather than discourage, these individuals to put money aside for the education of their children, for a downpayment on a home, or for other worthwhile purposes.

Except for that minority of taxpayers with incomes high enough to place them above the 30 percent marginal tax bracket, that is, those individuals for whom it makes financial sense to purchase an All Savers Certificate, every dollar of interest income will now be taxed, beginning from the very first dollar. By including section 302(b) in the Economic Recovery Tax Act the Congress has sent an unmistakable message to taxpayers with moderate incomes: "We do not care if you save. The small

amounts you set aside may be important to you, but in the grand scheme of things they mean very little. It is the wealthy who can save enough to make a difference; it is the wealthy who must therefore be encouraged to save."

Thus, to lessen the revenue loss, the Congress decided to eliminate the exclusion that benefits primarily the small saver and replace it with a new type of tax free investment benefiting only the well-to-do.

These are three major reasons for restoring the \$200-\$400 all inclusive exclusion for dividend and interest income. First, and most important, it represents fair treatment for taxpayers of all income classes. We should not be creating new tax exemptions for the wealthy, while simultaneously denying equal treatment to the middle class and to the retired.

When the average voter finds out what the Congress has done, he or she will be justifiably outraged. By repealing the \$200-\$400 exclusion and replacing it with the All Savers Certificate the Congress has violated the values of simple equity upon which the Internal Revenue Code should be based.

The second reason for restoring the \$200-\$400 exclusion is to encourage savings. Some may argue that this provision does not encourage savings since the affected individuals would save anyway. In return I ask: "How do they know?" The exclusion has been in existence for only 8 months. As of yet, no firm statistics based on actual data have been collected. It is, therefore, too early to be certain. At the very least, however, we can be certain that the \$200-\$400 exclusion does not discourage savings.

To those who maintain that the middle class and the retired will save anyway, but that the more well-to-do will not and thus need the encouragement of the All Savers Certificate, I reply that the wealthy are less, not more, likely to use all of their income for immediate consumption. Thus, they would be more likely to save and invest even without any Government encouragement. To those who believe that the All Savers Certificate will generate more new savings than the all inclusive \$200-\$400 exclusion and that only one such savings incentive can be afforded at this time, I reply that we cannot finance additional tax breaks for the wealthy by increasing taxes on the "little guy."

A third important reason for restoring this partial exclusion on interest income is that America's economic recovery is dependent on tax decreases, not on tax increases. More capital formation will result from tax reductions than will result from tax increases. Except for the closing of certain loopholes, we should not be increasing anyone's Federal taxes at this time. America is an overtaxed society and this Congress has dedicated itself to returning hard-earned income to the American public. Thus, we should not now be imposing new taxes through the back door by eliminating the partial exclusion of interest earnings from taxable income

For all of these reasons I have today introduced legislation to restore the

\$200-\$400 partial exclusion for dividend and interest income. I think it is necessary that we put this legislation on a fast track so that this exclusion is not allowed to lapse at the end of 1981.

My bill in no way affects the all-savers certificate. It in no way compromises the excellent provision included as part of the Economic Recovery Tax Act to provide a 15-percent exclusion on net interest income beginning in 1985. When this percentage exclusion becomes operative the \$200-\$400 partial exclusion will apply as a base amount. Taxpayers will be allowed to exclude from taxable income 100 percent of their interest income up to \$200 (\$400 in the case of a joint return) and 15 percent of any additional net interest income up to a total exclusion of \$450 (\$900 in the case of a joint return). These upper limits for the total exclusion are the same as those specified in the Economic Recovery Tax

The revenue loss for this legislation may sound high—over \$2 billion a year for the first 3 years—but it is really quite low when you consider that the Congress has already enacted this provision in 1979. We have already promised this small amount of tax relief to the American saver, and now it has been summarily taken away. We must reverse this unwarranted action.

By Mr. INOUYE:

S. 1608. A bill to authorize contracts for custodial care for mentally retarded or physically handicapped spouses and children of members of the uniformed services; to the Committee on Armed Services.

CONTRACTS FOR CARE OF CERTAIN DEPENDENTS OF MILITARY PERSONNEL

• Mr. INOUYE. Mr. President, today, I am introducing legislation to provide for the care of mentally retarded or physically and emotionally handicapped spouses and children of members of the uniformed services. This bill would amend the Department of Defense CHAMPUS program, specifically the handicapped children's section to authorize payment for the custodial care of dependents of active duty personnel.

My proposal is aimed at enhancing the quality of life for military families through additional health benefits. Families in our military services are not unlike most American families. They are beset by rising costs of basic needs such as food, energy, housing, and health care. I believe that through proposals which provide better health benefits for active duty personnel, the morale, preparedness, and retention of our highly trained military personnel will be considerably enhanced. Indirectly, our recruitment efforts may also be benefited.

It is my understanding that the lack of custodial care under CHAMPUS has created major financial drains on the resources of some families. The problem has become increasingly acute because of growing emphasis on professional review of long-term hospitalization. As a result of these professional reviews of health care services financed under the CHAMPUS basic program, benefits are increasingly being terminated when care

has been determined to be merely custodial. Although such a determination is appropriate, in many cases, the terminations involve dependents of active duty personnel who, because of the lesser severity of their mental or physical disorder, are not now eligible for the CHAMPUS program for the handicapped. Since most of our active duty personnel do not have alternative third party payment resources, they are experiencing great financial burdens for the care of their dependents who need custodial care.

This legislation could result in a substantial reduction of the financial burden now carried by many active duty personnel. Furthermore, since the program for the handicapped provides services to patients who are trainable and whose condition can be improved, it is possible that long-term governmental cost would be reduced through intervention.

The exact number of individuals who would be covered by this proposal and the exact costs are not known at this time. However, due to increased governmental contribution under the program for the handicapped (from \$350 to \$1,000 per person per month) and the professional review of care under the basic program, a certain number of beneficiaries and costs will be shifted and will not represent new costs. The fiscal year 1979 cost of the program for the handicapped has decreased substantially. In fiscal year 1975, the cost was \$9.4 million and in fiscal year 1979, the cost was \$2.3 million.

Mr. President, I request unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1608

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1077(b) of title 10, United States Code, is amended by—

(1) striking out "or custodial care" in clause (1);

(2) redesignating clause (2) as clause (3);

and
(3) inserting after clause (1) the follow-

ing new clause:
"(2) Custodial care for emotional or physical disabilities, except to the extent provided in section 1079(d) of this title.";

SEC. 2. Section 1079(d) of title 10, United States Code, is amended by adding at the end thereof the following new clause:

"(5) Custodial care for emotional or physical disabilities.".

By Mr. PRESSLER (for himself, Mr. Melcher, Mr. Baucus, and Mr. Andrews):

S. 1609. A bill to amend the Federal Reserve Act to revise provisions relating to the Board of Governors of the Federal Reserve System, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

AMENDMENT OF FEDERAL RESERVE ACT

Mr. PRESSLER. Mr. President, today I am introducing a bill on behalf of myself and Senator Melcher which amends the Federal Reserve Act to make the Federal Reserve more accountable to the

American people. I do this because of my concern for the high interest rates our country is suffering from and my contention that current Federal Reserve officials are not in touch with the problems of those sectors of our economy that depend on credit for their business operations.

In the past month, protest over unreasonable interest rates has reached a level that even insulated Washington officialdom is beginning to notice. We have been aware of the housing crunch for some time now and made some efforts to alleviate the tight mortgage money by passing the all-savers bill. However, the problem and effects of high interest rates have spread to every area of the country and every small business person and farmer is fighting for their economic life right now. No matter how hard these people work and, ironically, no matter how successful their operations have been in the past, the money needed to maintain and expand their enterprises is not available at a reasonable price.

The agriculture sector of our economy has experienced incredible costs in the past decade. But, whereas these fertilizer, seed, and machinery costs have increased almost 200 percent from 1967 to 1979, interest rates have increased 401 percent per acre in that time period and are estimated to have increased 200 percent more from 1979 to 1980. This means that in 1 year, interest rate costs per acre equal or exceed any of the other cost increases farmers have experienced in the

past decade.

Something must be done now to insure that the voice of the American people is heard where policy decisions on interest rates are made. And that is why I am introducing these amendments to the

Federal Reserve Act.

The Federal Reserve was created in 1913 and has been dominated by those persons involved in the world of high finance. Unfortunately, it is sometimes difficult for former presidents of some of our Nation's largest banks to maintain a clear view of the effects their policies are having on small business persons and farmers. My bill is designed to give those parts of our economy which are the backbone of our Nation a voice in Federal Re-serve policy. It does this by requiring that at least one member serving on the Federal Reserve Board have demonstrable experience in agriculture and one in small business.

Other provisions of my bill are a change in the current 14-year term for Federal Reserve Board Governors. My legislation reduces this term to 7 years in a belief that long terms only serve to isolate Reserve Governors from the effects of their economic policies.

The other two changes I am suggesting are that Members of Congress serve as ex officio members of the Federal Reserve and that the Board maintain statistics on loans made by size category of business in order that data may be accumulated with regard to interest rates and their effect on various categories of business by size.

I have pledged to continue working on this severe problem until relief is secured. I urge my colleagues to join with

me in supporting these amendments to the Federal Reserve Act and in responding to the voices of our constituents that are drowning in a sea of high interest

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as

S 1609

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) sec tion 10 of the Federal Reserve Act (12 U.S.C. 241) is amended by-

(1) striking "fourteen years" and substi-

tuting "seven years",
(2) inserting immediately before the last sentence the following: "At least one member serving on the Board shall have demonstrable experience in small business and one in agriculture." and

(3) by adding at the end thereof the following new sentence: "The President Pro Tempore of the Senate and the Speaker of the House of Representatives shall each appoint a person to serve as ex-officio members of the Board for terms not to exceed two

(b) Section 11(a) of such Act (12 U.S.C. 248) is amended by adding the following new sentence at the end thereof: "The Board shall maintain statistics on loans made by size category of business in order that data may be accumulated with regard to interest rates and their effect on various categories of business by size.".

By Mr. DANFORTH:

S. 1610. A bill to increase the excise tax on cigarettes and to transfer the revenues from such tax to the Federal Hospital Insurance Trust Fund; to the Committee on Finance.

EXCISE TAX ON CIGARETTES

 Mr. DANFORTH. Mr. President, today I am introducing a bill which would raise excise taxes on a pack of cigarettes by 10 cents. At present the excise tax is 8 cents a pack, a rate established in 1951, over a quarter of a century ago.

The revenues generated by this measure would be paid directly into the medicare program of health care for the elderly. Adding this 10-cent tax would generate close to \$3 billion annually, a sum which would prove a real shot in the arm for the ailing condition of the social security program.

An increase in cigarette excise tax program will go a long way toward making those who choose to smoke responsible for the tremendous health care costs now borne for them by the Federal Government. The sums spent by medicare and medicaid each year to treat persons suffering from smoking-related diseases is a staggering \$3.8 billion, an estimate from the National Center for Health Statistics within the Department of Health and Human Services. It strikes me as eminently fair to ask those doing the smoking to increase their share of the costs which their habits generate.

Three important things have happened since the cigarette tax was set at 8 cents a pack in 1951. First, we have had tremendous inflation, 8 cents in 1951 would be the equivalent of 25 cents today. In 1951, the Federal excise tax represented about one-third of the

average cost of a pack of cigarettes. Today, the Federal tax represents only one-eighth of the cost.

The second thing that has happened since 1951 is the Surgeon General's report. We now have indisputable evidence linking cigarette smoking with a whole range of catastrophic illnesses—lung cancer, strokes, emphysema and so on, and it is now the pronounced public policy of our Nation to discourage smoking.

Third, since 1951, the Government has established the medicare, medicaid, disability insurance and supplemental se-curity income programs. As a result, the American people—nonsmokers as well as smokers-are subsidizing through their taxes the real costs associated with cigarette smoking. An estimated 6 percent of the expenditures of the medicare and medicaid programs go to the treatment of illnesses caused by smoking. In 1980, that amounted to about \$3.8 billion spent by medicare and medicaid for smokingrelated diseases—a figure which would be significantly offset if a 10-cents-a-pack tax increase were enacted.

The additional \$3 billion would also make a major contribution toward solving the current financial crisis facing the social security system. Experts believe an additional \$50 to \$75 billion is needed to keep the system healthy over the next 5 years. This proposal would generate \$15 billion during that period—a sizeable portion of the system's projected short

No one likes to propose tax increases, but this is a case which is altogether logical, fair, and timely. It makes the smoker pay a larger share of smoking's cost to society. It also brings needed financial help to a troubled social security system and helps to avoid harsher solutions to that problem.

I invite each of my colleagues to study my proposal and join me as a cosponsor.

ADDITIONAL COSPONSORS

At the request of Mr. INOUYE, the Senator from Arizona (Mr. GOLDWATER), and the Senator from Rhode Island (Mr. CHAFEE) were added as cosponsors of S. 131, a bill to incorporate the Pearl Harbor Survivors Association.

At the request of Mr. Pell, the Senator from Illinois (Mr. Dixon) was added as a cosponsor of S. 672, a bill to require the Secretary of Transportation to administer a national driver register to assist State driver licensing officials in electronically exchanging information regarding the motor vehicle driving records of certain individuals.

S. 1053

At the request of Mr. Melcher, the Senator from Montana (Mr. Baucus), the Senator from California (Mr. CRANS-TON), the Senator from New York (Mr. MOYNIHAN), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Washington (Mr. Gorton) were added as cosponsors of S. 1053, a bill to amend the Federal Meat Inspection Act to authorize the Secretary of Agriculture

to regulate the transportation in commerce of horses intended for slaughter, and for other purposes.

S. 1131

At the request of Mr. Danforth, the Senator from Pennsylvania (Mr. Heinz) was added as a cosponsor of S. 1131, a bill to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes.

S. 1181

At the request of Mr. Jepsen, the Senator from Texas (Mr. Tower), the Senator from Wisconsin (Mr. Kasten), and the Senator from Arizona (Mr. De-Concini) were added as cosponsors of S. 1181, a bill to amend titles 10 and 37, United States Code, to increase the pay and allowances and benefits of members of the uniformed services and certain dependents, and for other purposes.

S. 1342

At the request of Mr. Melcher, the Senator from Tennessee (Mr. Sasser) was added as a cosponsor of S. 1342, a bill to define the circumstances under which construction workers may deduct travel and transportation expenses in computing their taxable incomes for purposes of the Federal income tax.

S. 1406

At the request of Mr. Lugar, the Senator from Massachusetts (Mr. Tsongas) was added as a cosponsor of S. 1406, a bill to amend the Depository Institution Deregulation and Monetary Control Act of 1980.

S. 1448

At the request of Mr. Mathias, the Senator from Idaho (Mr. Symms), the Senator from Delaware (Mr. Roth), the Senator from West Virginia (Mr. Randle), the Senator from Missouri (Mr. Danforth), and the Senator from Maryland (Mr. Sarbanes) were added as cosponsors of S. 1448, a bill to provide for the issuance of a postage stamp to commemorate the 70th anniversary of the founding of the Girl Scouts of the United States of America.

8. 1524

At the request of Mr. Metzenbaum, the Senator from Michigan (Mr. Riegle) was added as a cosponsor of S. 1524, a bill to amend the National Labor Relations Act to provide that the duty to bargain collectively includes bargaining with respect to retirement benefits for retired employees.

SENATE JOINT RESOLUTION 67

At the request of Mr. INOUYE, the Senator from Maryland (Mr. MATHIAS) and the Senator from Wisconsin (Mr. KASTEN) were added as cosponsors of Senate Joint Resolution 67, a joint resolution to establish "National Nurse-Midwifery Week."

SENATE JOINT RESOLUTION 76

At the request of Mr. RANDOLPH, the Senator from Mississippi (Mr. STENNIS) was added as a cosponsor of Senate Joint Resolution 76, a joint resolution providing for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt.

SENATE RESOLUTION 175

At the request of Mr. Boren, the Senator from New Mexico (Mr. SCHMITT), the Senator from Alabama (Mr. Her-LIN), the Senator from Tennessee (Mr. SASSER), the Senator from North Carolina (Mr. East), the Senator from Kansas (Mrs. Kassebaum), the Senator from Hawaii (Mr. Matsunaga), the Senator from Nevada (Mr. Laxalt), the Senator from Massachusetts (Mr. Kennedy), the Senator from North Dakota (Mr. Bur-DICK), the Senator from California (Mr. CRANSTON), the Senator from Idaho (Mr. SYMMS), the Senator from Delaware (Mr. Roth), the Senator from Alabama (Mr. DENTON), the Senator from New Jersey (Mr. Bradley), the Senator from Louisiana (Mr. Long), the Senator from Louisiana (Mr. Johnston), the Senator from Utah (Mr. HATCH), the Senator from Illinois (Mr. Percy), the Senator from West Virginia (Mr. Robert C. Byrd), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Arizona (Mr. GOLDWATER), the Senator from Washington (Mr. Jackson), the Senator from New York (Mr. Moynihan), the Senator from Indiana (Mr. Lugar), the Senator from Alaska (Mr. STEVENS), the Senator from New York (Mr. D'Amato), the Senator from Texas (Mr. BENTSEN), the Senator from Maryland (Mr. SARBANES), the Senator from Colorado (Mr. Armstrong), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Montana (Mr. MELCHER), the Senator from South Dakota (Mr. ABDNOR), the Senator from Alaska (Mr. MURKOWSKI), and the Senator from Hawaii (Mr. INOUYE) were added as cosponsors of Senate Resolution 175, a resolution to congratulate the State of Oklahoma on the celebration of its "Diamond Jubilee."

SENATE CONCURRENT RESOLUTION

32 — CONCURRENT RESOLUTION
AUTHORIZING A BUST OR STATUE
OF DR. MARTIN LUTHER KING, JR.
TO BE PLACED IN THE CAPITOL

Mr. MATHIAS submitted the following concurrent resolution; which was referred to the Committee on Rules and Administration:

S. CON. RES. 32

Resolved by the Senate (the House of Representatives concurring). That the Joint Committee on the Library is authorized and directed to procure a bust or statue of Dr. Martin Luther King, Junior, and to cause such sculpture to be placed in a suitable location in the Capitol as determined by the Joint Committee on the Library.

SEC. 2. Expenses incurred by the Joint Committee on the Library in carrying out this concurrent resolution, which shall not exceed \$25,000, shall be paid out of the contingent fund of the Senate on vouchers approved by the chairman of the joint committee.

A STATUE OF DR. KING FOR THE CAPITOL

• Mr. MATHIAS. Mr. President, many outstanding Americans and their individual accomplishments have been acclaimed in these Halls. Few have done more to change America than Martin Luther King, Jr., a man of vision who for many Americans came to symbolize the equality of all Americans.

Today I send to the desk a resolution to authorize placing a statue or bust of Martin Luther King, Jr., in the Halls of the Capitol. Dr. King had a profound influence in these Halls. It is reflected in historic legislation affecting civil rights and the right to vote. In fact, one of the major tasks now before Congress is the extension of the 1965 Voting Rights Act, the legislative result of the great crusade for voting rights spearheaded by Dr. King.

Placing a statue or bust of Martin Luther King, Jr., in the Capitol will not add to the luster of his life. That needs no confirmation by the Congress. But, Dr. King has earned his place among our Nation's heroes. We ought to affirm that place visibly in the Halls of the Capitol Building.

ORDER FOR STAR PRINT

Mr. BAKER. Mr. President, I ask unanimous consent that the resolution (S. Res. 190) be star printed to state that the resolution was reported without amendment and without recommendation. I send the correction to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

V. Consensation of the St.

ORDER FOR STAR PRINT

Mr. BAKER. Mr. President, I ask unanimous consent that there be a star print of Senate Resolution 192, to state that the resolution was reported without amendment, and I send the correction to the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOTICES OF HEARINGS

COMMITTEE ON THE BUDGET

Mr. DOMENICI. Mr. President, the Senate Budget Committee will meet for a series of hearings on September 15, 16. and 17 to consider matters relating to the second concurrent budget resolution for fiscal year 1982. Witnesses are as follows: Tuesday, September 15 at 10:30 a.m., Dr. Alice Rivlin, Director of the Congressional Budget Office; Wednesday, September 16 at 10 a.m., the Honorable Paul Volcker, Chairman of the Federal Reserve System; Wednesday, September 16 at 2 p.m., Dr. Ronald I. Mc-Kinnon, professor, Stanford University; Dr. Allan H. Meltzer, professor, Carnegie Mellon University; Dr. James Tobin, professor, Yale University; September 17 at 10 a.m., David Stockman, Director, Office of Management and Budget; and September 17 at 2 p.m., Dr. Jerry Jordan, member, Council of Economic Advisers; Mr. Larry Kudlow, Assistant Director of Economic Policy, Office of Management and Budget: Mr. Beryl Sprinkel, Under Secretary for Monetary Affairs, Department of the Treasury.

All hearings will be held in room 6202 of the Dirksen Senate Office Building. For further information, contact Lynn Pearson of the Senate Budget Committee staff at 224-0544.

ADDITIONAL STATEMENTS

MEDIATED NEGOTIATIONS IN EL SALVADOR

O Mr. KENNEDY. Mr. President, on August 28, two countries close to the United States in friendship and alliance issued an important declaration concerning the continuing civil strife in El Salvador. France and Mexico have recognized that the Frente Farabunda Marti Para La Liberacion Nacional and the Frente Democratico Revolucionario are a "representative political force" in El Salvador which should be able to participate in seeking a negotiated political solution to the crisis. In issuing this declaration, Foreign Ministers Cheysson and Castaneda also appealed to the international community to facilitate a "rapprochement between representatives of the warring Salvadoran political forces."

The Mexican-French declaration was met with both support and criticism internationally—support for its recognition that negotiations are necessary with the main adversary to the junta before conditions for truly free elections can be established; and criticism for supposed intervention in the internal affairs of Fl Salvador. These developments heighten the importance of urgently exploring every avenue to halt the killing in Fl Salvador, to seek a political solution and to prevent further military escalation of this senseless and tragic conflict.

The Mexican-French initiative provides a rare opportunity to break the stalemate in El Salvador. The United States should urge all sides to take immediate advantage of one or more of the offers outstanding for mediation of the dispute. There is abundant precedent for proceeding in this fashion, not the least example being the successful resolution of the conflict in Zimbabwe, following mediated negotiation among all parties, and after the failure of premature elections in a misguided attempt to impose an "internal" settlement without the consent of key political forces in that country.

It is plain that the administration's policy in El Salvador is not working. It is plain that valuable time has been and is being lost, and that more and more innocent lives are being expended in a senseless convulsion of a society too long denied the most basic rights and opportunities for all but a few of its people. It is plain that the junta remains incapable of assuring its population that it can govern justly and can bring its own security forces and the rightwing death squads under control, or even see justice done in the case of thousands of murders, including those of American women missionaries and American labor representatives

It is plain, in short, that negotiations, involving outside mediation, are needed now. And when the fighting and the killing and all outside military intervention have ceased, and when the opposing factions have agreed to reasonable approaches to resolving the issues that di-

vide them, only then will there be a real opportunity for fair and impartial elections which will be trusted and accepted by all the people of El Salvador.

Mr. President, I ask that the joint Mexican-French declaration be printed in the RECORD, together with a cogent editorial in the New York Times on September 8 urging that mediated negotiations be tried in El Salvador.

The material follows:

FRANCO-MEXICAN DECLARATION ON EL SALVADOR

The Minister for External Relations, M. Claude Cheysson, and the Mexican Minister of Foreign Affairs, Mr. Jorge Castaneia, have exchanged views on the situation in Central America.

The two Ministers wish to voice jointly their Governments' grave concern over the suffering of the people of El Salvador in the present situation, a source of potential danger for stability and peace throughout the region in view of the risks of internationalization of the crisis, they accordingly hereby make the following declaration;

Being convinced that it is for the Salvadoran people and for them alone to find a fair and lasting solution to the deepseated crisis affecting that country, thus putting an end to the tragedy suffered by the population;

Conscious of their responsibility as members of the international community, and taking guidance from the goals and principles of the United Nations Charter;

Considering the extreme gravity of the present situation and the need for fundamental social, economic and political changes:

Recognize that the alliance of the Frente Farabundo Marti Para La Liberacion Nacional and the Frente Democratico Revolucionario constitutes a representative political force ready to take on the attendant responsibilities and exercise the attendant rights. Consequently, it is legitimate that the alliance should participate in establishing the mechanisms of conciliation and negotiation needed for the political solution of the crisis:

Recall that it is for the people of El Salvador to set in train a process designed to bring about a global political solution whereby a new internal order will be established, the Armed Forces restructured and conditions created that will ensure respect for the popular will, as expressed through genuinely free elections and other mechanisms forming part of a democratic system:

Appeal to the international community to provide, more especially in the United Nations framework, for the protection of the civilian population in accordance with the applicable international norms and warring Salvadoran political forces, with a view to restoring harmony in that country and in order that all interference in El Salvador's domestic affairs may be avoided.

THE TAINTED BALLOT IN EL SALVADOR

Political solution: that is everyone's answer to the mercless civil war that has claimed as many as 20,000 lives in El Salvador. Even the Reagan Administration has muted its January call to arms and now talks about a political settlement of a conflict that it correctly describes as "Salvadoran in nature." Then why is it so annoyed with France and Mexico for opening a new path to that very end?

The French and the Mexicans outline an approach requiring negotiations between the American-supported junta and the diffuse

opposition coalition known as the Democratic Revolutionary Front. That is by no means an extreme idea. Everyone knows there are genuine democrats and certifiable zealots on both sides of the Salvadoran divide. There could be real promise in a deal uniting the fragmented center while isolating the totalitarian extremes.

By recognizing the opposition front as a "representative political force," Mexico and France think they can hasten a cease-fire and an acceptable compromise. The Administration thinks otherwise, and so do Venezuela, Colombia and Argentina, which have railied to its side.

Possibly, as the Administration insists, the French-Mexican initiative is unrealistic, a mere sop to left-wing opinion in both countries. But how realistic is Washington's notion of a political solution? The idea looks fine: let all Salvadorans go to the polls next March and elect a constituent assembly as the first step to founding a democratic system. The trouble is that there have been "elections" for 50 years in El Salvadore, and all have been tainted. As long as unregenerate security forces are in charge, democrats in the opposition will boycott the vote. Their price for participation is a restruc-

Their price for participation is a restructuring of the military, giving younger officers genuine authority. This is an option that the Reagan Administration has ruled out; it fears that leaning on the military would weaken the anti-guerrilla campaign. So it sends advisers and helicopters to El Salvadore, asking too little in return on all counts—moral, political and military.

It has been conventional wisdom in this poignant civil war that those who might negotiate a settlement do not control the contending armies. Up to a point, that is true. But the battle is deadlocked, and Washington no longer talks of quick and easy victory. The guerrillas, for their part, realize that should the tide seem to turn to their advantage they risk massive American involvement. These are circumstances that strengthen the democratic-minded leaders in both camps.

If France and Mexico are willing to assume the risks of promoting a political settlement, why not let them try?

ACTUARIAL EXPERIENCE OF SOCIAL SECURITY TRUST FUNDS

• Mr. ARMSTRONG. Mr. President, I would like to call the attention of my colleagues to the following memo in which the Office of the Actuary, Social Security Administration, compares the actual economic experience and assumptions and the trustees reports of 1971-80. As you will note, this comparison points out that the reports are rather consistently optimistic.

This is particularly significant in view of pending proposals to strengthen the financial underpinnings of the social security system. It is a clear warning against over optimism in the future. I ask that the memorandum be printed in the Record.

The memorandum follows:

COMPARISON OF ACTUAL ECONOMIC EXPERIENCE AND ASSUMPTIONS IN TRUSTEES REPORTS, 1971-80

(By Joseph A. Applebaum, F.S.A. Office of the Actuary)

This note compares the actual economic experience with the assumptions contained in the 1971 through 1980 reports of the Board of Trustees of the Federal Old-Age and Survivors Insurance and Disability Insurance Trust Funds. Because income and outgo are, to a major extent, affected by automatic indexing procedures, the financial stability of the OASDI system is linked to the nation's economy. In projecting its financial operations, assumptions must be made as to price inflation, wage growth, and the size of the work force. It is inherent in making projections of economic assumptions that actual experience will not correspond to that assumed, and such "errors" should not necessarily be taken to imply mistakes or oversights.

The accompanying table shows, for each calendar year from 1971 through 1980, actual values for: average unemployment rate, year-to-year percentage increase in the CPI. year-to-year percentage increase in average covered wages, and annual real wage increase—the difference between the increases in wages and in prices. Also shown are the value that were given for each of these measures of economic activity under the intermediate set of assumptions in various OASDI Trustees Reports.

A brief inspection of the table reveals one important fact. The values assumed in the reports were rather consistently optimistic, particularly with respect to price inflation and real wage growth, in comparison with what actually occurred. Thus, the reports projected more robust financial pictures for OASDI than what, in fact, occurred. A forthcoming actuarial note will analyze in greater

1 It should be noted that, for any particular year, data are shown for the estimated assumptions in the Trustees Report for the following year, which as to the increases in covered wages and the real wage increase generally differ from the actual experience for that year (although not by much). The reason for this is that the Trustees Report is prepared in the early part of the year, before actual data on increases in wages for the previous year are available (although actual CPI and unemployment data are obtainable).

detail the effects and implications of differences between actual and assumed economic experience.

The actual experience on real wage increases (which is probably the most important economic element from a cost standpoint), for each of the years from 1971 through 1980, was less favorable than the estimates made in the Trustees Report for the fourth preceding year. Further, this situation was also generally so for the reports for the third and second preceding years as well. For example, for 1980, the 1976-78 reports assumed real wage increases of about 2.4 percent, but the actual experience was a real wage decrease of 5.0 percent.

The foregoing analysis makes it clear that decisions about the short-range financing of the OASDI program should take into consideration the possibility that actual experience with respect to the economic assumptions will be less favorable than "best guess" estimates. This is especially so at the present time, when the level of the trust funds is

THE HMONG PEOPLE OF LAOS

 Mr. CHAFEE. Mr. President, more than a decade ago, during the height of the Vietnam war, the Hmong people of Laos supported U.S. interests by waging a bitter counter-guerilla war against Communist infiltration into South Vietnam. It is not known how many American lives were saved because of the gallant sacrifice of Hmong highlanders who fought the so-called secret war in Laos. But, we do know that when the United States withdrew its forces from the region in mid-1975, the Hmong, like many other indigenous allies, were left to fend for themselves.

The result has been disastrous. Many thousand Hmongs have been killed in skirmishes with Vietnamese and Pathet Lao forces, others have been driven from their traditional homelands. More recently, we have reports of chemical weapons being used against this basically peaceful highland people.

Mr. President, I am appalled at stories I have read that the chemical agent trichothecene toxin, known as T2, has been used against the Hmong people in Laos. This mycotoxin which has been developed by Soviet scientists causes a particularly trocious and painful death where a person breathing it suffers severe stomach craps before vomiting massive amounts of blood. Death comes within 15 to 30 minutes.

In my judgment, this is a tragic situa-

tion where a people who once fought bravely for U.S. interests in America's least popular war have now been decimated by brutish warfare that borders on genocide

It is not enough for the United States to open her doors to Hmong refugees, and we are proud that almost 3,000 have chosen Rhode Island as a place of recidence. I believe that some effort must be made to address the circumstances which have driven these people from Laos, as well as to look into the unique health problems they suffer as a result of their ordeal. Finally, we must make a better effort to understand the history and culture of these people. In this regard, I am proud to say that on the 12th of this

month, the Roger Williams Park Museum of Natural History in Providence, R.I., will open a Center for Hmong Lore.

Mr. President, I ask that three articles on the Hmong people and their ordeal be printed in the Record.

The articles follow:

[From Time, Sept. 14, 1981]

YELLOW RAIN-SOVIET CHEMICAL WARFARE

American intelligence experts have long suspected that chemical poisons developed in the Soviet Union have been used in military operations in Afghanistan, Laos, and Cambodia. Eyewitnesses in all three countries have reported seeing "yellow rain" fall from the skies. Shortly afterward, victims on the ground have suffered burning sensations, convulsions and massive internal bleeding. Many have died painful deaths. Still, there had never been scientific evidence that the poison came from the Soviet Union. So the U.S. has withheld any official accusation of Soviet violations of a 56-year-old international agreement banning chemical weapons.

Time has learned that in at least one instance, the use of a Soviet chemical agent has been proved beyond any scientific doubt. The site of the offense, by Vietnamese troops, was in Cambodia. Military patrols from Thailand gathered samples of foliage, soil and water from Cambodia and sent them to the U.S. for analysis. The State Department, in turn, sent the samples to private American laboratories without revealing the source of the evidence or why it was to be examined. The civilian scientists found that the samples contained the chemical agent trichothecene toxin, known as T₂. Soviet scientists have published articles on how to mass produce T₂, which occurs naturally in grain molds common in the Soviet Union.

The T₂ connection was first made by Writer Sterling Seagrave, who presents a persuasive circumstantial case of the Soviet violations in his forthcoming book "Yellow Rain." Seagrave interviewed victims of chemical attacks in Southeast Asia, Yemen and Afghanistan, as well as the doctors who treated them. In Afghanistan soldiers fighting the Soviet invaders told him about being attacked by rockets fired from helicopters. The rockets released a "yellowish-brown" cloud that caused victims to "die quickly, vomiting blood and fouling their clothes."

The State Department is still reluctant to level public accusations at the Soviet Union. Some officials would like to do so on the humane grounds that public disclosure might prevent further use of the poison and avoid more such deaths in both Southeast Asia and Afghanistan. More cautious U.S. officials prefer to await similar verification that the chemical has been used in both Laos and Afghanistan.

That may not be long in coming. At least three more samples of the vellow powder produced by the "yellow rain" are under study in private U.S. laboratories. If those tests lead to the same conclusions, the State Department presumably will make the detalls public and then make more formal charges against the Soviet Union.

[From the Reader's Digest, September 1981]
TRAGIC LEGACY FROM LAOS

(By Jane Hamilton-Merritt)

Last October, in "Gas Warfare in Laos: Communism's Drive to Annihilate a People," Reader's Digest told a horrifying story of modern-day genocide. Jane Hamilton-Merritt, a reporter-photographer and Ph. D. in Asian studies, disclosed the extermination by poison gas of thousands of H'mong, a fiercely independent tribal minority in Laos—people who had formed the backbone of a U.S.-supported guerrilla resistance against communist forces during the Vietnam war. In the following article she describes what has

happened since. And what—tragically—has not

No longer can the gassing of the H'mong be considered a faraway problem in Southeast Asia. Now the problem is here, on our own doorstep, among the H'mong refugees who have settled throughout the United States.

In the five years I reported on refugees in northern Thailand, I heard countless detailed accounts of poison-gas attacks by the Soviet-backed Lao-Vietnamese regime on H'mong villages—and of the deadly results. In 1960, there were an estimated 500,000 H'mong in Laos.* Today, some 100,000 are either in Thai refugee camps or resettled in Western countries, including about 40,000 who have come to the United States since 1976. A number of refugee experts fear that fewer than 100,000 are alive in Laos. Many died of starvation, but thousands were killed by gas attacks, which still continue.

I crisscrossed America recently, interviewing H'mong refugees, and I discovered a new dimension to their story of terror.

One H'mong leader estimates that of those who have arrived here, about 20,000 may have been exposed to the "poisonous rains" of chemical warfare. Many are chronically -because of the gassings, they believe. They complain of pulmonary problems, constant headaches, painful muscles and joints, eye and hearing disorders. Medical and public-health personnel who have worked with the H'mong are persuaded that their infant-mortality rate is high and that a large percentage suffer from cancer. More frightening, in the last few years in the United States, at least 35 young H'mong men and women have succumbed to a mysterious sudden death that occurs during sleep. The Centers for Disease Control in Atlanta have confirmed that 20 of these deaths are indeed unexplainable. (The other 15 were insufficiently documented.) Studies made in Portland. Ore., a large H'mong resettlement area, show the H'mong death rate to be five times that of the non-Lao population.

Some of the heartbreaking cases I have witnessed:

A woman on the West Coast, age 49, suffers from constant, terrible headaches. Her husband has pain in all his muscles. They have three children. The other eight were killed in gas attacks or in fighting.

A 33-year-old man lives in a rundown apartment in a Midwest city. He moves s'owly and has obvious difficulty breathing. "If I stand up or sit down fast, I faint," he says.

in a housing project, also in the Midwest, a 21-year-old man suffers from heavy coughing and shortness of breath, and complains, "After the gassing, my mind is slower."

These are the survivors, the lucky ones, but also the pathetic, lonely victims of chemical warfare. "Few Americans know who we are, what we did for the United States during the Vietnam war," says one young H'mcng man. "Many think we are Vietnamese or 'boat people.' Many of up still suffer from being gassed, but American doctors either don't believe us when we try to tell them or never ask us about our life in Laos."

"Why aren't Americans concerned about the gassing?" the H'mong ask. The answer, in large part, lies with the U.S. State Department's position that no "conclusive evidence" exists that gassing is occurring in Laos.

Consider the State Department's response under both the Carter and Reagan administrations to those who have asked about the gassing of the H'mong. The letter, still being mailed out as this article went to press, fails to acknowledge the H'mong as U.S. allies. It presents instead the Pathet Lao (commu-

nist) government's propaganda, without comment or explanation:

"The Lao government has used a combination of persuasion and force to bring the H'mong out of their highland homes to new settlements in the lowlands. The Lao government argues that the H'mong method of agriculture destroys valuable hardwood forests, Laos' principal natural resource. The Lao also argue that, by bringing the H'mong population to the lowlands, the government can better limit the production of cpium, a principal H'mong crop, which supplies the heroin markets of the world through illicit channels."

Those unfamiliar with Laos could infer from this official letter that the H'mong were wretched traffickers of heroin and conclude that gassing might be their just deserts. To be sure, the H'mong did grow opium poppies—opium has long been used medicinally by many tribal groups in Southeast Asia. But H'mong tribespeople do not convert poppy sap into heroin or traffic it through the illicit drug channels of the world.

Anyone who has studied the H'mong, from

Anyone who has studied the H'mong, from U.S. Drug Enforcement Agency investigators to on-the-scene diplomats, knows that these people are not involved in the heroin business. "Associating the H'mong with heroin is a part of the Big Lie," says former U.S. ambassador to Laos G. McMurtie Godley.

The State Department letter continues:
... By 1978, the United States had enough information to bring the matter [of chemical warfare] to the attention of the government of Laos, which denied the validity of the reports. We received the same response when we asked the Soviet and Vietnamese governments to look into the reports and end the practice if true.

Did our government really expect the Lao, Vietnamese or Soviet governments to acknowledge the use of chemical warfare—a practice banned by international treaty and abhorred by most of the world?

Eyewitness Testimony. A 1980 State Department publication, "Country Reports on Human Rights Practices," says of Laos: "During the past three years, there has been limited improvement in some aspects of human rights. There is no evidence that the government is seeking to destroy any particular ethnic group, per se, such as the H'mong. There have been numerous refugee accounts of attacks using lethal chemical agents against the H'mong. . . This charge has been denied by the Lao government." That is the only reference to the use of chemical agents in the entire section on Laos.

Not surprisingly, Gen. Vang Pao and other leaders of the H'mong community in this country are appalled by the report. "There has been overwhelming evidence of the gassing of men, women and children in Laos for years," says the general. "Yet the State Department not only avoids the subject but doesn't recognize the fact that my people are being eliminated because we were the U.S. allies in Laos."

While the State Department keeps telling the inquiring public, including members of Congress, that there is no "conclusive evidence," it falls to mention its own recently prepared report, which records the testimony of scores of eyewitnesses to chemical attacks in Laos, documenting over 13,000 dead from gassing.

And if that were not enough, evidence is now available from the communist side itself. For example, last November, a Pathet Lao pilot who defected to Thailand admitted flying numerous gas missions between 1976 and 1978 to "cause the H'mong people to die out completely. He adds that pilots flying these missions were granted special privileges and were closely monitored by doctors and nurses after each mission.

Will the Reagan Administration continue to honor the avoid-the-H'mong policy

^{*}All population figures are approximate, as precise information is unavailable.

generated during the Carter years? In a meeting with several members of the foreign diplomatic corps, John Holdridge, newly appointed Assistant Secretary of State for Asian and Pacific Affairs, said that the United States has no evidence to bring to

'court" on the reported gassing in Laos. Yet, human and moral considerations aside, the chemical agents used against the defenseless H'mong should be of considerable national-security concern to the United States. The fact is we don't know what these agents are. Even Defense Department experts are baffled. Victims suffer from profuse bleeding from the nose, throat, eyes, stomach and intestines—resulting in death by hemorrhaging.

Recently, I spoke with Col. Charles W. Lewis, M.D., a member of the Department of Army Surgeon General's team sent to Thailand in 1979 to interview survivors of chemical attacks in Laos. I asked what chemicals he thought could be causing such profuse bleeding. "That's what I want to know," he said. "I hope someone is working on finding out. Nerve agents don't cause hemorrhaging. These are all new symptoms. When I returned from this investigation, I talked to people in the chemical-warfare business and no one knew. Everyone was surprised. We had better find out in order to be able to defend against them."

In early December 1980, the U.N. General Assembly by a vote of 78-17 adopted a resolution calling for a U.N. investigation into the use of chemical warfare in various parts the world. Among those voting against the resolution were Laos, Vietnam, Afghanistan, the Soviet Union and Cuba, However, the project appears to be on the back burner, and in any case, Laos can reject U.N. requests for on-site investigations.

"Sudden Death." Meanwhile, the gassing attacks against the H'mong continue. H'mong who crossed into Thalland in February 1981 reported that between January 6 and 20, 1981, Soviet-made helicopters flew 20 chemical missions, killing 1,260 H'mong friendly to the Pathet Lao. On April 2, 1981, a Soviet M-17 dropped yellow chemicals on Ban Thong Hak, killing 24 H'mong outright, including 11 children. Two weeks later, a H'mong party reached Thailand with samples of the chemical residue gathered from stones, ground and leaves. The samples were given to U.S. authorities on April 23 but didn't arrive in the United States until the second week of May.

Under the best of circumstances, a chemical analysis is difficult. Experts say that, since gas disappears into the atmosphere, samples gathered from an exposed area may not contain any identifiable lethal proper ties. Incredibly, there is no U.S. team of chemical-warfare experts in Thailand to conduct on-the-spot analysis.

The H'mong in this country continue to suffer as well. In early 1981, the U.S. press picked up on the mysterious "sudden death" syndrome, and some public-health personnel became interested. But the interest is limited only to the sudden deaths. According to the Centers for Disease Control, there is no nationally coordinated plan to study the problem of the chronically ill H'mong who believe they are sick because of the gassings.

On the other hand. Richard Harruff, a doctor with special training in pathology who spent six months last year in a H'mong refugee camp in Thailand, is concerned about the long-range effects of the lethal agents used on the H'mong. According to Dr. Harruff's research on survivors who were exposed, complain of impotence, and females report a high rate of spontaneous abortions. Infants born to exposed mothers are often very weak and lethargic, and die within a few days to months of apparent respiratory failure. These victims of unknown poisons need special care." Harruff is outraged that no one in the U.S. health community has systematically investigated the medical condition of those H'mong exposed to chemical agents.

is the answer? What can-What must-be done?

First, public hearings should be held before all relevant committees in the House and in the Senate, presenting the situation in its totality.

Second, Secretary of Health and Human Services Richard Schweiker should designate an agency to alert all doctors to the potential H'mong health problems, to establish guidelines for conducting appropriate biopsies and treatments, and to establish a way for the H'mong exposed to the chemicals to report their problems.

Third, the United Nations should be used as a forum to keep the issue of poison gas before the international community until it is resolved.

Fourth, our government should tie any arms-control negotiations with the Soviets to their curtailment of chemical warfare by client regimes.

Fifth, the Administration should assign the highest priority to the identification of these lethal agents. This is crucial in developing strategic defenses and medical treatment for those exposed.

For too many years, the United States has swept the gassing in Laos under a cover of words. Now, the problem is our responsibility and we must deal with it. "There is no place to hide from the poisonous rains." This H'mong saying has become our harsh reality.

GAS WARFARE IN LAOS: COMMUNISM'S DRIVE TO ANNIHILATE A PEOPLE

(By Jane Hamilton-Merritt)

The place is not a pretty sight. I.V.'s drip fluid into skinny arms. Doctors and nurses scurry from one wooden-slab bed to another, responding to pleas for help. I am at Ban Vinai, a refugee camp along the Mekong River just inside northern Thailand. It is by some 35,000 H'mong (propopulated nounced Mong) tribal refugees from the mountains of Laos. They suffer from severe malnutrition, malaria, amoebic dysentry, tuberculosis, pneumonia and a host of parasites. For many there is a tragic complication: they have been gassed.

One of them is a friend of mine; yet I don't recognize him, although I have passed his pallet at least 20 times. Finally, through his pain, he recognizes me and sends a rela-

tive to bring me to him.

Nhia Yang Vang, about 40, had once been vigorous, energetic. Now he is a skeleton with sunken, haunted eyes. In a weak voice he tells me he had returned to Laos after I saw him in January. Concerned about relatives, he had gone back there with a party of 19 men for three months. During that time, he says, his team had been in areas sprayed by poisonous chemicals nine times.

Every few minutes his talk is broken by a racking cough that nearly strangles him. He spits bloody sputum into a tin cup. A H'mong nurse tells me that he has chest pains, finds breathing difficult, cannot eat.

Nhia continues: "They hit us at the end of May at Nam Khing with the yellow chemicals. It was a white plane like a Soviet helicopter-low enough so that I could see the figures of two pilots. Immediately when they dropped the gas I fell to the ground vomiting blood. My eyes burned; I could not see. I have the 'red' diarrhea.

"It was a powder. When it touched my skin it became sticky, like an ointment, and when water is put on it, it becomes liquid." He stops for another bout of coughing. You know, after a rain the chemicals will get into the water and poison it. Now that it is the rainy season, it will be so easy to poison us all.'

"Just Like the Jews." In 1960, there were at least 500,000 H'mong in Laos. Today, perhaps 70,000 are still alive there, many of them sick or dying of malnutrition. Another 50,000 are in Thai refugee camps, and some 35,000 have been resettled in Western countries. H'mong survivors in Laos now face a terrible future, for they are the targets of a deliberate, calculated policy of extermina-

This policy is the tragic heritage of the H'mong commitment to America's effort to prevent a communist takeover in Vietnam and Laos. The United States, unwilling to send its own troops into Laos, opted for another kind of army—a guerrilla army re-cruited mostly from the H'mong, but also from other Laotian tribes, such as the Yao. Lahu, Lao Teung. Trained by the U.S. military and the CIA, the H'mong formed the backbone of the resistance against the communist forces in Laos that were supported by North Vietnam, China and the U.S.S.R. They sabotaged war supplies moving south along the Ho Chi Minh Trail, and rescued American pilots shot down in Laos. They proved adept at intelligence work, gathering vital information on troop, tank and supply movements.

Gen. Vang Pao, who commanded the H'mong forces and now lives in the United States, told me recently that his forces destroyed millions of dollars' worth of mili-tary equipment, medical and food supplies moving down the Ho Chi Minh Trail into South Vietnam between 1962 and 1975. "To do that." he said, "my people gave 12,000 lives. All of that was secret, but now I want the American people to know."

When the Americans pulled out of Vietnam and Laos, the H'mong—and the sacrifices they had made—remained largely unknown. But the Vietnamese and Pathet Lao did not forget. Li Chai, who now lives in Denver, Colo., and is a leader of the H'mong refugee group there, tells why: "The communists know that we were the Americans' hands, arms, feet and mouths. That's why they believe they must kill all H'mong—soldiers, farmers, children. We suffer and die just like the Jews in World War II, but the world ignores us."

HIDE IN CAVES

Gen. Vang Pao says, "Communist gassing of the H'mong people began in August 1975, at Mung Om and Nam Fen, south of Phu Bai, where 17,000 men, women and children were killed. I learned from a Pathet Lao defector that from 1975 to 1978 the gassing had killed 50,000 H'mong in the Phu Bai area alone. During that time some 45,000 died from starvation and disease, or were shot trying to escape to Thailand."

Today, in tribal refugee camps in northern Thailand, H'mong refugees tell of starvation, rape, the crippling of children whose fathers worked for the United States, of massacres. worked for the United States, of massacres. But what frightens them most are the poisons, which they call "rain," "gas," or "smoke," for they cannot hide from the chemicals that poison them, their water, animals, plants and fields.

Survivors speak of several kinds of "rain." Yellow and red are very serious, and a direct hit means sure death. Green and blue-green rains are not as immediately lethal. A small bit of opium often enables victims to survive. but they suffer vomiting, bloody diarrhea, fever, bleeding through the nose, and dizziness.*

Recently, still another chemical, a lightyellow powder, has been dropped by fourengine planes or by helicopters. The latter, a U.S. military spokesman tells me, resemble Soviet MI-4s or MI-8s.

A H'mong farmer, looking much older than his 40 years, says; "For two years they attack my area in Laos. The planes cover us with red smoke, and the people and animals die. We cannot grow rice or farm. We must hide

Oplum has for centuries been used medicinally for severe gastro-intestinal disturb-

"They drop poison on us 200 times in 1978 and 1979. The first time five people die immediately. Red smoke rolls over the area and everyone is sick. It smells like burning rubber. I swallow a bit of opium, but slide to the ground unable to move. In about an hour I can get up, but I cannot eat or drink. I become very skinny. Twelve more people in my village die of being skinny"

Chronicle of Horror. The stories are count-

Chronicle of Horror. The stories are countless. One man sits before me in Ban Vinai refuge camp in Thailand carrying "evidence" of the continued gassing it Laos. Trained by the Americans in intelligence in the 1970s, this former H'mong lieutenant had crossed the Mekong River to Thailand on June 6. From a miniature diary that he miraculously managed to bring he guietly reads:

managed to bring, he quietly reads:
"On 15 May 1980, two Soviet helicopters
dropped yellow powder on a H'mong village
of 200 at coordinate TF 9376. Thirty-five died
within seven days; the remaining are very

He recites another attack. Then, carefully turning the tattered pages of his dlary to check dates, figures and locations, he chronicles what happened to him after the American withdrawal from Laos in April 1975:

"The first gas attack was in October 1975. The communists couldn't take our village by fighting, but they came back with airplanes. One carried red gas, another yellow. Those near where the chemical rockets exploded fell unconscious, with bleeding from the mouth and nose. Many died. Soon afterward a yellow water flowed from their bodies.

"They hit us with gas for three days. Seventy-five people died immediately. Five hundred more died within a short time. I was lucky, for I was not in the village at

the time.

"For three years we were constantly attacked like this. We must live in the jungle
like animals. Since early 1980, people are so
hungry that they eat leaves exposed to the
chemicals, and 715 people have died in my
area. I dig in the ground for roots and water,
but many are too weak to do this. We have
no cloth to cover our bodies from mosquitoes,
so we all have malaria. We have no medicine,
so we are all sick."

Shot in the Arm. On a visit to Thailand in January, my friend Nhia Vang, who had just escaped from a Vietnamese prison camp in Laos, told me a story not only of genocide, but of an added horror; medically supervised experimentation that uses chemical agents on imprisoned H'mong men, women and chil-

"In November 1978, a Vietnamese force of 3500 captured about 1200 H'mong men, women, and children—including mine—in the jungle where the red and yellow smoke had forced us to live. We were taken to a camp called Tong Mien, which held 2000 H'mong prisoners. We were given only a small portion of rice every 15 days, and many of my people were shot trying to get to the forest for food.

"Then, on March 25, two MiG jets flew low over our prison camp and sprayed us with white rain. One hundred people died immediately. The rest of us had diarrhea for 20 days, then fever; we cannot walk or raise our arms. Many more people die.

"In May, four Pathet Lao medics gave injections in the arm to 30 H'mong, including me. It was the color of water. I immediately became dizzy and could not breathe. Blood spurted from my nose and I fell to the ground unconscious. A relative blew opium smoke over me for several hours and finally the bleeding stopped. In 12 hours I could see again and by the next day I could walk.

"The next day four new medics came. This time they had injections and pills for 40 gassing victims. Some medics gave my people injections and green pills, others injections and white pills. Nothing happened for

12 hours; then they have trouble seeing, can't speak and black out. Fifteen died; the rest are very sick for a long time. The medics wrote reports on the people given medicine."

What has been the response of the United States to these atrocities? In my view, it has been appallingly weak and ineffectual.

The House Subcommittee on Asian and Pacific Affairs has taken testimony on the gassings. And the State Department and Department of Defense have made their own investigations. But they and other U.S. officials, including those in the White House, refuse to acknowledge that the evidence is conclusive.

After listening to testimony at the subcommittee hearings in April, Congresman
Jim Leach (R., Iowa) stated: "I personally
interviewed these refugees, I read State Department and Defense Department reports
which are so numerous and so persuasive
that they cannot be denied. No one in the
White House ever saw a person being gassed
in Auschwitz, but we know it occurred. I
think this Administration has a moral responsibility to tell the people of the world
what is happening."

sponsibility to tell the people of the world what is happening."

Urgent Mission. What government agencies want for "conclusive evidence" is a body for autopsy. But there are serious logistical difficulties in obtaining recently gassed victims and fresh chemicals because the gasing occurs in the remote mountains of Laos, many days' walk through enemy territory to the Thai border. One H'mong found a dispensed gas canister, wrapped it heavily in old clothes, and started to walk it out of Laos to Thailand. The chemical residue in the canister killed him before he reached the Mekong.

I asked Vang Neng, H'mong chief at Ban Vinai, about the U.S. insistence on having a body for autopsy. In a voice of frustration and anger, he said, "Yes, I have bodies for autopsy. I learned yesterday that the communists gassed a village on May 14, killing ten immediately. This is many days' walk from the Mekong. By the time we carry one body out, it will be spoiled."

Last fall, a step in the right direction was made when a team from the office of the Army Surgeon General was sent to Thailand to investigate the gassing allegations. They interviewed 40 men, two women and a 12-year-old girl, all of whom were witneses to, and survivors of, gassing attacks in Laos, and concluded in a report withheld from the public that chemical agents had been used against the H'mong. Two recommendations were: to "develop a plan whereby blood, tissue or other specimens may be rapidly transported from the suspect area to the Biomedical Laboratory for analysis, and to establish a medical team, on a standby basis, prepared to travel to the site of future allegations to conduct interviews/examinations." The final recommendation read: "From a military defense position, it would seem to be an extremely urgent mission to initiate every effort possible to identify the chemical agents that have been used and to develop appropriate countermeasures, antidotes, etc.

Unfortunately—indeed, unbelievably—those recommendations have been ignored. On June 30, 1980, I reported to the U.S. embassy in Bangkok that I had located two men in a refugee camp hospital who reported being gassed in the latter part of May. The timing for testing was within the six-week limit recommended by the Surgeon General. After 14 days of evasive and false information by the embassy and other U.S. officials in Thalland, I returned to the camp myself to speak directly to the two men recently gassed and to the camp medical personnel.

Only then did I learn that medical experts familiar with gassing had not conducted the investigations. We had sent a Thai nurse and an American public-health worker, who

admitted he was a "novice" with regard to chemical warfare and, in his own words, had "very little" instruction even in how to collect samples. When I left Bangkok on July 18, the specimens were still there.
"Will You Help?" While the West refuses

"Will You Help?" While the West refuses to acknowledge the use of lethal chemical agents by the Soviet-backed regimes of Hanoi and the Pathet Lao, the Vietnamese government applauds its army's chemicalwarfare branch by awarding it a Ho Chi Minh medal. According to Hanoi radio monitored in Thailand in April 1980, Gen. Le Trong Tan told the unit: "Chemical weapons contributed to winning the great victory in the great anti-U.S. salvation resistance struggle" and in "tasks in the new situation." The "new situation" undoubtedly refers to Laos, Cambodia—and possibly to Afghanistan.

The State Department calls evidence suggesting a Soviet role "circumstantial," but it is more than that. Independent intelligence sources have confirmed the presence of Soviet Gen. V. K. Pikolov's chemical-warfare forces in Laos—and subsequently in Kabul, Afghanistan. In addition, Soviet chemical-warfare experts are said to have visited several cities and areas in Laos to inspect "chemical explosives"—artillery shells, bombs, rockets. In sum, it is hard to escape the conclusion that the Soviets are involved, certainly in the production and distribution of chemical agents, and probably in on-site surveillance and medical experimentation.

Meanwhile, the H'mong continue to die. A H'mong leader who is responsible for almost 30,000 civilians in Laos recently crossed into Thailand. His words haunt me: "I have come to see if anyone has food, clothing or medicine to protect us from the gassing. Someone must help, soon, or we will all die. We are friends of the Americans. We fought for freedom. Will you help?"

Will we? How?

First, a fully publicized Congressional hearing—both Senate and House—into the gassing of the H'mong should be held. This would inform the U.S. people and attract world-press coverage of the atrocity. And the U.S. government should make communist gas warfare a major issue before the United Nations and every international forum.

Second, direct pressure should be applied on Hanoi by Free World industrial nations on whom Hanoi greatly relies for the technology and financial aid to rebuild Vietnam. This must be done at the highest private "hotline" leader-to-leader level. Hanoi should be told that this inhuman policy must stop or aid will be halted.

Finally, since Vietnam is a client state of the Soviets (apparently the source of the lethal chemicals), the United States should inform the Soviets that any discussions of other issues will be put off until we are satisfied that chemical warfare in Laos has ceased.

At Ban Vinai Camp, Vang Chue, an 18-year-old boy who has been gassed, is carried into the hospital. His chest heaves with eratic contractions and he struggles to breathe. His face is heavy with sweat and I see a tear looming—the first H'mong-soldier tear that I have ever seen. I lean down to talk with him.

"I'm so sorry that my country is dying," he says in a voice of pain. "Please do something."

IN MEMORY OF ROY WILKINS

• Mr. METZENBAUM. Mr. President, the editorial that appeared in the September 9, 1981 edition of the Washington Post began with the observation that:

Today's young Americans of all races may read with a certain understandable detachment about life in this country 50 years ago, when Roy Wilkins began his distinguished career with the National Association for the Advancement of Colored People.

That observation, Mr. President, is eloquent testimony to what the life and work of Roy Wilkins has meant to this Nation.

Roy Wilkins was a modest man—one who did not seek personal fame and recognition. But I believe that when future historians examine the times in which we live, they will point to Roy Wilkins as one of this Nation's great men.

Roy Wilkins knew the value of persistence, of organization and of attention to detail.

He understood the need to build from fundamentals, whether in strengthening the NAACP or in helping to set the agenda of the civil rights movement as a whole.

Roy Wilkins did not live to see the achievement of all of the objectives to which he devoted his life.

Black Americans today can no longer be denied access to public accommodations. But it remains true that the 12 percent of American citizens who are black bear 50 percent of the Nation's poverty.

Black Americans today have the right to vote in places where this American birthright had long been denied to them. But in cities all over this country, millions of young black men and women are without jobs, without prospects and without hope for the future.

Much remains to be done.

But great things have also been accomplished over the past several decades. And for that, Mr. President, this Nation owes an enormous debt of gratitude to Roy Wilkins and to his colleagues in one of history's greatest nonviolent movements for social change.

Roy Wilkins would have been the first to say that the cause of civil and human rights does not depend on any one individual. But Roy Wilkins was a very special human being and his death is a profound loss to the Nation, to the civil rights movement, and to all of us who had the opportunity to know him, to work with him and to benefit from his wise and gentle counsel.

Mr. President, the Metzenbaum family joins me in offering our profound condolences on this sad occasion to Mrs. Aminda Wilkins and to the rest of the Wilkins family.

TRIBUTE TO ROY WILKINS

• Mr. D'AMATO. Mr. President, our Nation has lost a great crusader, a man who has dedicated his entire life fighting to make life better for his fellow Americans. We have lost a man who spent his life working to improve the social, economic, and political status of his fellow blacks.

This man is Roy Wilkins. Roy Wilkins died yesterday at New York University Medical Center at the age of 80.

All Americans should be thankful for the work performed by Roy Wilkins. Through the NAACP, he worked to end discrimination, end racism, end the hatred that permeated American society. Roy Wilkins dedicated his life to the proposition that all men are created equal.

Traveling the country as executive director of the NAACP, Roy Wilkins built that organization into one of the most powerful and respected voices in America today. In 1931, the NAACP's membership was 25,000. In 1977, when Wilkins retired as the organization's executive director, the membership topped 400,000.

Roy Wilkins understood the importance of black participation in the political process. His crusade to win the right of blacks to participate in that process and his further efforts to encourage participation have only served to strengthen our representative democracy.

Understanding the fact that long term equality for blacks could best be achieved by working within the political system, Roy Wilkins could often be seen walking the Halls of Congress, fighting for an America where blacks and whites could work together to create a better Nation.

A gentle, dedicated, and compassionate man, he has been honored time and time again at universities throughout the land. I think President Reagan summed it up when he said:

Roy Wilkins worked for equality, spoke for freedom, and marched for justice.

The headline in today's New York Times reads, "Roy Wilkins: A Cool, Solid, and Respected Leader." This is what he was.

Our Nation has lost a great leader. We can be thankful that his accomplishments and achievements will have a permanent imprint on our society.

Roy Wilkins has been described by his colleagues as the quiet one in the back who got things done.

We will miss him.

SMALL BUSINESS

• Mr. LUGAR. Mr. President, citizens interested in the growth and vitality of small business should be delighted to know that Milton Stewart, the Small Business Administration's first Chief Counsel for Advocacy, is continuing his work for the entrepreneurial sector as the editor of Inc. magazine. Mr. Stewart and Inc. are a good match; each is an articulate and powerful voice for small business. Mr. Stewart contends, and I believe rightfully so, that the revitalization of our Nation's economy depends on the new jobs and innovations provided by small business.

In the September issue of Inc., Mr. Stewart salutes the Senate's overwhelming support of S. 881, the Small Business Innovation Research Act of 1981. I am submitting for the Record his article, "Congress Hears—and Forwards—a Message." It includes Inc.'s first entrepreneurship honor roll. a listing of the 81 cosponsors of the legislation. Since the magazine was printed, an 82d Senator. Ted Stevens, has joined us.

The article follows:

[From Inc. Magazine, September 1981] MILTON D. STEWART: THE BUCK STOPS HERE CONGRESS HEARS—AND FORWARDS—A MESSAGE

Eighty-one United States Senators have joined to sponsor (not just vote for) a

"Small Business Innovation Research Act of 1981." We have previously reported at length on the urgency of swift and decisive Federal action on this matter. Our country badly needs the forward thrust that this measure will give it. Expert testimony before the House Committee on Science and Technology (by Dr. Aaron Gellman, president of a Harbridge House subsidiary) reports data showing that small firms (under 500 employees) produce 2.4 times as many innovations per employee as large ones.

In the face of this and much other similar evidence, the Federal bureaucracy continues to spend with small business less than 4 cents of every one of the 35 billion research and development dollars it controls every year. In the words of one respected Federal research manager, this is nothing less than

"cheating the taxpayer."
For two reasons, then, we have saluted the wisdom and responsibility of the 81 Senate sponsors of S. 881 on our new "Entrepreneurship Honor Roll." First, because of their specific step in moving together to meet an important national need, And second, because their action should be the first installment of an ongoing message to the career Federal bureaucracy: Stop feeding the growth of government and government-sized business at the expense of entrepreneurial small and new business.

This is a clearly bipartisan group of Senators—41 Republicans and 40 Democrats. It runs the whole political gamut—regionally, ideologically, anyway you like. This is clearly a message from the whole country to the executive branch: It is time for a change. We've singled out for special mention Senator Warren Rudman, a New Hampshire Republican who is the principal sponsor of S. 881, and Senator Edward M. Kennedy (D-Mass.), who led the fight for the program in previous Congresses.

What S. 881 does is small in dollars, modest in scope, but large in significance. It directs each Federal agency to develop a special research grant program for innovative small high-technology firms, using first a tiny two-tenths of 1 percent of its existing funds—no added cost to the taxpayer. That amount is raised to 1 percent. (House supporters are talking about raising it to 2 percent.) These funds are made available on an open competitive basis in two steps: Initial grants of \$30,000 for feasibility research in federally needed areas like productivity. There is then a second round of financing for some of the winners who have come up with the most promising results.

And this is vital to us: Getting private business commitments for a third round to finance commercialization is one of the grounds for making second round awards. It has worked for the National Science Foundation—far more follow-on private money has turned up in support than the little Federal seed-money used. This is, thus, a program with a built-in, leveraged kicker for the taxpayer. It provides an incentive for privately funded market place applications of Federal research.

In our view, the longest-running Washington scandal is the impunity with which the Federal bureaucracy has been allowed to take into camp administration after administration on this subject. Courageous, broadgauge, and alert civil servants (and there are more than a few) are again disheartened by the dreary replaying of the old downtown Washington scenario: "We know best all you newcomers. Here's a rewrite of the same memorandum we used to stop small business the last 10 times." And whether the administration is Republican or Democratic, it usually works. The pitch is varied slightly to accommodate the political lingo of the party in power, but the permanent bureaucratic doctrine rolls on without change.

Four arguments against S. 881, for exam-

ple, are made in a variety of forms by agency witnesses and memo writers. It allegedly permits the use of government money for nongovernmental purposes. That's bunk, because the NSF model has made it plain that every Federal dollar is used for a federally selected Federal priority purpose, Commercial applications in the last phase must be financed privately. That's just what happens when, for example, an auto company learns how to do something making government tanks that it can use later on in making cars.

Then it's alleged that a percentage small business set-aside—even one as small as 1 percent—is an unwarranted "quota" that keeps the plous bureaucrat from choosing the "best" research performer. That's also bunk, because what the S. 881 set-aside really does is to discipline the bureaucracy which otherwise shovels all Federal R. & D. funds into its three artificial and preferred "de facto quotas": Government laboratories, nonprofit academic centers, and large companies. The competition that S. 881 sets up is far more vigorous and far more likely to produce outstanding performance in small-scale applied research than all those "de facto quota" beneficiaries rolled together.

Then there's the argument that in a time of budgetary stringency, even a 1 or 2 per-cent small business set-aside takes dollars that can't be spared away from needy and deserving nonprofit basic science research.
That's bunk, because the present level of
taxpayer-financed basic science research cannot be supported without a sharp increase in small-scale applications of that research. Otherwise we are simply doing more of what has gotten us into the soup for the past decade: Giving our competitors around world access to basic research which they apply while we fail to do so.

Finally, and the biggest laugh of all, is the rouser that S. 881 is "unnecessary" be-cause each agency itself can be trusted to do the best job possible for small business if left to its own devices. Exactly two Federal agencies have formal and competitive programs of the kind S. 881 would mandate-the National Science Foundation and, just the Department of Defense. Both have had to endure the most vicious and ceaseless internal opposition from the standpat brigade of the willfully blind.

What this bill does for research and de velopment is what the country wants done across the board. The country often does not know how to say it affirmatively and clearly to the Government so it shouts it negatively:
"Stop using our money and your power to
shrink the small business sector"—compared to growing bigness in government and large business. That's the message of S. 881 and it must be repeated in many areas: Taxes, regulations, capital, credit, interest rates, foreign trade procurement generally. We'll be talking about those in the months ahead.

For now, S. 881 represents a fine beginning. For those of you who are action-

oriented, here are the next steps:
1. Three hundred House sponsors are needed promptly for a bill to parallel S. 881. A bipartisan group is forming behind Representatives Berkeley Bedell (Democrat from Iowa), Joe McDade (Republican from Pennsylvania), Albert Gore (Democrat from Tennessee), and Jerry Lewis (Republican from California). If all the Congressmen from the States represented by Senators on Entrepreneurship Honor Roll No. 1 join in, that will be more than 400. We'll be glad to list them in Entrepreneurship Honor Roll No. 2.

2. The bill must pass both Houses swiftly with large enough margins to make the measure a sure bet for presidential approval.

3. The President must sign it into law. 4. Congress must keep a vigorous over-sight watch on the bureaucratic foxes to protect the national small business R. & D. hen houses until that great new brood of industrial innovations is hatched. ENTREPRENEURSHIP HONOR ROLL

Just as we honor successful entrepreneurs in the Inc. 100, the Inc. second 100, and soon to be published Inc. private 100, recognize the contribution of those outside business who improve the climate for entrepreneurship. Here are the 41 Republican and 40 Democratic Senators who are sponsoring the Small Business Innovation Research Act

of 1981 (S. 881): Abdnor, James (Republican of South

Andrews, Mark (Republican of North Dakota)

Baucus, Max (Democrat of Montana). Bentsen, Lloyd (Democrat of Texas) Boren, David (Democrat of Oklahoma) Bradley, Bill (Democrat of New Jersey) Bumpers, Dale (Democrat of Arkansas) Burdick, Quentin N. (Democrat of North

Byrd, Robert C. (Democrat of West Virginia).

Cannon, Howard W. (Democrat of Nevada) Chafee, John H. (Republican of Rhode Island).

Chiles, Lawton (Democrat of Florida) Cochran, Thad (Republican of Mississippi). Cohen, William S. (Republican of Maine). Cranston, Alan (Democrat of California). D'Amato, Alfonse (Republican of New York)

Danforth, John C. (Republican of Missouri).

DeConcini, Dennis (Democrat of Arizona). Denton, Jeremiah (Republican of Ala-

Dixon, Alan (Democrat of Illinois) Dodd, Christopher (Democrat of Connecticut).

Dole, Robert (Republican of Kansas). Domenici, Pete V. (Republican of New Mexico)

Durenberger, Dave (Republican of Minnesota).

East, John (Republican of North Carolina). Exon, J. James (Democrat of Nebraska). Ford, Wendell (Democrat of Kentucky). Garn, Jake (Republican of Utah). Glenn, John (Democrat of Ohio)

Goldwater, Barry (Republican of Arizona). Gorton, Slade (Republican of Washing-

Grassley, Charles (Republican of Iowa). Hart, Gary (Democrat of Colorado) Hatch, Orrin (Republican of Utah). Hatfield, Mark (Republican of Oregon). Hawkins, Faula (Republican of Florida) Hayakawa, Sam (Republican of Califor-

Heflin, Howell (Democrat of Alabama) Heinz, John (Republican of Pennsylvania). Helms, Jesse (Republican of North Carolina)

Hollings, Ernest (Democrat of South Caro-

Huddleston, Walter (Democrat of Kentucky).

Humphrey, Gordon (Republican of New Hampshire).

Inouye, Daniel (Democrat of Hawaii). Jepsen, Roger (Republican of Iowa). Johnston, J. Bennett (Democrat of Louisi-

Kassebaum, Nancy (Republican of Kan-

Kasten, Bob (Republican of Wisconsin). Kennedy, Edward M. (Democrat of Massa-

Leahy, Patrick (Democrat of Vermont)
Levin, Carl (Democrat of Michigan). Lugar, Richard (Republican of Indiana) Mathias, Charles, Jr. (Republican of Maryland)

Matsunaga, Spark (Democrat of Hawaii). Melcher, John (Democrat of Montana). Metzenbaum, Howard (Democrat of Ohio). Mitchell, George (Democrat of Maine). Moynihan, Daniel (Democrat of New

Murkowski, Frank (Republican of Alaska).

Pell, Caliborne (Democrat of Rhode Island)

Percy, Charles (Republican of Illinois) Pressler, Larry (Republican of South Dakota)

Pryor, David (Democrat of Arkansas). Randolph, Jennings (Democrat of West

Riegle, Donald, Jr. (Democrat of Michigan)

Roth, William V., Jr. (Republican of Delaware).

Rudman, Warren (Republican of New

Hampshire).
Sarbanes, Paul S. (Democrat of Maryland).
Sasser, James R. (Democrat of Tennessee).
Simpson, Alan K. (Republican of Wyoming)

Specter, Arlen (Republican of Pennsylvania).

Stafford, Robert T. (Republican of Vermont)

Stennis, John C. (Democrat of Mississippi).

Symms, Steven (Republican of Idaho). Tower, John (Republican of Texas).

Tsongas, Paul (Democrat of Massachusetts).

Wallop. Malcolm (Republican Wyoming)

Warner, John (Republican of Virginia) Weicker, Lowell P., Jr. (Republican of Connecticut).

Williams, Harrison A., Jr. (Democrat of New Jersey)

Zorinsky, Edward (Democrat of Nebras-

PUBLIC BROADCASTING

Mr. EAST. Mr. President, I would like to commend to my colleagues' attention a provocative editorial by columnist and author Anthony Harrigan. Mr. Harrigan is president of the U.S. Industrial Council in Nashville, Tenn.

Mr. Harrigan's comments remind us that federally-funded radio and television stations are inescapably controversial in a free society like ours. There are those who maintain that public broadcasting enriches our cultural life by offering us alternative programing, free from commercial constraints. There are also those who hold that it is unfair for all taxpayers to subsidize "elite" programing for the relatively few who avail themselves of it. Finally, there is the question of political bias, which Mr. Harrigan addresses here. I ask that the text of his editorial be reprinted in the Rec-ORD.

ALL THINGS CONSIDERED

(By Anthony Harrigan)

Driving home in the afternoons, I listen to "All Things Considered," the news and fea ture program broadcast by National Public Radio. I'm always amazed that this voice of liberalism receives funding from the taxpayers, especially now that the Reagan administration is in office.

"All Things Considered" is well-done from the technical standpoint. I pick up odd pieces of information, like a report on the de-cline of the sawmill business in Oregon and the State of Washington. The producers are clever at using theme music and employing the sounds associated with various aspects of American life.

But its principal content is politics of the Americans for Democratic Action brand. It is partisanship pure and simple. If a conservative viewpoint is aired from time to time, I have yet to hear it.

The bulk of NPR air time goes to commentaries by such folk as the national editor of the Washington Post and spokesman for Friends of the Earth. It airs statements by the environmentalists who want to drive Secretary of the Interior James Watt from office. It offers Sen. Cranston (D-Calif) who tells listeners how bad Dr. Ernest Lefever is. (Dr. Lefever, in case you have forgotten, withdrew his name as Undersecretary of State after a furious campaign of abuse by liberal groups.)

National Public Radio doesn't know the meaning of the word balance. It apparently meaning of the word balance. It apparently regards itself as a kind of Carter administration in exile. The good guys in the white hats, according to NPR, hate offshore leasing, pipeline building in Alaska, and the "rape" of the earth. The bad guys in the black hats are the likes of Sen. Jesse Helms of North Carolina because he takes a dim view of liberals in policy-making positions in

the State Department.

The producers of "All Things Considered" are the most smug lot imaginable. They regard liberalism as a revealed faith. They apparently can't believe that liberalism received a resounding defeat in the presidential elec-tion last fall. They have their own Shangri-La in National Public Radio. They are determined to keep the flame of liberalism burning in their slanted version of the news

If they wanted to do this with private money, with the help of the limousine liberals, that would be fine. They have a right to take their philosophical and political convictions to the public by buying air time or printing tracts. But it's outrageous that they should operate a liberal propaganda machine at the expense of the taxpayers

The federal subsidy for National Public Radio amounted to more than \$200 million in 1980. The Reagan administration reportedly wants to cut that subsidy in half. But why not eliminate the subsidy—and the op-eration—entirely? National Public Radio hasn't made any effort to "clean up its act" and broadcast in less than a totally biased

The American people don't need a federally-financed broadcasting operation that tries to sell one political and cultural point of view to the listening audience. If the government financed a publication with the bias of "All Things Considered," there would be a roar of protest.

Maybe only a few people listen to National Public Radio. Whatever the numbers, pro-grams such as "All Things Considered" are out of order.

STATUS REPORT ON THE BUDGET

• Mr. DOMENICI. Mr. President, hereby submit to the Senate a status report on the budget for fiscal year 1981 pursuant to section 311 of the Congressional Budget Act. Since my last report the Congress has cleared the Omnibus Budget Reconciliation Act of 1981 (H.R. 3982) and the Economic Recovery Tax Act of 1981 (H.R. 4242). The President has signed the bills which are now Public Law 97-35 and Public Law 97-34 respectively.

REPORT TO THE PRESIDENT OF THE U.S. SENATE FROM THE COMMITTEE ON THE BUDGET

STATUS OF THE FISCAL YEAR 1981 CONGRESSIONAL BUDGET ADOPTED IN H. CON. RES. 115: REFLECTING COMPLETED ACTION AS OF SEPT. 8, 1981

[In millions of dollars]

	Budget authority	Outlays	Revenues	
Revised second budget resolu- tion levelCurrent level	717, 500 715, 461	661, 350 661, 211	603, 300 610, 335	
Amount remaining	2, 039	139	7, 035	

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate and which exceeds \$2,039 million for fiscal year 1981, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in H. Con. Res. 115 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate and which would result in outlays exceeding \$139 million for fiscal year 1981, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in H. Con. Res. 115 to be exceeded

REVENUES

Any measure that would result in revenue loss exceeding \$7,035 million for fiscal year 1931, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in H. Con. Res. 115.0

AWACS

• Mr. HART. Mr. President, of the many arguments that have been made in the last few months against the proposed sale of AWACS planes to Saudi Arabia perhaps the most compelling is the threat to our own national security by the potential compromise of the AWACS technology that we risk when entrusting such sophisticated equipment to a regime which might be destablilized. We risk handing the Soviets a potential windfall in military intelligence at least twice as damaging as that reaped by the KGB in 1979 in Iran after the fall of the Shah.

Although the administration has repeatedly tried to downplay the capabilities of the AWACS, the evidence and the record point to the contrary. For example, in 1975 the Chairman of the Joint Chiefs of Staff, Air Force Gen. David Jones told the House Appropriations Committee that the AWACS system "is the greatest breakthrough in command and control in my entire military career." One year later Jones told the Senate Appropriations Committee that-

AWACS offer the greatest single quantum jump in command and control capability since the development of radar.

Also in 1977 during congressional hearings on the sale of AWACS to Iran, a GAO procurement official warned-

If the Soviets should gain access to the AWACS they could move ahead, in the opinion of the Director of Central Intelligence. some five to seven years in certain technologies. More immediately, they could learn how to jam any now contemplated AWACS version.

As the Congress debates the risks to U.S. security involved in the proposed AWACS sale it is worth noting that in 1977 the Departments of State and Defense and the CIA all gave assurances of Iranian stability when arguing that there would be a minimal risk in the transfer of sophisticated military equipment to the Shah's regime. Within 30 months, the Shah had fallen, and training manuals for systems such as the F-14 and the Phoenix missile were compromised.

A compromise of American technical secrets in Saudi Arabia would help the Soviets build systems they do not now possess, and improve systems they are currently developing. If our Government wants to signal that it is unwilling to give unintentional assistance to Soviet military planners, Congress should defeat the AWACS sale.

Mr. President, on August 30, 1981 the Washington Post published a detailed analysis of the American military technology which could be compromised by the AWACS sale. I ask that the article titled "Selling AWACS to Saudis Risks Our Own Security" be printed in the RECORD at this point.

The article follows:

SELLING AWACS TO SAUDIS RISKS OUR OWN SECURITY

(By Aaron D. Rosenbaum and Emanuel A. Winston)

When the government of Iranian Prime Minister Shahpour Bakhtiar collapsed on Feb. 11, 1979, civil order collapsed as well, and for the next two days, jubilant mobs sacked government buildings throughout Iran. At the Defense Ministry in Teheran, military police put up a desultory fight and fled. Secure areas were left unguarded; tech-nical data, classified manuals and intelligence findings were available to anyone bold enough to enter the ministry.

According to former senior officials of the CIA and Air Force intelligence, it is certain that Soviet agents were bold enough. When the last vestige of the shah's government fell, the United States lost more than an ally It lost to the Soviet Union information vital to America's own defense.

The U.S. Navy was damaged most. Compromised in Iran:

The F-14 fighter, keystone of long-range fleet defense. The airframe and engines, though advanced, held no great secrets for the Soviets. Of much greater interest were the electronics and missiles on the F-14:

The AN/AWG-9 radar and weapons control system.

The AIM-54A Phoenix long-range air-to-

The ASG-18 fire-control radar, which gives the Phoenix its exceptional accuracy.
The ALR-45 radar warning set.

The ALQ-100/126 electronics countermeasures suite, designed to both jam and deceive Soviet-built radars.

The U.S. Army (and thus NATO's infantry and armor) also suffered security losses in Iran. The Soviets gained insights about:

The Improved Hawk surface-to-air missile, the Army's basic element of ground defense. The AN/TSQ-73 command system, which directs the Improved Hawk.

The BGM-71 TOW antitank missile, which NATO regards as a primary means of neutralizing the 4-to-1 Soviet advantage in tanks in Europe.

"We know for a fact that the Soviets did lay their hands on a lot of the hardware, not just the manuals," Ryan Emerson of International Intelligence Report told Stephen Werbe in the Oct. 15, 1980 Christian Science Monitor. Security at military bases immediately after Bakhtiar's fall was uneven at best. In the weeks after Feb. 11, Islamic Guards policed the installations. The Carter administration cited this fact to rebut reports that the F-14s in Iran had been examined by unfriendly agents. But the claim of uninterrupted security for American-supplied weapons was dropped after it was learned that most of the Islamic Guards were irregulars and volunteers.

With the Iranian experience in mind, the Reagan administration's decision to sell Saudi Arabia five E-3A AWACS radar and control aircraft seems hard to believe. AWACS is central to both American security and the defense of Western Europe. So reliant is NATO on the "C3 doctrine" (command, control and communications) and so important is the AWACS to fulfilling the tenets of that doctrine (early warning, intelligence collection and battlefield coordination) that it is questionable how much political and military restraint the U.S.S.R. would show in Europe if the Soviet leadership were convinced that the AWACS could be partralized

Equally disturbing is the fact that the Saudis have received or will soon take delivery on a number of first-line weapons no less crucial to America's own defense than the ones compromised in Iran. The Saudis are politically unstable. Worse, the Soviets have the wherewithal to penetrate porous Saudi security even if there is no revolution.

In providing Saudi Arabia with the AWACS, F-15s, Sidewinders, shipboard defense systems and other weapons just now being delivered to America's own forces, the United States is risking its own security and that of NATO. In essence, we are offering the Soviets a windfall in military intelligence at least twice as damaging as the one reaped by the KGB in Iran.

In the months since the AWACS sale was announced, the administration has tried to defuse opposition by claiming that the planes the Saudis will receive will be stripped-down models. This is no more accurate than the Carter administration's description of the F-15 as a "defensive aircraft." The E-3as destined for Saudi Arabia will in fact be "Block 30/35" versions, the most advanced model of the AWACS, and superior to those sold to NATO (the Block 25 model).

The administration has suggested that it will delete certain advanced subsystems on the planes destined for Saudi Arabia. But there is evidence and precedent which indicate that when the planes are delivered, most once-deleted systems will be on board.

Block 30/35 AWACS normally will carry

Block 30/35 AWACS normally will carry the following equipment—every piece of which is on the cutting edge of technology and of intense interest to Soviet intelligence:

The AN/APY-1 radar, which on the Block 30/35 aircraft will be redesignated AN/APY-2 because of its added ability to track ships under way or at anchor. This radar has look-down capacity, meaning it can separate the images of aircraft from the radar echoes of the ground or the sea. The AN/APY-2 can see targets over the horizon and by virtue of its carefully shaped radar beam, is difficult to detect and jam.

The AN/APX-103 secure mode IFF system. IFF means "identification, friend or foe." The AN/APX-103 uses coded signals to "interrogate" unidentified aircraft, and judging by the response, displays on a console which planes detected by the main radar are friendly and which are potential targets. The AN/APX-103 is integrated with and utilizes a secure data communications system called TALIL-C, which is installed in the disc-shaped radome mounted above the fuselage. This radome also houses the antennas of the main AN/APY-2 radar.

In addition to identifying friends and adversaries, the AN/APX-103 simultaneously allows the AWACS to maintain air traffic control over a wide area. The Reagon administration has indicated that the Saudis will receive a commercial IFF instead of the AN/APX-103. But this would require a redesign of the radome and antenna suite. It would also require a technically difficult separation of the components and computer programs of the AN/APX-103 from those used in the main radar.

The AWACS computer software. The central computer of the AWACS is nothing special (through the Block 30/35 aircraft will carry a computer four times as powerful as the one on unmodified U.S. Air Force E-3As.) It is the software, even more than the electronics, which makes the AWACS such a powerful system. The Saudis will receive:

The executive programs, which coordinate radar tracking and the sequence of operations onboard the aircraft.

The surveillance programs, which sift hard information from the welter of signals collected every second by the radar.

The identification programs, which constantly change the codes used by the IFF and sort responses.

The communications programs, which intergate the multiple voice and data networks which link the AWACS to ground stations. The display programs, which translate

The display programs, which translate data into visual images on the consoles of the AWACS.

The battle command programs, which allow the general staff to utilize information collected by the AWACS and to execute orders to the battlefield on the basis of it.

And the electronic-counter-counter-measures (ECCM) programs, which enable the main radar to resist efforts by the enemy to blind it or misinform it.

Administration officials have stated the the Saudis will not receive ECCM capacity. This assertion is certain to be repudiated. ECCM on the AWACS radar is a matter of high-level computer code, much of it embedded in other computer programs. In order the deny the Saudis the ECCM capability, the U.S. would have to completely rewrite many of the other programs listed above, so thoroughly is the ability to resist countermeasures integrated by design throughout the AWACS.

In fact, the ECCM capacity simply cannot be deleted. The writing of software is one of the most cash- and labor-intensive enterprises of the technological age. The U.S. already has hundreds of millions of dollars and literally work-centuries invested in the AWACS software. More important, software reflects even more than hardware the modus operandi of America's military intelligence.

How the software sifts, what the software assigns importance to, all these things illustrate the philosophy and analytical framework of the designers and users of the AWACS. Hardware, once compromised to the enemy, can be redesigned and updated. But replacing software is like changing the way you perceive and think.

Finally, the Block 30/35 AWACS will normally come equipped with the JTIDS (Joint Tactical Information Distribution System). This device is a combined secure communications network, IFF system, precision navigation system and data collection and distribution center.

NATO plans to equip every ship, plane, tank, ground radar, SAM battery and infantry unit with a JT'DS transceiver. With battlefield information constantly flowing to central JT'DS processors on board each AWACS. Western commanders will have the ability to monitor every area of the battlefield and launch, without fear of countermeasure, integrated attacks against the enemy.

JTIDS is still under development, and the administration has stated that the Saudis will not receive this system, basic to NATO's operations. Yet for the five E-3A's to operate in proper coordination with the Saudi Air Force, a system like JTIDS will be necessary. In 1978, one of the authors wrote in a memorandum opposing the sale of F-15s to Saudi Arabia:

"An F-15 sale will require that the U.S. sell the Saudis advanced airborne radar systems such as the E-2C or E-3A AWACS."

The State Department responded to this contention in a memorandum (Feb. 18, 1978) drafted at the request of Rep. Lee H. Hamilton (D-Ind.). It stated:

"An F-15 sale will not lead to the sale of the E-2C or E-3A. The F-15 has an excellent radar. Were the Saudis to purchase an aircraft with a less effective radar than the F-15, they would be more likely to seek an airborne radar system. The Saudis have expressed no interest in either the E-2C or AWACS."

Analogously, any commitment tendered

now by the Reagan administration not to enhance the capability of the AWACS with the JTIDS must be viewed in light of this discarded assurance.

Bureaucratic pressures will certainly add impetus to such a decision: The U.S. Air Force pushed the AWACS sale in order to lower the unit costs on the planes it was buying and to establish a foothold for a permanent military presence in Saudi Arabia.

The administration's own rationale for the Saudi AWACS assumes the need for interpoperability with American forces which might be dispatched to protect Saudi Arabia in an emergency. By 1985, the Rapid Deployment Force will be equipped with JTIDS. So will the AWACS now based in Saudi Arabia. These planes are part of the U.S. inventory and will be upgraded accordingly. But by selling five E-3A's to Saudi Arabia, and by pledging to withhold JTIDS, the Reagan administration and the Saudis will face the prospect of having a Saudi-owned AWACS force which is less capable of defending the kingdom, and less able to assist U.S. forces than the "loaner" unit it replaced.

There is just no way the U.S. military will allow such a circumstance to occur. Given that under current law, any weapon system costing less than \$7 million may be sold abroad without congressional review, there will be little to stop a quiet decision to upgrade the Saudi AWACS with JTIDS.

Moreover, by delivery time in 1985, the Saudis will have had four years to cite Arab pride, petro-friendship and security needs in order to justify the addition of JTIDS and other deleted subsystems. This is part of the process known as after-sale upgrading. There is an instructive precedent in the aftermath of the F-15 battle. In May 1978, the Carter administration told members of Congress that the Saudis would not receive some of the top-of-the-line avionics standard on the F-15. But three months later, Electronic Warfare/Defense Electronics reported that:

"... the United States is planning to include the same avionics in Saudi Arabia's F-15s as that installed in U.S. F-15 aircraft, a high DoD [Department of Defense] source revealed to EW/DE. When asked if this included Loral's advanced ALR-56 radar warning receiver and Northrup's ALQ-135 computer-controlled jammer, he replied, '... all the avionics will be the same.'"

After-sale upgrades also have enabled the Saudis to acquire—without congressional review—the more advanced F-15C instead of the F-15As originally requested; F-5E fighters with aerial refueling capacity and the ability to launch Maverick air-to-ground missiles, and a more sophisticated model of the Maverick itself.

At least one official in the Reagan White House has acknowledged privately that by 1985, the after-sale upgrading process will have worked once again, and that the AWACS bound for Saudi Arabia will be fully equipped promises to Congress notwithstanding.

Even if the Congress votes resolutions of disapproval, the United States will only have lessened its security exposure in Saudi Arabia by perhaps a third. Other systems now in the country or destined for delivery are essential for the effective performance of America's Air Force and Navy against Soviet-armed forces. These include:

The F-15 fighter/bomber, the mainstay of NATO's tactical air threat until the year 2000. The Soviets have an abiding interest in the F-15's engine, the F-100. A fighter engine is only as good as its combustion chamber, and the F-100 utilizes a level of metallurgical magic that in its own way is as sophisticated as the electronics on the AWACS. Also of interest on the F-15:

The AN/APG-63 radar, described by Air Force Gen. John Vogt as "so far advanced that it is something of a decade ahead of anything else."

The AN/ASN-109 inertial navigation sys-

The ALF-56 radar warning receiver and the ALQ-135 ECM. The two units have only been in production for four years, and encompass in their designs every insight the U.S. gained in the Yom Kippur War and after about the workings of Soviet radars.

The AIM-9L Sidewinder air-to-air mis-

The AIM-9L Sidewinder air-to-air missile. The most advanced short-range air-to-air missile in the world, two were used to shoot down the Libyan Su-22s in the Gulf of Sidra. Sale of the AIM-9L is part of the AWACS package, and Congress still has the opportunity to block the transaction.

In April, a number of U.S. Air Force pilots wrote a letter to Rep. Tom Lantos (D-Cal.) warning against the sale of the AIM-9L to the Saudis. They noted the sophistication of the weapon and predicted a degradation of America's security if the AIM-9L were to fall into the hands of the Soviets. They were correct. The Soviets lag bady behind the U.S., Israel and France in both air-to-air missile design and lookdown radar capability. By adding knowledge of the AIM-9L to that now known about the Phoenix, the Soviets could eliminate one of the few remaining areas of military technology in which they trail the U.S.

The AGM-65B Maverick air-to-ground missile. Carried mainly on Saudi F-5E fighters, the 65B Maverick is a "fire-and-forget" weapon which has been in production only

Like the Air Force, the U.S. Navy may suddenly find itself less secure because of what gets penetrated by the Soviets in Saudi Arabia. The Saudis have purchased:

The RGM-84A Harpoon anti-shipping missile. This is the principal all-weather weapon for fleet defense. The Harpoon is now being installed on nearly every class of American warship, and has only been in service since 1977. The Saudis are also purchasing:

The AN/SWG-1(V) weapon control system, which channels data from the ship's radars to the Harpoon while the missile is in flight, and which makes the Harpoon a notably lethal weapon.

The Phalanx Close-In Weapon System (CIWS). Basically a radar-directed automatic machine-gun, the Phalanx is literally the last ditch defense system for the American fieet. It is only now being installed on American naval vessels after emerging from a high-priority development program. The critical time environment in which the Phalanx's radar must perform means that a compromise of this system could only be compensated at a great cost in both money and research.

With the AWACS sale formally submitted to Congress, witnesses for the State Department will assert—as they did during the hearings on the F-1fs—that Saudi Arabia possesses modern security infrastructures. This (they will say), combined with the loyalties forged in the desert make Saudi Arabia a secure place for even the most sophisticated American weapons. When the witnesses from Foggy Bottom give these assurances, they will be talking through their hats

The Saudi security apparatus is a Potenkin village. The system put together by Prince Turki al-Faisal (the Foreign Liaison Bureau and General Intelligence Directorate) has police units, spies, counterspies, computers, communications and camouflaged offices. What the Saudis security system lacks is security.

Like every other modern institution which has sprouted in the kingdom, the Saudi security system is nascent. And like every other technology-dependent infrastructure in the kingdom, it lacks both trained operatives and experienced executives. The Saudi security system is hamstrung by a dearth of experts and planners who feel at home in a high-

technology environment. Worse, Prince Turki has failed to instill a guiding sense of mission, cohesion and ideology.

Intelligence gathering and counter-intelligence are businesses which put a premium on personnel and experience. It takes decades to put together an effective system in which senior administrators trust each other and know the strengths and weaknesses of their agents and protective infrastructures.

Saudi security problems are compounded by shortcomings outside the two intelligence services. Soldiers and police are neither welleducated nor adequately schooled in protective techniques. The same things that make them hard to train also make them indifferent to security procedures and insensitive to real or potential breaches.

The armed forces should have their own powerful and semi-autonomous security units, but the royal family has kept military intelligence on a short leash. The ruling princes fear that any elite, secure, self-contained and well-armed group might attempt a coup d'etat. Their fears are not unitustified.

but this paranola doesn't enhance the security of American weapons in the kingdom. The worst problem is the number of aliens at military installations. Pakistanis train Air Force pilots. There are more than 400 Pakistani engineers and technicians with officer rank attached to the Saudi military. Pakistanis also serve as Air Force mechanics, as do Taiwanese. South Koreans work at Saudi naval facilities. Yemenis are ubiquitous, performing "menial" tasks as waiters, cooks and maintenance men. Egyptians and Pakistanis work as administrators and teachers both on

base and in nearby compounds.

The Saudi military itself is laced with Saudi citizens who sympathize politically with Iraq, Iran, Syria, Libya, Egypt and/or the Soviet Union. (This is a common circumstance in Arab armies.)

It does not require too much imagination to realize that clandestine communists, or pro-Iraqi, pro-Syrian or pro-Libyan Saudi officers would be targeted by Soviet intelligence as likely conduits of information about American weapons in the kingdom. The covert KGB presence in Saudi Arabia is growing, and is supported by major stations in Kuwait and Aden.

In essence, Saudi dependence upon the importation of skilled and unskilled personnel makes the kingdom a permanently unsecured area. The United States can dismiss this, but the Soviets will not.

Having created so many opportunities for security breach, the Saudi royal family may very well facilitate the ultimate intelligence compromise by getting itself overthrown. Weapons such as the AWACS and F-15 mean that when a coup attempt comes again, the sheer firepower at the disposal of the ring-leaders will increase their chances for suc-

Interestingly, the simple presence of highteeh weapons in the country destabilizes the royal family. It is a two-edged sword: many Saudis feel proud to know that their country is the recipient of the most powerful arms in the world. But for other Saudis, this is evidence of the overweaning self-aggrandizement of the royal family.

The royal family, hamstringing the military politically (while simultaneously trying to buy its favor with lush salaries, luxurious quarters and gold-plated cutlery in the mess halls) relies upon the National Guard to assure its safety. But this tribal force is just that—a throwback, bound by loyalties which were tested and found wanting in the take-over of the Grand Mosque in Mecca in 1979. The National Guard's fundamental problem is that it is not an elite force, like the commando units of Egypt and Israel. It lacks their training, techniques, command structure and political awareness. Here again, the waxing firepower of the Saudi armed forces makes it increasingly unlikely that the Na-

tional Guard could successfully protect the royal family.

But what has drawn the least attention, and yet is the likeliest source of a coup attempt is the tumult in the royal family itself. The conventional wisdom is that the family operates by consensus, mollifies complainers and assures that no one kills the goose that lays the golden egg. But that is a misperception of current dynamics within the family. There are two competitions for power and wealth now underway: one is taking place among the senior princes; the other pits the senior princes as a group against lesser, peripheral members of the royal family.

The Wall Street Journal reported early in May that a number of senior princes and their sons had been involved in schemes to sell oil to Japanese, Italian and Thai buyers in exchange for commissions which would have totaled millions of dollars. It is logical to ask: Why are some of the richest men in the world risking public embarrassment in pursuit of foreign payoffs—even payoffs exceeding \$100 million a year? Greed? Boredom? Power?

The answer appears to be power. The consensus process within the royal family is breaking down as the demise of the infirm King Khalid looms. The battle over the line of succession after Crown Prince Fahd has been brutal, unending and only partly resolved. The senior princes and their avaricious sons are developing their own parochial and irreconcilable agendas. These command ever more loyalty as the disagreement about policy for family and kingdom continues. Fahd's succession is likely to exacerbate this fractionalization, for he is neither a builder of coalitions nor a crusher of adversaries.

There is a story going around the intelligence community about the coup preparations of one of the senior princes. "Why should I care if a revolution costs me \$100 million?" the prince is reported to have told a confidant. "The day after I become king, my income that day will be twice as great."

The workings of the royal family destabllize the monarchy in another way. Power and oil revenues are concentrated at the center. The senior princes are under pressure from lesser family members to decentralize the family enterprise.

As with political power, the king and the senior princes divide the llon's share of oil revenues reserved for the royal family as a whole. (Aside from the senior princes, the only Saudi citizens who regularly command truly large chunks of oil money are the heads of the vassal tribes around the country.) These days, lesser family members get payments which may total several million dollars, but which are essentially token in nature. Their share of actual power is limited.

It is now clear that any move by the senior princes to share power with the outer circles is unlikely to occur because of the conflicts inside the senior group. Moreover, any devolution of power will not broaden the popularity of the senior princes or the family itself. What little power that is spun off from the center will be seized by less senior princes long before it has a chance to filter to the periphery.

More important, the burgeoning non-royal groups (the military, the technocrat-administrators, the entrepreneurs and the middle class) remain as powerless as before. Shut out and effectively disenfranchised, these groups are becoming a fertile agar for revolution. And unlike the shah, the Saudis have yet to undertake even a pretense of reforms.

Sadly, the worse-case scenario for the United States (massive security breach of its defenses) can happen even if the worst-case scenario for the Saudis (overthrow) does not occur. Whether the sieve-like quality of Saudi security is really important ultimately depends on the ability of the Soviet Union to get classified information and put it to use.

The deliberate structuring of the KGB to collect the maximum amount of technical data in the West and extract the maximum benefit from it has been well documented. This is a certainty: the Soviets use what they collect, and they are willing to collect it anywhere. The so-called "velocity of information" is swift between the scientific and technical directorate of the KGB and the research institutes of the Soviet military.

A compromise of American technical secrets in Saudi Arabia would help the Soviets to build systems they do not now possess, and improve systems they are currently developing. The Soviets already possess the ability to build most of the weapons sufficient to confront the U.S. But if the AWACS or F-15 (along, recall, with their subsystems) are compromised to the Soviets, the U.S.S.R. will focus not on duplicating the American components but on defeating them electronically. As in simple intelligence collection, electronic countermeasures have a much higher prospect of success when you have a known, defined target in mind.

Even if the Soviets acquire only a few pertinent facts about a radar or communications device, they will be much aided in their ability to build an effective ECM against it. Soviet science is uneven, but it is renowned for its mastery of electronic theory and the associated mathematics. The Soviets are fully capable of building devices to impair and deceive any system in the U.S. arsenal—given sufficient data.

Seemingly innocuous information about signal strength, bandwidth, pulse frequency, receiver sensitivity, selectivity, antenna characteristics and a thousand other minutiae is enough to focus research towards completion of an effective ECM. Physical examination of components provides information not only about how they work, but how they were made. Inspection of components functioning as a system allows one to discover systemic weakpoints. And there is no telling what could be done with some particular knowledge of a computer system, its operating software, its access routines and codes.

Advanced systems such as AWACS crucial to America's defense are acquired only at a great cost; research and development expenses are astronomical, because what is being designed is not merely a component, but a never-before assembled technology for building it.

Conversely, ECM research is very cost-efficient. With the right investment, you can render obsolete, even useless, billions of dollars worth of your enemy's weapons (and its investment in research and development). One acquires much of the enemy's technology without paying nearly as much for it in money or time. Moreover, the analysis which produces the ECM elucidates where the enemy is heading for the next generation of weapons. It also illuminates, as noted earlier, what he thinks is important, and how he detects and measures and classifies it.

It.

In the largest sense, these realities dictate a much more conservative and vigilant American policy for the protection of our technical prowess. In the immediate sense, they suggest that the United States should revise its plans to put a gamut of first line weapons in the hands of a nation—Saudi Arabia—patently incapable of protecting them.

If the United States wants to signal that it is unwilling to give unintentional assistance to Soviet military planners, it should withdraw the offer of the AWACS to Saudi Arabia. Reevaluation of the 1978 F-15 sale would not be unjustified either. Given the centrality of the AWACS to the security of the West, a refusal by the administration to cancel the sale should persuade the Congress that it must protect our interests, and vote resolutions of disapproval.

(This article was sent to the Department of Defense on Wednesday, Aug. 26, for its review and comment. Its reply, received Friday afternoon, follows.)

REVIEW AND COMMENT BY THE DEPARTMENT OF DEFENSE

Department of Defense officials were given 24 hours to review this article prior to publication. They have told the editors of The Post that in this brief period they were able to identify at least 25 factual errors and numerous tendentious and unsubstantiated assertions. Much of the article, by Aaron Rosenbaum and Emanuel Winston, is, in their view, anti-Saudi polemic but, for the rest, testimony by the secretaries of state and defense before Congress will set the record straight and make a convincing case that the sale is in the interests of our country, the Western Alliance and stability in the Middle East. Several of the most glaring factual errors include:

Article: The E-3As destined for Saudi Arabia will in fact be "Block 30/35" versions, the most advanced model of the AWACS now planned, and superior to those sold to NATO (the Block 25 model).

DoD: Saudi will receive a degraded Block 10 AWACS, not Block 30/35. Block 30/35 models have not even been funded by the U.S. at this point. Consequently, the Saudi AWACS will not be the most advanced model of the AWACS now planned. Saudi AWACS will be inferior to the NATO AWACS which will be the Block 15 model

Article: The administration has suggested that it will delete certain advanced subsystems on the planes destined for Saudi Arabia. But there is evidence and precedent which indicate that when the planes are actually delivered, most once-deleted systems will be on board.

DoD: Evidence and precedent indicate that these subsystems will not be transferred.

Article: The AN/APY-1 radar, which on the Block 30/35 aircraft will be redesignated AN/APY-2 because of its added ability to track ships under way or at anchor. This radar has lookdown capacity, meaning it can separate the images of aircraft from the radar echoes of the ground or the sea. The AN/APY-2 can see targets over the horizon and by virtue of its carefully shaped radar beam is difficult to detect and iam.

beam, is difficult to detect and jam.

DoD: AN/APY-1 radar is on the "core" aircraft, not Block 30/35. It is mid-sixties technology—both radars have look down capability. Neither can see ground targets. Neither can see targets over the horizon. Neither has a shaped radar beam that is difficult to detect—it is easily detected due to power emitted.

Article: The AN/APX-103 uses a secure data communications system called TAD'L-C, which is integrated into the disc-shaped radome mounted above the fuselage.

[Editor's note: The article language differs slightly from the DoD review copy.] DoD: There is no relationship between the

AN/APX-103 and TADIL-C.

Article: In addition to identifying friends and adversaries, the AN/APX-103 simultaneously allows the AWACS to maintain air traffic control over a wide area. The Reagan administration has indicated that the Saudis will receive a commercial IFF instead of the AN/APX-103. But this would require a redesign of the radome and antenna suite. It would also require a technically difficult separation of the components and computer programs of the AN/APX-103 from those used in the main radar

DoD: The AN/APX-103 has no connection with air traffic control. Providing a commercial IFF will require no redesign of the radome or antenna suite. Finally, no separation of components/computer program is needed from those used in the main radar.

needed from those used in the main radar.
Article: JTIDS is still under development,

and the administration has stated that the Saudis will not receive this system, basic to NATO's operations. Yet for the five E-3A's to operate in proper coordination with the Saudi Air Force, a system like JTIDS will be necessary.

DoD: JTIDS is not essential to interoperability. We are operating now without it. If necessary, swapping "black boxes" will accommodate.

Article: Given that under current law, any weapon system costing less than \$7 million may be sold abroad without congressional review, there will be little to stop a quiet decision to upgrade the Saudi AWACS with JTIDS.

DoD: Cost of JTIDS modification will be \$3M per aircraft, or \$15M total which would require notification.

Article: After the sale upgrades have also enabled the Saudis to acquire—without congressional review—the more advanced F-15C instead of the F-15As originally requested.

DoD: F-15As were never requested because they were no longer in production at available delivery date.

able delivery date.

Article: The Soviets lag badly behind the U.S., Israel and France in both air-to-air missile design and lookdown radar capability.

DoD: Soviet air-to-air missile technology

is rapidly catching up.

(The authors reviewed this critique and stated that they stand by their analysis. They cited references to support their original contentions. They added that "DoD's derision of the technology and capabilities of the various weapon systems contradicts testimony given over the years by DoD witnesses to the Congress.")

THE AMERICAN CONSUMER

• Mr. GOLDWATER. Mr. President, as is all too often the case, we in the United States suddenly wake up to the fact that we do not and cannot pretend to live in splendid isolation from the rest of the world. Even as the average American goes about his or her daily business, the combined result has startling impacts throughout the far reaches of the globe. By consuming or creating the vast amount of worldly goods that we do, the influence is felt in many far away places which then take on a heightened importance to the very existence of our society.

In a recent essay, Mr. Frank Pederson examined these impacts and the evolutionary nature of the fundamental changes which have occurred in international relations over the past 40 years.

Mr. President, I submit the essay for printing in the RECORD, for the benefit of my colleagues.

THE AMERICAN INTERNATIONAL MAN AND THE MENACE FROM THE EAST

(By Frederick Pederson)

The global transmigration of people, ideas and good, propelled rapidly in the post World War II era by air transportation, telecommunications, massive media exploitation and compounded technological development, has confronted the nations of the world with the reality of planetary internationalization and all the attendant confusion, turmoil, maladjustment and socio-economic dislocation. The precipitant magnitude of this is a formidable challenge for a single generation. We—all of us—individuals, as well as our political leaders, are muddling along in frustration and irresolution. We say stupid things. We jump to ridiculous conclusions as we seek immediate solutions to complex problems. There will be a dawn someday when equable adjustments and intelligent rationalization will take over, but

that day is not yet visible or even predictable.

In our recent lifetime we have seen once sleepy Arabian villages become petroleum and financial centers, African jungles transformed into housing developments, south sea islands turned into satellite tracking stations and the conversion in midwest American small town coffee shops mutate into forums for emerging profundity on subjects only recently far removed from bucolic discussion or speculation.

America showed early evidence of becoming an ethnic amalgam when the Dutch and the Swedes supplemented the early Britannic settlers with the French and Spaniards on either flank. The blacks joined the assemblage under less than happy circumstances initially and now have become an integral, contributory seement of American society.

contributory segment of American society. The great waves of European immigration, engendered by political unrest, social revolution, oppression, famine, frustration and that compelling motivator of all—the desire to get ahead—created a bastion of enterprise and progress on the North American continent the likes of which are awesome to behold. They all combined to produce the American archtype, an industrious creator of and a prodigious consumer of worldly goods on a colossal scale.

Whether it's petroleum or cocoa beans, coffee or diamonds, manganese or lobsters along with an increasing importation of motor cars, cameras, Scotch whisky, German beer, French perfume, Italian wine and Japanese television sets, there's an American ready to buy it and then eat it, drink it or use it.

The American consumer! This brave and accommodating soul indulges himself or herself to the fullest extent of credit available and with wanton profligacy. He assaults his stomach, ruins his liver, bewilders his nervous system, tests his stamina, endures pressures and works at his job feverishly to earn enough money to accomplish all this devastation, but usually not quite enough. He is even willing to demolish his solvency. What more can anyone ask of man? He may unbalance his country's balance of pay-ments, but he is the darling of all exporters the world over. The American consumer keeps plantations busy, factories humming, pumps pumping, miners digging, ships sailing and weavers weaving on a broad global scale. He is truly the international man. Can the world do without him? Frankly speaking, at the moment—no. The world economy would collapse. He is the epitome of capitalism-both the cause and the effect.

Capitalism is the worldwide system by which people exist and enjoy existing, communist propaganda and doctrine to the contrary, Communism itself is merely primitive capitalism which only provides scarcity. To be sure it minimizes the self-indulgent tendencies of its adherents (sic victims) by producing very little in the way of worldly goods which it is utterly incapable of doing. In the primitive capitalism of communism the only capitalist is the state, and the enormous bureaucracy neither has the energy, nor the incentive nor the imagination to conceive, manufacture and distribute the desirable conveniences of life. This primitive capitalism does not take advantage of the innate capabilities of educated man. It denies him the opportunity of doing his own thingachieving a goal or distinction which, admittedly, would benefit certain individuals above the norm, but in so doing raises the norm and everyone's standard of living. The broader application of capitalism, which the western world fosters in varying degrees, is very evident in America. Our inventive genius and innovative talents have produced everything from the prize in a Cracker-Jack box to the atom bomb, from the banana-split to the transistor, and from a Ferris wheel to supersonic aircraft. Vodka and sables,

curiously aimed at capitalist customers, come from Russia.

The tragic, if distinguished (after all, look at Shakespears, the Parthenon, Leonardo da Vinci and Einstein), history of the world uncomfortably discloses that there is nothing unique about a menace to western civiliza-tion from the east. The Huns and other assorted bellicose tribes spilled out of steppes of Scythia to assist in the destruction of the Roman Empire. The hordes of Genghis Khan and Tamerlane ravaged, burned and sacked everything in their paths and caused medieval Europe to tremble. As recently as 1683 the Ottoman Turks were at the gates of Vienna. The princes of Muscovy and the czars of Russia, as they threw off the Tartar yoke, picked up the same pattern of war and conquest which we see emanating from the east today. The east always has pre-ferred weapons to post-toasties and a bullet to an hors d'ceuvre. Mechanized Cossacks have overrun Czechoslovakia and Hungary and their steel phalanxes supported by armed helicopters and other aircraft have moved into Afghanistan, following in the footsteps of Genghis Khan over seven centuries later. Afghanistan is actually a replay. Shortly after the Bolshevik revolution, the comrades quickly overrun the Muslim khanates of Khiva and Bokhara which were surrounded by Russian Turkestan and had been czarist protectorates. Afghanistan is merely next on the agenda, and the curtain has opened on the drama of Poland.

As a matter of fact, communism is patently not a unique or panacean enchanting economic system. It is a derivation of the age old tribalism of the east; an overlay of beligerant and predatory Tartar or Mongol chieftains on the communal life of the tribe itself, an amalgam of herdsmen, hunters plus a few seed planters and weavers. Today we have the Politburo and its associated warlords operating under the cloak of so-called communism through the medium of euphemistically named "peoples" republics! A few migratory Mongol genes and chromosomes must have found their way into the antecedents of Marx and Engels who rendered gospel service to this modern day tribalism. Lenin's very physiognomy betrays Tartar ancestors. Stalin came out of the Georgian Caucasus mountains. They all are dramatic examples of recidivism.

What is the eventual solution, amelioration or conclusion to all this, short of employing the full services of the U.S. Air Force, Navy, Army and Marines? Such engagement even if victorious, would not necesarily settle all the complex issues. World War II proved it is not possible to completely win a war and then win a peace. The victors always have to cope with what is left.

There is, however, a glimmer of hope in the apparent worldwide reaction to current aberrant moves by fanatics and warmonto the detention of hostages, vasion of sovereign states and to the dis-gusting acts of terrorism. The American consumer is showing signs of sobering up after a sixty year binge which really began after the conclusion of World War I and was intensified immediately after World War II when he was the only privileged person on the globe who had any money. Now Japanese and Germans, who have successfully applied the principles of capitalism, have money. most sobering of all, is the spectre of the Arabians winding up with all the money via virtual economic blackmail. The aggravating energy shortage has brought a stark awakening to the American consumer. Suddenly he cannot have everything he wants when he wants it or even drive wherever he pleases as fast as he prefers. He is now a part of a global collage of inter-dependency.

The irrational fanaticism of Iran and the brutal aggressiveness of imperialist Russia have aroused many nations and peoples throughout the world and, in particular, the

free-wheeling American. We have just experienced a unification of thought and action second only to that precipitated by Pearl Harbor in 1941. A strong, resolute and effective America is the keystone of a normalization which will have to manifest itself to prevent chaos on an unprecedented scale. We also have observed the transformation of China into a nation with an evident intent to join others in collective harmony and security. Hopefully, the present charged atmosphere will start to dissipate itself when the major protagonists conclude the risks are too great, the support too undependable, the logic too fallacious, the gains too illusory. Then it is up to twentieth and twenty-

Then it is up to twentieth and twenty-first century man to disprove the unflattering, even calumnious, assessment of man made by Machiavelli in the turbulent times in which he lived: "The destiny of humanity is a compulsive sequence of events in which the individual participates for no particular reason—and in which he is incapable of living in peace with others. Men move from one thing to the other—they tire of evil, and of good they sicken."

Let us hope Machiavelli was wrong.

CLEAN AIR ACT

• Mr. STAFFORD. Mr. President, I would like to insert in the Record at this point a memorandum concerning the Clean Air Act. The author is Mr. Roger Strelow, a lawyer and spokesman for the business community, including the Business Roundtable. Mr. Strelow recently represented the business community on a McNeil-Lehrer news program, reporting on the Clean Air Act reauthorization. At one time, he was an Assistant Administrator of the Environmental Protection Agency, charged with administering the Clean Air Act.

I ask that the memorandum be reprinted for two reasons. First, it provides an analysis of what at least one well-informed person believes to be the administration position on amending the Clean Air Act. Second, and more importantly, it illustrates an approach which could doom efforts to finish the Clean Air Act in this Congress or to achieve a sound and reasonable result.

Those outside the Congress interested in the Clean Air Act can choose the path they wish to travel. I hope they approach the reauthorization process in an open, honest, and straight-forward manner.

On page 5 of this memorandum there is a statement that an administration draft leaked to Representative Waxman in June contained—and I quote—"a number of inconspicuous, seemingly technical provisions which would have effectively gutted many of the requirements applicable to class I areas. * * *" The author then notes that later in the drafting process "technical details could again prove to be critical."

Later in the memo, the author describes the Business Roundtable position on acid rain as a "preemptive strike." Another position is described as "buying peace."

Mr. President, I can say with a conviction born of 20-years experience in the Congress that if those involved in this debate choose to tred a path littered with "technical" details and "preemptive strikes," their journey may be much, much longer than they bargained for. They may also find, at journey's end.

that it was both a trip and a destination they would have preferred to avoid.

The memorandum follows:

MEMORANDUM

To: Van Langley From: Roger Strelow

Administrator's August 5, 1981, Re: EPA

Press Release

The statement of principles contained in Administrator Gorsuch's August 5, 1981, press release is too sketchy to draw defini-tive conclusions regarding the Administration's proposal. The press conference did not provide much elucidation. (See Al Fry's August 5 memo.) In broad terms, however, the position announced August 5 is compatible with virtually all of the Roundtable recommendations, reflecting a substantially more moderate approach than the bill leaked to Congressman Waxman in June.

Some initial reactions to the press release

are summarized below:

Administration's Position: The Nation should continue its steady progress towards

cleaner air. Comment: Environmental groups are unlikely to quarrel with this statement of goals, but will argue that the Administration's proposals fail to meet its own test, since they will allow substantially higher emissions than would be permitted by the present version of the Act. In support of this contention, these groups will be able to point to credible evidence which suggests that elimination of the percentage reduction require-ment, coupled with other proposed changes in the law, will increase emissions by 3.0 to 5.0 million tons per year, compared to pro-

jected levels. It is important for industry to be in a position to refute this claim, to the extent it is excessive. The work ICF is doing for Conoco could prove critical in this regard. In addition, we are reviewing the studies EPA prepared in connection with the 1979 NSPS requirements as a further source of informa-

tion on this issue.

2. Administration's Position: Statutes and regulations should be reasonable and should be related to the economic and physical realities of the particular areas involved.

Comment: The reference to "economic and physical realities" appears to be patterned after the Roundtable's recommendations regarding cost effectiveness, economic

values and attainability.

Phrased so broadly, it is difficult to quarrel with the Administration's statement of principles; the trick will be to convert this statement into acceptable and effective legislative language. We might want to begin drafting soon, based on our legislative specifications (see especially § 317), so as to be in a position to provide language to the Committee staffs when they begin drafting a bill.

3. Administration's Position: The basic concept of the health-based primary standards in the Clean Air Act should be maintained. Cost benefit analysis should not be included as statutory criteria in setting these standards, but standards should be based on sound scientific data demonstrating where air quality represents real health

Reaction: The Roundtable can fairly take credit for the emphasis on "real health risks" and the use of "sound scientific data. The decision not to provide for cost-benefit analysis in promulgating the standards appears to reflect a political judgment by the Administration that a moderate position on standard setting will significantly increase

the prospects for approval of other major reforms. If translated into appropriate legislative language, the Administration's proposal probably would permit EPA to relax the present standards substantially, even if cost-benefit analysis cannot be explicitly taken into account.

4. Administration's Position: Secondary standards should also continue to be set at

the Federal level.

Comment: The Administration's ment appears to rule out the possibility of states adopting more lenient standards, and thus conflicts with the recommendation adopted by the Roundtable. As a practical matter, however, Administrator Gorsuch is likely to set secondary standards at or near the level of the primary standard whenever warranted, in which case an effort to reverse to the Administration's position might have little practical effect. Further, the brief statement in the press release would not appear to preclude adoption of separate re-gional standards for each region of the country, or the use of incremental cost ben-efit analysis in setting standards (a major element of the Roundtable's recommenda-

5. Administration's Position: The current program for the prevention of significant air quality deterioration should be maintained for the protection of park and wilderness areas. In other areas, protection should be based on uniform technology requirements

for pollution control.

Comment: The Administration's proposal to eliminate class II and class III increments and adopt uniform technology requirements (presumably based on NSPS requirements) is identical to that adopted by the Roundtable and virtually every other major industry group. (Note, however, that there is no specific mention of revising the class I increments.)

On PSD, like several other administration proposals (including proposals regarding hazardous pollutants an nonattainment areas) it will be essential to review a more proposals hazardous detailed statement of the Administration's position before any definitive conclusions can be drawn. In broad, outline form, the Administration's statement of principals regarding the PSD issue is compatible with the approach taken in the draft bill leaked in June. However, the June draft contained a number of inconspicuous, seemingly technical provisions which would have effectively gutted many of the requirements applicable to class I areas (including the class I annual increment, which industry generally has not challenged). Even if the Administration is now committed to a more moderate approach, technical details again could prove to be critical. (For example, while the Administration's press release is silent on the issue of visibility, a carefully targeted technical amendment to current provisions regarding class I areas, including a more realistic statistical approach to the short-term increments such as Terry Thoem has urged, could cure many of the Roundtable's objections to the current version of the Act.)

6. Administration's Position: States should be accorded a full partnership in implementing the Nation's standards. The Federal government will monitor state achieveof the national health and welfare standards.

Comment: Subject to appropriate limitations, the concept of significantly restricting EPA's role in reviewing state decisions has wide-spread support. (ERT's study for the Roundtable should add to the momentum for reform, since it provides impressive documentation of the extent to which the current system of overlapping review causes unnecessary expense and delay.)

As currently formulated, however, the Administration's proposal may hide a bombshell. One of the most controversial aspects of the June draft bill was the proposal to eliminate most of EPA's current review func-

tions, by eliminating entirely EPA's review of individual permit decisions (even for major new sources) and cutting back sharply on EPA's review of S P's. (By contrast, the Roundtable's legislative specifications gave EPA 90 days to veto state permitting decisions for major new sources and continued to provide for meaningful review of SIPs.) In light of intense reaction to the leaked bill, the statement in the press release that the federal government "will monitor state achievement of national ... standards," with-cut further elaboration, suggests that the Administration may intend to adhere to its original, controversial approach. I would note that it is my distinct impression that much of industry would not favor excessive delegation and decentralization to the states since this could allow discrimination within industry by region and/or industry category.
7. Administration's Position: A more effec-

tive hazardous pollutant program should be established to allow, for the first time, efficient control of the hazardous health hazards

posed by airborne toxic pollutants.

Comment: It is not clear whether this language is a smokescreen, or reflects a decision to take a tough stance. To the extent it indicates the latter, it could prove to be a major point of tension between industry and the Administration. We should not oppose a truly more effective and aggressive toxic pollutant control program under § 112, but we must insist upon appropriate procedural and scientific (e.g., peer review) protections. You may recall that DuPont's representative made this basic point at the CAAF meeting held in BRT's conference room about a month ago.

8. Administration's Position: Research on acid deposition should be accelerated.

Comments: This statement is unobjection-

As we discussed when we were preparing the paper for Vice President Bush, the prospects for this proposal being accepted (in lieu of immediate imposition of control measures) would be enhanced substantially if we are able to develop a very detailed pro-posal for how the current research program should be accelerated, pointing to very specific areas in which research should be accelerated, and explaining why it would be reasonable and appropriate for Congress to defer action until after this research has been completed. The Administration may not be able to avoid further action on acid rain— in the legislation and/or in the treaty with Canada—if it insists on promoting a significantly relaxed NSPS for coal-fired powerplants (see #11, infra), which could lead to significant SO₂ increases. BRT's "preemptive strike" position may well become a necessary compromise in any event.

9. Administration's Position: Deadlines for achieving primary air quality standards should be adjusted to reflect realities in particular areas.

Comment: The proposal for selective extensions of attainment deadlines is identical to the recommendation offered by the Roundtable, and represents a major retreat from the position proposed in the draft bill leaked to Congressman Waxman.

From the terse description offered in the press release, it is unclear whether the Administration intends to modify its position with regard to other controversial aspects of the nonattainment program (e.g., elimina-tion of the offset requirement and the construction ban).

10. Administration's Position: As sugeested by the National Commission on Air Quality, automobile standards should be adjusted to more reasonable levels. The limit for nitrogen oxide could be raised to a level slightly higher than that suggested by the Commission without affecting air quality goals.

Comments: According to the story in Wednesday's Wall Street Journal, the Admin-

¹ Indeed, on several issues (e.g., the limitation of primary standards to "real health risks," the requirement for use of "sound scientific data" and the proposal for selective extensions of compliance deadlines) the concepts in the Administration Bill appear to be borrowed directly from the Roundtable's paper.

istration intends to determine compliance with the relaxed limits based upon companywide averages. This represents a substantial further concession to the automobile industry, beyond that already reflected in the press release.

11. Administration's Position: Pollution control standards for new coal-fired plants should be based on uniform emissions

standards.

Comments: This proposal clearly requires uniform, fixed emission limits, in lieu of the current mandatory scrubber requirements. As such, it is likely to be one of the more controversial aspects of the Administration's current proposal. The environmental groups will insist—with some credibility—that the effect of this proposal will be to increase emissions of SO, by several million tons per year, thus negating the Administration's promise of "steady progress towards cleaner air." Further, representatives from states with large reserves of high sulpropose this provision.

As a result, the pressure on the Administration to find a compromise position is likely to be intense. In this context, it may be important to note that the Administration was careful not to commit itself to any specific emission limit. (The utility industry had pushed for an emission limit of 1.2 lbs SO₂/MMBTU, consistent with both the 1971 and 1978 NSPS requirements.) This leaves open the possibility that the Administration ultimately will accept a lower limit (e.g., 0.8 lbs SO₂/MMBTU or perhaps even some form of sliding scale), as a way of

buying peace.

THE FEDERAL BUDGET

 Mr. ARMSTRONG. Mr. President, within the next few days, the Senate will be asked to increase the national debt to more than \$1 trillion. Based on precedent, it probably will, in order to keep the Government going.

This mind boggling debt, and the Government spending policies which have caused it are exactly why interest rates are soaring, bond prices are crashing, the stock market is sagging, the Nation's economic recovery is crippled and millions of workers are losing their jobs.

There is now little doubt that excessive Federal spending is, in fact, the main cause of the Nation's inflation/credit crunch. Almost no one now disputes the once-controversial notion that a balanced Federal budget is essential to getting the economy back on track.

President Reagan is pledged to do so. And no one doubts the sincerity of his

intentions.

What is in doubt is whether Congress, in the wake of making dramatic budget cuts this summer, will go along with Mr. Reagan's plan for further spending cuts needed to match recent tax reductions.

While there may be no such thing as a painless budget cut at this point, one way Congress can help restrain Federal spending is by passing an amendment I intend to offer when Congress considers the debt ceiling increase.

The amendment makes one simple but significant change in current policy. Introduced as S. 384, the Federal Expenditure Control Reform Act, the amendment requires congressional veto rather than congressional approval of any rescission proposed by the President. As before, the President would be required to notify

Congress of his intent to rescind or withhold appropriated budget authority. But to halt such action, Congress would within 45 days have to pass a resolution disapproving it.

The Senate Budget Committee conservatively estimates that some \$5 billion could be saved each fiscal year by adopting this approach. Further savings, I be-

lieve, are possible.

Our President presides over the largest budget in the world, an estimated \$642 billion in this fiscal year. Yet he has less management control over that budget than almost any other Chief Executive. The Governors of virtually all of our 50 States have the power to block wasteful, duplicative and unnecessary spending, but Congress has denied this essential management prerogative to our President.

Under present law, if the President discovers that funds appropriated by Congress for a particular purpose are no longer required, or are more than required to achieve that purpose, he cannot prevent the expenditure of the excess funds without first obtaining explicit permission from Congress to do so.

The Congressional Budget and Impoundment Control Act of 1974 protects the constitutional prerogative of Congress to have the first and the last word about the expenditure of public funds, but it does so in a needlessly wasteful and

extravagant way.

The trouble with the Impoundment Control Act is that the President's efforts to restrain wasteful spending can be thwarted simply by congressional inaction. If the President determines that funds appropriated for a particular purpose need not or should not be spent, he must inform Congress of his intention to rescind them. But if both Houses of Congress do not pass resolutions approving the rescission within 45 days of the President's announcement, then the funds must be released.

Unfortunately, all kinds of factors other than the merits of a proposed rescission can block action by both Houses of Congress before the 45-day period expires. Since 1974, Congress has approved fewer than 15 percent of the rescissions proposed by Presidents Nixon, Ford, and Carter. In most cases, the rescission request never even reached a vote.

Fiscal year 1980 provides an all too typical case in point. In that year, a year of near record budget deficts and double digit inflation, President Carter sent to Congress rescission requests totaling \$1.6 billion. Congress rejected by inaction \$1.1 billion of these rescission requests. Thus, out of a budget of \$579.6 billion, a scant \$500 million, eight one hundredths of 1 percent of the total, was saved through the decision of the President that the same results could be achieved with fewer dollars through better management.

Presidents used to have a very potent power to prevent wasteful spending, the power of impoundment. The history of Presidential impoundments shows clearly that this power was used in virtually every instance to achieve sound management objectives. The most common reason for impoundments was because changed circumstances rendered a particular expenditure unnecessary, as when President Jefferson blocked \$50,000 for gunboats on the Mississippi after the Louisiana Purchase had removed the threat the gunboats were supposed to guard against. Another frequent reason was to prevent waste, as when President Van Buren blocked payment of a duplicate pension to a military widow, and President Truman refused to spend money to build Veterans' Administration hospitals until a study had been made to determine the geographical need for them.

But there were instances where the impoundment power was abused. President Lincoln, for instance, impounded funds for water projects in order to punish certain Illinois Congressmen who had opposed his administration on other pol-

icy matters.

The use by some Presidents of the impoundment power to punish recalcitrant legislators, or to alter policies enacted by Congress quickly irritated Congress, and raised a serious constitutional question as well. The Constitution makes it clear that Congress has the power to determine how public money should be spent. But if the President impounded funds appropriated by Congress, Congress either would have to pass the appropriation again-in which case it would be subject to a second impoundment, or a veto—or take the President to court. This was, especially from the congressional point of view, most unsatisfactory.

The impoundment controversy came to a head in 1972 when President Nixon attempted to force Congress to adopt a block grant housing approach by imposing a moratorium on funding of the housing programs authorized by Congress. The President won the battle—an appeals court ruled against Congress' lawsuit—but Congress, by enacting the Budget and Impoundment Control Act of 1974, won the war.

Most Americans would agree that some protection had to be found against the sporadic Presidential abuses of the impoundment power. But the congressional "cure" has proven far worse than the disease. Clearly, some middle ground must be found.

Enter the rescission amendment, allowing flexibility in achieving needed savings without returning to the old abuses.

This basic change, to congressional veto from congressional approval, would alter the climate for Presidential action by requiring a positive, considered action by Congress in order to block proposed rescissions instead of killing needed rescissions by inaction—without even having a vote. The President would be allowed the managerial flexibility required for efficient Government, but Congress would retain its constitutional prerogative to control the public pursestrings.

ADDRESS BY SENATOR DOLE ON ISSUES AFFECTING DISABLED AMERICANS

Mr. MURKOWSKI. Mr. President, last evening, my distinguished colleague

from Kansas, Mr. Dole, delivered a very timely speech on issues affecting disabled Americans to a group called "Mainstream," which is sponsoring a 2-day symposium on disabled people in the workplace. As a member of the Senate Veterans' Affairs Committee, I am particularly aware of the necessity for assistance in employment opportunities for disabled veterans. I submit this speech for the Record, so that my other colleagues in the Senate may have the opportunity to read it.

The speech follows:

JOBS, JOBS, AND MORE JOBS-FOR THE DISABLED

It's an interesting coincidence that tonight's seminar, which focuses on employing disabled Americans, should take place during the week of Labor Day—two days after President Reagan outlined the economic policies of his administration as "Jobs, Jobs, and More Jobs."

Well, we all agree with that, and we look to the President and Congress to make certain that the millions of new jobs we believe his economic program will create in the next few years will go to people regardless of whether they walk to work or ride in a wheelchair—whether or not they can hear the sounds of an office around them—whether they stand tall in physical posture or personal spirit.

AN IMPORTANT DISTINCTION

The year 1981 is the year of the disabled person. It is not the year of the handicapped. The distinction is important. For a disabled person is handicapped only so long as he or she is prevented from achieving a goal, earning a living, realizing a dream. Throughout my life, I have known persons who might have been physically disabled, but who attained great things of the mind or the spirit. I have known in my own life the call to self-discovery that comes with a physical disability—and I learned many years ago that sympathy is no substitute for a chance to develop one's skills.

There are thirty-five million other Americans who have learned or will learn that same lesson. They represent a vast and largely untapped human resource. They ask for nothing but a chance to share their talents. And they demonstrate every day of their lives the meaning of what Tennyson meant when he wrote "To strive, to seek, to find, and not to yield."

The last decade has seen a lot of striving, seeking and finding. The only yielding done was by the barriers—architectual, economic or psychological—that have traditionally blocked the way to personal independence and employment of the disabled. Physical mobility was increased. Now the same thing must happen with economic mobility.

FISCAL AUSTERITY-AND CONTINUING NEED

I hardly need remind anyone in this room that we live in a time of fiscal austerity. The Federal budget is under seige to some hard economic realities. The Federal Government itself is trying to restore the historic concept of federalism before that foundation of American self-rule is smothered beneath Washington's deficits, Washington's rules, Washington's regulations and Washington's smug conviction that it knows best.

The demands on our dollars have never been greater. But that does not mean any diminution in the needs of the disabled. What is just a time of heavy spending remains just in a time of belt-tightening. Fortunately, I can report that programs for the disabled have, by and large, escaped the budgetary ax. I think the administration is sensitive to the needs of disabled Americans. I see no desire—and no possibility—for a retreat for the commitment of recent years,

But I do see a greater reliance upon the private sector as a partner in meeting the economic needs of the disabled. To be blunt, business will be invited to pick up some of the slack that Government alone can no longer handle. This seems a fair price for the largest tax cut in American history, much of it specifically aimed at the business community. Along with rewards goes responsibility.

THE PRIVATE RESPONSIBILITY

And I've seen already encouraging evidence that the private sector is anxious to meet that responsibility. Not long ago, I had chance to speak with a Foundation Council sponsoring the projects with industry program. PWI is the best evidence I know to support the theory that a small investment in the disabled can lead to a substantial payoff, both financial and social. Ninety PWI programs across the country put 5,500 people to work. Taxes on their million wages alone will more than double the entire public expenditure on the program. PWI works because it stresses capabilities-not the disabilities-of the individuals it employs. It works because it advocates competition as well as compassion. It instills independence: it disclaims impairment. It gives people a reason to hope, as well as a paycheck.

In the course of its work, PWI has educated a lot of businessmen as well. Employers have discovered that it takes less accommodation than they thought to hire handicapped workers. They have removed architectural barriers. They have launched PWI training programs. They have hired—and they have promoted—qualified disabled job applications.

GIVE A MAN A JOB

This is a country whose people have always believed in work. Give a man a job, and you give him a stake in society. You give him a reason to share in the great central dream of this Republic, which was founded, after all, as a vast, ongoing experiment in social mobility. Give a man a job, and you give him reason to hope for better days ahead—for himself, for his family, for generations yet unborn. Give a man a job, and it doesn't make any difference the color of his skin, the place of his birth, the nature of his faith.

PWI extends that belief and that tradition to the largest minority group of all—the disabled. By itself, it is only a beginning. But it can and ought to serve as an example to both Government and business of what can be done when determined individuals set about to find innovative ways of employing disabled workers. Tax incentives to employers can help further such programs. I'd like to see my five year old amendment to provide deductions to those who remove architectural or transportation barriers increased and made permanent. We have managed to amend the Social Security Act, to provide fresh incentives for the disabled to return to work. And we continue the fight for adequate funding for a whole range of education, rehabilitation and employment efforts.

COMMITMENTS THAT CANNOT BE TRIMMED

Budgets in Washington may face trimming. But our commitment to economic justice for the disabled can never be cut back. This Nation has no intention of muffling the disabled in a cloak of fiscal austerity. Rather, I think we are already searching for better ways to tap their human resources. In that search, private businesses and concerned individuals must be willing to assume partnership status with Government at all levels. Economic common sense suggests it. Conscience demands it.

We have broken down some barriers. Now we must raise up the disabled to their rightful place in society. We must measure our progress in economic as well as medical terms . . . and hasten the day when "jobs, jobs and

more jobs" applies to every American, regardless of physical or emotional handicaps.

We've come a long way already. We have a long way to go. But it's good to know that the road ahead will be traveled in the company of people like yourselves.

NRTA-AARP LEGISLATIVE COUN-CIL'S ENERGY POLICY STATE-MENT

 Mr. HEINZ. Mr. President, energy costs have soared precipitously since the oil embargo in late 1973.

Home heating fuel oil No. 2 increased by an astonishing 411.2 percent from October 1973 to June 1981. Residential natural gas rose by 224.7 percent and electricity by 134.5 percent during this same period.

On the other hand, the Consumer Price Index—the Nation's yardstick for measuring inflation—increased 98.6 percent from October 1973 to June 1981.

All Americans have been affected in one form or another by rising energy prices in the past 8 years. Older Americans have been especially victimized because they frequently are struggling on limited incomes.

Many elderly persons simply do not have a sufficient margin between income and outgo to absorb escalating energy price hikes.

Large numbers are confronted with virtually impossible daily decisions. Do they use their limited resources to heat or to eat? Typically, both needs suffer—and in some cases irreparably.

In addition, many older Americans find it difficult to adjust to reduced room temperatures in the winter and higher temperatures in the summer because they do not adapt as readily as younger people to these extremes.

Moreover, elderly persons oftentimes live in older houses that were constructed 30 or 40 years or more—when energy prices were substantially lower and insulation was not needed to the same degree that it is today.

Energy is clearly a high priority issue for senior citizens. It affects their daily lives and is intensifying the cost squeeze that grips millions of aged persons today.

The National Retired Teachers Association and the American Association of Retired Persons—the Nation's largest older Americans membership organizations—recognize the importance of energy for the elderly.

The 1981 legislative council meeting devoted considerable attention to the impact of rising energy costs for the aged.

The council members developed a thoughtful statement which should be of interest to all Members of the Congress.

Mr. President, I submit for the RECORD the NRTA-AARP energy policy statement.

1981 FEDERAL AND STATE LEGISLATIVE POLICY THE CURRENT SITUATION

More than seven years have passed since the Arab oil-producing nations embargoed the shipments of oil and, more importantly, put an end to the era of cheap energy suppiles. The price of OPEC oil has increased from \$1.77 a barrel to well over \$30, more than a 2,000 percent increase, with half of it occurring in 1979. Other non-OPEC producers have followed suit. The result has been to depress the economies of the non-oil-exporting countries and contribute to the inflation afflicting them. It has been estimated that, in the U.S., the annual rate of growth in real GNP has been cut by nearly one percent as a result of the energy price increases. Late in 1980 the OPEC producers announced further price increases averaging about 10 percent, thus promising more upward pressure on price levels and downward pressure on output.

Despite all this, the United States has still not developed an energy policy appropriate to its needs. These needs are: (1) to protect the nation from a repetition of the economic dislocations which might be created under future interruptions, and (2) to provide protection from the inflation consequences of the even higher price levels that the OPEC cartel may be disposed to dictate. The nation has failed to correctly assess the strength of the cartel; it has failed to correctly assess the prospects for oil supplies both here and abroad; and it has failed to assess properly the prospects of developing alternatives to imported oil. Because of these failures, the nation is still importing almost half of its crude oil needs. The price of these supplies is not negotiable. In a nation so dependent on energy as the U.S., the excessive oil price have been inflationary and very damaging to the economy. Furthermore, the failure to resolve energy price and supply issues, may, in the future, further reduce the resources (GNP) the country would otherwise have available to meet its obligations with respect to the expanding elderly popu-

DECONTROL OF OIL PRICES

With respect to the decontrol of domestically produced oil and natural gas prices, the Associations have no choice but to accept and support this action even though it will yield much higher prices for domestically produced fuel. That will mean, at least in the short term, the nation's having to accept and accommodate the inflationary effect these higher price levels will have. The only policy option available that could restrain the degree of inflationary consequences would be the reimposition of price controls for domestically produced oil and natural gas. However, even if this were a legislatively realistic option, any relief from such infla tionary pressures would be short-term and would come very probably at the expense of increasing the nation's development and expansion of existing and new domestic energy sources. That would tend to leave the na tion at least as dependent as it is today (if not more so) on OPEC-priced foreign fuel and as vulnerable as ever to future oil embargoes, the economic consequences of carteldictated price levels, and economic and political blackmail. Moreover, since controls are very likely to discourage increased exploration, development and production of domestic fossil fuels as well as discourage the introduction of new energy sources, the antiinflationary gains made in the short term from such a policy would be more than off-set by its long term inflationary conse-

THE "WINDFALL PROFITS" TAX AND INCENTIVES FOR DEVELOPING NEW ENERGY RESOURCES

Now that the scheduled decontrol of prices charged for domestically produced oil and natural gas is a fact that clearly must be accepted if the nation is to decrease its dependence on foreign source fuels, supporting policies must be pursued to alleviate some of the consequences of that policy choice. First, because decontrol of prices for oil and gas will yield very large and unexpected "windfall" profits to domestic oil and gas producers—profits that bear no relationship whatsoever to the cost of exploring for, devel-

oping and producing the oil that yields those profits (plus a reasonable rate of return on the investment)—it is appropriate that at least part of that windfall gain be captured by society through the tax mechanism. The "windfall profits" tax enacted in 1980 resembles an excise tax. The alternative would have been an "excess profits" tax. At this juncture, the Associations would have to oppose efforts to eliminate the windfall profits tax, unless an excess profits tax were substituted for it. The windfall profits tax is the source of the funding for the Low Income Energy Assistance Program which provides assistance to lower income individuals and families to help them meet the rising cost of fuel and, if it is phased out, another source of revenue would have to be provided (see income policy for further discussion).

It is argued by some that the domestic oil and natural gas industry ought to be allowed to keep all of the profits that decontrol yields in order to provide incentives to explore for, develop and produce more domestic energy. However, stifficient incentives still exist even with the modest windfall tax. The significant amount of profits that decontrol will yield coupled with price support programs (funded from some of the revenue that accrues from the windfall profits tax) should provide private energy producers with sufficient incentives to develop both conventional and new source; of domestic energy, like shale oil.

source; of domestic energy, like shale oil.

One domestic energy source with potential for development is coal. Unlike oil, has large, untapped reserves of coal, enough for many hundreds of years at any likely production rate. Also, unlike oil, the U.S. is an exporter of coal and could be a larger exporter, if port facilities were made adequate. Unfortunately, both the production and consumption of coal produce environmental problems. Also, coal is primarily used by electric utilities, and can only be converted into oil products at great cost. Private industry, encouraged, and assisted by the government, should make a concerted effort to overcome the problems associated with the production and utilization of this valuable natural resource. Similar efforts should also be made with respect to the use of renewable energy sources such as solar, biomass, and wind power.

Given the inflationary pressures that will be generated, especially in the near term, as a result of the decontrol of domestic energy prices, it is obvious that, if the aggregate in-flation rate is to be lowered, then actions taken to deal with the other factors contributing to that aggregate rate must be effective and strong enough to more than offset the inflation-promoting effects of energy price increases. While a consequence of this will probably be a lowering of living standards for the short term (the living standard of the elderly is being lowered in any event by the inflation), there at least will be better prospects for rebuilding those living standards back up once the nation's economic house is in better order. If, however, all groups in the economy attempt to protect their current living standards at all costs, and ignore the inflation spiral and the energy situation, some groups will be successful in the short term those with sufficient "market power" others, like the elderly, will not. In the long run, all groups will lose in terms of living standards as the nation's economy weakens.

DEFENSE BUDGET

• Mr. GOLDWATER. Mr. President, in recent weeks, there has been much talk about the size of the Defense Department budget. In the face of a continuing national budget deficit, we must certainly take a look at any and all areas where economies can be effected. If this country is to be able to reduce the budget and

still maintain the military strength it needs to face its worldwide challenges, then Congress must do its share in the authorizing and appropriating process. Recently, the Association of the U.S. Army issued one of its periodic reports concerning the Defense Department procurement process and it succinctly describes the problems and Congress role in that problem.

I ask that this article be entered in the RECORD for the benefit of my colleagues.

The article follows:

A MAJOR MILITARY PROBLEM—How To GET BETTER EQUIPMENT FASTER AND CHEAPER

For the taxpaying public, military procurement has a bad reputation for costing too much, taking too long to deliver and sometimes producing equipment plagued by problems. The blame for this poor public image can rarely be put on a single individual or agency but must be shared by the White House, Congress, the Pentagon and U.S. Industry.

Because the services know they will have to keep a generation of weapons in their inventories for a long time, they tend to press forward into fields of rapidly changing technology in the hope that the final product will represent the ultimate state of the art. Often, the art itself is not properly formed and the product is troublesome. Budgeteers at all levels tend to make overly optimistic estimates of costs that may very well result in that military boogeyman "cost overrun." As problems have arisen, Congress has injected itself more and more deeply into the acquisition process, often tending to confuse and delay it even further. Unquestionably, there has been a degree of rivalry among and within the services that has sometimes made it difficult to decide which developments should

None of this is big news. The problem has existed for years but now the Reagan Administration says it is going to do something about it. In a recent memorandum to the services and the responsible Department of Defense staff, Secretary of Defense Caspar W. Weinberger announced a program to streamline the acquisition process, to reduce costs and to shorten the time between conception and delivery. The memo calls on the services to do many things, such as improving longrange planning, using evolutionary alternatives that don't press the state of the art too far and budgeting realistically. Perhaps most importantly it calls for production to be carried out at higher, more economical rates and to be planned on a multi-year basts.

This is a laudable course, but it will take the long-term cooperation of all the parties involved to make it work. Only Congress, for example, has the authority to set efficient production rates and to fund multi-year procurement plans. Firm adherence to Secretary Weinberger's plan will go a long way toward improving the efficiency and the image of the military procurement program.

BUDGET ACT WAIVER

Mr. BAKER. Mr. President, I ask the Chair to lay before the Senate Calendar Order No. 249, Senate Resolution 190, a budget waiver.

Without objection, the resolution (S. Res. 190) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 859, was considered and agreed to, as follows:

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are

waived with respect to the consideration of S. 859. Such waiver is necessary because the bill, as reported, would reallocate receipts after January 1, 1981, from Federal leases on acquired lands used for military or naval purposes.

AMENDMENT OF MINERAL LEASING T.AWS

Mr. BAKER. Mr. President, having adopted a budget waiver in respect to Calendar Order No. 225, I ask the Chair to lay before the Senate that item, Calendar Order No. 225 on today's calendar.

The PRESIDING OFFICER. The bill

will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 859) to amend the mineral leasing laws of the United States to provide for uniform treatment of certain receipts under such laws, and for other purposes.

The Senate proceeded to consider the bill.

Mr. BUMPERS. Mr. President, on January 23 of this year, the Bureau of Land Management announced a recordbreaking oil and gas lease sale totaling more than \$43 million on approximately 24,000 acres within the Fort Chaffee Military Reservation in Arkansas. Since the lands involved in this sale were originally acquired by the Federal Government for use as a military reservation and so were not covered by one of the many statutes governing the disposition of proceeds from oil and gas leases, the State of Arkansas, the school districts near Fort Chaffee, and other local governments will not receive any portion of the bonuses paid by oil companies for the leases. If, however, this sale had been conducted on public domain lands or on other types of acquired lands, such as national forests or almost any other type of Federal land, the State and local governments would have shared in the proceeds of the sale.

Mr. President, there is no logical reason for the proceeds from lease sales on military reservations on acquired lands to be treated differently from sales on public domain lands and other types of

acquired lands.

The authority of the Secretary of the Interior to administer the grants of mineral rights on public domain lands has been recognized by Congress since the middle of the last century, although it was not until 1920 that Congress authorized the present system of leasing such lands for oil and gas exploration and production by the Secretary.

However, mineral leasing was not permitted on lands acquired for military reservations until 1976, when the Congress passed the Federal Coal Mineral Leasing Amendments Act of 1975 (30

U.S.C. 351 et seq.).

Mr. President, according to 30 U.S.C. 355, all receipts from sales issued under the Mineral Leasing Act for acquired lands are paid into the Treasury and distributed "in the same manner as prescribed for other receipts from the lands affected by the lease, the intention of this provision being that this chapter shall not affect the distribution of receipts pursuant to legislation applicable to such lands *

The quoted phrase means that all moneys received from rents, royalties, and bonuses from mineral leases on acquired lands are shared with State or local governments in the same fashion as other revenues realized from similar types of lands. For example, revenue received from mineral leases on acquired national forest lands are shared in the same fashion as other revenues derived from national forest lands. Revenues generated from mineral leasing on military reservations on acquired lands, however, must be disposed of according to the provisions of the Military Leasing Act (10 U.S.C. 2667), which prescribes procedures for disposing of receipts from leasing on military reservations. Under this act, revenues received from leasing on these military lands are deposited into the U.S. Treasury. No portion of any revenue is shared with State or local governments.

Mr. President, when the Mineral Leasing Act was changed in 1976 to allow mineral leasing on military reservations, a change should have also been made in the act to permit a sharing of proceeds from mineral leasing with the State and local governments where the leasing occurs. The bill that I have introduced,

S. 859, corrects that omission. The sale at Fort Chaffee was only the first lease sale held under the amended statute permitting leases on military reservations on acquired lands. I am submitting for the record a list of 68 military reservations which are located on acquired lands and for which interest has already been expressed in obtaining oil and gas or other mineral leases. A total of 4,024,307 acres of military lands are

acquired lands, and thus potentially affected by this bill.

As more lease sales are held, greater demands for services will be placed on the adjacent local governments. Unless the law is changed to allow the proceeds from the lease sales to be shared with the States and local governments, counties, and school districts in which these military reservations are located will face an increasing financial burden.

The Federal Government has always recognized its responsibility to the States and local governments and has established programs to partially compensate them for the impact of Federal ownership within their boundaries. I am convinced that if this issue had been raised in 1976, when the Mineral Leasing Act was amended to allow leasing on military acquired lands, the law would have also been changed to provide for sharing of the proceeds from

It is essential for the Federal Government to bear its fair share of the costs of the increased demands that will be placed on local governments as a result of expanded oil and gas exploration on military reservations. President Reagan clearly outlined the Federal responsibility in this area when he met with the

National Association of County Officials and stated:

Responsibility of ownership requires landowners to pay their fair share of the cost of local government, and the federal government shouldn't be exempt.

The bill that I have introduced would insure that the Federal Government does meet its responsibility, by requiring that 50 percent of all rents, bonuses, and royalties received from leasing on military reservations be given to the States. This is the same distribution of funds which applies to proceeds from mineral leasing on public domain lands.

Mr. President, I urge the Senate to act quickly to correct this inequitable

situation.

Mr. WARNER. Mr. President, this bill will correct an oversight in the Mineral Leasing Act for oil and gas leasing on acquired Federal lands. The Congress amended the law in 1976 to provide such leasing on acquired lands, but did make the conforming changes to the revenue sharing provisions of the law.

Consequently, an inequity was created with regard to the revenues from these leases. This inequity became the focus of the committee's attention in hearings during the last Congress on oil and gas leasing at Fort Chafee, Ark. The bill before us will amend the appropriate revenue provisions of existing law to correct Congress original oversight and the resulting inequity. I commend Senator BUMPERS for his efforts to bring this matter before the Senate.

Enactment of this legislation will insure that nonpublic land States, like those in the East, will share in the receipts derived from Federal mineral leases on acquired military lands in the same way that most public land States in the West share in leases on public land—that is, 50 percent to the States and 50 percent to the United States.

The administration, in testimony by the Department of Interior before the Subcommittee on Energy and Mineral Resources of the Senate Energy and Natural Resources Committee, which I chair, on S. 859, strongly supported the bill and urged that the Senate pass it as quickly as possible.

Mr. President, as cosponsor of S. 859 with Senator Bumpers, I urge Senate passage of the bill.

Mr. BAKER. Mr. President, I understand that the distinguished Senator from Arkansas may have an amendment to that bill. I yield the floor.

UP AMENDMENT NO. 353

(Purpose: To allow payments to states pursuant to this act after October 1, 1981)

Mr. BUMPERS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arkansas (Mr. Bumpers) proposes an unprinted amendment numbered 353.

On page 2, line 9 at the end of the sentence strike the first period and insert the following language: ", but in no event shall any payments be made pursuant to this Act to any state prior to October 1, 1981."

Mr. BUMPERS. Just a two-sentence explanation, Mr. President. This amendment was designed and drafted by the chairman of the Budget Committee to make sure this bill did not have a budget impact on the 1982 budget.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. The question is on engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading was read the third time and passed, as follows:

S. 859

An act to amend the mineral leasing laws of the United States to provide for uniform treatment of certain receipts under such

laws, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6 of the Act of August 7, 1947 (61 Stat. 915; 30 U.S.C. 355), is amended by adding the following at the end thereof: "Notwithstanding the preceding provisions of this section, all receipts derived from leases on lands acquired for military or naval purposes, except the Naval Petroleum Reserves and National Oil Shale Reserves, shall be paid into the Treasury of the United States and disposed of in the same manner as provided under section 35 of the Act of February 25, 1920 (41 Stat. 450; 30 U.S.C. 191), in the case of receipts from sales, bonuses, royalties, and rentals of the public lands

payments be made pursuant to this Act to any State prior to October 1, 1981.".

SEC. 2. The amendment made by this first section of this Act shall take effect with respect to leases entered into after January 1, 1981.

under that Act, but in no event shall any

Mr. BUMPERS. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR THE RECORD TO RE-MAIN OPEN UNITL 5 P.M. TODAY

Mr. BUMPERS. Mr. President, I ask unanimous consent that the record on the passage of this bill be held open for an additional 30 minutes in case the chairman of the Committee on the Budget (Mr. Domenici) wishes to insert a statement in the Record pertaining to it.

Mr. BAKER. Let me ask if the Senator will permit me to amend that slightly. I have just a few more moments of routine business to transact today.

Mr. BUMPERS. Certainly, Mr. President.

Mr. BAKER. In order to accommodate that request, Mr. President, I ask unanimous consent that the record may remain open for statements until 5 p.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, the matters I am about to submit have been cleared, I believe, by the minority side.

First, is there an order for the convening of the Senate tomorrow?

The PRESIDING OFFICER. There is an order for the Senate to meet at 9 a.m. tomorrow

Mr. BAKER. Mr. President, is there an order for the Senate to proceed at an hour certain to the consideration of the military pay bill?

The PRESIDING OFFICER. There is no order with regard to that. There is an order to take up the Matsunaga-Hatfield amendment at 9:30.

Mr. BAKER. I thank the Chair.

ORDER FOR RECOGNITION OF SENATOR PROXMIRE TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that on tomorrow, after the recognition of the two leaders under the standing order, the distinguished Senator from Wisconsin (Mr. Proxmire) be recognized on a special order for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR H.R. 4416 TO BE HELD AT THE DESK

Mr. BAKER. Mr. President, I ask unanimous consent that H.R. 4416, the eradication of plant, pests on animals, and poultry diseases bill, be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEATH OF REPRESENTATIVE WIL-LIAM R. COTTER, OF CONNECTICUT

Mr. BAKER. Mr. President, I understand that this matter has been cleared.

I ask unanimous consent that the Senate proceed to the consideration of a resolution, on behalf of the senior Senator from Connecticut (Mr. Weicker), for himself and the junior Senator from Connecticut (Mr. Dopp).

The PRESIDING OFFICER. The resolution will be stated.

The legislative clerk read as follows:

Resolved, That the Senate has heard with profound sorrow the announcement of the death of the Honorable William R. Cotter, late a Representative from the State of Connecticut.

Resolved, That a committee be appointed by the Presiding Officer to join the committee appointed on the part of the House of Representatives to attend the funeral of the deceased Representative.

Resolved. That the Secretary communicate these resolutions to the House of Representatives and transmit an enrolled copy thereof to the family of the deceased.

Resolved, That when the Senate recesses today, it recess as a further mark of respect to the memory of the deceased Representative.

Without objection, the Senate proceeded to consider the resolution.

Mr. WEICKER. Mr. President, good men are deserving of praise. Bill Cotter was a good man and a dedicate legislator. He arrived in Washington in 1971 and immediately set about his work as Representative of Connecticut's First District with determination and quiet dignity. Bill worked hard to serve the needs of all the people in his district, from those in Hartford's affluent suburbs to the poor of the inner city. They rewarded him for his efforts by returning him to office five times.

Recently, Bill Cotter was responsible for the expansion of individual retirement accounts. He was aware that private pensions and social security often fail to meet the full needs of retired workers and their families. His proposal now means that individuals will have a greater control of their future financial stability.

Bill's commitment to his work can be seen in his desire, despite his grave condition, to return to Washington to vote on the Economic Recovery Act, which included the proposal on which he had worked so diligently.

Only the strong insistence of his friends and doctors kept him from casting his vote in support of the bill that was to be signed into law only weeks before his untimely death on September 8.

Mr. President, I first met Bill during the campaign of 1970. Instead of a traditional rivalry between Democrats and Republicans, a friendship was born. Bill Cotter quietly and effectively represented the aspirations of Connecticut's First District. His constituents will miss the Congressman. I will miss the man.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 208) was unanimously agreed to.

The PRESIDING OFFICER. Pursuant to the resolution, the Chair appoints the Senator from Connecticut (Mr. Dopp) as a member of the funeral committee on the part of the Senate.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have no further business to be transacted this afternoon, and I inquire of the minority leader if there is any matter he wishes to present to the Senate.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader for his customary courtesy. I have nothing further for today.

Mr. BAKER. I thank the minority leader.

RECESS UNTIL 9 A.M. TOMORROW

Mr. BAKER. Mr. President, in accordance with the previous order, and pur-

suant to the provisions of Senate Resolution 208, as a further mark of respect to the memory of the deceased William R. Cotter, late a Representative from the State of Connecticut, I ask unanimous consent that the Senate stand in recess until 9 a.m. tomorrow.

There being no objection, the Senate, at 4:23 p.m., recessed until tomorrow, Friday, September 11, 1981, at 9 a.m.

NOMINATIONS

Executive nominations received by the Senate, September 10, 1981:

DEPARTMENT OF STATE

Richard W. Murphy, of Maryland, a Foreign Service officer of the class of Career Minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Kingdom of Saudi Arabia, to which office he was appointed during the last recess of the Senate.

Thomas Aranda, Jr., of Arizona, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Uruguay.

Joseph Verner Reed, Jr., of Connecticut, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Kingdom of Morocco.

INTERNATIONAL COMMUNICATION AGENCY

Richard J. Bishirjian, of New York, to be an Associate Director of the International Communication Agency, vice Alice Stone Ilchman.

DEPARTMENT OF COMMERCE

Donald James Quigg, of Oklahoma, to be Deputy Commissioner of Patents and Trademarks, vice Lutrelle F. Parker.

COMMODITY FUTURES TRADING COMMISSION

Susan Meredith Phillips, of Iowa, to be a Commissioner of the Commodity Futures Trading Commission for the term expiring April 13, 1985, vice Read P. Dunn, Jr., term expired.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Jeffrey S. Bragg, of Ohio, to be Federal Insurance Administrator, Federal Emergency Management Agency, vice Gloria Cusumano Jimenez.

EXTENSIONS OF REMARKS

SOCIAL SECURITY OVERSEAS BENEFICIARIES

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 10, 1981

· Mr. WHITEHURST. Mr. Speaker, as are most Americans, I am concerned about the future of the social security system and want to do all I can to assure its continued vitality for generations to come. The old-age, survivors, and disability insurance program, commonly referred to as social security, is the largest single program in the budget. Federal outlays for social security are estimated to rise from \$117 billion in 1980 to \$136.9 billion in 1981, about one-fifth of the Federal budget, and pay benefits to over 36 million persons. These benefits are indexed to the cost of living.

As you may recall, in the 96th Congress I led the debate on the issue of extending certain social security benefits to our Nation's prisoners. Considerable national attention was focused on this issue, and my legislation was eventually incorporated into a larger measure that went on to become Public Law 96-473. While the issue is small when viewed in the overall scheme of things, the estimated annual savings nevertheless total many millions of dollars.

In recent months, I have been examining another group of social security beneficiaries who, in my judgment, represent a substantial drain on the system and pose severe problems down the road. I am also pleased that Social Security Commissioner John A. Svahn also has expressed his concern to me and has indicated that he will recommend legislative remedies in the near future.

On Wednesday, I introduced the Social Security Alien and Foreign Resident Limitations Act of 1981, which addresses the growing number of foreign auxiliary beneficiaries living in more than 60 countries. At present, 313,342 persons living abroad receive \$965.8 million annually in social security benefits. Of course, while some of these people are U.S. citizens who have retired to their native countries, the vast majority-nearly 70 percentare not. I am concerned that this situation is only going to get worse in the years ahead; indeed, there has been a 50-percent increase in the number of beneficiaries in the last foreign decade.

Aside from the dramatic increase in with the names of 111 aliens obtained the number of foreign beneficiaries, it from a sample of 175 beneficiaries re-

is my sense that opportunists exploit the social security system abroad simply because of the inherent difficulties in administering it. Among the most highly visible problems are the following:

The overseas beneficiary population is growing rapidly (from 98,791 in 1960 to 313.342 in 1981).

Benefits are obtained through fraud-

ulent means.

The high number of undocumented workers in the United States raises the specter of massive increases in future benefit claims. For benefit purposes, the Social Security Administration does not keep statistics on the number of workers here legally or illegally. It is estimated that 8 million of these individuals are workers.

Benefits are lucrative compared to local income levels in some countries.

Little risk of prosecution for receiving benefits fraudulently.

As the General Accounting Office noted in a report 3 years ago that was never published:

Overall, dependents and survivors represent approximately 40 percent of the general population of Social Security beneficiaries. However... in the five countries with the most beneficiaries, dependents and survivors range from 45 percent in Canada to 73 percent in Mexico. We believe this disproportionate number of dependents and survivors is an indication of the magnitude of program inequities and abuses.

At my request, the GAO is updating its findings and will provide me with a summary in the near future.

As with the prisoner issue in the 96th Congress, the issue of foreign auxiliary beneficiaries has been one that has received scant attention in recent years. In my judgment, the ramifications of our social security laws applied abroad have not been fully appreciated. But after reviewing numerous case histories and examining the administration of the social security program abroad, there is no question in my mind that serious problems exist that must be dealt with by this Congress.

As an example, in the cases of four families of illegal aliens whose combined contributions to the social security system totaled \$910, as of last month they have collected \$81,026. Of the total, the primary wage earners have received \$10,694, while their dependents and survivors have received \$79,032—none of whom has ever been in the United States.

In its study 3 years ago, the General Accounting Office provided the Immigration and Naturalization Service with the names of 111 aliens obtained from a sample of 175 beneficiaries re-

siding in Canada or Mexico to determine the number of undocumented workers receiving social security benefits. It was determined that 39 of these individuals, or 35 percent, could be undocumented workers.

In a letter to my colleagues in the House explaining my legislation, I noted two other areas of abuse:

ITEM

In May 1978, there were 2,070 Mexican students enrolled in public universities receiving social security student benefits. According to several studies, the average tuition costs in Mexican public universities in 1978 was \$10 per year. Even so, the average monthly social security student benefit at the time was \$93.

ITEM

Because there is a limited number of nursing homes in the Philippines, it is not uncommon for a Filipino to return to the Philippines upon retirement and marry a young woman to care for him in his later years. In exchange for her taking care of him, the woman, and any children they may have, are financially provided for after his death. In one case, a 70-year-old man married a 17-year-old woman, and fathered three children before his death at age 75. Even though his widow and three children will probably never set foot in the United States, they will collect many thousands of dollars in social security benefits.

Mr. Speaker, during this past recess when most of us returned to our districts, I think it is fair to say that among the most frequently expressed concerns of our citizens is the future of the social security system. If the Second District of Virginia can be assumed to be a relatively accurate barometer of thought on this issue, I can tell you that many of our citizens are urging this Congress to return the social security system to its original intent of providing a supplementary income when an individual becomes old or disabled.

Of course, we all know that this is not the case today. The Social Security Act has become a Christmas tree of programs with a little bit of something for everyone. Unfortunately, in doing this, our tree's roots have become severely weakened to the point where today we are scrambling to find revenue sources to keep them alive.

The Social Security Alien and Foreign Resident Limitations Act of 1981 would significantly limit the opportunities for abuse of the social security program by beneficiaries in foreign countries.

Specifically, the legislation would do

First, prohibit the payment of social security benefits to illegal aliens.

Second, in cases of U.S. citizens who reside outside the United States, social security benefits would be extended only to those dependents existing at the time of the wage earner's 57th birthday.

Third, in cases of individuals who are not citizens or nationals of the United States, social security benefits would be limited to a single lump sum benefit, equal to the total amount of social security taxes imposed plus interest.

Mr. Speaker, my legislation protects those individuals presently receiving social security benefits, and would not conflict with treaty obligations existing on the date of enactment of this bill.

Finally, Mr. Speaker, I would urge my colleagues to join me in this effort to end what, in effect, has become an international welfare state. At a time when our social security system is hard pressed to meet its commitments in this country, it is difficult for me to continue to support an expansion of benefits to beneficiaries abroad who are not U.S. citizens.

Thank you.

A TRIBUTE TO MRS. LILLIAN TICHY

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. CONTE. Mr. Speaker, I would like to bring to the attention of my colleagues an event that will be taking place in Leverett, Mass., on September 12. On that date, the citizens of the town of Leverett will honor their oldest resident, Mrs. Lillian Tichy, who will be observing her 100th birthday.

Mrs. Tichy is a vivacious and active centenarian. An avid reader, she displays a sense of humor as well as an interest in current national and local events, participates in senior citizen activities and is an accomplished pianist. She is truly a shining example not only to her fellow senior citizens but to our younger people as well.

The residents of Leverett are honored to celebrate this milestone in Mrs. Tichy's life and I would like to join them in wishing her a happy birthday and ever peace and happiness in the years ahead.

EXTENSIONS OF REMARKS

WE NEED THE VOTING RIGHTS

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 10, 1981

• Mr. HAWKINS. Mr. Speaker, during this past spring and summer, witness after witness testified before the Judiciary Subcommittee on Civil and Constitutional Rights on the urgent need to extend the Voting Rights Act with section 5 intact. Despite great gains achieved by minorities in the past 16 years, many examples of blatant and more subtle violations of voting rights remain. Carl Rowan points out that without extension of the act, the fundamental right of political participation may remain in jeopardy for millions of our citizens.

Do Not Carry Us Back

(By Carl T. Rowan)

President Reagan has hinted that he will support extension of the Voting Rights Act of 1965—extension without amendments designed to make this vital piece of legislation meaningless.

Support of the Voting Rights Act would be Reagan's first act of consequence that would say to America's minorities, "I am

your president, too!"

Skeptics are saying that Reagan's good intentions will get washed away by the "boll weevils," those Deep South congressmen who figure that the president owes them some favors for their help in the passage of his budget and tax cuts. Others fear that the Justice Department will, at its Oct. 1 deadline, offer Reagan some formula under which areas once guilty of blatant electoral discrimination (9 states and portions of 13 others) can wriggle out from under a requirement that they clear with the Justice Department any changes in election laws, such as the reapportionment of state legislatures.

If Reagan wonders why this piece of legislation is so important to minorities, he need only look at the last 25 years of Mississippi

history.

Even with the Voting Rights Act, it took 13 years of court battles before blacks got a half-decent chance of being elected to the Mississippi legislature. Today 17 blacks are among the legislature's 174 members, 10 percent representation, although blacks make up 35 percent of Mississippi's population.

"Look at that progress!" opponents of the Voting Rights Act are saying to the president. "This law is not needed anymore."

Reagan need only look at what is still going on in Virginia to know that not only is the law still needed, but it must be enforced by his Justice Department with diligence and vigilance.

Virginia has a history of trying every trick known to dilute the black vote and to ensure that blacks are not elected to Congress or to statewide office and that very few blacks get elected to the state legislature.

Virginia is 18.7 percent black, but only 3.6 percent of its state legislators are black; one senator out of 40 and four delgates out of

Virginia's game has been to draw district lines so as to split up large, predominantly

black areas in places like Richmond and Norfolk.

Richmond's Mayor Henry Marsh recently told a House judiciary subcommittee that in 1969, when blacks were becoming a majority in that city, then mayor Phil Bagley told public gatherings, "I don't want niggers to take over the city." So he moved to annex portions of Chesterfield County to acquire 44,000 whites and thus dilute the political power of blacks.

Virginia remains so backward politically that electoral injustices would again become commonplace if the Voting Rights Act were allowed to expire next year—or if it were extended without Section 5, the provision that requires the would-be gerrymanderers to pass muster at the Justice Department and before the courts.

The Voting Rights Act was a major factor in ending the violence of the 1960s because it gave people long outside the system reason to believe that, once inside, they could vote their way to justice.

Whatever else this society may take away from its hungry and harassed, it must not take away that hope.

THE POOR HAVE MANAGED WITHOUT THE HELP OF AN ALL-PROVIDER FEDERAL GOVERNMENT

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 10, 1981

• Mr. ASHBROOK. Mr. Speaker, I would call attention to a recent item in the Washington Post, "Funds Cutoff Fails To Stem Low-Income Abortions" (September 4, 1981).

Despite the denial of Federal funds for abortions—

The first paragraph reads-

95 percent of low-income and other women who might have turned to medicaid for help have gotten abortions anyway, the Government's Center for Disease Control reported yesterday.

The "poor" have managed to get abortions on their own or with State or local aid, but without the help of an all-provider Federal Government. This would lead one to suspect that the vicious criticism that was leveled against the passage and implementation of the Hyde amendment-criticism which labeled supporters of that amendment as being "insensitive to the needs of the poor" was not really justified after all. One might suspect further that it was just a propaganda barrage to try to gain public support and sympathy, not so much for the poor, who, according to this report, really did not need it, but for the providers of this socalled service.

Since the poor have not actually suffered by the cutoff of funds for abortion under the Hyde amendment, how can anyone seriously claim that a cutoff of funds for abortion under the Federal employees health benefits programs would hurt well-paid Feder-

al employees, even those in the lowest ranks?

I am saddened to note that almost as many abortions are still taking place—unborn human lives canceled out for reasons of convenience or comfort, for reasons of deformity or defect, or for reasons of economy or careers—unborn human lives that might otherwise have been born in a society where someday they will be sorely missed, as the old grow more numerous and the ranks of the young continue to shrink. But I am likewise heartened that the Federal taxpayer role in financing abortions will soon come to an end.

Certainly, now, with this report in hand, we can claim that there is no longer any valid reason for not passing the Ashbrook amendment as well.

REAGAN'S IMMIGRATION PLAN-AN AMERICAN CASTE SYSTEM

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 10, 1981

 Mr. GARCIA. Mr. Speaker, I wish to share the following article from Inquiry magazine which points out the racist, unrealistic, and even illegal immigration policy of the Reagan administration

As the article indicates, this plan makes no economic, political, or social sense. Further, it goes against American historical concepts, that is, we are all immigrants; we or our ancestors took a chance on political freedom and better economic opportunity in America. It made sense then and it makes sense now.

Reagan's Immigration Plan—An American Caste System

There is nothing quite like the word "immigration" to stir a politician's blood. After all, a lot of the fun has gone out of politick-ing in the last couple of decades; if you try to give a speech about "shiftless niggers on you're liable to get in considerable welfare," trouble. But talk the same way about Haitian boat people or Mexican immigrants and even the liberals love it. And you don't have to worry that what you say makes even the vaguest sense. For instance, Detroit's black mayor Coleman Young says that contrary to common wisdom, last year's rioting in Miami had nothing to do with the fact that a bunch of white police officers beat an unarmed black man to death and got away with it. What the rioters were really upset about, says Young, was Cuban immigrants. (The only way to tell liberals from conservatives on immigration is that liberals are reluctant to use such conservative totems as welfare in their racist harangues. So Ted Kennedy, instead of repeating the Republi-can myth that immigrants all go on food stamps, says instead that they take jobs from decent red-blooded Americans.)

The temptations of the immigration issue have proven a bit too much for the Reagan administration. Opening with a properly ominous warning that "we have lost control of our borders," attorney general William French Smith unveiled an administration

"plan" for immigration that steadfastly ignores all the real issues—but does offer grand opportunities for more of the same old political bluster.

The plan entails turning every business in America into an arm of the Immigration and Naturalization Service by forcing them to prove that all their employees are citizens and not some foreign scum. INS itself, possibly the most incompetent of all federal agencies, is to get an extra \$75 millionwhich, if things proceed according to form, will get misfiled and lost. The hated bracero program, under which Mexicans were allowed into the country as "guest workers" and then instantly deported if they complained about wages or working condititions, is to be revived. The Coast Guard is to swoop down on boats operating on what we quaintly refer to as the "open" seas and hold deportation hearings on Haitians who haven't even gotten here. And the plan's one concession to reality-amnesty for illegal aliens who arrived before 1980-is irredeemably warped by the insistence that most such aliens pay taxes and yet not be allowed to use government services.

What it all adds up to is an expensive, unworkable, and unfair mess. No one has even ventured a guess as to what it will cost businesses to try to verify the status of all their employees. And if the Reagan administration really tries to enforce the proposal the likely result will be massive job discrimination against Hispanics and other minorities at the lower end of the job market. Who will bother to spend a lot of time and money checking the credentials of a potential busboy? Better just to hire someone who's white and indisputably "American."

The other provisions are equally silly. Giving \$75 million to INS is pointless; this agency can't even deal with legal immigrants, much less the illegal ones. Earlier this year there was a near riot at Miami International Airport when 16,000 passengers arrived in a single day and INS couldn't cope. (Of course, when INS does cope, it can be frightening. Some agents of the Border Patrol, an INS subagency, report that the patrolmen routinely carry garrotes, blackjacks, and lead-lined gloves, the better to administer justice. Another popular item is the "throwdown" gun, to be dropped near the body of a murdered fugitive so patrolmen can say they fired in self-defense)

If the INS can't stop the flow of illegal aliens-and it won't ever be able to, unless we hire the 2.5 million more border patrolmen that it would take to stand shoulder to shoulder along the 2,000 miles between Brownsville, Texas, and San Ysidro, California-then the administration's conditional amnesty plan makes no sense, either. What we have now is a permanent underclass of illegal aliens who are subject to awful exploitation because unscrupulous employers can have them thrown out of the country if complain. (The bracero program, which operated from 1942 to 1964, was nothing more than an attempt to institutionalize this practice.) Amnesty-even Reagan's bizarre pay-taxes-but-don't-collect-services amnesty—is the only decent way to deal with this situation. But what good does it do to relieve one group of the stigma of illegal alien status while simultaneously creating another one? Most Americans are appalled at India's caste system, and yet our immigration laws have created an appalling caste system of our own.

Underneath it all is a hard core of racism. No one complains that the damn Canadians are sneaking down here and ruining every-

thing. The groups that arouse popular enmity are the Mexicans, the Haitians, the Cubans, and the Vietnamese (although the government applauds Cuban and Vietnamese emigrants as long as they go elsewhere; after all, it's a propaganda coup). But we've faced racist objections to immigration for two centuries and overcome them, and we can do it again—if the political mythmaking about the economics of immigration can be exposed. When conservatives claim that immigrants go on the dole, and when liberals say immigrants take jobs from the deserving poor, they are lying. It's as simple as that. Nearly all available economic data shows that most immigrants work hard, avoid welfare, and do not take jobs from natives.

In 1975, for instance, the average native family paid \$3,008 in taxes. Immigrant families here ten years averaged \$3,564, and immigrant families here between sixteen and twenty-five years averaged \$3,592. At the same time. immigrants-who tend to be young, healthy, and single-make comparatively little use of welfare-type social programs. This is especially true of illegal aliens. A U.S. Department of Labor study found that only 5 percent of illegal aliens use free medical care, 4 percent unemployment insurance, 1 percent food stamps, percent welfare, and 4 percent public schools. "Practically no illegals receive social security, the costliest service of all," says economist Julian Simon of the University of Illinois, "but 77 percent of illegal workers paid social security taxes and 73 percent had federal income tax withheld [in 1975]." Even those who avoid withholding still pay taxes every day; sales taxes, excise taxes, property taxes (through their rent). Meanwhile, a pair of University of California researchers interviewed nearly 1200 unemployed natives in Los Angeles and gave them lists of jobs that illegal aliens typically hold. Some 40 percent of the natives said they wouldn't take the jobs under any circumstances, and virtually none was willing to take them at the minimum wage. The inescapable conclusion is the same one economist Simon reaches: Admitting immigrants, of any kind or color, "improves our average living standard. If we Americans just plain don't want any more 'foreigners' in our midst, let's say so, but let's not justify our xenophobia with unsound economic argu-

The tragic thing is that Simon or anyone else should have to address the issue. We should know better. Nearly all of us are immigrants; we, or our ancestors, came here looking for a better life—a life with more political freedom and better economic opportunity. In a very real sense, immigration is what this country is all about. How can we deny others the same chance we had? In doing, so, we deny our own heritage—and for all its patrotic trappings, that's exactly what the Reagan administration is trying to do.

FOCUSING ON ENERGY

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. MURTHA. Mr. Speaker, in the first 8 months of 1981, I believe we have tended to ignore the remaining aspects of America's energy situation.

For the information of my colleagues, I include two of my "Weekly Columns" which I recently wrote on this issue:

THE BOTTOM LINE READS ENERGY

In 1981 the debate in Washington has focused on the economy and national defense. Missing from the debate, however, has been an issue that links the two together, and without attention could destroy our plans in either area—the issue is America's energy future.

Like the popular ballad where singers remind us of "the good old days" and "the way we were," a summer's oil surplus has cut our memory very short about gasoline lines two summers ago. Naturally, we all would like to return to the days when gas and oil were easy to come by and cheap. Unfortunately, we can not. It is a problem we must face. So far this year, we have not.

must face. So far this year, we have not.

A new book on "Energy and Security," by David Deese and Joseph S. Nye, summarizes our problems in a couple of vitally important paragraphs. In the one, the authors note, "Today, nearly two-fifths of the oil consumed by the free world's economy is vulnerable to terrorism, accident, warfare, and extortion. The sudden loss of Persian Gulf oil for a year could stagger the world's economy, disrupt it, devastate it, like no event since the Great Depression of the 1930s." That is the economic link of energy.

As for the national security link of energy, Deese and Nye outline it like this: "The probability of Soviet tanks rolling across the North German plain is much lower than the likelihood of an interruption of oil supplies stemming from various conflicts in the Middle East. Yet our energy plans and our diplomatic strategy do not reflect those probabilities. We are far less prepared for an energy emergency than for a military attack."

Of course, energy policy has proved complex and controversial. Regional differences over the use of natural gas and oil remain; environmentalists worry properly about "acid rain," and other difficulties associated with increased coal use; the debate continues over the role of nuclear power; government research funds are being cut-back from solar and other energy research in the budget trimming steps. When Congress adopted the first National Energy Plan in United States history back in 1978, the key portions passed by only a single vote in the House of Representatives. Congress and the Nation still remain that divided over the best way to proceed.

But to ignore energy will be disastrous. Eight years after the oil embargo we have learned many important things: we have learned Americans will conserve, we have learned Americans want to use our own energy resources, we have learned business and institutions will join in the conservation effort; but we have also learned that there is no magic, all-purpose solution that will make this problem go away; we have also learned that we cannot easily break our oil habit or our need to import foreign oil, and we have learned that switching to coal is costly, cumbersome, and controversial.

In the last three weeks in this space as we have looked at the energy problem, I think we have noted that we can take some pride in the last eight years of energy debate; after all, we have done more on energy in those years than in any other period in our history, but if we fail to continue to act, we will lose everything that we have gained. Moreover, we will throw open to disaster

whatever progress we have made on economic stability and national security.

Those are the stakes in the energy debate. We cannot afford to forget them. We cannot fail to act.

EXPORTING MORE COAL

The road to using more Pennsylvania coal winds through what at first glance appears to be a most unlikely stop—Philadelphia.

When we think of coal, we do not usually associate it with Philadelphia, but last week I was in that city for an announcement that will impact directly on our area's coal hopes.

The meeting unveiled plans for a major new coal storage and handling terminal at Philadelphia's Port Richmond Pier. By 1985 the coal handling capacity is estimated to reach 15 million tons per year, an increase from a present capacity of only about 3 million tons.

By the time the second phase of construction is complete, over \$60 million will have been spent with the result of a loop track arrangement for continuous unloading of unit trains, dockage of ships up to 60,000 tons, ship and barge loading capacity of 5,000 tons per hour, and significant storage of coal, allowing ships to load directly from storage without awaiting rail cars.

Port Richmond has great potential for serving the expanding coal export market. Its east coast location—closest to the coal fields of the Northeast and the coal-burning markets of Europe—can combine with worldwide coal demand and a good competitive pricing situation for U.S. coal, to make the port attractive to shippers and buyers.

That impacts directly on our area and our coal mines. In the short-range (meaning the 1980s), our two best hopes for major increases in coal production remain export of coal and synthetic fuels development.

A major hindrance to increasing our foreign sales of coal has been the transportation bottleneck. The road transportation system out of the mines must be improved, the rail links between the coal fields and the export ports must be upgraded, and the ports like that of Philadelphia must be improved to be more efficient and economical. The need for the improvements is shown by the increase between 1979 and 1980 when U.S. coal exports surged from 65 million tons to 90 million tons. At our Nation's three major coal ports-Hampton Roads. Baltimore, and Philadelphia-ships were delayed an average of 40 days prior to loading, and extra charges of about \$15 a ton were added to the coal cost, because of the delay.

Now, though, American ports see the need for expansion. A Dravo Corporation study concluded that world demand for seaborne coal will grow from 180 million tons in 1980 to more than 600 million tons by the end of the century. A British study estimates that coal importing nations will more than double their imports by 1985, and then double them again by 1990. The U.S. has the greatest potential for supplying this world demand for steam coal.

So, step one is to improve these port facilities. Step two is to work on the rest of the transportation network. Working hand-inhand with those steps is the third one—to make sure we link the mines of our area to that system so we can play a major role in providing that coal, and so we can put our miners back to work.

In the last month in this space, I have talked about the energy problem our nation still faces. I talked about the need for new technology, the need to reduce our dependence on foreign oil, and the need for a

strong energy leadership role from the federal government. It is proper that this series end with a fourth key element in America's energy plan—making full use of the coal reserves we have, both in our own country, and throughout the world.

A TRIBUTE TO DR. RANDALL H. NELSON

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. SIMON. Mr. Speaker, one of the finest citizens of my district and of this country is the former chairman of the Political Science Department at Southern Illinois University and now professor there, Dr. Randall H. Nelson.

Dr. Nelson served this country in the armed services, sustained serious injury, has provided distinguished leadership to our area and is one of the most thoughtful citizens I know.

Recently, he wrote a letter to me which summarizes in such commonsense terms what we are doing in the Nation that I thought I would share it with my colleagues and those around the country who read the Congressional Record.

I urge my colleagues to read this fine letter which raises the fundamental question of whether we are considering what is happening to the quality of life as we debate budget problems:

Hon. Paul Simon, House of Representatives, Washington, D.C.

DEAR PAUL: I am certain that what you need least is another letter from the hustings, but I am sufficiently concerned about current events to write a few comments. The test of any society, it seems to me, is the quality of life that it can provide for its people. This seems to be the furthest thing from the mind of the present administration. These ideologies are monopolizing the political dialogue. The President simply proclaimed that the economy is in the worst condition since the great depression. That is pure fiction. The unemployed are indeed very bad off, and the unemployment among young blacks is of crisis proportions. However, I do not think that the President's program will remedy either problem. Most people in this country have more in the way of material goods than they ever had any right to expect, but they still do not want to pay taxes and are concerned lest somebody else pick up a crumb or two.

The idea that all that we have to do is to accept the President's program and let free enterprise lead us out of the wilderness is nonsense. Has corporate industry ever done anything that it was not forced to do by law? I can recall a few things such as workmen's compensation, the right of workers to organize and bargain collectively, unemployment insurance, social security, air pollution, water pollution, chemical dumping, consumer protection, and safety in the workplace. How much of this is to be lost under the plea of necessity for restoring the economy? I am as concerned about inflation

growth.

as anyone. Income in higher education has not come close to keeping up with inflation. However, I do not think that the simplistic proposals of the Reagan Administration are going to cure inflation. Inflation is a worldwide phenomenon. I do not know what causes inflation, but I am reasonably certain that David Stockman doesn't either. Part of the problem, I suspect, flows from the fact that we do not have a free economy. When there is a freeze in Florida, the price of orange juice on the store shelf is immediately raised. That is not what the law of supply and demand dictates. It is what the market will bear. The oil companies are rapidly consolidating control over all forms of energy and are now expanding into other areas. Has Congress ever undertaken a thorough study of the impact of conglomerates on the economic system? The question that concerns me is whether a corporation with excess capital uses that capital to expand or modernize its equipment or whether merely goes out and buys control of another corporation or a professional sports team. It seems to me, although I hasten to add that I am talking about a subject of which I know nothing, that such practices could have a stultifying impact on industrial

The President himself convinced me that the budget is not the problem. He spoke of a national debt that is approaching a trillion dollars, certainly a frightening figure. However, he then explained that the dollar is worth only thirty-six cents compared to 1960. Simple arithmetic suggests, then, that the debt is only 360 billion dollars in 1960 dollars which is only a modest increase over the Eisenhower legacy. I noted in the Tribune last week that the program for eliminating architectural barriers for the handicapped was to be cut back or eliminated because it is too costly. Has anyone considered the cost of not continuing this program? Why not cut out FAA support for private aircraft? I am certain that the cost must be great and the amount of fuel consumed enormous.

I also noted last week that the administration is considering the resumption of domestic surveillance by the CIA. I think that it is imperative that this be prevented. If we need a secret police or intelligence agency to spy on American citizens, the country has a more malignant problem than the economy, and the President should be required to tell us the nature of this malignancy.

Finally, I am tired of hearing about the mandate which the people gave the President. The most disconcerting fact about the last election was the fact that almost fifty percent of the people of voting age stayed home. President Reagan received the votes of less than thirty percent of the potential electorate. That is hardly a mandate. How-ever, I respect Woodrow Wilson's observation that the President has a right to be as big a man as he can. The Democrats need to develop counter proposals based on hard data. We need education in the public sector. How many jobs will the President's program cost? I have not seen that question addressed. Can the defense industry absorb, economically, the amount of new money that will be "stuffed" into it? Who will man the 150 new ships that are to be added to the fleet, the planes, tanks, etc.? Is a new draft inevitable? Is it necessary to deny the poor people of the country the benefits of the Legal Services Corporation so that their rights can be violated with impunity?

It is much easier to write a long letter than a short one, and I have only just begun. I merely wanted you to know that all Democrats have not abandoned the field to "supply side" economics which I thought had gone out of style with Herbert Hoover. Sincerely.

RANDALL H. NELSON.

A PATTERN DEVELOPING

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. SWIFT. Mr. Speaker, there is a pattern developing. It started with the budget. Estimates were so fuzzily optimistic that JIM JONES warned the administration their programed deficit would balloon. The budget predicts the Federal Government will be paying only 8.9 percent interest starting next month. Ridiculous. The deficit now looks like its going to be twice the size the President assured us it would be.

The House Budget Committee told him so. But he told the Congress, in effect, "Don't listen to them. They will tell you two and two make four. But I tell you two and two make five. Follow me."

Then we came to the tax cut plan. It will benefit the average American very little. Alternatives that would have done a better job for middle America and been more reasonable in many other ways were offered.

But the President went on television and said, "Don't listen to them. They say two and two make four. But I tell you it makes five. Support me."

Now that pattern will hold, I predict. Small businessmen all over America are going bankrupt because of the high interest rate policy of the Federal Reserve. And this President is as enthusiastic a supporter of that terrible policy as has ever sat in the White House.

But you watch. He will soon call on the Congress for power to impound appropriations—the much abused tactic of Richard Nixon—and he will demand another round of cuts in important domestic programs even before the ink is dry on his last set. And, he will do so in the name of fighting—what? High interest rates, of course.

But, let us get it straight right now. The President can affect high interest rates, instead of continuing his support of Chairman Volcker's terrible policy that is bleeding Americans to death.

His impoundment ideas and his further budget cuts should be examined on their own merits. Those policy proposals and any others he may want considered are not tied to high interest rates. To use the agony of millions of Americans caused by that interest rate policy—to use it as a cover for other and unrelated proposals—is not

only cynical; it is worse. Such a linkage will serve to cover more delay by the administration in doing anything about high interest rates. We need something done now. No flimflam this time. Two and two really do make four.

LOCAL BAR ASSOCIATIONS ENDORSE LEGAL SERVICES

HON. BARNEY FRANK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. FRANK. Mr. Speaker, at the recent meeting of the American Bar Association in New Orleans, the leaders of the major local bar associations throughout the country adopted a statement urging reauthorization of the Legal Services Corporation Act and sufficient funding for this program. The statement noted, and I concur, that the Corporation's programs have provided a major step forward in making equal access to justice a reality for the poor. The statement was signed by the leaders of 28 local bar associations.

The House will today continue consideration of the Commerce, Justice, State, and Judiciary appropriations bill which contains an appropriation of \$241 million for the Legal Services Corporation. I ask my colleagues to support this figure, which represents an amount equal to that which passed the House in H.R. 3480-the Legal Services Corporation Act Amendments of 1981. I also ask my colleagues to consider the overwhelming support of the legal services program by members of the bar as evidenced by this statement, which I ask to be printed in the RECORD.

A copy of the statement follows: STATEMENT ON THE LEGAL SERVICES CORPORATION

As representatives of major local bar associations in the United States, we strongly urge the reauthorization of the Legal Services Corporation and sufficient funding for legal services to the poor. Most of our associations already provide extensive volunteer services to poor in supplement to the existing federally funded programs, and we know from practical experience that volunteer programs cannot fill the void created by the elimination of, or severe cut back in, the Legal Services Corporation.

Equal access to justice is a basic societal concern, and the programs funded by the Legal Services Corporation have been a major step forward in making such access a reality for the poor. We will continue our efforts, whatever the outcome, but we hope Congress will not dismantle this program.

Raymond Young, President, Boston Bar Association; Joanne M. Garvey, President, Bar Association of San Francisco; Herman S. Palarz, President-Elect, Beverly Hills Bar Association; Martha H. Perin, Executive Director, Cincinnati Bar Association; Thomas L. Dettelbach, President, Cuyahoga County **EXTENSIONS OF REMARKS**

Bar Association, Cleveland, Ohio; Don McDonald, President, Denver Bar Association; James W. Lamberton, President, New York County Lawyers Association; Robert Russell, President, Detroit Bar; David Butler, President, Atlanta Bar; Wayne E. Babler, President, Milwaukee Bar Association; and Leonard A. Girard, President-Elect, Multnomah Bar Association, Port-

land, Oreg.

Victor H. Beauzay, President, Santa Clara County Bar Association, San Jose, Calif.; Sidney R. Rose, President, Beverly Hills Bar Association; Helen K. Pulsifer, Executive Director, Seattle-King County Bar Association; Roy H. Aaron, President-Elect, Los Angeles County Bar Association; Maryanne S. Freedman, President, Eric County, New York Bar Association; Kevin M. Forde, President, Chicago Bar Association; George M. Burditt, Past President, Chicago Bar Association; and Richard William Austin, Past President, Chicago Bar Association.

Esther R. Rothstein, Past President, Chicago Bar Association.

Esther R. Rothstein, Past President, Chicago Bar Association; Robert J. Perry, President, Columbus, Ohio, Bar Association; Anthony J. Sestric, President, Bar Association of Metropolitan St. Louis; William R. Delano, Executive Secretary, Association of the Bar of the City of New York; Herbert J. Belgrad, President, Bar Association of Baltimore City; H. J. Kelly, President, Hennepin County Bar Association, Minn.; Jerome Bogutz, Past Chancellor, Philadelphia Bar Association; Miles C. Cortez, Jr., President-Elect, Denver Bar Association; and Ralph E. Mahowald, President, Maricopa County Bar

Association.

PENTAGON WASTE

HON, LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 10, 1981

• Mr. ASPIN. Mr. Speaker, the most fundamental waste continues in the Pentagon. Today I would like to cite examples such as a Navy office that holds checks for 11 days before depositing them and an Army arsenal that planned to build tank cannons at four times the rate that tanks could be built.

The new administration took over at the Pentagon intent to root out waste and inefficiency. Let me point out to these officials several examples of clear and simple wastefulness that have been unearthed by auditors

within each of the services.

First, an Army recruiting command paid an advertising agency \$323,381 for work that was not performed, \$92,200 for work previously paid for and \$220,979 for work that may have been done but for which documentary evidence of the work was never supplied. The payments were approved and made and no questions asked until Army auditors came in for a routine check.

Second, an Army arsenal laid out plans to expand its production base for artillery and tank cannons. The expansion included a capacity for producing tank cannons four times greater than the capacity for producing tanks. It also included expansion to produce artillery weapons due to be replaced or phased out before the expansion would be completed. The excess capacity would cost about \$15.7 million.

Third, Navy auditors found one Navy regional finance center was holding checks for an average of 11 days from the time they arrived until they were sent for deposit. The deposits, furthermore, were mailed, adding another 2 to 4 days to the cycle. Navy auditors estimated that that one finance center was costing the Government an extra \$1 million a year by its slow processing of checks.

Fourth, Army auditors looked at 22 medical care items, each of which was being bought from a solitary source without competitive bidding. The auditors said that if the Army had used competitive bidding, it could have saved \$533,000 on those 22 items alone

Fifth, the Hydrographic and Topographic Center of the Defense Mapping Agency found it had a half million dollars in unspent funds as the fiscal year was ending. So it went out and spent it all on map paper for which it had no plans or need.

Sixth, the Army has spent \$115 million to develop a scout helicopter. The project began in 1974. Seven years later, the Army is no closer to having a helicopter that fulfills that mission. Army auditors said the primary problem was very simple: the agency that is developing the helicopter and the Army's helicopter users still haven't agreed on just what is needed in a scout helicopter.

These are just a handful of examples of waste that internal auditors and inspectors found in a 6-month period, October 1980 through March 1981.

They are illustrative of problems I have pointed out for many, many years: sloppy planning, poor management, too little competitive bidding, yearend spending binges, and ill-defined ideas for weapons.

Many of these problems entered the Pentagon with the first people to occupy the building 40 years ago. They would not be tolerated for even 1 week in private enterprise. There is no reason they should be tolerated any longer in the largest agency of the Federal Government. If the Reagan administration is eager to make good on its pledges to root out waste, I invite it to start prowling the Pentagon halls now.

MAKING A SCHOOL SYSTEM WORK

HON. OLYMPIA J. SNOWE

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

Mrs. SNOWE. Mr. Speaker, we read headlines in the newspapers almost daily about the problems of our public schools, particularly declining test scores, difficulties in retaining competent teachers, and other roadblocks to providing quality education for our children. In contrast, I would like to bring to the attention of my colleagues an article from the September 9, 1981, Wall Street Journal about the Portland school system in Maine. This article describes the work of school superintendent Peter Greer, and how his competence, commitment, and courage has created a school system which has distinguished itself from national education trends by improving upon its past performance and setting new records for achievement by its students.

[From the Wall Street Journal, Sept. 9,

Making a School System Work (By Bill Bennett and Terry Eastland)

(Mr. Bennett is director of the National Humanities Center in North Carolina. Mr. Eastland is editor of the Norfolk Virginian-Pilot.)

Recent studies on what makes schools effective have all pointed to the importance of good leadership in both the individual school and the school system. This perhaps is obvious, but what may not be so obvious is that good leadership is not a matter of style but requires day-to-day commitment, competence and no small amount of courage.

This is especially true in the public schools, constrained in ways private schools are not. An effective leader in the public schools will find himself involved in skirmishes every day, and at the end, if not of the day, of the school year, he must win more than he loses. One such effective leader is Peter Greer, superintendent of schools in Portland, Maine.

Mr. Greer, previously a full-time teacher, is 40 years old and has been Portland's superintendent for the past two years, having been an assistant superintendent. The system includes 12 elementary schools, three middle schools, two high schools, a regional vocational school and a school for the emotionally disturbed. Many of the 8,000 students come from low-income families. An unusually high 16 percent are enrolled in special education. The system relies heavily on the property tax. The budget this past year was \$20 million. The Portland system is Maine's largest, and nationwide it is of average size.

MR. GREER'S PHILOSOPHY

Earlier this summer Mr. Greer spelled out his educational philosophy. Portland, he said, "must stand for the belief that the widespread despair over public education is a form of self-indulgence we cannot afford. Education must demand something, stand for something, or it has nothing to give. Competence and quality must be recognized,

sought and rewarded. Outstanding teachers must be rewarded in order to encourage first-rate people to choose teaching as a profession. Excellent students must serve as models for other students."

Mr. Greer has emphasized this philosophy to teachers and staff. But his push for excellence has involved more than philosophy.

Faced with budget cuts, and at the same time wishing to institute a program in Latin for the elementary grades, Mr. Greer has succeeded in finding funds for the program from a local bank. He also has instituted a writing program in which all students in all grades participate, and he has instituted a Great Books program.

Mr. Greer hired administrators for his central office whom he describes as parents, taking time, for example, to read samples of the students' writing. Mr. Greer does the same, and also finds time during his more than 70-hour work week to teach a class in American history.

Mr. Greer has established a quarterly periodical called "Excellence." It is mailed to all parents, including those who send their children to non-public schools. The periodical also is placed in hospitals, supermarkets and offices. Excellence highlights the achievement of Portland students, teachers and schools.

As a result of these achievements many parents who chose to place their children in private schools have decided to return them to the Portland system. In 1980-81, for the first time in the past 10 years, the standardized test scores of Portland students were at or above the national norm in all grades, one to 11 and in all seven test areas. Last year Portland students won 35 state and national awards for writing, the highest ever for the city's children.

But everything isn't roses and harmony in Portland. Mr. Greer is controversial. He receives his share of hate mail. "Drop dead," said one recent letter. Another said: "You will be shot dead soon in a lonlely (sic) place by the people of Portland due to your unreasonable and unjustful demands. You are the most unacceptable person for the Portland public schools system. The time is very short for you to leave Portland to heavenly holiday."

A large part of Mr. Greer's administrative work is absorbed by personnel matters, mainly grievance and arbitration procedures. He estimates he spends two days a week in legal matters. During a recent two-week period he was served three times by the Portland sheriff.

Though he is well liked and widely respected by parents and by most of the teachers in the system, the Portland Teachers Association, the local affiliate of the National Education Association, is hardly a Peter Greer fan club. Some of the system's principals have told Portland citizens that since Mr. Greer became superintendent "it's not as much fun as it used to be."

Mr. Greer frankly admits that they are right. "There are no more long lunches and visits with each other by the principals and teachers every day. There's no more neglect or rejection of test scores. Test scores now are taken seriously, and so is the teachers' work. When the teachers had fun, as before, the students suffered. I firmly believe that superintendents who are universally liked make no decisions or have few to make."

Mr. Greer issues press releases that anger some school personnel and please others. A recent one led with the headline: "Fewer sick days equal higher test scores." Mr. Greer says that "one way to assess school morale is by considering the number of sick days each staff member uses."

The staff evaluation form Mr. Greer uses has angered some Portland school system employes. The evaluation form's first question asks the reader to say when this person usually arrives at work and usually leaves. The second, third, and fourth questions ask about the employe's pace at work, level of effort and quality of work. Other questions deal with the person's maturity and stability, and there are very direct questions about the person's intelligence, judgment and range of information.

THE MOST IMPORTANT ISSUE

Mr. Greer is serious in using these evaluation forms; indeed, he is serious about getting the best people there are to teach in and staff the Portland schools. He is absolutely opposed to using seniority as the sole criterion for retention. The most important issue in his mind is the quality of the teacher. He thinks that the credibility of teacher associations depends on their understanding this

One afternoon recently Mr. Greer relaxed with one of his principals over beer and reflected on the pace of their jobs. Like Mr. Greer, this principal works hard, and the two were probing the question of why work so hard.

"The only answer," Mr. Greer said, "is that for some reason we can't stand the educational hustling that goes on. We can't stand the fact that children in certain classrooms are getting mediocre teaching. We know how bad it is to be short-changed in your education—it ought to be a crime. We can't stand to let new and terrific teachers go, while a bozo stays to cheat kids."

Mr. Greer is an example of what it takes today, day-to-day, to be an effective public school administrator. There is no avoiding the fact that the campaign for effective public education is a battle, and it takes conviction and courage on the part of those ultimately in charge of a school system—the superintendents—to wage this battle successfully.

IN SUPPORT OF REPEALING WINDFALL PROFIT TAX IN THE ECONOMIC RECOVERY TAX ACT OF 1981

HON. PETER A. PEYSER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 10, 1981

• Mr. PEYSER. Mr. Speaker, I am introducing today legislation to repeal those provisions of the Economic Recovery Tax Act of 1981 which extended the credit against the windfall profit tax on domestic crude oil for royalty owners, which reduced the rate of such tax on newly discovered oil, and which exempted from such tax independent producer stripper well oil.

It is my hope that in order to support the President's call for a reduction in the 1982 Federal deficit that we in the House, and particularly those members of the Ways and Means Committee who will be initially involved, will recoup \$11 billion that was given to oil producers as an extra

bonus in the recently passed tax program. I cannot believe that Members of the House would knowingly vote to make additional, unnecessary cuts in programs dealing with education, defense, housing, and so forth without first taking this action, thereby minimizing additional cuts that the President may deem necessary in other programs. Can we truly ask the elderly to tighten their belts and at the same time say to oil producers that we are going to give you an \$11 billion bonus? This is the time when even those Members from oil-producing States should bite the bullet if they are convinced that we must hold down the deficit in 1982. It is my hope that Chairman Rostenkowski and the members of the Ways and Means Committee will give us the opportunity to act quickly on this on the floor of the House.

NO COMPROMISE ON JOB OPPORTUNITY

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 10, 1981

• Mr. HAWKINS. Mr. Speaker, politics is known as the art of compromise. Every day we seek a balance over such issues as resource development versus environmental protection, first amendment rights versus national security needs, et cetera. However, as the Christian Science Monitor so ably points out in its August 28 editorial:

There can and must be no compromise * * * for the Federal commitment to equal job opportunity for all Americans.

The administration's retreat on affirmative action must be countered forcefully. I include this editorial for the Members' benefit.

[From the Christian Science Monitor, Aug. 28, 1981]

No RETREAT ON JOB OPPORTUNITY

While recognizing the legitimate interest of the U.S. business community in freeing up firms from excessive paperwork—in other words, "red tape"—it is paramount that the federal government not renege on its obligation to women and minorities to ensure equal access to jobs involving federal montes.

In the case of government contracts, after all, employers receive taxpayer dollars—collected from all citizens irrespective of color or gender.

Consequently, how those dollars are disbursed, and to whom, takes on a different aspect than in the free market economy, where contracts involve private funds.

The principle involved here is directly relevant to the administration's new proposal to ease paperwork and other antidiscrimination requirements for federal contractors. Currently, affirmative action paperwork requirements apply to all contractors with 50 employees and contracts worth \$50,000 or more. The administration is proposing reducing the compliance rule for something

like 75 percent of all firms in the U.S. by requiring written compliance plans from only those contractors having 250 or more employees and contracts of at least \$1 million. The new regulations also would reduce the government's definition of the proper number of minorities to be hired by contractors in different parts of the U.S. Despite the proposed changes, according to Labor Secretary Ray Donovan, affirmative action protection will be retained for nearly 77 percent of all women and members of minority

Meantime, all employers having contracts of \$10,000 or more. Mr. Donovan points out, are still required to hire and promote women and minorities, whether or not they file written affirmative action reports.

The proposed new rules, published this week in the Federal Register, are now open for routine comment. After the comments are reviewed by the Labor Department, the final regulations will take effect 30 days from their publication.

Organized labor, women's groups, and civil rights organizations should vigorously use the review process to insist that the changes actually do what one Labor Department official promises, namely, "create incentives for voluntary compliance and put an end to mindless confrontations with employers who have been acting in good faith."

There is little question that many smaller firms find the current compliance processes onerous and costly. For them, some form of relief from the paperwork burden seems in order so long as affirmative action requirements are met. But what must be ensured is that the changes do not serve as a method for retreating from the federal commitment to equal job opportunity for all Americans. About that there can and must be no compromise.

VLADIMER TSUKERMAN

HON. F. JAMES SENSENBRENNER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

o Mr. SENSENBRENNER. Speaker, I have recently added my name to the list of Congressmen who have given their support to Representative Barnes' vigil for Soviet Jewish refuseniks. I would like to draw my colleagues' attention to the case of Vladimer Tsukerman. Mr. Tsukerman was born in Kishinev, Moldavia, in 1947. He is not a Communist party dignitary or a government official. He is a mechanical engineer. Being a Soviet Jew, Mr. Tsukerman applied to emigrate to Israel in December, 1977. His application was refused, but his wife and son were allowed to leave the Soviet Union. They live in Israel now and have been separated from their husband/father for several years.

After Mr. Tsukerman's first attempt to emigrate, the Soviet authorities let it be known that if he laid low, they would reconsider his application. For over 2 years, Vladimer Tsukerman complied with their wishes and refrained from any so-called anti-Soviet activity. Then, last April, the authorities told him that "a wife who leaves her husband is no wife," and rejected his application again. He could no longer remain quiet and decided to participate in a demonstration protesting Soviet denial of exit visas, in Kishinev on May 30. On May 29, Soviet authorities placed 48 people under short-term house arrest so that the demonstration could not take place. Mr. Tsukerman, however, along with Mr. Loksin, were arrested and charged with article 203-3 of the Moldavian Criminal Code, better known as article 190-3 of the Russian Soviet Republic Criminal Code. The charge was "joining an organization of or activities participating in group actions which vio-

late public order.'

If we recall that several people throughout the Soviet Union have recently been charged and sentenced under article 190-3, we must realize that Mr. Tsukerman's situation is very serious. Having been in solitary confinement since his arrest, if he is tried and sentenced, he faces up to 3 years of internal exile, or prison camp, or both. The fact that he is not a world renowned dissident, but an average mechanical engineer, is all the more reason for us to protest this treatment of Vladimer Tsukerman. We must let it be known that we do not in any way support the forced separation of a family or the unethical detainment by Soviet authorities which he has experienced and may continue to experience for an indefinite period of time.

CINCINNATTIAN CONDEMNS WEAKNESS THROUGH GUILT, CALLS FOR PEACE THROUGH AMERICAN STRENGTH

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

ASHBROOK. Mr. Speaker, after World War II, Japanese leaders told Americans repeatedly that they had decided to attack Pearl Harbor because they felt America was militarily weak and morally unwilling to fight. We paid dearly for the antidefense image we had projected in 1941 by the time the war ended in 1945.

Predictably, leftists have worked hard to twist the lesson we should have learned from our war with the Japanese Empire. Each August, they stage demonstrations, and weep crocodile tears over the dropping of atomic bombs on Hiroshima and Nagasaki in August of 1945. At these gatherings, they demand that America disarm, and leave its enemies in sole possession of nuclear weapons.

As anyone familiar with history knows, the alternative to using those bombs was the invasion of Japan. Millions of people, American and Japanese, are alive today because we used our nuclear power at that time. Had we been militarily stronger in 1941, all the deaths in that conflict, including those in Hiroshima and Nagasaki, might have been avoided. It was the very policy the weakness-throughguilt advocates demand today that led to the tragedy they claim to mourn.

In response to news coverage to such an August demonstration this year, Mr. Lois Kindley exposed its real motives in a letter to the Cincinnatti Enquirer, and explained the historical facts and their implications. Her exposition is clear, sincere, and factual. I insert it below, and recommend strongly that my colleagues read it.

TEARS FOR HIROSHIMA BUT NOT PEARL HARBOR

To THE EDITOR: The picture on the front page of the Aug. 7 Enquirer entitled "Rally on the Square" (against nuclear arms and energy) was sad indeed. These demonstrators have a dubious idea. Perhaps we should be grateful to them for reminding us of the events, even though these events were taken out of the context in which they occurred.

They weep and pray over Hiroshima and Nagasaki, but they seem to have no tears for the Americans who died in the Japanese sneak attack on Pearl Harbor Dec. 7, 1941. Nor do they seem to have any prayers for our brave veterans of the war, some still confined to Veterans Administration hospitals. We can mourn the tragedy of the atomic devastation of Aug. 6, and Aug. 9, 1945, but not to the point that we use it as an excuse for disarming America. Who started the war, anyway?

The Japanese made up their minds quickly after Aug. 6 and 9. On Aug. 14, they accepted Allied terms and hostilities ceased. On V-J Day, Sept. 2, 1945, General MacArthur and the allied forces received the formal surrender of Japan on the U.S. battleship Missouri. We will-have we-remembered these historic days? This was the victory that bought freedom paid for in "blood, toil, tears and sweat." Our country was determined to survive. Because of our military might and ability, we once again had peace in the world-yes, peace with freedom.

What is the best way to keep peace? Shall we choose peace through strength? Since today another nation (Soviet Russia) accumulates nuclear weapons beyond all rational necessity, shall we stand idly by? The Soviets are dedicated to a system of government that strangles freedom. Some of the 'peace" activists are merely misguided, but it cannot be doubted that there are traitors who sympathize with the Soviets and know full well that an unarmed America can easily be conquered.

At Pearl Harbor we weren't prepared to resist aggression. Surely we have learned the lessons of history. To remain free and deter would-be invaders, we need to build the cruise missile, B-1 bomber, nuclear-powered aircraft carrier, neutron bomb and increase our conventional forces. We can be thankful that we now have the Trident submarine, the USS Ohio, to protect our

The men in the Kremlin show by their actions as well as their words that they have plans for world conquest. But we have an answer. We have a will to stay free. We elected a President to carry out this will of

the people and we should support his efforts to make America strong again.

As the poet Edna St. Vincent Millay so beautifully phrased it: "Make bright the arrows, polish the shields, against prise . . ." This is my prayer for peace shields, against sur-

Mrs. Lois Kindley.

DEFICITS MATTER

HON, BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. CONABLE. Mr. Speaker, Vermont Royster of the Wall Street Journal has been writing instructive analyses of the Nation's policies and problems for many years. As he noted in a column of September 9, his conservative views now seem to be regarded as more timely than previously, but he is concerned that they be fully understood. Mr. Royster discussed our spending and defense policies in yesterday's column, and I include it in the RECORD:

[From the Wall Street Journal, Wed., Sept. 9, 1981]

DEFICITS AND DEFENSE (By Vermont Royster)

If reading this you think me out of time with the times, you won't be the first. For years liberals labeled me an anachronism for my views on everything from government economic policy to the threat of the Soviet Union to world peace.

Now, ironically, I find myself out of tune with some of what's called the new conserv-

Specifically, I think that deficits mattergovernment deficits, that is-in their effects on the nation's economy. And after years of bewailing the disrepair of our defense ramparts. I find myself uneasy with the idea that we best repair them with a crash program of just throwing money at the Penta-

The attitude of the new conservatism, if I read the signs right, is that government deficits don't matter. Or in the words of Representative Jack Kemp, one of the more thoughtful and articulate spokesmen for the new attitude, Republicans as conservatives "no longer worship at the shrine of a balanced budget."

Similar views, less colorfully expressed, have been heard from others on the pages of The Wall Street Journal and elsewhere. Their burden, at least until very lately, is that the Reagan administration need not overly concern itself with the President's promise of a balanced budget by 1984. Shades of Walter Heller and John Kenneth Galbraith!

The rationale for the new conservatism is that government deficits don't of themselves create the inflation which so much plagues us. Moreover we shouldn't worship at the balanced budget shrine because the nation faces another problem, the sad estate of our armed forces compared with those of the Soviet Union.

There is truth in both of these arguments. Inflation, as these pages have long insisted, arises from the excessive creation of money and credit from whatever sources. It would be quite possible to have inflation, even a while the rampant one, government's

budget was precisely balanced between revenue and expenditures. That would happen if monetary policy remained expansionist.

By the same token it would be possible for the government to run a budget deficit with little or no inflationary effects if the deficit was not "monetized"; that is if the government borrowed real savings to finance it, rather than having it "paid for" with money and credit pumped out by the Federal Reserve system. If that were the case a "small' deficit would make no difference.

There remain a few difficulties nonetheless. The greater the government's demand for "real" savings the greater the squeeze on the savings supply, raising the cost (interest rate) for all borrowers, from home purchasers to industry. Even without inflation the economy would have mammoth problems.

Perhaps I'm too cynical, but experience suggests also it is highly unlikely that a deficit of any size would in fact be met by borrowing only "real" savings. The pressures on the monetary authorities against standing fast would be enormous even with the support of a President as tough as Mr. Reagan. Already we've heard mumblings from the Secretary of the Treasury about the present restraint by the Federal Reserve Board, not to mention complaints from business and industry about the prevailing high interest rates.

So I persist in my anachronistic view that deficits do matter. Handled one way they cause one kind of problem, inflation. Handled differently they create all manner of

other problems.

The Reagan administration came to office with three main objectives, all worthy and all overdue. To reduce the growing size and cost of government. To lower the people's To rebuild our neglected armed forces.

The first two were carefully thought out and a splendid beginning made on each. The third hasn't been. The approach was simply to increase the defense budget without weighing its overall effects on the cost of government and, equally importantly, without pause to consider carefully how the money should be spent.

To pinch-penny with our defense is foolhardy. To merely hand the Pentagon money and leave it to decide how to spend it is reckless. No branch of government can waste money easier, or in such large amounts, as the military. We need hard thought on what kind of planes, ships, missiles, guns or troops will be best adapted to the next war, not the last one. If that means difficult decisions by the President, that's

what we have one for.

Another thing. One of the reasons we could gird ourselves for World War II with a minimum of strain was that we entered it with no inflationary pressures. The country could absorb huge wartime expenses. The next war, big or little, will bring new inflationary pressures-make no mistake about that-as we should have learned from the half-war of Vietnam. The less strain on our resources at the beginning, the easier we

will bear the burden.
So it's with relief I see some cracks in the attitude that of all the activities of government, defense alone should be immune to discipline. Money may be the sinews of war but its use should never be left to generals

I'm relieved too at what seems a recognition that deficits matter after all. Anyway, there are hints the administration will seek to shrink them and won't shrink from a rigorous look at all spending, not just part of

For the two are related. Military safety depends not only on the ramparts we watch but on the economic strength behind them. Conservatives also need to relearn old lessons now and then.

NORTHEAST FACES MANY PROBLEMS

HON. DONALD J. MITCHELL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

• Mr. MITCHELL of New York, Mr. Speaker, I would like to bring to the attention of my colleagues the following editorial from the Herkimer (New York) Evening Telegram. It is thoughtful commentary on the difficulties of the Northeast region of our Nation that demonstrates the persisting intensity of local concern for the

NORTHEAST FACES MANY PROBLEMS

The Northeast is continuing to lose population, industry, and economic and political importance for a variety of factors which must be confronted. Some of them are difficult to combat, such as the energy question. When production costs are necessarily higher, because of higher energy needs and costs, a continuing drain of industry is one of the consequences.

In addition, the needs of the Northeast, and to some extent of the Middle West, are being increasingly ignored in Washington. This is a trend which set in in the aftermath of World War II, and has been accelerating. Until the energy crisis, it affected the Middle West to a lesser extent, but the slump of the automobile industry has hit that region harder in late years. Steel production, with aging plants and reduction in demand because of lower automobile output, has been another hard hit industry.

All this requires much greater cooperative effort in the so-called Snow Belt if the present trends are to be halted and turned around. Unfortunately, as economic clout has been declining, so has political strength in Washington. The South, Southwest and Far West, which have been prospering, seem less and less concerned with what goes on to the north and east.

Regional planning may be one of the answers. Declining industries simply cannot be bailed out, a temporary and often counterproductive action. New approaches to old industries and the development of entirely new ones, especially in advanced technology, seem to be the best answer. Massachusetts has been particularly successful in this area, partly because of its large number of high quality educational institutions.

The states involved need to operate on a much more closely integrated basis, especially since there is less and less likelihood of help from Washington. This may be good; it may end the long-time practice of devoting energies to the hunt for federal grants, and divert it to an independent search for answers to our problems.

The situation can be reversed, but this demands greater and better coordinated effort to achieve regional goals. Hand-wringing and adherence to the traditional solution must alike be avoided. We need more of the ficiency.

THE TRUTH ABOUT THE BLACK LUNG PROGRAM

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES Thursday, September 10, 1981

• Mr. ERLENBORN. Mr. Speaker, the CONGRESSIONAL RECORD for the past 12 years contains literally hundreds of pages about what the black lung benefits program does and does not do. Now, however, we have an analysis made by someone who spent 2 years working on black lung claims at the Department of Labor and then left to research and write his master's thesis on the subject.

Whether you favor the black lung program, are opposed to it, or just want to be enlightened about it, I urge you and my other colleagues to read the following assessment from Mr. David Nicolai:

CHAMPAIGN, ILL., August 8, 1981. Hon. John N. Erlenborn, U.S. House of Representatives,

Washington, D.C.

DEAR CONGRESSMAN ERLENBORN: I have been a close observer of Congressional proceedings ever since I was a page in the House of Representatives in 1969, but I have never before sat down to write a "fan to a Congressman or Senator. It is ironic that I should now be writing one to you, as we probably do not agree on very many political issues (my views tend to be somewhat to the left of most "liberal" Democrats). However, after working for two years at the Black Lung Benefits Program in Washington and then doing extensive research on the legislative history of the program for my masters' thesis, I must take the time to commend your singular efforts over the past twelve years to bring some measure of reason to the Congressional debate on this little-understood and scandalous program.

I went to work at the Department of Labor in November, 1977, just before the passage of the Black Lung Benefits Reform Act of that year. It did not take very long after the re-evaluation of claims under the liberalized eligibility criteria established by that Act began in August, 1978, for me to realize what a horrendous mistake Congress had made. The name of the game, as you are well aware, was to reward as many claims and to pay out as much benefit money as was humanly possible, regardless of the evidence in the files; this was made crystal clear to all agency personnel by the top administrators, who knew their jobs depended on placating certain powerful members of Congress. Thus, the findings of the G.A.O. report which you commissioned, concluding that almost 90 percent of the awarded claims contained insufficient evidence of black lung disease, only confirmed what had become obvious to me after examining thousands of claim files.

I was delighted that the G.A.O. report received at least some press attention, but it was not until I began reading through the thousands of pages of floor debate and hearings transcripts that I became aware of

old "can do" spirit, we need greater self-suf- the role you've played ever since 1969 in regard to this program. I am so impressed by how well informed, fair, and constructive your contributions to the lengthy black lung debate have been. It is remarkable that Congressman from a wealthy suburban district of Chicago, devoid of coal miners and coal mines, should be the only member of Congress who has consistently offered an honest analysis of where the program was heading. I realize just how difficult it would be to convince a skeptical public that a conservative Republican from Du Page County would argue again and again against further liberalization of the Black Lung Program, not because of an obession with budget deficits or a lack of compassion for the miners, but because this dishonest piece of special interest legislation raises very basic questions of social justice. It is, in fact, a travesty of justice for all other American workers, very few of whom are able to supplement their often meager retirement income with the \$15,000 to \$25,000 checks that so many black lung claimants have been receiving over the past three years. I also believe that the continual expansion of the Black Lung Program, beyond any reasonable bounds, has jeopardized the prospects for establishing legitimate compensation programs for the many thousands of workers who do genuinely suffer from occupational diseases. Senator Javits emphasized this point during the 1977 debates.

> According to a recent issue of the Congressional Quarterly, the Black Lung Program has emerged intact from the past few months of budget-cutting in Washington. I find that shocking, given the hundreds of worthwhile social programs and other federal initiatives which are being severely trimmed or terminated. The American public loves to condemn "welfare chisellers," but what other welfare or benefits program can you name where almost 90 percent of the recipients do not really deserve the benefits? Was the Reagan Administration really that intimidated by the miners' march on Washington to protest the proposed black lung cuts?

> One other aspect of the program I should mention is the way it is abused by many of your colleagues on the Hill as a vehicle for both pumping hundreds of millions of dollars annually into their home states or districts and for garnering thousands of votes in the process. It would be hard to overstate the attention paid to the Congressional Inquiries Office, where I worked, by the Department of Labor officials who oversee the program. Prompt processing of claims and courteous treatment of the claimants were of secondary importance compared with answering the thousands upon thousands of Congressional inquiries about constituents' claims. When I was there, the cardinal sin for an employee was to notify a miner or widow of an awarded claim before informing all interested Congressional offices; otherwise, the Congressman or Senator would not be able to claim personal credit for the award. I don't object to Congressional staff members doing reasonable case work, but the Black Lung Program has obviously become a very big and cynical racket.

> I suppose I have rambled on long enough, but let me reiterate my great admiration for your eloquent and principled criticism of the Black Lung Program.

Sincerely.

DAVID NICOLAL.

HON. MARTIN OLAV SABO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 10, 1981

• Mr. SABO. Mr. Speaker, over the last half century great advances have been made in the cause of civil rights in this Nation. Roy Wilkins, a man who for 50 years served as a leader of the movement, and stood at the helm for much of the last 30 years, died yesterday. Wilkins' death means the departure of a leading champion of the cause of civil rights, but we will long be grateful for his spirit, his vision, and his successes.

Roy Wilkins joined the national offices of the National Association for the Advancement of Colored People, the largest and oldest civil rights organization, in 1931. Until his retirement in 1977, Wilkins served as executive director of the NAACP for 22 years, a long and influential tenure.

Many young people today—both black and white—forget the great struggles that took place, and the great and significant distances traveled, on the road toward equal rights and equal opportunities. Roy Wilkins was at the forefront of many of the most significant accomplishments during the last 50 years. When lynchings were occurring in horrifying numbers in the 1930's, Wilkins fought for, and got, antilynching laws. He was there when the landmark 1954 Supreme Court decision banning school segregation was made. He was a leading organizer of the influential 1963 civil rights march in Washington. Working closely with President Johnson, Wilkins again played a leading role in securing the passage of the Civil Rights Act of 1964, which made voting rights, equality in employment, and equal access to public accommodations part of Federal law.

Roy Wilkins' style evoked admiration and respect from followers and adversaries alike. While people were not always aware of the extent of his contributions and influence, his persistent behind-the-scenes work within the system produced successes. He did not need the limelight in the movement. Instead he worked quietly and eloquently-knowing the facts, the system, and the people involved-and always pushing forward.

Minnesotans are especially proud of our special association with Roy Wilkins. Growing up in St. Paul, where he spent most of his young life, Wilkins lived in an ethnically diverse neighborhood. Here he was exposed to a variety of people and conditions. Following his graduation from the University of Minnesota, where he began his career as a journalist working on the Minnesota Daily, he returned to work in St. Louis. Wilkins' awareness of the contrast between the treatment of blacks in Minnesota and the conditions in St. Louis, ignited his life-long passion for the civil rights movement.

Roy Wilkins truly stands out, not only as one of the paramount leaders in the history of the civil rights movement-alongside Martin Luther King, Jr. and A. Philip Randolph-but also as one of the great Americans of this century. His persistent work helped to enlighten all Americans, of all races, about the plight and conditions of black Americans and the poor and the ills of our society. Roy Wilkins once said that the NAACP was in the business to go out of business. While Wilkins produced great successes in his business, today the NAACP and the civil rights movement still has much to do. Today as we remember and express our gratitude for Roy Wilkins' life and work, let us rekindle our efforts to his goal of equal rights, equal opportunities, justice, and the improvement of the quality of life for black Americans and the poor.

INJUSTICE DEPARTMENT

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 10, 1981

• Mr. HAWKINS. Mr. Speaker, many Americans wrongly seem to feel that there is no longer any need to advocate forcefully for civil rights. The legislative successes of the 1960's and the activist stance of the Carter Justice Department have caused many to ignore the fact that divisive and dangerous prejudice continues to fester in our Nation. The Reagan administration, in a change of focus, is unfortunately adopting a Department-wide policy of abstaining from a vigorous enforcement of civil rights. This restrained approach actually reveals a deep dislike of these laws which protect minorities and the handicapped. As Robert Plotkin, an ex-administrator in the Justice Department's Civil Rights Division points out, "the administration is not only turning back the clock, it is also turning its back on millions of Americans." I submit the complete text of Mr. Plotkin's article from the August 3, New York Times.

INJUSTICE DEPARTMENT (By Robert Plotkin)

Washington.—President Reagan may be undecided about extending the Voting Rights Act of 1965, perhaps the most important civil rights legislation in United States history. But Justice Department policy across the entire spectrum of civil rights issues reveals a deep-seated hostility toward the laws that protect minorities and handicapped persons.

Attorney General William French Smith has already promised that the Justice Department will not pursue busing orders in school-desegregation cases, that it will not seek the imposition of numerical quotas to correct employment discrimination, and that it will not impose "onerous" standards upon state and local prisons to correct conditions that violate inmates' rights.

The Attorney General has not said, however, what the Reagan Administration will do in these and similar cases. This silence is not simply the pause of indecision. Indeed, in a Government otherwise tickled by its own ability to seem bold and imaginative, the lack of a coherent civil rights policy is ominous. It masks an antipathy toward civil rights that stretches far beyond particular disputes about effective remedies for discrimination.

This Administration sees civil rights laws as imposing unnecessary regulatory and economic burdens on society, and would like nothing better than ultimately to replace today's tough laws with toothless "tigers." The debate about the voting legislation is simply the opening round in a bout that is sure to go the distance.

Principled civil rights policy-making at the Justice Department has been replaced by the political gamesmanship of Deputy Attorney General Edward C. Schmults. Allies of the new Administration have learned quickly that a telephone call to Mr. Schmults will achieve favorable results and bypass the lawyers of the Civil Rights Division, whom their new bosses see as subversive "liberals."

For example, Senator Jeremiah Denton, Alabama Republican, recently called Mr. Schmults to complain about language that he found objectionable in a legal document filed by the Civil Rights Division in a voting case against the city of Mobile, Ala. Within 24 hours, an amended pleading had been filed at Mr. Schmults' personal direction, removing the offending words. Although the legal significance of the change was inconsequential, its political message was clear: The Civil Rights Division is under control.

The "Denton maneuver" was also executed by the Governor of Texas, William P. Clements. Complaining about a successful prison-conditions suit brought in district court by the Civil Rights Division, Governor Clements wrote to the Attorney General that the court's decision would cost Texas "billions of dollars" to implement, and pointed out that "it makes good political sense" for the department to reconsider its position. The letter was referred to Deputy Attorney General Schmults, who agreed to review the case and wrote to the Federal District Court for the Southern District of Texas asking it to delay further orders. To its credit, the court refused to delay again the eight-year-old controversy, but Mr. Schmults' promised review will continue while the case is on appeal.

Similarly, in a discrimination suit against North Carolina's college system, the Department of Education, without consulting the Civil Rights Division lawyers responsible, negotiated a settlement that failed to resolve important issues in the case. When those attorneys refused to sign the agreement, Mr. Schmults reassigned the case to another division and ordered the compromise to be filed.

The Administration has publicly denied that the Justice Department has moved away from vigorous enforcement of the civil rights laws. Labeling the new course as a "change of focus," Attorney General Smith has promised minority groups that he intends to seek more "innovative and practical approaches" to achieve racial equality.

Significantly, not a single Reagan appointee at the Justice Department has any background in civil rights. Not a single appointee is a member of a racial minority. No special "task force" exists to study controversial civil rights problems, although the Attorney General has made much ado about other task forces he has created, such as the one on violent crime.

If we are to believe that creative new solutions will replace the supposedly outmoded policies of the past, who will devise them? And when?

It is remarkable that the Reagan Administration continues to refuse to admit that the era of civil rights enforcement is dead. This refusal, obscured as indecision, deprives concerned citizens of their right to publicly debate the matter. It also assumes that public dissatisfaction with busing equals rejection of racial equality. The Administration is not only turning back the clock, it is also turning its back on millions of Americans.

NEED FOR A TRULY FREE WORLD PRESS

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

. Mr. STARK. Mr. Speaker, the free flow of information is vital to international understanding and cooperation. For almost 10 years the United Nations Educational, Scientific, and Cultural Organization (UNESCO) has been working to establish a restrictive code of conduct for journalists. This effort must be defeated. In May of this year leaders of the world's free press met at Talloires, France to denounce UNESCO's proposed code and to adopt the Declaration of Talloires which speaks to the need for a truly free world press. The declaration reads as follows:

IFrom the New York Times, May 18, 19811 TEXT OF DECLARATION BY INDEPENDENT NEWS ORGANIZATIONS ON FREEDOM OF PRESS

We journalists from many parts of the world, reporters, editors, photographers, publishers and broadcasters, linked by our mutual dedication to a free press,

Meeting in Talloires, France, from May 15 to 17, 1981, to consider means of improving the free flow of information worldwide, and to demonstrate our resolve to resist any encroachment on this free flow.

Determined to uphold the objectives of the Universal Declaration of Human Rights, which in Article 19 states, "everyone has the right to freedom of opinion and expression; this right includes freedom to hold opinions without interference and to seek, receive and impart information and ideas through any media regardless of frontiers,"

Mindful of the commitment of the Constitution of the United Nations Educational, Scientific and Cultural Organization to "promote the free flow of ideas by word and

image,"

Conscious also that we share a common faith, as stated in the charter of the United Nations, "in the dignity and worth of the human person, in the equal rights of men and women, and of nations large and small,"

Recalling moreover that the signatories of the final act of the Conference on Security and Cooperation in Europe concluded in 1975 in Helsinki, Finland, pledged themselves to foster "freer flow and wider dissemination of information of all kinds, to encourage cooperation in the field of information and the exchange of information with other countries, and to improve conditions under which journalists from one participating state exercise their profession in another participating state" and expressed their intention in particular to support "the improvement of the circulation of, access to, and exchange of information,"

Declare that:

111

We affirm our commitment to these principles and call upon all international bodies and nations to adhere faithfully to them.

[2]

We believe that the free flow of information and ideas is essential for mutual understanding and world peace. We consider restraints on the movement of news and information to be contrary to the interests of international understanding, in violation of the Universal Declaration of Human Rights, the constitution of Unesco, and the final act of the Conference on Security and Cooperation in Europe; and inconsistent with the charter of the United Nations.

[3]

We support the universal human right to be fully informed, which right requires the free circulation of news and opinion. We vigorously oppose any interference with this fundamental right.

[4]

We insist that free access, by the people and the press, to all sources of information, both official and unofficial, must be assured and reinforced. Denying freedom of the press denies all freedom of the individual.

[5]

We are aware that governments, in developed and developing countries alike, frequently constrain or otherwise discourage the reporting of information they consider detrimental or embarrassing, and that governments usually invoke the national interest to justify these constraints. We believe, however, that the people's interests, and therefore the interests of the nation, are better served by free and open reporting. From robust public debate grows better understanding of the issues facing a nation and its peoples; and out of understanding greater chances for solutions.

[6]

We believe in any society that public interest is best served by a variety of independent news media. It is often suggested that some countries cannot support a multiplicity of print journals, radio and television stations because there is said to be a lack of an economic base. Where a variety of independent media is not available for any reason, existing information channels should reflect different points of view.

[7]

We acknowledge the importance of advertising as a consumer service and in providing financial support for a strong and self-sustaining press. Without financial independence, the press cannot be independent.

[8]

We recognize that new technologies have greatly facilitated the international flow of information and that the news media in

many countries have not sufficiently benefited from this progress. We support all efforts by international organizations and other public and private bodies to correct this imbalance and to make this technology available to promote the worldwide advancement of the press and broadcast media and the journalistic profession.

191

We believe that the debate on news and information in modern society that has taken place in Unesco and other international bodies should now be put to constructive purposes. We reaffirm our views on several specific questions that have arisen in the course of this debate, being convinced that

Censorship and other forms of arbitrary control of information and opinion should be eliminated; the people's right to news and information must not be abridged.

Access by journalists to diverse sources of news and opinion, official or unofficial, should be without restriction. Such access is inseparable from access of the people to information.

There can be no international code of journalistic ethics; the plurality of views makes this impossible. Codes of journalistic ethics, if adopted within a country, should be formulated by the press itself and should be voluntary in their application. They cannot be formulated, imposed or monitored by governments without becoming an instrument of official control of the press and therefore a denial of press freedom.

Members of the press should enjoy the full protection of national and international law. We seek no special protection nor any special status and oppose any proposals that would control journalists in the name of protecting them.

There should be no restriction on any person's freedom to practice journalism. Journalists should be free to form organizations

to protect their professional interests.
Licensing of journalists by national or international bodies should not be sanctioned, nor should special requirements be demanded of journalists in lieu of licensing them. Such measures submit journalists to controls and pressures inconsistent with a free press.

The press' professional responsibility is the pursuit of truth. To legislate or otherwise mandate responsibilities for the press is to destroy its independence. The ultimate guarantor of journalistic responsibility is the free exchange of ideas.

All journalistic freedoms should apply equally to the print and broadcast media. Since the broadcast media are the primary purveyors of news and information in many countries, there is particular need for nations to keep their broadcast channels open to the free transmission of news and opinion

[10]

We pledge cooperation in all genuine efforts to expand the free flow of information worldwide. We believe the time has come within Unesco and other intergovernmental bodies to abandon attempts to regulate news content and formulate rules for the press. Efforts should be directed instead to finding practical solutions to the problems before us, such as improving technological progress, increasing professional interchanges and equipment transfers, reducing communication tariffs, producing cheaper newsprint and eliminating other barriers to the development of news media capabilities.

Our interests as members of the press, whether from the developed or developing countries, are essentially the same; ours is a joint dedication to the freest, most accurate and impartial information that is within our professional capability to produce and distribute. We reject the view of press theoreticians and those national or international officials who claim that while people in some countries are ready for a free press, those in other countries are insufficiently developed to enjoy that freedom.

We are deeply concerned by a growing tendency in many countries and in international bodies to put government interests above those of the individual, particularly in regard to information. We believe that the state exists for the individual and has a duty to uphold individual rights. We believe that the ultimate definition of a free press lies not in the actions of governments or international bodies, but rather in the professionalism, vigor and courage of individual journalists.

Press freedom is a basic human right. We pledge ourselves to concerted action to uphold this right.

Immediately following the conference at Talloires, I introduced House Concurrent Resolution 137 which condemns UNESCO's attempts to control the press and endorses the sentiments of the Declaration of Talloires. Hearings were held on House Concurrent Resolution 137 this past July. Freedom of the press must be protected. I heartily endorse my colleague's amendment.

MORTIMER GOLD-65 YEARS OF GIVING

HON, JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES
Thursday, September 10, 1981

· Mr. ADDABBO. Mr. Speaker, it is indeed a great pleasure for me as I rise today to call to the attention of my distinguished colleagues in the House Representatives Mr. Mortimer Gold, a truly wonderful human being who has spent a good portion of the past 65 years helping to raise money for charities and hospitals throughout my borough of Queens, N.Y. A man I have known for a great many years and a person revered and loved by all who know him, Mortimer Gold is proof positive that age should never be considered a barrier to contributing to society. As he approaches his 83d birthday in a matter of weeks, countless citizens of Queens and the rest of the city whom he has touched will long remain grateful for his work.

Too often we read that people just do not care anymore except about themselves. How many times have we heard someone say they are "too busy" or "too tired" to give an organization trying to raise money a few hours of their "valuable" time. To Mortimer Gold however, the only real "valuable" time is serving on the boards of 15 charities. To Mortimer Gold, the only real "valuable" time is

EXTENSIONS OF REMARKS

spent producing fundraisers, a total which reached 271 a few weeks ago in Flushing, N.Y., for the benefit of one of my great loves, Jamaica Hospital. It was an event in line with his past productions, done with great style and aplomb, a show to help a hospital which over the years has become a vital, thriving institution in the community

Thank you Mort, thank you for always having the time and energy to come to the aid of others less fortunate. I know that you show no signs of slowing down and would like to be one of the many to wish you a happy and healthy birthday and may this year in your life be just as rewarding as the others have been.

Mr. Speaker, at this time I would like to request permission to have an article which appeared in the New York Daily News of August 21, detailing the work of Mortimer Gold, inserted into the RECORD.

HIS GIFT FOR GIVING IS PURE GOLD TO OTHERS

(By Gus Dallas)

Mortimer Gold, who is about to produce his 271st fund-raising show in 65 years—this time for a Jamaica Hospital building fundis known around Queens as "Mr. Charity" or "Mr. Benefit," all because of a distressing incident back in 1914.

On Mortimer's 16th birthday, his mother told him he was going to have a special

birthday party.
"Great," said young Morty.

Indeed, said his mother, Eva. "We're inviting some underprivileged children and you're paying for the party out of your bar mitzvah money."

To this day, Gold recalls blurting out: "Hey, wait. No sir, that's my money," or

words to that effect.

However, his mother wanted him to learn to help the neighborhood's poor children. So, young Morty shelled out \$25 of his own for a party for 16 kids. And even though he could hardly bear at first to eat such precious ice cream, he was impressed by what a good time the youngsters were having.

Gold, who will be 83 on Oct. 27, has been tossing parties on his birthday for underprivileged or institutionalized kids every

year since then.

He produced his first fund-raiser for an in-stitution at the age of 19, which coincidentally was for the Jamaica Hospital.

This year's benefit will be staged on Sunday at 2 p.m. in Colden Auditorium at Queens College, 65-30 Kissena Blvd., Flush-

The program will be a vaudeville show, with comedian Henny Youngman as headliner. Tickets are a tax-deductible \$20 and may be obtained at the box office on a firstcome, first-seated basis.

The hospital, at 89th Ave. and the Van Wyck Expressway in Jamaica, has been offered \$54 million in government loan guarantees to erect a new medical center, provided the hospital can raise \$5 million by the

end of this year.

Gold produces his shows mostly from a cluttered dining room table in his Jamaica Estates apartment. He has difficulty getting around and uses a cane. A hip injury from a nearly fatal auto accident 26 years ago never really healed.

Among the heaps of papers and notebooks on the table are scores of programs and bills

from previous benefit shows.
"What do you think of these fees for top talent?" he asked, displaying a bill from a talent agency that was dated Nov. 23, 1938, for show folk who appeared in one of Gold's shows at about that time.

Henny Youngman's name was on the bill, for a fee of \$125. Actress Betty Hutton was noted for \$65, and pianist Vincent Lopez ap-parently performed for \$125. "Don't be fooled into thinking Henny got a whopping \$125," Gold said. "He pocketed

\$75. The rest went to the agent."

Gold recalls getting a young comic named Jackie Gleason from a Jackson Heights cellar club in 1940 to be master of ceremonies at a five-night benefit for a total of \$50. Gold has produced many benefits for the

Jamaica Hospital since his original effort in

He volunteered for that first production because his father was on the hospital's board of directors, Gold remembered.

His family operated a cemetery in Howard Beach, which was called Bayside Cemetery. A lot of mourners wound up in Bayside, Queens, looking for their funeral, Gold recalled sadly.

He had a lot of time to produce benefits during the winter. "Our biggest business was not burials, which you would think, but constructing and erecting monuments, and maintaining the flowers and landscaping of the cemetery, which are mostly summer

Gold is on the boards of 15 charitable agencies, such as the Jamaica Hospital, United Cerebral Palsy, Multiple Sclerosis, Children's Shelter and institutions that mostly care for children.

Most of his events and vaudeville productions are staged to raise money for such in-

stitutions.

TAX CUTS MEAN MORE THAN POCKET CHANGE

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

GINGRICH. Mr. Speaker, I would like to call my colleagues' attention to an article by Dick Williams which appeared in the Atlanta Journal/Constitution on August 15, 1981. Williams explains the bipartisan tax rate cut we recently approved will, in the long run, increase the savings and investment rates in this country. He notes the effects of our tax legislation have to be looked at in a cumulative, long-term way-just as proponents of the bill argued during debate. The fact is, as Williams illustrates, this Congress has given middle-income earners a real tax break, the financial means to plan ahead, save and "take stock in America."

The article follows:

TAX CUTS MEAN MORE THAN POCKET CHANGE

A man I know, liberal to moderate and traditionally suspicious of Republicans, was pooh-poohing the tax cut the other day.
"Nickels and dimes," he was saying. "How

can \$3.50 a week to the average wage earner fuel the economy, put the inner city to work and light the fires of a thousand blast furnaces?

Most of us under 50 who work for a salary view our earnings in terms of our take-home pay. We don't think of that part of our salary we never see. We curse a 10-buck raise because we figure all we'll take home is \$4.50. We figure tax shelters are for rich guys with six-figure windfalls.

We figure our budgets on our take-home pay and maybe hope for a tax refund after April. That's money, of course, that has been in the government bank at no interest.

When we get a chunk of money together, by payroll deduction or hard savings, the smarter among us buy a home or sock it into a money-market fund or maybe even buy some stocks. But we rarely think cumulatively.

Which seems to me the message of Ronald Reagan's tax cut. It's not just \$3.50 a week.

Given our tax structure and our reliance on H&R Block, most of us know that the three-year, five-percent, 10-percent, 10-percent plan can't possibly mean anything. But there was a simple calculation formula in last Saturday's newspaper that caused several men I know to rethink their cynicism about the recent congressional action.

By Herbert Hoover, we might just have rolled back the onerous burdens of the New

Deal.

I checked the attitudes of several acquaintances and then, begging their indul-gence, used my trusty calculator on their weekly federal withholding figure-state taxes and Social Security aside.

By any standard, the men I know who would allow me to be privy to their weekly withholding figure are of moderate income. None was a high-roller, their deductions were representative of most of white-collar metro Atlanta and none can afford to live in Dunwoody.

With one exception, the men I know were surprised, if not greedy, upon arrival at the

The exception was a fellow with five dependents. When the tax cut is fully effective, his take-home pay will increase by only \$40 a month, but he is also accustomed to generous tax refunds, his major savings plan.

The rest of the men I know found that by July 1983, their take-home pay would increase by more than \$100 a month, exclu-

sive of any raises before then.

That, I submit, is more than bill-paying money-if those of us at the middle of the economic ladder can increase our spendable income by \$150 a month, it would mean another \$1,800 a year. And for a two-income family, the prospects are delicious.

At that rate, taking stock in America-pri-

vate America-is accessbile.

What's needed here is for the investment to teach profligate, borrowing America how to save and invest again. The folks who survived the Depression know how. The next generation has been resigned to "here today, gone tomorrow."

A person claiming one exemption and earning \$300 a week, will be taking home \$55 a month more by June 1983. As a weekly figure, it's not much, but planning for it will give that figure long-range power.

Here's a plan, for example, with a long view. David Fischer of Brandeis University. analyzing the Social Security system, points out that if every newborn American had \$1,300 to start and it were invested at a modest 8 percent over 65 years, the proceeds would net a retiree an annual pension of \$18,000.

That's not a pipe dream, given the other changes in the tax laws allowing more than that annual figure to be put into tax-deferred IRA and Keogh plans.

The men I know can get government off their backs now, but they'll have to start thinking long-term and forget "buy now, pay later." How about "save now and relax later?".

CALL TO CONSCIENCE 1981: NAUM TSELESCIN

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

Mr. FRENZEL, Mr. Speaker, again this year the Congressional Vigil for Soviet Jewry will try to focus world attention on the plight of all Soviet refuseniks. We are interested in every one of them, but the one I shall discuss today is Naum Tselescin.

Mr. Tselescin and his parents, both of whom are elderly and in poor health, wish to go to Israel to be reunited with Naum Tselescin's mother's sister. They have repeatedly requested

permission to emigrate.

Over the past several years I have attempted unsuccessfully to help Mr. Tselescin in his efforts to obtain permission to emigrate from the Soviet Union, I was again saddened to learn that he was recently denied this permission for the fifth time since 1977.

Mr. Naum Tselescin holds a doctorate in powder metallurgy. Until he applied for an exit permit in 1977, he had been the chief of the Department of New Materials in Leningrad. He now has been transferred to a menial

factory job.

I am told that the reason given for refusing permission for emigration is that Mr. Tselescin has knowledge of military secrets. However, Mr. Tselescin completed a 2-year military obligation over 9 years ago, was not an officer, and would probably not have been privy to any classified information.

Once more, I request that Soviet authorities allow Mr. Tselescin, his parents, and all other Soviet refuseniks like them, to exercise their right to free emigration as agreed to under the

Helsinki accords.

WALL STREET AND THE BUDGET

HON. BILL LOWERY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 10, 1981

Mr. LOWERY of California. Mr. Speaker, since Congress reconvened yesterday, we have heard a great deal about the high level of interest rates that we are all experiencing. There is no doubt that these interest rates are certainly damaging to our economy,

and certain segments-housing, the thrift industry, agriculture, and small business—are particularly hard hit. We have heard talk of credit controls, reorganizing the Fed, and wage and price controls. Under these circumstances, I would commend the following editorial from today's Wall Street Journal to the attention of my colleagues. I certainly concur with the premise of, first and foremost, giving the President's economic program an opportunity to take effect.

WALL STREET AND THE BUDGET

President Reagan has returned from the West to discover that it's the White House, not Santa Barbara, that the Apaches are circling. They're all uttering the same blood-curdling cry: "Look what's happening on Wall Street!"

We hope the President and his troops continue to avoid panic because this may prove to be the biggest test yet of their nerves. It calls for a cool-headed look at why Wall Street was so unimpressed with those July

budget and tax victories.

One reason is that Wall Street knows the July budget reconciliation victory was only a battle, not the war. There's still plenty of fighting to be done to make the budget cuts real. For example, even though the reconciliation bill calls for cutting some \$4 billion in Social Security benefits, the House has already passed and the Senate will soon consider a bill that would restore minimum benefits, the one important thing the administration had thought it had won.

Another reason is that the positive side of the Reagan program, lower tax rates, has not yet taken effect. The air still is full of doubts and conjecture and will likely continue to be until after October 1, when the cuts begin to have impact on the economy.

And finally, Wall Street, for all its accuracy in recording and playing back economic signals, is not a one-track tape. Capital markets are international and Wall Street has some interest, to say the least, in places like Gdansk, Moscow, Paris and New Delhi. What it sees is risk, and the possibility that some disaster will someday be met by a new inflationary outpouring of dollars.

All that considered, however, the economic situation is not nearly as bad as the politics of Washington would have us believe. The economy is indeed flat but one could hardly say it has been pole-axed by the extended period of high interest rates it has had to endure. Indeed, auto sales in August were relatively strong. Steel production, retail spending and durable goods orders continue to run well ahead of a year ago. Most economic forecasts are for real eco-

nomic growth for 1981.

Moreover, there is a good side to those high interest rates. Small savers, by means of money market funds and the gradual removal of savings account interest ceilings, are finally being allowed to earn market rates. We already are seeing signs of a revival of personal savings, which had been dried up by the combination of inflation and interest rate ceilings. One thing happening on Wall Street is that the attractiveness of money market funds has transferred a lot of the action out of the securities markets and into the banks, but there is every reason to believe that this will be a temporary phenomenon if the Fed continues to wedge down money growth and inflation.

The renewed attack on the White House is in fact a continuation of the old attack by the President's opponents in Congress. The aim is to put the President into a box. If he admits to concern about the high interest rates and flatness of the economy, it can be said that he has lost confidence in his own program (the one, keep in mind, which hasn't yet gone into effect). If he professes no concern, his leverage for holding the budget ground he has won and winning more is weakened.

The President has only one course. He must keep up the budget battle until it really is won, while at the same time displaying no loss of confidence in his program. There are still large areas of federal spending that are ripe for cutting if the President can overcome congressional opposition. As we have said here before, we would even be willing to suffer a trimming of projected military spending if we could see evidence of a coherent defense strategy. It should be kept in mind that Wall Street has heard September promises of tight budgets too often in the past. It will begin to believe when it sees how the budget looks next March.

It's a healthy sign that so many people are suddenly taking Wall Street seriously. It's too bad they didn't start years ago, when stock and bond prices first started to falter under the impetus of soaring federal spending and rapid money creation. Back in 1965, after all, the Dow was near 1,000, equivalent to 2,540 in 1981 dollars. While no one in Washington was watching it plunged to 950 a month ago. Now because of another 100-point tick in the last month, the conventional wisdom is that Ronald Reagan, who has done more to cut the budget than any President in 20 years, has been too timid.

This is of course an opportunity for Mr. Reagan. By all means he should cut more. The new proposal for impoundment powers is a good one. Something has yet to be done to get a grip on the entitlements programs. All this should be done, but without panic

or apology.

SHELBY WELCOMES NEW INDUSTRY TO DEMOPOLIS

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES Thursday, September 10, 1981

Mr. SHELBY, Mr. Speaker, I would like to take this opportunity to welcome the Bergeron Barge Co., to the city of Demopolis and the Seventh Congressional District of Alabama. In this day of economic developments, the news that a multi-million-dollar industry is coming to town is quite something to announce.

Construction on an 88-acre site near the Demopolis airport should begin early sometime next summer. According to William T. Bergeron, president of Bergeron Industries, Demopolis was chosen because of the "attractive labor force, its strong belief in the work ethic, and development of the Tennessee-Tombigbee Waterway.

The Bergeron facility will construct steel river barges, approximately twice the size of barges currently on the Tennessee-Tombigbee Waterway. These barges will be 260 feet long and 52.5 feet wide, with an expected cargo

capacity around 3,000 tons.

Finished barges are to go down the Tennessee-Tombigbee Waterway to Mobile, then over to the Mississippi River and up the river to transport coal from either Kentucky or Illinois. The coal-loaded barges would then go back down the Mississippi and eventually to Florida.

Employment opportunities with this new industry are overwhelming. It has been estimated that around 95 percent of the employees will be local labor. The Alabama industrial development training program is also planning to help prepare workers for their jobs.

Congratulations are certainly in order to all those who were involved in this project. Many people from local concerned citizens to the Marengo County Commission to the Governor's office played a vital role in bringing Bergeron to the community. Demopolis Mayor Hugh Allen and Demopolis Industrial Development Board Chairman Kim Mayton put many untiring hours into this project.

I also feel both city and county officials are very fortunate to have a State representative such as Rick Manley, who really cares about industrial growth and will devote the time and effort in an industry's locating

process

This outstanding example of industry expansion is what this country needs to turn our troubled economy around. It is indeed a pleasure for me to share this news with my colleagues in the House.

I know Bergeron Industries will have much continued success by their decision, and I am looking forward to having this industry in the business community of the Seventh Congressional District.

THE STATE DEPARTMENT AND GENERAL MIHAILOVICH: STUDY IN TIMIDITY

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, September 10, 1981

Mr. MICHEL. Mr. Speaker, I recently received a letter from three former American airmen who, during World War II, were rescued after being shot down by the Germans in Yugoslavia. These airmen and many others owe their lives to the heroism and the dedication of the late Yugoslavian leader, Gen. Draza Mihailovich. The National Committee of American Airmen Rescued by General Mihailovich, Inc., has been formed to erect a memorial on public land in Washington, D.C., to Mihailovich. This memorial would be erected at no expense to the taxpayers, expressing the grati-

You would think that nothing would be simpler or more appropriate. Here we have American veterans who were the direct beneficiaries of Mihailovich's aid asking nothing more than that they be allowed to erect a simple monument, at private expense, to a posthumously awarded the Legion of Merit in the degree of Supreme Commander by President Harry S. Truman in 1947.

Let me quote from the letter that was sent to me by the committee:

Legislation supporting our petition has been approved by the eight-agency National Capital Parks Advisory Committee on Monuments, by the Senate Rules Committee, and has twice been passed without dissenting vote by the United States Senate. Our efforts have also had the endorsement of the National Convention of the American Legion, of AFL-CIO President George Meany, and other national organizations.

despite the fact that we now have almost 70 sponsors in the House, our efforts have been held up there for reasons that are no secret. We have been told frankly by the State Department and by others that, although they sympathized with our motivation, it was an unfortunate fact that Marshall Tito was extremely sensitive on the issue of General Mihailovich and that the Department could not afford to offend his sensitivities. We were never able to understand this attitude because it did not seem right to us that the likes or dislikes of any foreign dictator should affect the outcome of a purely domestic legislative issue involving 500 American airmen and the U.S. Congress

Now that sounds like an open-andshut case, doesn't it? Ordinarily we might say so, but the fact is that the Department of State is opposed to erecting this monument on public ground. Let me offer you the reasoning of the Department of State, as it was expressed to me in a letter from Richard Fairbanks, Assistant Secretary of State for Congressional Relations on August 18, 1981:
